WHY not slogans like these: "Milady uses Milk," "Kream Kist Butter," "Reach for an Ice Cream cone," "Drink Buttermilk—not a belch in a boat load."

Sure Thing—A chip on the shoulder often advertises the existence of more wood higher up.

PRODUCE MARKETING

By Frank Gougler

LAST YEAR Albion, in Edwards county, furnished the poorest cream market in all the surrounding territory.

This condition prompted the organization of a produce marketing association which started operating April 16, 1929. From that date to the end of July (3½ mos.) the association handled 29,582.7 lbs. of butterfat at a total handling cost of 2c per lb. The margin above operating cost was sufficient for the association to make a refund at this time of over $700. One member received a $35 refund check. Everyone is enthusiastic over the new method of marketing butterfat. The members are well pleased with their "boy" manager, Albert Michels, who is but eighteen years of age.

Farm Adviser Myers says that the Aro Creamery of St. Louis where the cream is shipped reports that it is well pleased with the quality of cream coming from Albion. The board of directors has found the management of Aro Creamery satisfactory in every way. The creamery keeps them well supplied with cans, makes payments promptly, and is courteous.

The Edwards County Farm Bureau has two new units in the process of organization, one at Browns and the other at West Salem. The success of the Albion unit has prompted these communities to become active.

At Norris City (White Co.) a produce association was started about the middle of June. This unit is the farthest south in the state of all our cooperatives. Another unit is being organized in the same county at Carmi.

Interest is now developing as far south as Brownfield (Pope County) in cooperative produce marketing. This is very gratifying for throughout Southern Illinois producers are not getting as much for their produce by several cents as northern and central Illinois is receiving.

On July 19 while on my way to Golconda to attend a district conference, I stopped at the Norris City station. That day the local butterfat price was 36c. The Chicago butter market the same day was 41¼c. The creamery purchasing the co-operative association cream pays a premium of 3c above the Chicago market. Thus, the association that day bought its butterfat at 36c and sold it at 44¾c leaving a gross margin of 8¼c. If operating costs do not exceed 2c then the association would have left a net margin of 6¼ cents per pound butterfat handled to return to its members in a patronage refund.

Any town in southern Illinois that is being patronized by enough producers to bring 75,000 to 100,000 lbs. of butterfat to town annually is a promising center for a cooperative produce marketing association.

Farm Adviser "Hank" Brunnemeyer of Jo Daviess County snapped this one at the Farm Bureau picnic near Galena on Aug. 15. Williams addressed similar gatherings in several other counties.

Life Insurance

By Lawrence A. Williams

THE man who carries ample life insurance has a chance to relax from the daily strain and worry of life. He is relieved of the anxiety of calamity or of income ceasing at his death. The reward of satisfaction and freedom from worry is indeed worth the effort of prompt annual deposits.

Remember way back when they used to say, "It never will be a success." "Farmers can't run a life insurance company." They don't say that anymore. They say, "No wonder you can do so well, you have the whole Farm Bureau behind you."

Do you think there will be a Farm Bureau family in all of Illinois which cannot boast at least one policy in Country Life by the end of December this year?

Our speech, "The Passing of the Hick," will be sent on request to any one who writes to Life at 608 So. Dearborn St., Chicago.

A definite increase in the size of policies now being taken in Country Life shows the growing confidence of our folks in that remarkable institution. Some folks want to be sure. But the Company was as sound the first month as it possibly could be the 70th year, so far as the death claim of the policyholder is concerned.

Country Life has been receiving comment liberally in the various publications of the country, but what is more important, it is being patronized by the farmer members in every county in the state, with one exception.

How much insurance should a man carry? Enough to pay his debts, and permit his family to live on the income from the principal invested. At 4.8% the interest on $10,000 amounts to $40.00 per month.

Chicago Producers

(Continued from page 9)

Last year the Chicago Producers' handled 50 per cent more business than any other selling agency on the Chicago market. With better support from Farm Bureau members who made possible the organization of the Producers' movement, this business can be increased materially.

The National Live Stock Producers' Association, the largest and most representative farm organization in the livestock field, is in a position to co-operate with the Federal Farm Board toward stabilizing this branch of the farming industry. The benefits already derived from the Producers' movement can be greatly enhanced if more farmers will ship their livestock to their own co-operative commission agency.

"Well, old dear, I suppose we'll meet again?"
"Well, accidents will happen."

* * *

"Ouch! I bumped my crazy bone!"
"Oh, well, comb your hair right and the bump won't show."

WHEN THE FROST IS ON THE PUNKIN

WHEN the frost is on the punkin and the fodder's in the shock,
And you hear the kyouck and gobble of the struttin' turkey-cock,
And the clackin' of the guineys, and the cluckin' of the hens,
And the rooster's ballyooyer as he tiptoes on the fence;
O, it's then's the times a feller is a-feelin' at his best,
With the risin' sun to greet him from a night of peaceful rest,
As he leaves the house, bareheaded, and goes out to feed the stock,
When the frost is on the punkin and the fodder's in the shock.

They's something kind o' harty-like about the atmusfere
When the heat of summer's over and the coolin' fall is here—
Of course we miss the flowers, and the blossums on the trees,
And the mumble of the hummin'-birds and buzzin' of the bees;
But the air's so appetizin'; and the landscape through the haze
Of a crisp and sunny morning of the airly autumn days
Is a pictur' that no painter has the colorin' to mock—
When the frost is on the punkin and the fodder's in the shock.

The husky, rusty russel of the tossels of the corn,
And the raspin' of the tangled leaves, as golden as the morn;
The stubble in the furries—kind o' lonesome-like, but still
A-preachin' sermuns to us of the barns they growed to fill;
The strawstack in the medder, and the reaper in the shed;
The hosses in theyr stalls below—the clover overhead;—
O, it sets my hart a-clickin' like the tickin' of a clock,
When the frost is on the punkin and the fodder's in the shock!

Then your apples all is gathered, and the ones a feller keeps
Is poured around the celler-floor in red and yeller heaps.
And your cider-makin' 's over, and your wimmen-folks is through
With their mince and apple butter, and theyr souse and sausage too! . . .
I don't know how to tell it—but ef sich a thing could be
As the Angels wantin' boardin', and they'd call around on me—
I'd want to 'commodate 'em—all the whole-indurin' flock—
When the frost is on the punkin and the fodder's in the shock!

—James Whitcomb Riley.

Golden Egg Goose Should Squawk More

Real Estate in Danger of Being Taxed Out of Existence Says Chicago Man

REAL estate in Illinois is in danger of being taxed out of existence as a result of ever increasing governmental expenditures. The only relief is through a division of the tax burden with owners of other forms of wealth. By creating a greater number of persons taxed there will be a tendency to improved government, because this great body of taxpayers will have an immediate interest in the public's servants.

These are the high spots in a recent address by Francis E. Manierre, prominent Chicago real estate man, before the Chicago Fireproof Building Association, as reported in the Chicago Tribune. Mr. Manierre's talk was in line with the policy of the Illinois Agricultural Association in its fight for a square deal in taxation for agriculture. His talk in part follows:

"What is the cause of high real estate taxes? First, the state of Illinois is operating under what is practically the equivalent of a single tax levy; 80 per cent of the total tax collected being produced by the ad valorem tax on real estate and the balance of 20 per cent by personal property tax which is a farce, impractical of application and confiscatory if collected to the letter of the law.

Tax More Than Doubles

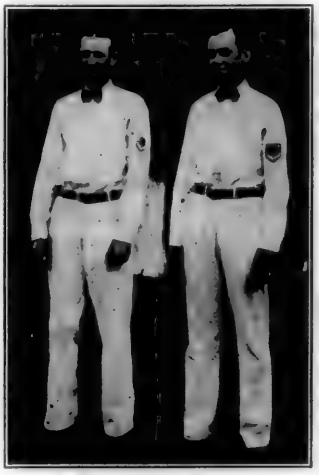
"This real estate tax in Chicago has more than doubled in the last seven years and has gone up at a rate of progression much faster than the proportionate rate of increase in rental returns. In other words, should the present rate of increase in taxation be carried to the nth degree, the tax item alone would take all of the revenue of any building.

"This ever increasing burden is due to the ever increasing demands of the spending bodies for widening functions of government. Concrete roads, bathing beaches, parks, convention halls, libraries, museums, zoos and other public improvements, whether justified or not, have to be paid for and maintained and are being paid for mostly by the tax on real estate. Paternalistic legislation, such as the granting of pensions and bonuses, also has to be paid for. The demands on the tax dollar have increased tenfold for governmental expenses which a previous generation would have denied.

Cause of Situation

"Again, we have been so prosperous in the last five or ten years that the average citizen has been too busy to take any interest in his government and as a consequence municipal governments (and this I believe holds true all over the country) have fallen into the control of low grade political factions which have debauched themselves in one of the worst eras of money spending and thievery the country has even known. Graft is registering now on the public mind and the tax dollar is beginning to pinch the payer. I doubt very much if today we are receiving more than 50 cents on that dollar in the way of real service from our public bodies.

"How about the cure? It is perfectly evident that we will have to clean up our city government, put it on a businesslike basis by consolidating the assessing and spending bodies, establish store-keeping principles, eliminate duplicity of jobs and demand a day's work from the city employe.



Income Tax as Remedy

"The city of Baltimore, through its citizens' committee, did this very thing and since the installation of its business principles the taxpayers have enjoyed a progressive decrease in the rate of taxation. In back of the whole picture we must have the support and interest of the people, and in so far as only 10 per cent of the people in the city of Chicago pay direct taxes, we must have more direct taxpayers in order to get this interest. We need more squawks from the goose that lays the golden egg. Indirect taxation does not register at election time.

"This leads us to the question of an income tax. This, of course, is a highly controversial subject and has its proponents mostly in the real estate owners who feel that they are paying more than their fair share of the cost of the government. *An income tax bill which provided for a full deduction for any ad valorem tax from the income tax failed of passage in the last session of the legislature. It was estimated that this tax would have brought about half a million additional taxpayers into the field. We need these additional taxpayers to make for good government, to say nothing of equalizing the tax burden, for as matters stand at present real estate stands in jeopardy of being taxed out of existence.*

Must Reach Other Sources

"The reassessment as ordered by the state tax commission has been fairly and efficiently concluded, equalizing the real estate tax in Cook County, but the tax question does not end there. Other sources of revenue must be reached, for it is perfectly apparent that one form of wealth, owned by 8 to 10 per cent of the population, cannot and should not continue indefinitely to pay the bills for the other 90 per cent, who pay practically no tax under our present state constitution."

KEPT TRYING AND WON

Left to right are Joe Boyle and Joe Bumgarner, the 1929 championship 4-H demonstration team. The two Joes are members of the Clear Creek Booster Club of McNabb sponsored by the Marshall Putnam County Farm Bureau.

"In 1928 these boys prepared a demonstration that won third at the Aurora Fair," writes R. J. Laible, farm adviser, "but they were defeated for the state championship at Springfield where they won first in their district.

"Determined to make their demonstration the best that could be produced, they revamped it and in 1929 drew first at Aurora and were awarded the state championship at Springfield.

"J. C. Spitler, judge at Springfield, stated that their demonstration on the control of corn diseases through selection was one of the most completely worked out he had ever seen."

Joe Boyle broadcast over KYW, Chicago, recently on a national chain 4-H club program.

Marshall-Putnam Oil Co. To Cut Melon

MORE than $12,000 will be distributed among members of the Marshall-Putnam Oil Company when that organization cuts a melon in the near future. The board of directors already has authorized an eight per cent patronage dividend. The dividend is paid out of accumulations left after paying eight per cent on preferred stock in the company.

"This sum is considerably in excess of the entire cost of maintaining the Marshall-Putnam Farm Bureau for the entire year," says R. J. Laible, farm adviser. "Undoubtedly a large part of the success of this co-operative is traceable to the fact that a state-wide purchasing agency has been provided which takes care of the purchasing of petroleum products for the 21 farmer-owned supply companies now operating in Illinois."

The State Company will distribute in excess of $20,000 to its 21 member units in the near future.

Ladies Beat Men

In the ladies auto driving contest held at the district picnic, Sandwich, Miss Delores Wheeler, Belvidere, Boone county, was first, and Mrs. Alma Seville, of Leland, LaSalle county, was second. The ladies had a higher score than the men, Miss Wheeler scoring 288 out of a possible 300, and Mrs. Seville a score of 275.

Out of a possible score of 300 points the high score of 268 was made by Alvin Anderson of Newark, Kendall county in the men's driving contest. The results are as follows:

1st. Alvin Anderson, Newark, Kendall county 268
2nd. R. A. Baker, Ottawa, LaSalle county 267
3rd. Fay Anderson, Newark, Kendall county 266
4th. Harold Luhman, Belvidere, Boone county 260
5th. Clarence Hughes, Newark, Kendall county 247
6th. Dan Piatt, Morris, Grundy county.... 240
7th. Victor Piffer, Newark, Kendall county 227
8th. Mr. Barshdorf, Morris, Grundy county 221

"The contestants entered with the idea of getting the most out of it from a practical standpoint," writes M. E. Robert who was in charge. "One contestant remarked at the close of the event, that if he did not get a cent in prize money, the questions alone were well worth the effort."

Rapidity of gain in a pig is an important factor contributing to the firmness of the pork, experiments have shown.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925.

Number 10 OCTOBER, 1929 Volume 7

September Picnics Wind Up '29 Season

District Gatherings Held at Sandwich, Kankakee, and Morrison

THE last three district Farm Bureau picnics held at Sandwich, Kankakee, and Morrison demonstrated that mid-September is not the ideal time for holding outdoor gatherings of this kind. In each case the weather was cool and the crowds comparatively small. The Kankakee picnic was all but rained out although a crowd estimated at nearly 1,000 assembled after the rain to hear the president of the Illinois Agricultural Association, Earl C. Smith, Don Geyer of the Pure Milk Ass'n, Mrs. Homer Johnson, president of the Home Bureau Federation, and others. Ex-governor Len Small, president of the Kankakee County Farm Bureau, or rather the soil and crop improvement association as it is known locally, was generalissimo of the day. After a short appropriate speech in which he welcomed the visitors to the new park and Kankakee county he introduced the speakers.

Farmers' Park

The picnic was held in a beautiful grove on the wooded banks of the picturesque Kankakee River only a mile and a half from the heart of the city. The 20-acre plot has been taken over by the versatile farm adviser John Collier and the Kankakee county soil and crop association as a farmers' park. It was leased from the governor. The plot is being smoothed off and already a creditable baseball diamond, a new band-stand and speaking platform, and other necessary conveniences have been established. Several concerts have been played by the soil and crop band in the natural amphitheatre beside the rippling waters of the Kankakee.

All the usual appendages of a district picnic were on the program. The quality and clarity of the hog, chicken, and husband callers' favorite intonations were not damaged by the weather or the lack of a great surging audience. The lusty call of A. J. Pallissard who summons the pigs regularly from the back acres on his farm near St. Anne put him down as the master hog caller of the day which adds to his previously won laurels of master farmer.

The Kankakee County Farm Bureau nine had little difficulty in beating the Lasalle county boys by the one-sided score of 14 to 0. Henry Hulse of Cissna Park was the champion horseshoe thrower.

A Little Soft Food

J. F. Porter, president of the Tennessee Farm Bureau Federation, made a good speech at the 12th district picnic held on the Sandwich Fair Grounds in DeKalb county. The day was nearly ideal for an outdoor program. The crowd which numbered several thousand filled the grandstand comfortably. The national champion high school band from Belvidere entertained throughout the day.

Mr. Porter was conservative in his remarks with reference to the new legislation culminating in the federal farm board. Being a democrat from Tennessee might explain part of his skepticism but many a spectator winked knowingly when he summed it all up by saying, "we asked for a seat at the table but we got a high chair and a little soft food."

Attentive Audience

The most attentive audience that ever attended a farmers' picnic heard Earl Smith make perhaps the best speech of his career out on the Morrison fair grounds in Whiteside county on Sept. 14. Most picnic audiences are anything but attentive. All this was accomplished in spite of the fact that a hotly contested baseball game was in progress between Whiteside and Stephenson counties during the speaking program. A couple of thousand people came out. The day was bright, sunshiny, and cool. Lee county's Farm Bureau nine defeated Carroll county in the morning baseball game while Stephenson nosed out Whiteside 7 to 5 in the 10-inning afternoon contest.

The district picnics this year were not as well attended as those held in the previous season. The nearest approach to the state I. A. A. picnics held in previous years was the gathering at Monmouth in Warren county. All the counties in the 14th district supported that picnic by calling off their county picnics and urging their members to make the drive to Monmouth.

In a number of other districts, 90 to 95 per cent of the picnic crowds apparently came from the county playing host while the adjoining counties sent their farm advisers and a few Farm Bureau directors to lend atmosphere and dignity to the occasion.

The district picnics have not succeeded in displacing the county gatherings, at least in the majority of cases, and unless all the Farm Bureaus work together wholeheartedly as was done in the 14th at Monmouth, the so-called district picnic will be little if any more than a county picnic with a sprinkling of outside "guests."

I. A. A. MEETING

The 15th annual meeting of the Illinois Agricultural Association will be held on January 29-30-31, 1930.

Mark these dates on your calendar. An unusually attractive program is being arranged. It will probably be held at Springfield.

Watch for further announcements.

Income Only Measure of Ability to Pay

Farmers Not Pleased With Delay in Getting Fair Tax System

"FARMERS and urban business men realize today as never before that an individual's prosperity and tax-paying ability is measured by his profits, not by his inventory or physical holdings," Stanley M. Powell, Michigan farmer, told the conference of the National Tax Association at Saranac Lake, New York, recently.

"It cannot be denied that a carefully prepared income tax is the most equitable tax yet devised. It accurately measures the individual's ability to pay. It is extremely flexible from year to year, reflecting precisely the financial fortunes of each taxpayer. An income tax never confiscates any man's property. In lean years it does not howl like a devouring wolf at the door as does the property tax.

Progress Too Slow

"The record of the National Tax Association in supporting the principle of income taxation is long and well known. Yet I want to give warning that the farm sentiment in favor of income taxation is by no means satisfied with the progress that has been made up to the present.

"Our farmers will not be content with an income tax which represents but an insignificant proportion of the total state and local revenues. Instead, they look forward to the day when income taxes will supplant the property tax as the chief source of revenue. They are aware that it required the intervention of the Federal government to bring the inheritance tax to its present highly productive state and they are going to demand that means be devised for increasing the revenue possibilities of state income taxes without creating a situation wherein a few backward states can offer an asylum to wealth which seeks to evade the levy.

Many Pay Nothing

"It often appears that farmers and other sober-minded, law-abiding citizens pay taxes way beyond the benefits received or their financial ability as measured in net income. Meanwhile, thousands of reckless, law-breaking individuals pay no taxes, although they directly and indirectly cause the various units of government a large amount of expense. This is a situation which is admittedly difficult to remedy, but which should be ever kept in mind in outlining our fiscal policies. Perhaps some form of a poll tax might to a slight degree meet this perplexing problem.

"The experience of a number of states has

What Agriculture Wants

A SUMMARY of the things for which organized agriculture is earnestly striving was clearly outlined in a short vigorous radio address by Secretary George E. Metzger recently.

"First, agriculture wants a fair price for the product produced," he said. "By a fair price we mean one that will cover the cost of production plus a reasonable profit.

"Secondly, agriculture wants a marketing system—farmer owned and farmer controlled that will enable the grower through his own representative to sell his product in the terminal markets as manufacturers of other commodities already are doing. Agriculture wants a marketing system that will assist in the orderly distribution of agricultural products throughout the markets of the world, the withholding of surplus products until such time as the demand will take them at a fair price.

"Thirdly, agriculture wants equality with industry and labor. It demands some assistance at the hands of government that will enable the farmer to benefit from the protective system just as industry and labor profit by it today. Agriculture can not continue to market crops of which we produce a surplus at world prices and buy her supplies in highly protected markets.

"Fourth, agriculture wants to cease buying everything at retail and selling at wholesale. No business can long prosper under that system.

"Fifth, agriculture wants a fair and equitable taxing system which will not levy an unjust share of the cost of government against the man who tills the soil.

"Sixth, agriculture wants an adequate standard of living on the farm and an income from the farm that will pay the bill.

"Is agriculture willing to pay the price? Those wants and desires cost something. First, if agriculture is to obtain them it must market its products in a big way. Federal legislation recently obtained, encourages the farmer in this movement. That means that a lot of local pride now held by farmers in their small assembling units must be put down and those units merged into large, effective, well financed distributing agencies.

"Secondly, the rank and file of farmers must become organization minded. They must realize that individually they can not solve their big problems. General farm organizations must be maintained to continue to do research and promotional work.

"Thirdly, farmers and their wives must begin to support candidates in the state and national legislatures who stand four square for an agricultural program, regardless of party affiliation. These three principles, I believe, are the principal factors in the price that farmers must pay before agriculture will get what it desires."

THIS MACHINE AGE

Courtesy Farm Journal.

The day of hand labor is drawing to a close; better wheel coal and let the big boy do the digging.

Dividing The National Income

EVERY time a law is passed, says George Bernard Shaw, the national income is redivided.

The Interstate Commerce Commission is one of our law-making bodies. Its laws have to do mostly with transportation rates. Its decisions either take away some of the income of the utility and give it to the shipper, or else take it away from the shipper and give a greater portion to the carrier.

This important body held a hearing down in Washington recently. It will decide soon whether or not the corn belt livestock farmer must pay more to the railroad for moving his stock to market.

Special counsel for the I. A. A.—the Farm Bureau—appeared before the commissioners and argued against an increase in rates. The railroads' lawyers were there to argue in favor of a substantial increase.

It was an argument over the distribution of the national income. It illustrates why farmers need a strong organization to represent them. Millions of dollars were involved. Every livestock farmer who ships to market has considerably more money at stake in this case than his annual Farm Bureau dues.

Your organization for years has been at Springfield and Washington fighting for you. Next time your neighbor who dropped out says, "It never done me any good," review some of the cases such as this one in which the organization saved him more than he would have paid into it had he been a member.

Tune in on the I. A. A. Forum from Station WLS every Tuesday night at 6:30 p. m., Central Standard Time.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (264 meters) is broadcast between 12:00 and 12:20 p. m., Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

Change Time

The I. A. A. Half-Hour Forum from station WLS will be broadcast hereafter between 6:30 and 7:00 p. m., on Tuesday nights instead of Thursdays as heretofore. The change was made effective on Tuesday, Oct. 8.

The struggle of organized labor for equality, fair wages, and better working conditions and the common interests of agriculture and labor will be the subject of a radio address by John H. Walker, president of the Illinois State Federation of Labor on the I. A. A. Forum from Station WLS, Tuesday, Oct. 29, 6:30 to 7:00 P. M.

Mr. Walker is recognized as an outstanding leader in the labor movement and is well known to farmers who have attended recent annual meetings of the Illinois Agricultural Association. Mark the date on your calendar and hear Walker.

The Illinois Farm Bureau Baseball League had charge of the I. A. A. Forum program on Tuesday night, Oct. 15.

A brief history of the League and other interesting news about this unique organization was given by representatives.

Lyon Karr of Wenona, president of the Illinois Bankers Association, will be the I. A. A. Forum speaker from station WLS, on Tuesday, Nov. 5, 6:30 to 7:00 P. M.

Mr. Karr will tell what bankers have accomplished through organized effort. Don't miss this program.

At St. Louis

Wednesday, October 16, was a red letter day for members of the Sanitary Milk Producers, the new St. Louis co-operative. Before going out to see the National Dairy Show they assembled in the Marquette Hotel to hear W. S. Moscrip, president of the Twin City Milk Producers who was Pres. Hoover's original choice for the dairy member of the federal farm board.

Insurance

The double indemnity feature recently adopted by the Country Life Insurance Company pays twice the face of the policy in the event of accidental death. This additional benefit is sold at a rate of $1.50 per thousand additional premium.

John H. Walker

John H. Walker, president of the Illinois State Federation of Labor, will be the I. A. A. Forum speaker from station WLS, Tuesday, October 29, 6:30 to 7:00 p. m.

Mr. Walker will discuss some of the common interests of labor and agriculture, and will present some of the things labor has accomplished through organization.

September High Month

SEPTEMBER was the greatest month in the history of the Illinois Agricultural Mutual Insurance Company; 1023 applications were received at the office. Champaign County led the state by sending in 82 applications; Logan County was second with 51 applications. Roy Mitchell, of Champaign County, wrote 76 applications in September. Total applications to date 17,775.

Farmers are appreciating the value of automobile insurance. A party in Freeport who is making $25 per week has to pay $40 per month for 20 years on account of an auto accident. "Your own company with insurance at cost" appeals to every thinking farmer.

Great Convenience

Illinois Agricultural Mutual Ins. Co.,
Chicago, Illinois.

"I wish to thank you for the very courteous and fair treatment you accorded me in having my car repaired after it was wrecked this summer.

"It was indeed a great convenience to have you advance me money by telegraph while I was in Pennsylvania, and furthermore it was very gratifying to make an insurance adjustment without a single bit of quibbling about any of the items or charges on the bill.

"You may rest assured that I shall continue to be a booster for the Illinois Agricultural Mutual Insurance Company."

Irvin Funk,
LaSalle County, Ill.

A WELL known minister of a great city church asserted recently that a moral life must be its own reward.

People there are who are good, practice the golden rule, and obey the ten commandments hoping to be blessed with material things for their efforts.

There is meagre evidence to support the belief that prosperity and exemplary living go hand in hand. Ill fortune befalls many a devout person as it did Job. Others attain wealth and position whilst breaking the laws of both God and man.

The good a man does lives after him. But his only pay may be the self-satisfaction that comes from helping posterity. The world uses his invention or contribution, forgets about him who gave it.

Observers are scanning the agricultural horizon, wondering about the future of the general farm organizations. The Farm Bureau in Illinois, in other states, has spread the gospel of better farming, given birth to new organizations—co-operatives—nursed them along through the fledgling stage, seen many fly off never to return, never again to recognize their parents. Life is that way.

We soon tire of the old no matter how useful. It's the spirit of the age in which we are living. A new organization full of promise looks better than the old one, tried and true though it may be.

The next decade promises to witness a great awakening in co-operative marketing. Big co-operatives are being organized. The Farm Bureau (also other farm groups) is furnishing and will continue to furnish much of the leadership, the initiative, the energy to get them under way.

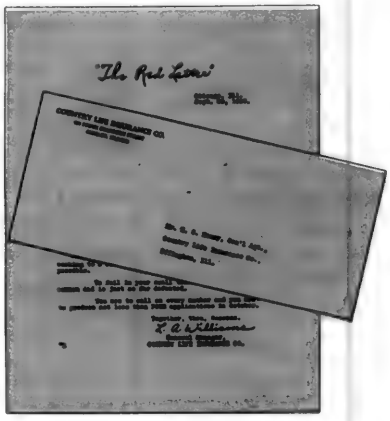
"Will the Farm Bureau by so doing dig its own grave?" asks one editor. The answer rests with the man on the farm, his vision and understanding, with the service rendered by the organization and its staff too. Will the goose that lays the golden eggs be deserted for her dazzling fruit? Thinking farmers will not allow it.

Granted that the parent organization must continue its productiveness, changing with the times, adapting itself to the new order of things. Co-operatives will not solve all the farm problems. They can not provide for all the needs of farmers. Some of them inevitably will fail. New ones must replace these. The parent organization will stand ready to help. It must and will be preserved.

—E. G. T.

A Policy in Every Farm Bureau Home

Pulling Together



Every Agent of Country Life Insurance Company received a Red Letter.

If every agent does as the Red Letter instructs, there will be a Country Life policy in every Farm Bureau member's home by the end of 1929.

Five hundred trained representatives working together can make any kind of endeavor successful.

EVERY representative of Country Life Insurance Company who received the Red Letter illustrated below is obligated to call on all the Farm Bureau members in his territory before the holidays. It is his duty to give all the facts and information about this low cost protection with guaranteed rates.

When a representative receives the Red Letter, there are specific orders within the envelope, the carrying out of which will make possible greater success for your company. We are expecting every representative to turn in no less than four applications during the month of October.

A Country Life Man Will Call At Your Home

When he comes listen to his message and explanation. Help him. Your assistance in putting over this great undertaking to protect the farm families of Illinois will advance the cause of sound business practice among farm people.

Farmers Can Do Big Things Collectively

FOR years the business world has scoffed at the farmer as a business man, called him "unfit," "incompetent to market his own produce," "inferior in business intelligence."

The farmer no longer admits inferiority. He has discovered his ability to help himself.

Country Life Insurance Company aided in this discovery by teaching farmers to pull together in this great business enterprise. In the first month of its existence this Company, owned by organized farmers, stepped ahead of *one-third of all old line companies* in existence for total volume in force.

$17,000,000 In Force

Today Country Life has seventeen millions of life insurance in force. It is nine months old and successful. It represents an outstanding victory—a tribute to farmers' ability to do big things collectively.

Country Life offers old line legal reserve life insurance at rates that cannot be increased. It offers a clear cut policy with cash and loan values, and all standard provisions. Its rates are participating, and are much lower than most other participating companies.

You can insure the baby, father, mother, and even grandmother and grandfather. Write for rates.

If you have a prospect, notify your own COUNTY FARM BUREAU.

If you are ready to take a policy, don't wait for the agent, notify the Farm Bureau, or mail the coupon.

PRODUCE MARKETING

By Frank Gougler

NEW produce marketing units have recently been completed at Taylorville, (Christian County), Carlinville (Macoupin County), Sheffield and Buda (Bureau County) and Stronghurst (Henderson County). This brings the total number of units now marketing up to 47, with more than 15 units in the process of organization.

Two units in Champaign County at Sadorus and Fisher, finished their first year's business recently. Fisher handled over 80,000 pounds of butterfat and made a net profit of more than $1,500. Sadorus handled about one-third less cream which cut profits proportionately.

Just a year ago Adams County Farm Bureau organized three units at Golden, Liberty and Plainville. These associations are showing a net gain of at least 4c per pound for their butterfat over former prices. Half of their net profit will be placed in a reserve and the remainder will be refunded on the patronage basis.

At Golden the handling of poultry and eggs has contributed in a large way to the success of the association. In addition to handling poultry and eggs delivered to the association, a trucking system is provided whereby these products are brought direct from the farm to the association. Sales of these commodities are made similar to that of cream. The association pays cash according to the local prevailing market and sells on a guaranteed price above the purchase price, which is more than enough to take care of overhead expenses. The purchaser furnishes coops and cases and takes care of transportation from the association to the company plant.

Of the 47 produce marketing units now marketing, twelve are handling poultry and eggs in addition to cream. Eventually poultry and egg marketing will become as important a part of this project as cream marketing. Last year, the Schuyler County Association handled 78,000 lbs. butterfat; 41,566 dozens eggs and 36,418 lbs. poultry. Total sales amounted to $57,339.89, while purchases were $51,675.77, leaving a gross profit of $5,664.12. Total expenses were $3,314.35, leaving a net profit of $2,349.77. A similar association at Winchester handled from Aug. 1, 1928, to Aug. 1, 1929, 84,930.5 lbs. butterfat, eggs 62,185 7-12 doz. and poultry 79,127½. On this business after paying all expenses and paying for permanent equipment the net profit amounted to $4,019.66 of which $1,200 placed in permanent reserve and $2,819.66 was refunded as patronage dividends.

The middle of July, 1929, the third produce marketing association was started at Chenoa (McLean County). Profits were sufficient by Saturday, Oct. 12, that the board of directors called a meeting on that date of the patrons to declare a patronage dividend. At Bellflower in the same county last year this unit handled only 42,000. This year up to August 1, the association handled over 55,000 lbs. Most units are handling an increased volume of butterfat this year over last. At Mason City last year, the first year for the association, around 77,000 lbs. of fat were handled compared to over 100,000 lbs. this year. A similar gain will be shown at Bloomington. Farm Adviser McKinzie of Schuyler County reports that the association there will handle 25% more cream this year than last.

Farmers Perplexed Over New Insurance

Vaniman Explains How to Withdraw From Provisions of Act

MANY farmers who are carrying workman's compensation insurance don't know what to do. They have filed a written election (a statement accepting provisions of Compensation Act) with the Industrial Commission to come under the provisions of the Compensation Act. The only way they can get out from under the provisions of the act is to file a notice of withdrawal with the Industrial Commission. Notice of withdrawal must be filed 60 days prior to the end of the calendar year in order to terminate liability under the act by January 1st.

How to Find Out

Most farmers do not know that they filed a written election to come under the provisions of the Compensation Act when they took out the compensation insurance. Write to the Industrial Commission, 300 W. Adams St., Chicago. They will furnish you the information as to whether you have made a written election to come under the act, if you do not know.

Does Not Terminate Liability

Just because your workman's compensation insurance has expired does not terminate your liability, if you have filed a written election to come under the act. Such farmers cannot get out from under the provisions of the act until January 1, and in order to do this must file notice of withdrawal prior to November 1, or 60 days prior to the end of the calendar year.

Employers Liability Insurance

Farm employers are interested in employers liability insurance that will protect them against the common law liability for injury or death to employees engaged in farming operations. Protection provided by the Illinois Agricultural Mutual is up to $5000 for personal injury or death to employee, and $10,000 for any single accident. Pays court costs, lawyers' fees, hospital bills, and doctor bills.

The premium deposit is based on the estimated months of hired labor and is $5 for each six months of hired labor. The surplus share is $10, and the policy fee $5, making the minimum initial payment $25.

In case of cancellation the premium deposit and surplus share is returned, by the insured paying the cost of the insurance. It is estimated that the cost of the insurance will be about $10 for each 12 months of hired labor. For further information see your County Farm Bureau, or write the Illinois Agricultural Mutual Insurance Company, 608 So. Dearborn St., Chicago.—V. Vaniman.

Illinois produced more than 3,000,000 bushels of soybeans last year. This production exceeds one-third of the bushelage grown in the United States.

23 Per Cent Lower Accident Record

A DECREASE of 23 per cent in auto accidents during September compared with the previous month was noted among policyholders in the Illinois Agricultural Mutual Insurance Company. This marked reduction in mishaps is seen by Vernon Vaniman, director of insurance service, as a direct result of the "No Auto Accidents in September" campaign.

V. Vaniman

"Since we have had no reports of accidents to date from the following counties: Cumberland, Douglas, Effingham, Franklin, Greene, Jo Daviess, Kankakee, Massac, Menard, Monroe, Pope, Richland, Scott, and Wayne," states Vaniman, "they are considered members of the 'No Auto Accidents in September Club.'"

Vaniman attended the 18th annual meeting of the National Safety Council held in Chicago the week of October 1. He states that the dominant thought of the meeting was to create in the minds of the public not only an accident prevention consciousness by continually calling to drivers' attention ways and means of preventing accidents, but also to emphasize the tremendous savings made possible by reducing loss of property through accident prevention.

According to the National Safety Council, September, October and November are the high months in the number of auto accident deaths. The following figures indicate the number of deaths due to auto accidents during each day for the following months:

	1925	1926	1927
January	42	49	47
July	50	60	56
September	67	70	76
October	74	84	81
November	60	77	72

The following slogans are used with good effect in accident prevention campaigns:

1. "Most accidents can be explained in a sentence—'He met a fool'."
2. "Success is a habit, so is safety."
3. "Why take unnecessary chances? Accidents profit no one."
4. "Prevention of accidents is prevention of suffering. Why not be careful?"
5. "Always Be Careful," is the A B C of accident prevention.

Record Ads Pay

The Illinois Agricultural Association RECORD has proved to be the best advertising medium used by subsidiaries and associated companies of the I. A. A. as indicated by coupon returns.

Consistent advertising in the RECORD has assisted in more than doubling the number of policyholders in the Illinois Agricultural Mutual Insurance Company during the past year.

September was a record month with 1,023 applications for auto insurance received.

The steady influx of applications in Country Life Insurance Company is seen as a result of more activity by the general agents assisted by consistent advertising to tell the member about his own company.

Measure of Ability to Pay

(Continued from page 3)

shown convincingly that a considerable amount of revenue may be derived through taxes on such non-essentials as tobacco, soft drinks, cosmetics, amusements, etc.

Charge Beneficiaries

"Our various units of government are today rendering without charge or at a nominal fee, a great variety of special services of a protective and development nature. The full expense of these inspections and certifications and other forms of special service might very properly be charged to those directly benefited. This would mean a material saving to the taxpayer.

"The various wards of the state should be employed to the limit of their proper productive ability and the articles so manufactured should be used to supply the needs of the state institutions and activities.

"Farmers are not the sole victims of the present system which places too great dependence upon the general property tax. City home owners are also hard hit. This naturally tends towards an increase in rents, so that urban home owners and renters as well should make common cause with farmers in an effort to secure tax readjustment and relief.

Farmer Can't Dodge

"One of the most grievous features of the heavy taxes borne by agriculture is that the farmer has no power to pass any portion of them on or shift them in any way, as he has so little to say concerning the price which he receives for the product of his labors.

"It should ever be remembered that the power to tax carries with it the power to destroy. It is certainly not good statesmanship to discourage the ownership of farms and homes through confiscatory property taxes. The ownership of real estate is one of the most stabilizing forces in society and should by all proper means be encouraged, not discouraged."

Add 105 New Members

SEVENTY-SIX new members were added to the Iroquois County Farm Bureau on September 26 in a county-wide one-day neighbor-sign-neighbor drive, according to C. E. Johnson, farm adviser. These together with the 29 new members signed up in the summer by volunteers makes a total of 105 new Farm Bureau members.

"Joe Pruitt of Wellington now claims the honor of being the oldest new Farm Bureau member," says Johnson. "Mr. Pruitt is 87 years old. Three of the Pruitt generation are now members of the Farm Bureau, which includes Joe, his son Frank, and his grandson Harold."

The Iroquois County Farm Bureau now has a membership in excess of 1,000 members.

Farm Indebtedness

Farm mortgage indebtedness in the United States on January 1, 1929, was about one per cent or $108,000,000 greater than that on January 1, 1925, according to the Bureau of Agricultural Economics. Estimates on January 1, 1928, show a total indebtedness on farms of $9,468,000 as compared with $9,360,000 on January 1, 1925.

WIN IN DAIRY JUDGING

Left to right are C. M. Hatland, coach; Lloyd Espel, Loren Hoge, and Clyde Conley, all from around Walnut in Bureau county. The team won the state contest in judging dairy cattle staged at the Illinois State Fair, Springfield. Hatland teaches vocational ag. in the Walnut Community High School. The Bureau County Farm Bureau has long held a leading position in sponsoring 4-H Club and high school judging teams.

Scott Going Strong

"Scott county now has the distinction of being the only county in the state with 75 per cent of its farmers belonging to the Farm Bureau," says John C. Moore, district organization manager. "We held our school of instruction during the second week of September and the indications are that the boys over there are determined to hold the record of having the highest percentage of farmers in the Bureau of any county in the state.

"The membership drive is going nicely and they have already written 57 new members or farmers who have not been members during the last three years.

"The memberships expire on December 1 and indications now point to a substantial increase in membership in the Farm Bureau."

I. A. A. Transportation Department,
Chicago, Illinois.

"Have been delaying writing, although I felt confident your work was the thing that prompted or compelled the Northwestern Casualty Company to offer and then send me $300 in settlement for my damage claim against the company. I accepted the $300 offer and the insurance company already has sent me the money. I consider this a fair settlement.

"By way of information, the lamed horse is still lame, but hope she ultimately will recover.

"For your kind and skilled assistance in this matter I am deeply grateful, and hope and believe you do the same for many others."

Harry L. Reed,
Peoria county.

Pageant Depicts Story of Corn

A PAGEANT depicting the history and development of corn, together with an educational exhibit showing all the commercial uses being made of the corn plant will be held in the Stevens memorial community building at Sycamore, DeKalb county, during the latter part of November.

Geo. A. Fox

George A. Fox, treasurer of Country Life Insurance Co., is chairman of the committee sponsoring the event. The story of corn, included in the series "Farming Through the Ages" written by Clifford Gregory in Prairie Farmer, will be the basis for the pageant. The Playground and Recreation Association of America is lending assistance in dramatizing the story.

Community groups in DeKalb and adjoining counties are responding enthusiastically in putting on different parts of the pageant which will have a cast of around 150 to 200 people.

It is expected that thousands of people from northeastern Illinois will see the pageant at Sycamore during the two nights when it will be staged. Local organizations in Sycamore and DeKalb county are busily engaged in preparing for the event. School children will be offered prizes for the best posters advertising the pageant. An elaborate pageant illustrating the history of agriculture may be prepared for the coming Century of Progress Exposition, Chicago in 1933.

Both the total and per capita consumption of ice cream in the United States was greater last year than in any preceding year. Total consumption in 1928 is estimated at 348,048,000 gallons, as compared with 335,628,000 gallons in 1927. The estimate is based on reports from 2,258 ice cream factories.

PRODUCE MARKETING

By Frank Gougler

NEW produce marketing units have recently been completed at Taylorville, (Christian County), Carlinville (Macoupin County), Sheffield and Buda (Bureau County) and Stronghurst (Henderson County). This brings the total number of units now marketing up to 47, with more than 15 units in the process of organization.

Two units in Champaign County at Sadorus and Fisher, finished their first year's business recently. Fisher handled over 80,000 pounds of butterfat and made a net profit of more than $1,500. Sadorus handled about one-third less cream which cut profits proportionately.

Just a year ago Adams County Farm Bureau organized three units at Golden, Liberty and Plainville. These associations are showing a net gain of at least 4c per pound for their butterfat over former prices. Half of their net profit will be placed in a reserve and the remainder will be refunded on the patronage basis.

At Golden the handling of poultry and eggs has contributed in a large way to the success of the association. In addition to handling poultry and eggs delivered to the association, a trucking system is provided whereby these products are brought direct from the farm to the association. Sales of these commodities are made similar to that of cream. The association pays cash according to the local prevailing market and sells on a guaranteed price above the purchase price, which is more than enough to take care of overhead expenses. The purchaser furnishes coops and cases and takes care of transportation from the association to the company plant.

Of the 47 produce marketing units now marketing, twelve are handling poultry and eggs in addition to cream. Eventually poultry and egg marketing will become as important a part of this project as cream marketing. Last year the Schuyler County Association handled 78,000 lbs. butterfat; 41,566 dozens eggs and 36,418 lbs. poultry. Total sales amounted to $87,139.89, while purchases were $81,675.77, leaving a gross profit of $5,664.12. Total expenses were $3,314.35, leaving a net profit of $2,349.77. A similar association at Winchester handled from Aug. 1, 1928, to Aug. 1, 1929, 84,930.5 lbs. butterfat, eggs 62,185 7-12 doz. and poultry 79,127½. On this business after paying all expenses and paying for permanent equipment the net profit amounted to $4,019.66 of which $1,200 placed in permanent reserve and $2,819.66 was refunded as patronage dividends.

The middle of July, 1929, the third produce marketing association was started at Chenoa (McLean County). Profits were sufficient by Saturday, Oct. 12, that the board of directors called a meeting on that date of the patrons to declare a patronage dividend. At Bellflower in the same county last year this unit handled only 42,000. This year up to August 1, the association handled over 55,000 lbs. Most units are handling an increased volume of butterfat this year over last. At Mason City last year, the first year for the association, around 77,000 lbs. of fat were handled compared to over 100,000 lbs. this year. A similar gain will be shown at Bloomington. Farm Adviser McKinzie of Schuyler County reports that the association there will handle 25% more cream this year than last.

Farmers Perplexed Over New Insurance

Vaniman Explains How to Withdraw From Provisions of Act

MANY farmers who are carrying workman's compensation insurance don't know what to do. They have filed a written election (a statement accepting provisions of Compensation Act) with the Industrial Commission to come under the provisions of the Compensation Act. The only way they can get out from under the provisions of the act is to file a notice of withdrawal with the Industrial Commission. Notice of withdrawal must be filed 60 days prior to the end of the calendar year in order to terminate liability under the act by January 1st.

How to Find Out

Most farmers do not know that they filed a written election to come under the provisions of the Compensation Act when they took out the compensation insurance. Write to the Industrial Commission, 300 W. Adams St., Chicago. They will furnish you the information as to whether you have made a written election to come under the act, if you do not know.

Does Not Terminate Liability

Just because your workman's compensation insurance has expired does not terminate your liability, if you have filed a written election to come under the act. Such farmers cannot get out from under the provisions of the act until January 1, and in order to do this must file notice of withdrawal prior to November 1, or 60 days prior to the end of the calendar year.

Employers Liability Insurance

Farm employers are interested in employers liability insurance that will protect them against the common law liability for injury or death to employees engaged in farming operations. Protection provided by the Illinois Agricultural Mutual is up to $5000 for personal injury or death to employee, and $10,000 for any single accident. Pays court costs, lawyers' fees, hospital bills, and doctor bills.

The premium deposit is based on the estimated months of hired labor and is $5 for each six months of hired labor. The surplus share is $10, and the policy fee $5, making the minimum initial payment $25.

In case of cancellation the premium deposit and surplus share is returned, by the insured paying the cost of the insurance. It is estimated that the cost of the insurance will be about $10 for each 12 months of hired labor. For further information see your County Farm Bureau, or write the Illinois Agricultural Mutual Insurance Company, 608 So. Dearborn St., Chicago.—V. Vaniman.

Illinois produced more than 3,000,000 bushels of soybeans last year. This production exceeds one-third of the bushelage grown in the United States.

23 Per Cent Lower Accident Record

A DECREASE of 23 per cent in auto accidents during September compared with the previous month was noted among policyholders in the Illinois Agricultural Mutual Insurance Company. This marked reduction in mishaps is seen by Vernon Vaniman, director of insurance service, as a direct result of the "No Auto Accidents in September" campaign.

V. Vaniman

"Since we have had no reports of accidents to date from the following counties: Cumberland, Douglas, Effingham, Franklin, Greene, Jo Daviess, Kankakee, Massac, Menard, Monroe, Pope, Richland, Scott, and Wayne," states Vaniman, "they are considered members of the 'No Auto Accidents in September Club.'"

Vaniman attended the 18th annual meeting of the National Safety Council held in Chicago the week of October 1. He states that the dominant thought of the meeting was to create in the minds of the public not only an accident prevention consciousness by continually calling to drivers' attention ways and means of preventing accidents, but also to emphasize the tremendous savings made possible by reducing loss of property through accident prevention.

According to the National Safety Council, September, October and November are the high months in the number of auto accident deaths. The following figures indicate the number of deaths due to auto accidents during each day for the following months:

	1925	1926	1927
January	42	49	47
July	50	60	56
September	67	70	76
October	74	84	81
November	60	77	72

The following slogans are used with good effect in accident prevention campaigns:

1. "Most accidents can be explained in a sentence—'He met a fool'."
2. "Success is a habit, so is safety."
3. "Why take unnecessary chances? Accidents profit no one."
4. "Prevention of accidents is prevention of suffering. Why not be careful?"
5. "Always Be Careful," is the A B C of accident prevention.

Record Ads Pay

The Illinois Agricultural Association RECORD has proved to be the best advertising medium used by subsidiaries and associated companies of the I. A. A. as indicated by coupon returns.

Consistent advertising in the RECORD has assisted in more than doubling the number of policyholders in the Illinois Agricultural Mutual Insurance Company during the past year.

September was a record month with 1,023 applications for auto insurance received.

The steady influx of applications in Country Life Insurance Company is seen as a result of more activity by the general agents assisted by consistent advertising to tell the member about his own company.

Measure of Ability to Pay

(Continued from page 3)

shown convincingly that a considerable amount of revenue may be derived through taxes on such non-essentials as tobacco, soft drinks, cosmetics, amusements, etc.

Charge Beneficiaries

"Our various units of government are today rendering without charge or at a nominal fee, a great variety of special services of a protective and development nature. The full expense of these inspections and certifications and other forms of special service might very properly be charged to those directly benefited. This would mean a material saving to the taxpayer.

"The various wards of the state should be employed to the limit of their proper productive ability and the articles so manufactured should be used to supply the needs of the state institutions and activities.

"Farmers are not the sole victims of the present system which places too great dependence upon the general property tax. City home owners are also hard hit. This naturally tends towards an increase in rents, so that urban home owners and renters as well should make common cause with farmers in an effort to secure tax readjustment and relief.

Farmer Can't Dodge

"One of the most grievous features of the heavy taxes borne by agriculture is that the farmer has no power to pass any portion of them on or shift them in any way, as he has so little to say concerning the price which he receives for the product of his labors.

"It should ever be remembered that the power to tax carries with it the power to destroy. It is certainly not good statesmanship to discourage the ownership of farms and homes through confiscatory property taxes. The ownership of real estate is one of the most stabilizing forces in society and should by all proper means be encouraged, not discouraged."

Add 105 New Members

SEVENTY-SIX new members were added to the Iroquois County Farm Bureau on September 26 in a county-wide one-day neighbor-sign-neighbor drive, according to C. E. Johnson, farm adviser. These together with the 29 new members signed up in the summer by volunteers makes a total of 105 new Farm Bureau members.

"Joe Pruitt of Wellington now claims the honor of being the oldest new Farm Bureau member," says Johnson. "Mr. Pruitt is 87 years old. Three of the Pruitt generation are now members of the Farm Bureau, which includes Joe, his son Frank, and his grandson Harold."

The Iroquois County Farm Bureau now has a membership in excess of 1,000 members.

Farm Indebtedness

Farm mortgage indebtedness in the United States on January 1, 1929, was about one per cent or $108,000,000 greater than that on January 1, 1928, according to the Bureau of Agricultural Economics. Estimates on January 1, 1928, show a total indebtedness on farms of $9,468,000 as compared with $9,360,000 on January 1, 1928.

WIN IN DAIRY JUDGING

Left to right are C. M. Hatland, coach; Lloyd Espel, Loren Hoge, and Clyde Conley, all from around Walnut in Bureau county. The team won the state contest in judging dairy cattle staged at the Illinois State Fair, Springfield. Hatland teaches vocational ag. in the Walnut Community High School. The Bureau County Farm Bureau has long held a leading position in sponsoring 4-H Club and high school judging teams.

Scott Going Strong

"Scott county now has the distinction of being the only county in the state with 75 per cent of its farmers belonging to the Farm Bureau," says John C. Moore, district organization manager. "We held our school of instruction during the second week of September and the indications are that the boys over there are determined to hold the record of having the highest percentage of farmers in the Bureau of any county in the state.

"The membership drive is going nicely and they have already written 57 new members or farmers who have not been members during the last three years.

"The memberships expire on December 1 and indications now point to a substantial increase in membership in the Farm Bureau."

I. A. A. Transportation Department,
Chicago, Illinois.

"Have been delaying writing, although I felt confident your work was the thing that prompted or compelled the Northwestern Casualty Company to offer and then send me $300 in settlement for my damage claim against the company. I accepted the $300 offer and the insurance company already has sent me the money. I consider this a fair settlement.

"By way of information, the lamed horse is still lame, but hope she ultimately will recover.

"For your kind and skilled assistance in this matter I am deeply grateful, and hope and believe you do the same for many others."

Harry L. Reed,
Peoria county.

Pageant Depicts Story of Corn

A PAGEANT depicting the history and development of corn, together with an educational exhibit showing all the commercial uses being made of the corn plant will be held in the Stevens memorial community building at Sycamore, DeKalb county, during the last part of November, George A. Fox, treasurer of Country Life Insurance Co., is chairman of the committee staging the event. The story of corn, included in the series "Farming Through the Ages" written by Clifford Gregory in Prairie Farmer, will be the basis for the pageant. The Playground and Recreation Association of America is lending aid in dramatizing the story.

Geo. A. Fox

Community groups in DeKalb and adjoining counties are responding enthusiastically in putting on different parts of the pageant which will have a cast of around 150 to 200 people.

It is expected that thousands of people from northeastern Illinois will attend the pageant at Sycamore during the two nights when it will be staged. Local organizations in Sycamore and DeKalb county are busily engaged in preparing for the event. School children will be offered prizes for the best posters advertising the pageant. An elaborate pageant illustrating the story of agriculture may be prepared for the coming Century of Progress Exposition, Chicago.

Both the total and per capita consumption of ice cream in the United States was greater last year than in any preceding year. Total consumption in 1928 is estimated at 348,048,000 gallons, as compared with 335,628,000 gallons in 1927. The estimate is based on reports from 2,258 ice cream factories.

Do Million Dollar Business In 3rd Yr.

Farm Supply Co. A Successful Cooperative

A MILLION dollar business in less than three years is the record of the Illinois Farm Supply Company as revealed in the report of Manager L. R. Marchant, presented at the organization's annual meeting in Bloomington on Oct. 16.

During the first six months' operation of the company purchases of petroleum products and supplies totaled $145,196.62. A year later the business handled amounted to $672,872.59. The third year, ending August 31, 1929, closed with a business of $1,171,186.18. The petroleum products handled were in excess of twelve million gallons, consisting of 1102 carloads of gasoline, 438 carloads of kerosene, approximately 125 carloads of lubricating oils, and 90 tons of grease.

51 Stations

Distribution of these products has been made from fifty-one bulk stations with a combined storage capacity of 1,989,000 gallons, with forty-four of these stations operating the full twelve months. 135 trucks are operated in the territory surrounding these stations, serving 30,000 or more customers. The stations are all operated by the 21 county supply companies holding membership in the state agency.

Steady expansion of the business of the established companies and increased volume brought about by new companies has been responsible for the remarkable growth in business. Applications for membership were received and accepted during the year from the DeWitt County Service Company, Henry County Supply Company, Jersey County Farm Supply Company, Peoria County Service Company, and Lake County Farm Supply Company.

Capital Set-up

The capital stock of the company includes 324½ shares of Preferred "A" stock having a par value of $100 per share, which is held by the twenty-one county companies. The Series "B" Preferred stock consists of 2500 shares having a par value of $1.00 per share, held by the Illinois Agricultural Association. These shares of stock are subject to 7% cumulative dividends. The common stock outstanding consists of 21 shares of the nominal value of $1 per share, which is held by the member companies and entitles them to participate in the patronage refund.

L. R. Marchant

The gross trading income of $6,008.32 resulting from profits on purchases and sales, and the brokerage income of $39,553.12, make a gross income of $45,641.44 for the fiscal year.

Profit 93 Per Cent

The operating expense for the period was $15,834.58, or 34.69% of the operating income, as compared to 45.47% for the year ending August 31, 1928. The net operating income of $29,806.86 with the additional income from interest and discounts of $2,504.64, and deductions of $1,777.45 for federal income tax, trade mark expense, and discounts allowed, results in a net income in the amount of $30,534.05, or 66.9% of the gross operating, as compared to $16,299.85, or 56.93% for the preceding fiscal year. On the basis of the paid in capital stock the earnings for the year represent a profit of 93.45%.

In accordance with Article 8 of the By-Laws a reserve has been established for the payment of 7% dividends on Preferred stock in the amount of $2,019.75, and also a reserve in the amount of $20,772.74 for the payment of patronage refunds. These amounts, with the $817.31 returned to the member companies in the form of a special refund, represent 51.08% of the gross income, and reserve added to capital stock 14.96%, or the sum of $6,924.25.

Total Assets

Total current assets of the company, according to the auditor's balance sheet, are shown as $58,379.02, of which $18,521.62 represents cash funds on deposit in the Transportation Bank of Chicago, and $27,537.50 in government securities, which are carried in a safety deposit box in the Continental National Bank & Trust Company. A total of $11,721.96 represents unpaid stock subscriptions of the member companies. This amount is offset in part by the reserve for patronage refunds in the amount of $20,772.74 shown in current liabilities. Other assets consist of deferred charges covering laboratory and office supplies in the amount of $237.92.

Current liabilities are shown of $24,991.00 which includes reserves for dividends on "A" and "B" Preferred stock and patronage refunds.

Worth $45,000 Plus

The net worth of the company is represented by a capital stock investment of $34,971.00 and a surplus of $10,376.89, making a total net worth of $45,347.89.

Distribution of the reserve for patronage refunds has been authorized on the percentage basis of brokerage and trading income. Remittance will be made in full for the following amounts, after deductions are made to cover any stock subscription notes and interest charges:

Coles County Supply Company	$ 870.61
DeKalb County Agricultural Assn.	1,069.55
DeWitt County Service Company	345.40
Edgar County Farm Bureau Supply Co.	334.98
Ford County Service Company	986.68
Henry County Supply Company	637.25
Jersey County Farm Supply Company	431.30
Kendall Farmers Oil Company	981.54
Knox County Oil Company	1,761.75
Lake County Farm Supply Company	187.57
LaSalle County Farm Supply Company	1,725.74
Logan Farm Supply Company	1,094.01
McLean County Service Company	2,929.90
Macon County Supply Company	1,301.69
Marshall-Putnam Oil Company	1,430.22
Menard County Farmers Supply Company	329.30
Montgomery County Farmers Supply Co.	388.85
Peoria County Service Company	562.49
Shelby Farm Supply Company	634.24
Warren-Henderson Oil Company	1,599.45
Will County Farm Supply Company	1,170.22
	$20,772.74

These figures indicate that the finances of the organization are on a sound basis and that there is considerable merit to centralized purchasing of petroleum products.

Opinions Differ

"There is some difference of opinion among those in active charge of the member companies concerning the methods of purchasing our necessary requirements, particularly gasoline and kerosene," said Marchant in his annual report. "There are those who favor a regular source of supply in order that they can assure their trade of a uniform product at all times thereby avoiding the criticisms which may come if shipments are made from various sources. On the other hand, there are others who are inclined to favor buying from a number of reputable concerns on the spot market basis. Both methods have some merit.

"Insofar as contracts are concerned, their value depends upon the trend of the market. The pendulum swings both ways; sometimes in favor of the seller and other times in favor of the buyer. The past summer has been a buyer's market on gasoline and kerosene and a seller's market on lubricating oils. Consequently, our lubricating oils contracts have been exceedingly valuable; more so than those covering our gasoline and kerosene requirements. If the market of petroleum products could always be predicted several months in advance there would be little need for negotiating contracts, but this is something that very few, if any, can do.

Contracts Advisable

"In view of our ever increasing volume, it would seem advisable to contract for at least a portion of our requirements in the future, preferably with more than one source of supply. To what extent this will be done will depend somewhat upon the recommendations of the county companies. The Illinois Farm Supply Company is administered by a board of nine directors who are seriously concerned with the movement and who are open-minded to suggestions for improving the service, and there should be no hesitancy on the part of any local company to offer suggestions and constructive criticisms at any time.

"There is no question in the minds of those who are most familiar with common trade practices of large concerns about buying-power increasing with volume, which is the most outstanding reason for close affiliation of these farmer service organizations. We cannot accomplish the most for our people unless this is done. Reports show the local companies to be in a healthy and prosperous condition, which is very commendable from the standpoint of securing favorable price consideration from the companies interested in our business. This cannot be overlooked and encouragement of substantial reserves should be made.

Must Strengthen All

"Our organization will never be any stronger than its weakest link and we must keep our house in order if we are to thrive and grow as we should. The future of the organization will depend largely upon our ability to cooperate. Competition can furnish plenty of opposition to our plans without any internal friction and it is our duty to organized agriculture to keep harmony within our ranks. Furthermore, it is our duty to avoid any serious mistakes, if possible, and frequent gatherings of those most interested should help to guide us in the right direction.

"There may be difference of opinion among us, which may call for open and frank discus-

sion. Yet, in the end, any decision made by a group of thinking farmers will probably not be far wrong. The results obtained thus far are beyond our earliest estimates. The success of the local companies associated with the Illinois Farm Supply Company has stimulated interest in the movement. The territory in the state already covered with service trucks is far more than the number of organizations would indicate. A number of counties are actively engaged in selling stock at the present time and several of these should be ready to organize within the next few months.

May Spread

"It is reasonable to believe that this service will continue to spread throughout the state until the number of customers equal the Farm Bureau membership of the state. With increased facilities for distribution, more territory to cover, and more customers to serve we have every reason to expect that our business eventually will far exceed the present volume. The future holds great promise, and our slogan should be 'A Three Million Dollar Business by 1933!'"

Lyon Karr

Lyon Karr, president of the Illinois Bankers Association who hails from Wenona, will address the I. A. A. Forum audience on Tuesday night, November 5. What banks have done through organized effort will be discussed.

Mr. Karr succeeded to the presidency at the last annual meeting of the State Bankers Association.

T. H. Lloyd, Treasurer, Macoupin County.

Parke Kerbaugh, McLean County.
Harry E. Pickrell, Sangamon County.
Samuel Sorrells, Montgomery County.
W. J. Sandusky, Vermilion County.
L. A. Reed, Morgan County.

Grain Marketing

By Harrison Fahrnkopf

ORGANIZED to sell soybeans collectively as well as to represent the producer in the various problems connected with the growing and marketing of the crop, the Soybean Marketing Association, a corporation organized under the Illinois Cooperative Marketing Act of 1923, was launched on October 9 at a meeting of central Illinois soybean growers in Decatur.

One hundred and thirty-five growers from twenty-five counties attended the meeting where by-laws were adopted, the membership agreement ratified and officers elected. In addition to growers there were present farm advisers, representatives of the University of Illinois and of the Illinois Agricultural Association.

Growing soybeans in Illinois each year is becoming of greater importance. Due largely to teachings of the University of Illinois and the Farm Bureaus, the acreage of this legume has trebled in Illinois during the last three or four years. It is usually looked upon by farmers as the crop which can be very profitably used in supplementing or replacing the oat acreage.

Fully Cooperative

A soybean cooperative at this time is quite significant inasmuch as the Federal Farm Board is urging that farmers endeavor to improve their marketing conditions through cooperative organizations controlled by the grower. While the new organization does not intend to request assistance from the Federal Farm Board at this time, it qualifies as a one hundred per cent cooperative.

The growers want an organization not merely for the purpose of representing them in their marketing problems but also to give them assistance in many related problems.

Aims and Purposes

A perusal of the aims and purposes of the Soybean Marketing Association, as set forth at the meeting, emphasizes the fact that the growers want a real service organization. These aims and purposes are as follows:

1. To represent soybean growers in the commercial problems of the industry.

2. To negotiate with buyers of beans on prices and terms of sale for beans grown by its members except those for seed.

3. To make local arrangements for shipping out beans so that they may be moved as economically as possible from farmers to buyers.

4. To encourage research work in, and commercial development of processes for extending the uses of products from beans.

5. To encourage the research work necessary for the development of standards which fully recognize the commercial differences in value between different lots of beans and to establish buying practices which put these into operation.

6. To educate growers as to the relationship between production practice and quality in order to encourage production of high quality product.

7. To educate soybean growers in the commercial problems of the industry.

8. To keep soybean growers informed on the commercial possibilities and limitations of soybean production so that they may plan their program of production with a full knowledge of the facts.

15 Directors

The officers and directors of the new organization are as follows:

John W. Armstrong, President, Champaign County.

Dwight Hart, Vice-president, Christian County.

W. G. McCormick, Secretary, Douglas County.

Baseball Dope

TAZEWELL county took the lead in the race for the state Farm Bureau championship when it nosed out McLean by a score of 5 to 4 in their game at Morton on October 5. The second game of the series was scheduled for Bloomington on October 12.

Plans are under way as we go to press to give a play by play broadcast of this game from station WLS on Tuesday night, October 15, during the I. A. A. Forum program.

The game at Morton was attended by a large audience of boosters from Tazewell, McLean, and other central Illinois counties. There was plenty of hitting and effective pitching on both sides. Each team fought hard for the opening advantage in the series. When Weinzierl, McLean county pitcher who was substituting on first base, made a wild throw to third he let in the first Tazewell county run. Tazewell scored again in the following inning on a McLean county error. A third inning rally by McLean netted three runs and darkened Tazewell's hopes for the time being. Tazewell recovered on bunched hits later and from then until the end of the game it was nip and tuck with Tazewell holding the advantage.

Tazewell went into the game at Bloomington on October 12 a slight favorite to win. The Tazewell players are an experienced aggregation.

McLean has had a rapid rise since its entry in the League only three years ago. Defeated by Logan county for the divisional championship last year the team came out last spring improved by several new players and went into the lead early in the season.

A banquet will be given to the state championship team where the silver trophy awarded annually by the Illinois Agricultural Association, will be presented.

The Knox County Farm Bureau baseball team bought new suits, and paid all expenses out of receipts from free-will offerings at games during the current season.

Receipts at its various games were as follows:

June 22—Stark county game	$ 5.40
August 19—Henry county game	36.05
August 29—Picnic game	75.00
Sept. 1—Henry county game	40.00
Sept. 11-12—Henry county fair	90.00
Total	$246.45

AUTO ACCIDENT MADE HIM A BANKRUPT

A WAYNE county farmer injured two people with his car in a recent automobile accident. The injured parties sued. Evidence presented in court revealed that the defendant had not used reasonable care in driving his car. Judgment was rendered against him for $4,000 damages. As a result this man was compelled to give up his farm and file a petition in bankruptcy.

CAREFUL men are insured against such mishaps. No owner of an automobile can afford to be without protection against personal liability and property damage

INSURANCE at cost in your own Farm Bureau company at a farm risk rate is available to every member. Rates are kept down to the minuimm. They are so low compared with those of old line companies as to make protection easily within the reach of all. A full coverage policy includes also fire and theft (pays actual value of car in case of loss in either case) and collision insurance. The policy even pays collision damage to tires.

The rapid growth of your company in the past two years indicates that members appreciate this service.

Satisfied policyholders now number in excess of 17,500.

Mail the coupon today and get full information about auto insurance in your own company at cost.

Indifference Is Bar to Better Farm Life

Sec. Metzger Speaks Before American Country Life Conference

"THE greatest problem which confronts a farm organization in the maintenance of membership is indifference. Too many do not appreciate the value of organization. Individualistic habits of living and the failure of many individuals to recognize their relations and duty toward other people contribute largely to this attitude of mind which I characterize as indifference" Secretary George E. Metzger told the recent conference of the American Country Life Association at Ames, Iowa. Metzger spoke on the subject "Jobs that Confront a State Farm Organization."

Geo. E. Metzger

"Some of our farm folks have little or no confidence in their fellow farmers," he said. "Jealousy and prejudice are too common. There still exists some prejudice against salaried men and so one of our big problems is to maintain trained men whom agricultural organizations seriously need.

Members Read, Think

"Generally speaking the Farm Bureau has the more intelligent, progressive farm people who read and think. They are the ones responsible for any progress made in the industry and so one of our great difficulties is to deal with the farm family that is not informed.

"I asked one of my field men who was working in one of the best agricultural counties in Illinois to select and travel down some highway and call on 10 non-Farm Bureau members just as he came to them, and make inquiry concerning a certain publication of a daily paper that had been issued in that county and sent to every farmer. This paper carried an eight-page insert on agricultural matters, featuring, of course, the Farm Bureau movement. It was one of the best pieces of publicity of its kind that I have ever seen.

"The first question the solicitor asked was whether or not the paper was received. All had received it. The feature article in this paper had to do with the new Federal Marketing Act and the Federal Farm Board.

Lack of Information

"The second question the solicitor asked was what they thought of the new marketing act. Eight out of the 10 men did not know that such an act had been passed by congress. After some explanation he asked the third question, 'What do you think of the new Federal Farm Board and the possibilities of some relief to the farmer?' Six out of the 10 of them stated they had no confidence in the Farm Board whatever, that it would eat up all of the five hundred million dollars appropriation in salaries and that no relief would come to the farmer. What can we expect of people having such meager knowledge of current events, affecting their own interests.

"The only way such people can be reached is through word-of-mouth publicity. If membership organizations are to grow in size and prestige, we must begin at once to prepare the non-member for membership. This preparation must largely take place through the men and women who already are affiliated with membership organizations. Our members must accept the responsibility of cultivating the non-member.

Friendliness Helpful

"In marketing activities the farmers' business is largely held through friendliness. Support to a membership organization can be gained in the same way. The member must sympathize with the non-member. He must recognize his problems intimately, and above all, he must be able to show Mr. Non-member that the organization has a helpful program. Any other method of cultivating and preparing the non-member is decidedly costly.

"The next question is, how can we prepare this non-member. Our experience is that membership is difficult to maintain on educational projects alone. Farmers, like most groups of businessmen, want to see a money return. Therefore, it seems to be essential that state farm membership organizations list in their programs certain projects which will lend themselves to a money return large enough, so that it will completely offset the membership fee. Whatever can be added over and above the membership fee adds considerably to the sales material which a solicitor may have to offer.

"The non-member must be fully informed on the importance of legislation to the agricultural industry. He must know to what length industry and labor go in securing favorable legislation. He must be shown how a legislative project will benefit him individually—for after all, sales are usually made when the prospect is convinced that the commodity is going to contribute to his own personal comfort.

Teach Marketing

"In preparing the prosepect for membership, we must teach marketing. It must be taught in its broader sense. The non-member must see the relation of co-operative marketing to personal income. Most farmers at the present time are inclined to look at the local assembling unit as their market. In other words, the local livestock shipping association, the farmers' elevator or the local creamery is looked upon as the ultimate end in their marketing operations.

"Such is not the case. The market for livestock is the individual or the concern that finally processes that stock and prepares it for the consumer. The same is true with most other farm commodities. A commission agency is not the market. It is farther removed from the producer than that.

Not Co-operative Marketing

"The state of Iowa boasts that a large per cent of its livestock last year moved through co-operative channels, yet the fact remains that less than five per cent of this livestock was sold in the terminal markets through any one marketing agency. This represents co-operative assembling but not concentrated selling in large volume by a single agency, which promises to bring to the producer his proper share of bargaining power.

"Thirdly, in preparing the non-member, we must point out to him that our program involves reduction in the cost of production. Such accomplishments as tax reduction, which has been a big item in our state, automobile insurance on a mutual basis, now a project of most state Farm Bureau organizations, transportation activities and practically the entire production program of the county units which come under this general head, should be brought to his attention. There are other matters of common interest and knowledge among organized groups of farmers that can be advantageously taught.

"These items have a money-saving angle to them. Helpful economic legislation, and co-operative marketing increase the farmers' income. Cutting expenses reduces the outgo. Combined, the result is more money for the farmer. But, what is he to do with this increased money at his command. He must spend it wisely. The farmer's standard of living must be placed on a higher level. To do so costs money. The farm is his chief source of income. It must be made profitable. Now let's see for what he should spend it. Should it be for a larger and more costly automobile? I should not oppose that movement, but I have something more deep-seated in mind. I am thinking particularly of the modern conveniences which have become necessities in most of the homes of the cities.

Only 42 Per Cent

"I doubt seriously if you could rent a residence property in this town not equipped with electric lights, running water and a modern heating plant. Yet, a survey made in our state discloses that only 42 per cent of the farm homes in Illinois have so much as a cistern pump and a sink toward a running water system. The percentage having electric lights and heating systems is much lower than this figure.

"I looked further into the school system. I find that in most cities of 5,000 population and up, the school term ranges from 180 to 200 days per year; while in many of our one-room country schools, the session does not represent more than 120 to 140 days per year. I find that, as a general rule, the more highly paid teachers, the better trained teachers and the better equipment are to be found in the city schools. The thing that I wonder about is whether or not these boys and girls coming out of these one-room country schools, with all the handicaps which they undergo in their training, can compete favorably at the age of 25 to 30 years with those youngsters coming out of the better schools in the cities.

May Lead to Peasantry

"I am just wondering if there may not be some tendency on the part of these country boys and girls to consider themselves inferior to the better trained youngsters from the cities, and eventually be satisfied to content themselves with a lower standard of living than is going to be demanded by their city cousin. If so, I am forced to believe agriculture will go into peasantry.

"Thirdly, in this matter of a standard of living, I look to the church institutions. As I see it, one of the biggest problems confronting the churches today is the economic problem. Yet, the church is a part of an adequate standard of living. Very few individuals, whether they go to church or not, will be satisfied to live in a community without the influence of the church. Here is another place that I would recommend that some of this increased income be expended.

More Play Needed

"Fourthly, in this standard of living, I would recommend that more time of the American farmer be used for play. I note in most of our larger cities that people enjoy a Saturday half holiday. In fact, in most of our county seat towns, the weekly half-day holiday is becoming prevalent. I maintain that if it is right for those groups of people and their income is such that they can afford it, that it should be right for the American farmer."

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second-class matter at post-office at Mount Morris, Ill., Oct. 20, 1925, under the Act of Mar. 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925.

Number 11 NOVEMBER, 1929 Volume 7

Prominent Men On A. F. B. F. Program

Convention at Hotel Sherman, Chicago, Dec. 9-10-11

ACTIVITIES of the Federal Farm Loan Board, the Federal Farm Board, governmental road building policies, farm taxation, child welfare and waterways will feature the discussions before the coming annual convention of the American Farm Bureau Federation at the Hotel Sherman, Chicago, Dec. 9-10-11.

Sam H. Thompson and Alexander Legge will be the chief speakers on the opening day. With the great farm relief battle now history, the organization is expecting Mr. Thompson to look to the future and outline his ideas on how further advances can be made in bringing about equality for agriculture.

Legge On Monday

Alexander Legge, the man entrusted by President Hoover with responsibility for administering the agricultural marketing act will be the headline speaker Monday afternoon. Mr. Legge will tell the Farm Bureau how farmers can obtain the maximum benefits from the new legislation.

H. Paul Bestor of St. Louis, appointed by President Hoover to make the farm loan act work for farmers' interests, will speak on the subject "Farm Finances." He is scheduled for the Wednesday morning session.

"Waterway Development" is the subject Secretary of War James W. Good will discuss. It is taken for granted that he will voice the policies of Mr. Hoover since the secretary of war is charged with the responsibility of federal waterway development.

S. H. Thompson

Farm Taxation

Frank O. Lowden of Oregon has been chosen to outline his views on the important subject of farm taxation. He is to speak on Tuesday morning, December 10.

Dr. H. E. Barnard, director of the President's White House Conference on Child Health and Protection is to be the speaker on Monday evening, Dec. 9. A "community meeting" with a forum discussion will follow this address.

A speaker to be announced later will present the subject of highway development. The Illinois Agricultural Association has taken the lead in calling to the attention of governmental officials the need for a better farm to market road system. Now this movement is being carried forward on a national scale by the A. F. B. F. It is estimated that 5,000,000 farmers find it impossible to get from their farms to markets in automobiles several months each year. It is the Farm Bureau's belief that public funds should be used generously in building rural roads because of their vast importance to agricultural welfare.

Alexander Legge

Illinois Delegates

Representing Illinois at the convention as official voting delegates will be President Earl C. Smith, Frank D. Barton, Geo. F. Tullock, and Samuel Sorrells.

Alternates are H. C. Vial, A. R. Wright, C. E. Bamborough, and Charles Black.

The entire executive committee of the Illinois Agricultural Association is expected to attend the convention.

Custom Grinding

A farmer or individual who does custom grinding of feed for his neighbors is not required to secure a license according to the feeds division of the State Department of Agriculture.

If, however, a customer should purchase grain from the mill operator and ask the latter to mix it according to his, the purchaser's direction, and then grind it, the mill operator would be required to obtain a license.

State Produce Co-op Is Set Up at Decatur

Bloomington Chosen As Headquarters, Organized Under Illinois Act of 1923

PAPERS of incorporation for the Illinois Produce Marketing Association, organized under the Illinois co-operative act of 1923, were applied for on Nov. 9 following a meeting three days earlier at Decatur where 100 representatives from 35 counties gave unanimous approval to the plan.

Under the by-laws adopted at Decatur, the Association is authorized to buy, sell, handle, ship, process, or in any way make farm produce more salable so farmers may receive the maximum net return for their products. Non-members' produce may be handled as well as that for members "provided that the products handled for non-members in any fiscal year shall not exceed the total of similar products handled for members during the same period."

Farm Board O. K.

Frank Gougler, director of produce marketing for the I. A. A. explained the state marketing plan, discussing the advantages of big scale co-operation, and the policy of the Federal Farm Board in encouraging co-operation between the smaller co-operatives. Donald Kirkpatrick, legal counsel, explained the capital stock set-up. A. D. Lynch, director of dairy marketing, who assisted in organizing the first co-operative produce associations in the state, told how fluid milk co-operatives and produce co-ops could work together to their mutual advantage.

Frank Gougler

The Association is to be organized under Farm Bureau control as a co-operative with capital stock, although no immediate sale of stock to raise funds is contemplated. Capital stock shall be divided into preferred and common. The preferred stock shall consist of 30,000 shares to be designated as Class A preferred stock of $25 per share par value, and 150,000 shares to be designated as Class B preferred stock of no par value, and 75,000 shares of common stock of no par value.

Stock Setup

Class A preferred stock when and if issued, shall be entitled to draw cumulative dividends

(Continued on page 5)

Indifference Is Bar to Better Farm Life

Sec. Metzger Speaks Before American Country Life Conference

"THE greatest problem which confronts a farm organization in the maintenance of membership is indifference. Too many do not appreciate the value of organization. Individualistic habits of living and the failure of many individuals to recognize their relations and duty toward other people contribute largely to this attitude of mind which I characterize as indifference" Secretary George E. Metzger told the recent conference of the American Country Life Association at Ames, Iowa. Metzger spoke on the subject "Jobs that Confront a State Farm Organization."

Geo. E. Metzger

"Some of our farm folks have little or no confidence in their fellow farmers," he said. "Jealousy and prejudice are too common. There still exists some prejudice against salaried men and so one of our big problems is to maintain trained men whom agricultural organizations seriously need.

Members Read, Think

"Generally speaking the Farm Bureau has the more intelligent, progressive farm people who read and think. They are the ones responsible for any progress made in the industry and so one of our great difficulties is to deal with the farm family that is not informed.

"I asked one of my field men who was working in one of the best agricultural counties in Illinois to select and travel down some highway and call on 10 non-Farm Bureau members just as he came to them, and make inquiry concerning a certain publication of a daily paper that had been issued in that county and sent to every farmer. This paper carried an eight-page insert on agricultural matters, featuring, of course, the Farm Bureau movement. It was one of the best pieces of publicity of its kind that I have ever seen.

"The first question the solicitor asked was whether or not the paper was received. All had received it. The feature article in this paper had to do with the new Federal Marketing Act and the Federal Farm Board.

Lack of Information

"The second question the solicitor asked was what they thought of the new marketing act. Eight out of the 10 men did not know that such an act had been passed by congress. After some explanation he asked the third question, 'What do you think of the new Federal Farm Board and the possibilities of some relief to the farmer?' Six out of the 10 of them stated they had no confidence in the Farm Board whatever, that it would eat up all of the five hundred million dollars appropriation in salaries and that no relief would come to the farmer. What can we expect of people having such meager knowledge of current events, affecting their own interests.

"The only way such people can be reached is through word-of-mouth publicity. If membership organizations are to grow in size and prestige, we must begin at once to prepare the non-member for membership. This preparation must largely take place through the men and women who already are affiliated with membership organizations. Our members must accept the responsibility of cultivating the non-member.

Friendliness Helpful

"In marketing activities the farmers' business is largely held through friendliness. Support to a membership organization can be gained in the same way. The member must sympathize with the non-member. He must recognize his problems intimately, and above all, he must be able to show Mr. Non-member that the organization has a helpful program. Any other method of cultivating and preparing the non-member is decidedly costly.

"The next question is, how can we prepare this non-member. Our experience is that membership is difficult to maintain on educational projects alone. Farmers, like most groups of businessmen, want to see a money return. Therefore, it seems to be essential that state farm membership organizations list in their programs certain projects which will lend themselves to a money return large enough, so that it will completely offset the membership fee. Whatever can be added over and above the membership fee adds considerably to the sales material which a solicitor may have to offer.

"The non-member must be fully informed on the importance of legislation to the agricultural industry. He must know to what length industry and labor go in securing favorable legislation. He must be shown how a legislative project will benefit him individually—for after all, sales are usually made when the prospect is convinced that the commodity is going to contribute to his own personal comfort.

Teach Marketing

"In preparing the prospect for membership, we must teach marketing. It must be taught in its broader sense. The non-member must see the relation of co-operative marketing to personal income. Most farmers at the present time are inclined to look at the local assembling unit as their market. In other words, the local livestock shipping association, the farmers' elevator or the local creamery is looked upon as the ultimate end in their marketing operations.

"Such is not the case. The market for livestock is the individual or the concern that finally processes that stock and prepares it for the consumer. The same is true with most other farm commodities. A commission agency is not the market. It is farther removed from the producer than that.

Not Co-operative Marketing

"The state of Iowa boasts that a large per cent of its livestock last year moved through co-operative channels, yet the fact remains that less than five per cent of this livestock was sold in the terminal markets through any one marketing agency. This represents co-operative assembling but not concentrated selling in large volume by a single agency, which promises to bring to the producer his proper share of bargaining power.

"Thirdly, in preparing the non-member, we must point out to him that our program involves reduction in the cost of production. Such accomplishments as tax reduction, which has been a big item in our state, automobile insurance on a mutual basis, now a project of most state Farm Bureau organizations, transportation activities and practically the entire production program of the county units which come under this general head, should be brought to his attention. There are other matters of common interest and knowledge among organized groups of farmers that can be advantageously taught.

"These items have a money-saving angle to them. Helpful economic legislation, and co-operative marketing increase the farmers' income. Cutting expenses reduces the outgo. Combined, the result is more money for the farmer. But, what is he to do with this increased money at his command. He must spend it wisely. The farmer's standard of living must be placed on a higher level. To do so costs money. The farm is his chief source of income. It must be made profitable. Now let's see for what he should spend it. Should it be for a larger and more costly automobile? I should not oppose that movement, but I have something more deep-seated in mind. I am thinking particularly of the modern conveniences which have become necessities in most of the homes of the cities.

Only 42 Per Cent

"I doubt seriously if you could rent a residence property in this town not equipped with electric lights, running water and a modern heating plant. Yet, a survey made in our state discloses that only 42 per cent of the farm homes in Illinois have so much as a cistern pump and a sink toward a running water system. The percentage having electric lights and heating systems is much lower than this figure.

"I looked further into the school system. I find that in most cities of 5,000 population and up, the school term ranges from 180 to 200 days per year; while in many of our one-room country schools, the session does not represent more than 120 to 140 days per year. Taxation And The Law

THE old time-worn complaint of financial hardship, great expense, closing the schools, cutting off of widow and blind pensions, and delay in collecting taxes is brought up by local officials in Franklin and Williamson counties in answer to the recent order of reassessment issued by the Illinois Tax Commission.

Plenty of excuses are offered for letting the old inequalities remain, but not one sound argument is advanced as to why the law which states that "all persons shall pay a tax according to the value of his or her property," should not be obeyed.

The Tax Commission during the incumbency of its able chairman, William H. Malone, has endeavored to see that this law is carried out impartially on real estate. It has consistently ordered reassessments to destroy favoritism and tax racketeering when facts brought before it justified such action.

Local officials in Franklin and Williamson counties have had every opportunity to challenge successfully the evidence of gross inequalities in assessments uncovered by the Farm Bureau and Illinois Agricultural Association. Farmers in these counties have been patient, the Tax Commission has been patient. But up to date there has been no refutation of the data gathered from representative sales of farm lands and city property in the official county records.

As a result the Tax Commission did the only thing it could do under the circumstances. It ordered a reassessment that equality may prevail as required by law.

Local assessors and the board of review have chosen to disregard the only accepted measure of values, namely selling price at a fair sale of the property taxed. Perhaps for political purposes or some more sinister reason, property in certain cities is favored.

The facts reveal that there are glaring inequalities in assessments in these counties. Property in a number of small cities and villages as well as farm lands are assessed decidedly higher, as measured by the only legal yardstick, than property in the protected and favored cities such as West Frankfort, Benton, Christopher, Carterville, Herrin, Hurst, Johnson City, and Marion. Property owners in Buckner, Sesser, and Ziegler in Franklin county, and Creal Springs, Pittsburg, and White Ash in Williamson county, have even more cause to complain than landowners, so this is not a fight between country and city. It is a demand for the elimination of inequalities, and the restoration of honesty and fairness in assessments.

The boards of review in these counties can still wipe out the illegal discrepancies in valuations without going to the trouble of reassessing each piece of property. The Tax Commission will probably be glad to order the boards of review to reconvene, as it has power to do, for the purpose of equalizing valuations. Had the local officials shown any disposition to act on the information provided more than two years ago the matter never would have been presented to the State Tax Commission. If there is any inconvenience, delay, or extra expense involved in the collection of taxes the blame rests solely on the shoulders of the county officials who refused to do their duty. The honest, law-abiding citizens of Illinois can be thankful that they have a court of last resort in the Tax Commission to protect their rights.

International Time

HUNDREDS of Illinois Farm Bureau members will be in Chicago the week beginning Dec. 2 for the fat stock and hay and grain show. That will be a good time to visit the I. A. A. offices, Country Life, the Illinois Agricultural Mutual, and the Farmers Mutual Reinsurance companies, all at 608 So. Dearborn St. The Pure Milk Association has offices in the same building.

The Soybean Marketing Association directors will meet in the I. A. A. offices on Wednesday, Dec. 4. Growers who happen to be in the city that day are invited to attend.

Direct Marketing 1,000 Years Ago

HOW little times change—in some ways. A practice comparable to direct marketing of the present day was forbidden as long ago as 980 A. D. An editorial in a recent issue of Wallaces' Farmer quoted from the old Roman code of regulations governing the activities of mechanics and tradespeople in the city of Constantinople, at that time under the rule of the Roman Empire. The regulation provided that "The butchers shall not go out to meet the drovers who bring in their flocks for sale either in Nicomedia or in other cities beyond the Sangarious . . . in order that they may buy the meat more cheaply and the due profit may fall to those who slaughter the sheep and not to the drovers."

It is apparent that even at that early day the evils of a marketing system wherein the buyers controlled the system and the sellers exercised little, if any, control were recognized. In those ancient times the "drovers" were at the mercy of the "butchers" when they sold as individuals out in the country before reaching the market places in the cities. They did not know current prices in the cities, they were not as familiar with grades and the values of those grades as were the "butchers." Large numbers of the "drovers" found themselves competing with each other in the sale of their herds. They came from widely scattered sections of the country and had no opportunity to get together in order that they might bargain as a group with the butchers in the sale of their stock. The butchers, on the other hand, were acquainted with each other and both because of their smaller number and because of this acquaintanceship were able to develop and maintain practices which increased their bargaining ability.

The drovers suffered because they were compelled to use the facilities provided by the buyers and follow the grading and other practices dictated by the buyers. The drover was on foreign soil, many days travel from his native pastures. He was under the pressing necessity of disposing of his herds even though the terms and conditions were not to his liking.

(Continued on page 5)

(Continued from page 4)

It is true that certain economies might have been effected by direct sales from the drover to the butchers—but the drover was not in a position to claim his share of the saving. The butcher got it. It is self-evident that it was to the latter's advantage to go out from the city and meet the drover, otherwise why shouldn't he have waited at the market place and purchased his needs there?

In its fundamentals direct marketing apparently hasn't changed much. The livestock farmer attempting to sell as an individual is still sacrificing his bargaining ability under the mistaken idea that he is preserving his individual rights and privileges. When he hauls his stock to the local concentration point he is still trading with the buyer in the buyer's territory and on the buyer's grades, weights and terms. Of course, he can return home with his stock but that is generally difficult and always expensive.

It might be argued that the livestock farmer is a long way from home when he is on a terminal market. That is true but the seller at least has the advantage of competition between buyers and the protection of government supervision in weights, trade practices, etc.

Most important of all he is still transferring his ownership long before his stock reaches the consuming market. and giving over control of his volume into the hands of the purchasers and processors who are at liberty to use his stock in effecting general price levels to their liking.

Doubtless the "butchers" of old argued that they wanted to save money in the marketing process and doubtless they did—for the "butchers." The livestock farmer was not then and is not now in a position to claim his part of the saving. He may be misled into believing that he is getting his share but when he counts the full cost in weights, grades and effect on price levels the net result is about the same as it was a thousand years ago.

There is some merit in "direct marketing," doubtless there are possibilities of effecting a saving in market expense, but if the livestock farmer benefits by the system he will have to control it himself. Until he does have marketing machinery through which he can move his livestock to the packer under his own control, he had bettter support the present facilities at his disposal, i.e. the local shipping association and the cooperative selling agencies on the terminal livestock markets.

Livestock buying is being again inaugurated at Bloomington. It is the same old proposition in different clothes. From the standpoint of livestock farmers of McLean county it has the same disadvantages as did the system which was forbidden by the Roman Empire back in 980 A. D.—Ray E. Miller.

State Produce Co-op

(Continued from page 3)

at the rate of seven per cent per annum to be paid only out of the net earnings of the Association when and as such dividends shall be declared by the board of directors.

Class B stock shall be entitled to draw no dividends, either capital or patronage, and shall be entitled to no distribution of the assets of the Association in the event of liquidation. The policyholders of such stock shall be entitled to one vote for each and every share of such stock held by them.

Under the Co-operative Marketing Act of Illinois control of the co-operative must rest in a board of directors chosen from among the member producers of the commodity marketed. Thus, under this Act there is no possibility of directors being chosen from among those not directly interested and producing the commodity marketed.

Patronage Dividends

The common stock of the State Marketing Association shall only be issued to, and owned by, county or district co-operative associations of producers of dairy and poultry products. Shares of common stock may be transferred only with the consent of the Association.

Holders of common stock shall not be entitled to any dividend on the common stock as stock dividends, but the holder of a share of common stock (to be held only by producers) shall be entitled to his share of the net savings, the distribution of such savings to be pro-rated on a patronage basis.

The board of directors shall consist of 15 members to be elected at the annual meeting of shareholders and serve for a term of one year or until their successors are duly elected and qualified. At the close of each annual meeting the directors shall hold a meeting and shall elect the officers consisting of a president, vice-president, secretary, and treasurer. All officers shall be members of the board of directors except the secretary and treasurer who may or may not be directors.

Here Are Officers

Officers and directors elected at the Decatur meeting who will apply for incorporation papers are as follows: S. M. Elkins, president, McLean county; William Krause, vice-president, Logan county; Claude J. Martin, secretary-treasurer Mason county; Burton Leamon, Richland county; Clarence Shurtleff, Edwards county; Guy Pomeroy, White county; Benjamin Folck, Crawford county; Perry Journey, Adams county; T. G. Jackson, Brown county; H. B. Smith, McDonough county; R. J. Ash, Hancock county; Elery Leefers of Macoupin county; and Walter Scott of Scott county. Bloomington was chosen as headquarters of the new organization.

Organization of the local co-operative marketing associations into state-wide and district organizations has the approval of the Federal Farm Board which has advised that local co-operatives must federate into large units if they would obtain the full benefits of the Agricultural Marketing Act.

The local co-operatives now operating handle approximately 4,000,000 pounds of butterfat annually in addition to considerable quantities of eggs and poultry.

Big Turnout Expected From Illinois Bureaus

EXCEPT for the voting delegates, the bulk of the crowd at the coming A. F. B. F. convention is expected from the middle west states, including Illinois, Iowa, and Indiana.

All the sessions are open to Farm Bureau members and it is hoped that representatives from every Illinois county will be there.

For those driving to Chicago for the meeting, it is suggested that automobiles be left in the outlying sections. Transportation by elevated lines, interurban, buses, street cars, and suburban trains is available from every part of the city and from neighboring suburbs. For those who drive in, parking space may be found a few blocks from the Sherman Hotel in Grant Park just east of Michigan Boulevard.

Special Rates

Railroads have reduced their rates for the convention so visitors may go from any point in the United States for a fare and a half. Certificates for the special rate may be obtained from county advisors and Farm Bureau officials.

Directors of extension from 45 states will be entertained at a banquet on Friday night, Dec. 6, and the following night, Dec. 7, another dinner will be given to representatives of the farm and city press.

Further requests for information should be made at A. F. B. F. headquarters, 58 E. Washington St., Chicago.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

Taxation And The Law

THE old time-worn complaint of financial hardship, great expense, closing the schools, cutting off of widow and blind pensions, and delay in collecting taxes is brought up by local officials in Franklin and Williamson counties in answer to the recent order of reassessment issued by the Illinois Tax Commission.

Plenty of excuses are offered for letting the old inequalities remain, but not one sound argument is advanced as to why the law which states that "all persons shall pay a tax according to the value of his or her property," should not be obeyed.

The Tax Commission during the incumbency of its able chairman, William H. Malone, has endeavored to see that this law is carried out impartially on real estate. It has consistently ordered reassessments to destroy favoritism and tax racketeering when facts brought before it justified such action.

Local officials in Franklin and Williamson counties have had every opportunity to challenge successfully the evidence of gross inequalities in assessments uncovered by the Farm Bureau and Illinois Agricultural Association. Farmers in these counties have been patient, the Tax Commission has been patient. But up to date there has been no refutation of the data gathered from representative sales of farm lands and city property in the official county records.

As a result the Tax Commission did the only thing it could do under the circumstances. It ordered a reassessment that equality may prevail as required by law.

Local assessors and the board of review have chosen to disregard the only accepted measure of values, namely selling price at a fair sale of the property taxed. Perhaps for political purposes or some more sinister reason, property in certain cities is favored.

The facts reveal that there are glaring inequalities in assessments in these counties. Property in a number of small cities and villages as well as farm lands are assessed decidedly higher, as measured by the only legal yardstick, than property in the protected and favored cities such as West Frankfort, Benton, Christopher, Carterville, Herrin, Hurst, Johnson City, and Marion. Property owners in Buckner, Sesser, and Ziegler in Franklin county, and Creal Springs, Pittsburg, and White Ash in Williamson county, have even more cause to complain than landowners, so this is not a fight between country and city. It is a demand for the elimination of inequalities, and the restoration of honesty and fairness in assessments.

The boards of review in these counties can still wipe out the illegal discrepancies in valuations without going to the trouble of reassessing each piece of property. The Tax Commission will probably be glad to order the boards of review to reconvene, as it has power to do, for the purpose of equalizing valuations. Had the local officials shown any disposition to act on the information provided more than two years ago the matter never would have been presented to the State Tax Commission. If there is any inconvenience, delay, or extra expense involved in the collection of taxes the blame rests solely on the shoulders of the county officials who refused to do their duty. The honest, law-abiding citizens of Illinois can be thankful that they have a court of last resort in the Tax Commission to protect their rights.

International Time

HUNDREDS of Illinois Farm Bureau members will be in Chicago the week beginning Dec. 2 for the fat stock and hay and grain show. That will be a good time to visit the I. A. A. offices, Country Life, the Illinois Agricultural Mutual, and the Farmers Mutual Reinsurance companies, all at 608 So. Dearborn St. The Pure Milk Association has offices in the same building.

The Soybean Marketing Association directors will meet in the I. A. A. offices on Wednesday, Dec. 4. Growers who happen to be in the city that day are invited to attend.

Direct Marketing 1,000 Years Ago

HOW little times change—in some ways. A practice comparable to direct marketing of the present day was forbidden as long ago as 980 A. D. An editorial in a recent issue of Wallaces' Farmer quoted from the old Roman code of regulations governing the activities of mechanics and tradespeople in the city of Constantinople, at that time under the rule of the Roman Empire. The regulation provided that "The butchers shall not go out to meet the drovers who bring in their flocks for sale either in Nicomedia or in other cities beyond the Sangarious . . . in order that they may buy the meat more cheaply and the due profit may fall to those who slaughter the sheep and not to the drovers."

It is apparent that even at that early day the evils of a marketing system wherein the buyers controlled the system and the sellers exercised little, if any, control were recognized. In those ancient times the "drovers" were at the mercy of the "butchers" when they sold as individuals out in the country before reaching the market places in the cities. They did not know current prices in the cities, they were not as familiar with grades and the values of those grades as were the "butchers." Large numbers of the "drovers" found themselves competing with each other in the sale of their herds. They came from widely scattered sections of the country and had no opportunity to get together in order that they might bargain as a group with the butchers in the sale of their stock. The butchers, on the other hand, were acquainted with each other and both because of their smaller number and because of this acquaintanceship were able to develop and maintain practices which increased their bargaining ability.

The drovers suffered because they were compelled to use the facilities provided by the buyers and follow the grading and other practices dictated by the buyers. The drover was on foreign soil, many days travel from his native pastures. He was under the pressing necessity of disposing of his herds even though the terms and conditions were not to his liking.

(Continued on page 5)

(Continued from page 4)

It is true that certain economies might have been effected by direct sales from the drover to the butchers—but the drover was not in a position to claim his share of the saving. The butcher got it. It is self-evident that it was to the latter's advantage to go out from the city and meet the drover, otherwise why shouldn't he have waited at the market place and purchased his needs there?

In its fundamentals direct marketing apparently hasn't changed much. The livestock farmer attempting to sell as an individual is still sacrificing his bargaining ability under the mistaken idea that he is preserving his individual rights and privileges. When he hauls his stock to the local concentration point he is still trading with the buyer in the buyer's territory and on the buyer's grades, weights and terms. Of course, he can return home with his stock but that is generally difficult and always expensive.

It might be argued that the livestock farmer is a long way from home when he is on a terminal market. That is true but the seller at least has the advantage of competition between buyers and the protection of government supervision in weights, trade practices, etc.

Most important of all he is still transferring his ownership long before his stock reaches the consuming market. and giving over control of his volume into the hands of the purchasers and processors who are at liberty to use his stock in effecting general price levels to their liking.

Doubtless the "butchers" of old argued that they wanted to save money in the marketing process and doubtless they did—for the "butchers." The livestock farmer was not then and is not now in a position to claim his part of the saving. He may be misled into believing that he is getting his share but when he counts the full cost in weights, grades and effect on price levels the net result is about the same as it was a thousand years ago.

There is some merit in "direct marketing," doubtless there are possibilities of effecting a saving in market expense, but if the livestock farmer benefits by the system he will have to control it himself. Until he does have marketing machinery through which he can move his livestock to the packer under his own control, he had bettter support the present facilities at his disposal, i.e. the local shipping association and the cooperative selling agencies on the terminal livestock markets.

Livestock buying is being again inaugurated at Bloomington. It is the same old proposition in different clothes. From the standpoint of livestock farmers of McLean county it has the same disadvantages as did the system which was forbidden by the Roman Empire back in 980 A. D.—Ray E. Miller.

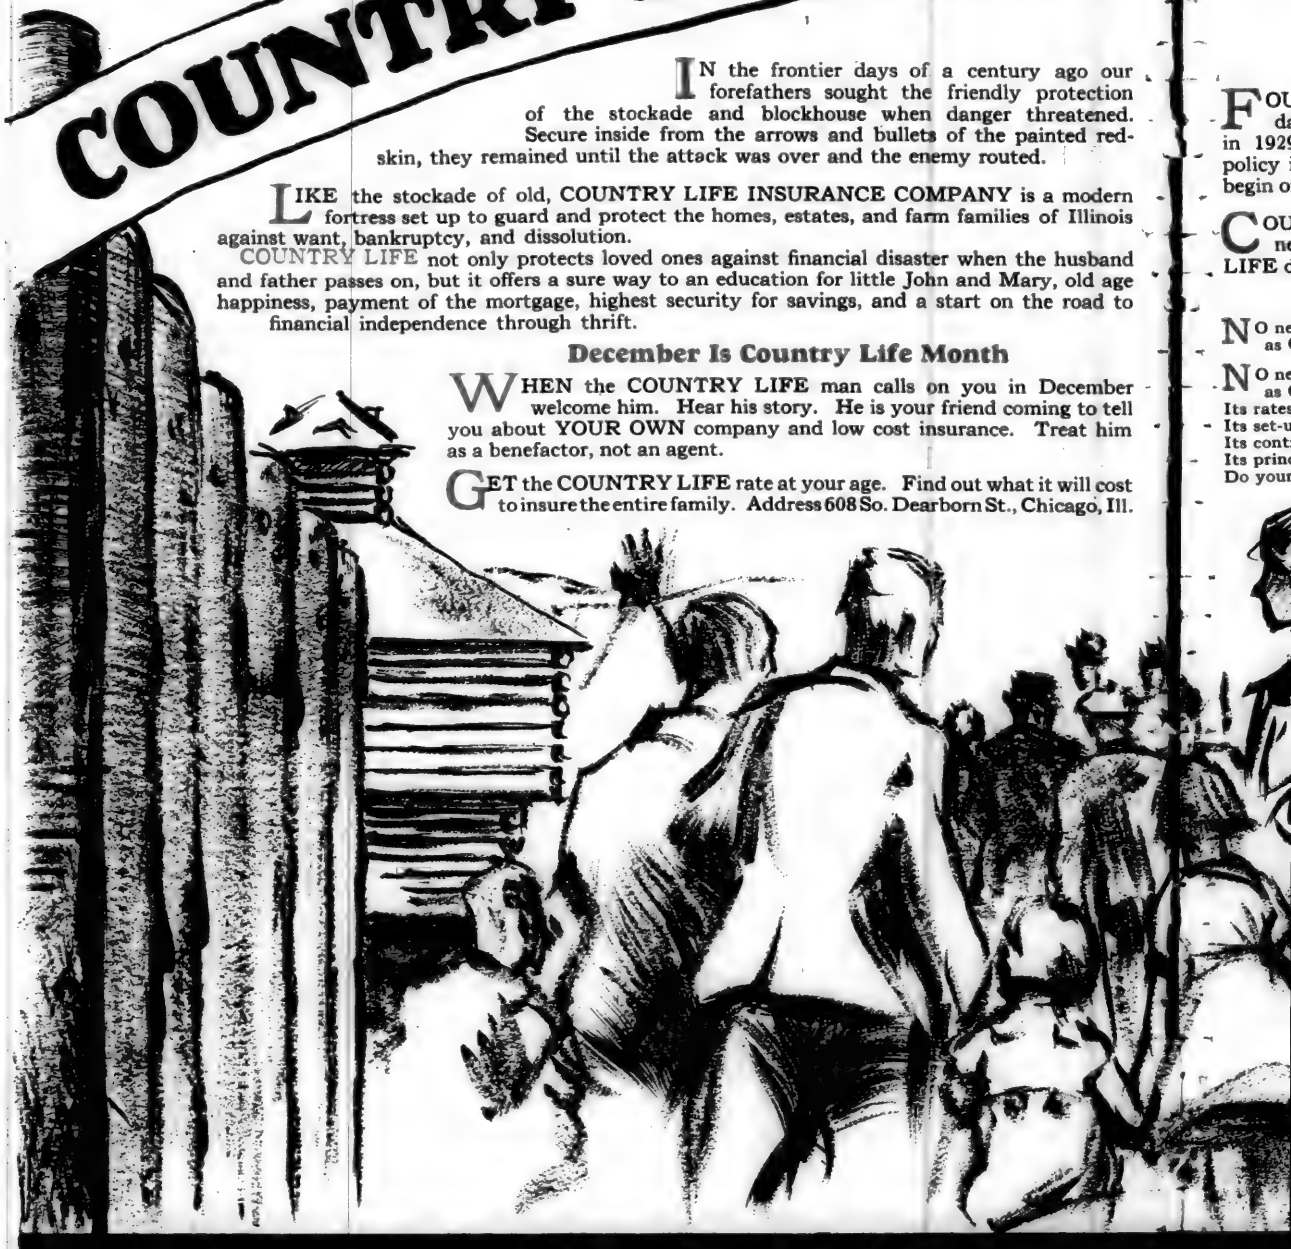
COUNTRY LIFE INSUR

IN the frontier days of a century ago our forefathers sought the friendly protection of the stockade and blockhouse when danger threatened. Secure inside from the arrows and bullets of the painted redskin, they remained until the attack was over and the enemy routed.



LIKE the stockade of old, COUNTRY LIFE INSURANCE COMPANY is a modern fortress set up to guard and protect the homes, estates, and farm families of Illinois against want, bankruptcy, and dissolution.

COUNTRY LIFE not only protects loved ones against financial disaster when the husband and father passes on, but it offers a sure way to an education for little John and Mary, old age happiness, payment of the mortgage, highest security for savings, and a start on the road to financial independence through thrift.

December Is Country Life Month

WHEN the COUNTRY LIFE man calls on you in December welcome him. Hear his story. He is your friend coming to tell you about YOUR OWN company and low cost insurance. Treat him as a benefactor, not an agent.

GET the COUNTRY LIFE rate at your age. Find out what it will cost to insure the entire family. Address 608 So. Dearborn St., Chicago, Ill.

The Gate to Protection

Listen to Country Life's radio program from Station WLS, Chicago, on December 3rd, between 8:30 and 9:00 p. m. Results of the first three days' drive will be reported.

SURANCE COMPANY

Goal $50,000,000 In '29

FOUR thousand agents will take part in the 30 day drive with $50,000,000 of life insurance in 1929 as the goal. With the slogan "A COUNTRY LIFE policy in every Farm Bureau home in 1929," the great drive will begin on Dec. 1. You can help make this wonderful achievement possible.

COUNTRY LIFE already is the outstanding success in the insurance world of 1929. No new company ever obtained as much paid for business in its first year as COUNTRY LIFE did in its first 30 days of existence.

I. A. A. Farm Bureau Backing

NO new company ever stepped so far ahead of old competitors in advanced "old line, legal reserve" ideas as COUNTRY LIFE.

NO new company ever had the backing of such complete organization as COUNTRY LIFE.

Its rates are low and participating.
Its set-up is entirely for the policy holder's benefit.
Its control rests in the Farm Bureau members of Illinois.
Its principles and ideals are of the very highest, unbiased by selfish interest.
Do your bit to put YOUR OWN company in the $50,000,000 class before the New Year.

Tune in on the I. A. A. Forum from Station WLS every Tuesday night at 6:30 p. m., Central Standard Time.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (264 meters) is broadcast between 12:00 and 12:20 p. m., Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

"BEATING the Sheriff To Farmer Brown" is the title of a play broadcast by agricultural students from the Greorgetown High School on the I. A. A. half hour from WLS on Nov. 12. The Vermilion County Farm Bureau arranged the program. Oris Kercher, farm adviser, and J. C. Murphy, agricultural teacher, accompanied the boys.

This play which spreads the gospel of dairy herd improvement through cow testing association records and influence, won first prize in national competition at the recent Dairy Show, St. Louis.

J. C. Murphy, agricultural teacher at Georgetown who coached the boys, also had a part in the program.

C. E. Gates, county adviser, and members of the LaSalle County Farm Bureau, will feature their county-wide soil testing program with a demonstration before the microphone on Tuesday night (Nov. 19) at the same hour.

Those who fail to attend the A. F. B. F. meeting in Chicago Dec. 9-10-11 will hear several of the speakers from station WLS. Portions of the program will be broadcast on the NBC chain.

By L. A. Williams

EVERYONE else seems to feel glum about the stock market. Not a life insurance man could sanely regret the return to normalcy of investment funds.

AH! No, it has not returned to normal as yet. But it will. What goes up must come down. The sound, safe dollar in life insurance policies is a great consolation in panicky days, and in days of investment slumps.

PLAYING life's game safely instead of on a get-rich-quick scheme means a definite program of constructive work, and enough life insurance to guarantee the estate if your time is cut short before the work is completed.

GAMBLERS are not heavy insurers. They want long chances with big stakes.

THE sure estate is life insurance. The sure and systematic savings plan is life insurance.

SIT down with your wife and talk over the future. What will happen? You will discuss life insurance, of course. The future can only be guaranteed by life insurance. Future retirement, future comfort, future for the family if you die, education of children if you should die.

WOULD you risk the whole future happiness of your wife and children on one spin of the wheel? That is what the underinsured man does. What if he dies tonight? The paltry little he is insured for is all that is available. Income ceases.

INFLATED land values should have taught some lessons. Inflated stock values should teach more lessons. Florida booms should have taught lessons. One outstanding lesson all should learn is that a scientific base on which all should build is a satisfactory life insurance program protecting and guaranteeing a certain estate before any chance-taking can cause ruin.

HIGH MAN IN OCTOBER

Homer Hitchcock, of Pecatonica, Winnebago county general agent, led all other agents in personal production for the month of October. He wrote $78,500 of life insurance in the Country Life Insurance Co. for that month.

Order Uniform Tax, Officials Squirm

Gross Inequalities in Franklin and Williamson Counties

AS WE go to press, local officials in Franklin and Williamson counties are squirming under orders of reassessment signed by Wm. H. Malone, chairman of the Illinois Tax Commission.

Wm. H. Malone

Their continued delay in equalizing valuations of farm lands, and city real estate culminated in this action of the commission.

The local boards of review, and county treasurers had ample warning of what would happen if they insisted on disobeying the law. The Tax Commission under Chairman Malone has followed consistently a policy of uniformity in assessing real estate for tax purposes. The reassessment in Cook county was ordered in spite of the fact that it was a tremendous undertaking, when tax fixing and favoritism were revealed.

A similar situation now exists in Franklin and Williamson counties whether intentional or unintentional.

Had Opportunity

The local boards of review were given every opportunity to produce evidence showing why a reassessment should not be ordered and to act voluntarily on the facts presented by the Farm Bureaus which never were successfully refuted. The Farm Bureaus exercised great patience but finally were compelled to appeal to the Tax Commission.

Chairman Malone called a number of hearings where the county officials again had an opportunity to present their case. This they failed to do chiefly because they had no case to present.

The Tax Commission exercised great patience because of the sorry financial conditions in these two counties, but finally was compelled to act.

Some Cities Suffer

The evidence shows gross inequalities not only between farm lands and city property, but also between city real estate in the various towns and cities in the two counties.

In Franklin county, for example, it was found that land was valued for tax purposes at an average of 41.4 per cent of its fair sale price. All forced sales and irregular sales were thrown out of the computations. Only regular sales were included. On the other hand, in the city of West Frankfort assessed valuations averaged only 33 per cent of sales value; in Christopher the ratio was 34.1 per cent; in Benton 38.88; in Buckner 56.43; in Royalton 35.77; in Sesser 44.27; in Zeigler 49.25. In the smaller towns of the county assessments were entirely too high as measured by the ratio above.

These records reveal gross inequalities with property in several small towns and farm lands grossly overassessed. In a number of the larger cities there is marked underassessment. The inequalities in tax valuations it is thought developed largely as a result of the present system of assessing property by local assessors who invariably compete with each other in underassessment.

Williamson Too

In Williamson county a similar condition obtains. Farm lands there were valued for tax purposes on the basis of 48.94 per cent of their selling values as obtained from records of sales in the county building. Town and city lots in Cartersville were assessed at only 36.35 per cent of their sales value; in Herrin the valuation ratio was 28.47 per cent; in Hurst 33.71 per cent; in Johnson City 33.32 per cent; in Marion 33.92 per cent; and in the smaller cities and villages of the county 55.07 per cent. Here again there was marked inequality with certain towns and villages, and farm lands being discriminated against.

W. F. Purnell of Muncie, Vermilion county, has been employed as farm adviser in Ford county to succeed Geo. T. Swaim. Purnell is a graduate of the University of Illinois (1918) and has been farming during the past 10 years.

Northwestern Illinois Dairymen Want Co-op.

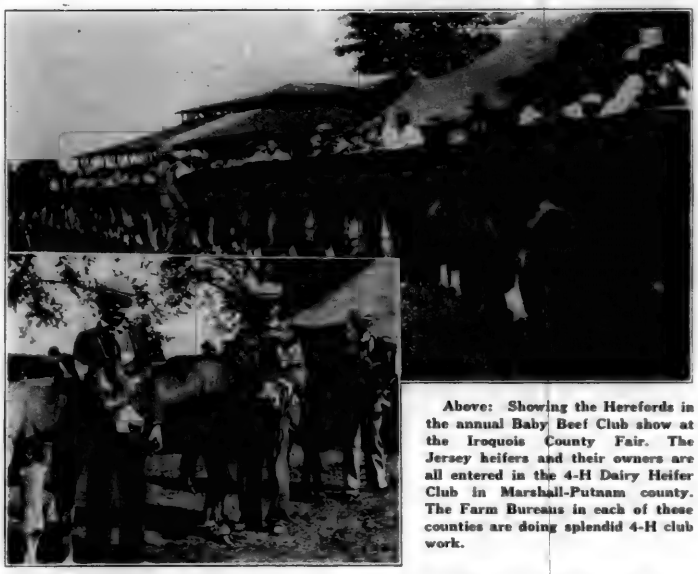
Producers Who Supply Condenseries Cast Eyes at Chicago Market

REPRESENTATIVES of Farm Bureaus in the northwestern Illinois counties gathered at Dixon on Oct. 29 to consider the advisability of organizing a co-operative association of dairymen in that area. Practically all of the milk produced in the Rock river valley, which includes such counties as Lee, Ogle, and Whiteside, is sold to local condenseries.

A. D. Lynch

A. D. Lynch, dairy marketing director for the I. A. A., discussed the dairy industry, the program being carried out by bargaining associations on the principal milk markets in Illinois, and outlined the need for a complete survey of the territory and milk marketing conditions there.

Committee Appointed



A committee was appointed as follows to report at a future meeting: Carl Sartorious, Amboy; Harve Rhoads, Compton; LeRoy Lehman, Franklin Grove; L. M. Gentry, Oregon; H. W. Allyn, Oregon; W. A. Heintzelman, Oregon; O. C. Beatty, Sterling; B. F. Hoover, Morrison; and Geo. P. Fisk, Prophetstown.

Between 40 and 50 dairymen, local leaders, and farm advisers attended the meeting. They represented approximately 1,080 producers who sell to condenseries at Dixon, Sterling, Morrison, Oregon, Amboy, and other points. Lynch emphasized the national aspect of dairy marketing and the need for co-ordinating local co-operative effort with mid-west and national organizations.

H. W. Allyn, manager of Rock River farms and an able leader in state dairy activities, told the dairymen of the need for more favorable freight rates on milk to Chicago.

"We ought to have the Chicago markets for Illinois dairymen," said Allyn. "Wisconsin has stolen our market because it has more favorable freight rates than do we. Why should milk be shipped into Chicago from Janesville, Green Bay, Madison, and even more distant Wisconsin points when we have milk in this territory that should be bringing the Chicago price. Illinois markets for Illinois producers should be our watchword."

The transportation department of the I. A. A. has been asked to check the freight rates with the idea of eliminating discrimination against milk shippers in the northwestern Illinois territory.

Above: Showing the Herefords in the annual Baby Beef Club show at the Iroquois County Fair. The Jersey heifers and their owners are all entered in the 4-H Dairy Heifer Club in Marshall-Putnam county. The Farm Bureaus in each of these counties are doing splendid 4-H club work.

DEFENDS TITLE IN NATIONAL MEET

Walter Olson, member of the Knox County Farm Bureau, and national champion corn husker, was scheduled to defend his title in the national meet near Kansas City on Nov. 15. Walter placed second in the recent state contest near Rio being bested by Harold Holmes of Henry county. Holmes turned in 34.98 bu. net, Olson 34.31 bu. Orville Welch of Piatt county placed third, Carl Seiler of Knox fourth, and Elmer Williams of Stark, former national champion, fifth. Eleven contestants husked more than 31 bu. net.

Farmer Employers' Liability Insurance

By V. Vaniman

ILLINOIS farmers appreciate the fact that they are living in a progressive age and are protecting themselves by Employers Liability Insurance for injury or death to employees just the same as they are protecting themselves against liability for automobile public liability and property damage.

Employers' Liability Insurance furnished by the Illinois Agricultural Mutual Insurance Company provides protection for the farmer employer up to $5,000 and $10,000; i. e. $5,000 for personal injury or death to one employee, and with that limit per employee, $10,000 for any single accident.

In taking out the insurance the employer makes a premium deposit of not less than $10. Five dollars premium deposit is required for each additional six months of labor, or fraction thereof, in excess of 12 months. For example, if the employer estimates he will have one man for 12 months and 3 men for two months each, this would be a total of 18 months of estimated hired labor which would require a $15 premium deposit.

The surplus share is $10 in every case and the policy fee $5.

Dairymen Meet at Decatur

Preliminary steps toward the organization of a milk producers' co-operative organization were taken at Decatur on Oct. 24 in a meeting at the Macon County Farm Bureau office.

Representatives from every township in the county met with Farm Bureau officers and A. D. Lynch, dairy marketing director of the Illinois Agricultural Association, who told what organized dairymen were doing at other markets. A collective bargaining organization is contemplated similar to those now in existence at Champaign, Peoria, Bloomington, Chicago, and St. Louis.

Tune in on the I. A. A. Forum from Station WLS every Tuesday night at 6:30 p. m., Central Standard Time.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (264 meters) is broadcast between 12:00 and 12:20 p. m., Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

"BEATING the Sheriff To Farmer Brown" is the title of a play broadcast by agricultural students from the Georgetown High School on the I. A. A. half hour from WLS on Nov. 12. The Vermilion County Farm Bureau arranged the program. Oris Kercher, farm adviser, and J. C. Murphy, agricultural teacher, accompanied the boys.

This play which spreads the gospel of dairy herd improvement through cow testing association records and influence, won first prize in national competition at the recent Dairy Show, St. Louis.

J. C. Murphy, agricultural teacher at Georgetown who coached the boys, also had a part in the program.

C. E. Gates, county adviser, and members of the LaSalle County Farm Bureau, will feature their county-wide soil testing program with a demonstration before the microphone on Tuesday night (Nov. 19) at the same hour.

Those who fail to attend the A. F. B. F. meeting in Chicago Dec. 9-10-11 will hear several of the speakers from station WLS. Portions of the program will be broadcast on the NBC chain.

By L. A. Williams

EVERYONE else seems to feel glum about the stock market. Not a life insurance man could sanely regret the return to normalcy of investment funds.

AH! No, it has not returned to normal as yet. But it will. What goes up must come down. The sound, safe dollar in life insurance policies is a great consolation in panicky days, and in days of investment slumps.

PLAYING life's game safely instead of on a get-rich-quick scheme means a definite program of constructive work, and enough life insurance to guarantee the estate if your time is cut short before the work is completed.

GAMBLERS are not heavy insurers. They want long chances with big stakes.

THE sure estate is life insurance. The sure and systematic savings plan is life insurance.

SIT down with your wife and talk over the future. What will happen? You will discuss life insurance, of course. The future can only be guaranteed by life insurance. Future retirement, future comfort, future for the family if you die, education of children if you should die.

WOULD you risk the whole future happiness of your wife and children on one spin of the wheel? That is what the underinsured man does. What if he dies tonight? The paltry little he is insured for is all that is available. Income ceases.

INFLATED land values should have taught some lessons. Inflated stock values should teach more lessons. Florida booms should have taught lessons. One outstanding lesson all should learn is that a scientific base on which all should build is a satisfactory life insurance program protecting and guaranteeing a certain estate before any chance-taking can cause ruin.

HIGH MAN IN OCTOBER

Homer Hitchcock, of Pecatonica, Winnebago county general agent, led all other agents in personal production for the month of October. He wrote $78,500 of life insurance in the Country Life Insurance Co. for that month.

Order Uniform Tax, Officials Squirm

Gross Inequalities in Franklin and Williamson Counties

AS WE go to press, local officials in Franklin and Williamson counties are squirming under orders of reassessment signed by Wm. H. Malone, chairman of the Illinois Tax Commission.

Wm. H. Malone

Their continued delay in equalizing valuations of farm lands, and city real estate culminated in this action of the commission.

The local boards of review, and county treasurers had ample warning of what would happen if they insisted on disobeying the law. The Tax Commission under Chairman Malone has followed consistently a policy of uniformity in assessing real estate for tax purposes. The reassessment in Cook county was ordered in spite of the fact that it was a tremendous undertaking, when tax fixing and favoritism were revealed.

A similar situation now exists in Franklin and Williamson counties whether intentional or unintentional.

Had Opportunity

The local boards of review were given every opportunity to produce evidence showing why a reassessment should not be ordered and to act voluntarily on the facts presented by the Farm Bureaus which never were successfully refuted. The Farm Bureaus exercised great patience but finally were compelled to appeal to the Tax Commission.

Chairman Malone called a number of hearings where the county officials again had an opportunity to present their case. This they failed to do chiefly because they had no case to present.

The Tax Commission exercised great patience because of the sorry financial conditions in these two counties, but finally was compelled to act.

Some Cities Suffer

The evidence shows gross inequalities not only between farm lands and city property, but also between city real estate in the various towns and cities in the two counties.

In Franklin county, for example, it was found that land was valued for tax purposes at an average of 41.4 per cent of its fair sale price. All forced sales and irregular sales were thrown out of the computations. Only regular sales were included. On the other hand, in the city of West Frankfort assessed valuations averaged only 33 per cent of sales value; in Christopher the ratio was 34.1 per cent; in Benton 38.88; in Buckner 56.43; in Royalton 35.77; in Sesser 44.27; in Zeigler 49.25. In the smaller towns of the county assessments were entirely too high as measured by the ratio above.

These records reveal gross inequalities with property in several small towns and farm lands grossly overassessed. In a number of the larger cities there is marked underassessment. The inequalities in tax valuations it is thought developed largely as a result of the present system of assessing property by local assessors who invariably compete with each other in underassessment.

Williamson Too

In Williamson county a similar condition obtains. Farm lands there were valued for tax purposes on the basis of 48.94 per cent of their selling values as obtained from records of sales in the county building. Town and city lots in Cartersville were assessed at only 36.35 per cent of their sales value; in Herrin the valuation ratio was 28.47 per cent; in Hurst 33.71 per cent; in Johnson City 33.32 per cent; in Marion 33.92 per cent; and in the smaller cities and villages of the county 55.07 per cent. Here again there was marked inequality with certain towns and villages, and farm lands being discriminated against.

W. F. Purnell of Muncie, Vermilion county, has been employed as farm adviser in Ford county to succeed Geo. T. Swaim. Purnell is a graduate of the University of Illinois (1918) and has been farming during the past 10 years.

Farmer Employers' Liability Insurance

By V. Vaniman

ILLINOIS farmers appreciate the fact that they are living in a progressive state and are protecting themselves by Employers Liability Insurance for injury or death to employees just the same as they are protecting themselves against liability for automobile public liability and property damage.

Employers' Liability Insurance furnished by the Illinois Agricultural Mutual Insurance Company provides protection for the farmer employer up to $5,000 and $10,000, i. e. $5,000 for personal injury or death to one employee, and with that limit per employee, $10,000 for any single accident.

In taking out the insurance the employer makes a premium deposit of not less than $10. Five dollars premium deposit is required for each additional six months of labor, or fraction thereof, in excess of 12 months. For example, if the employer estimates he will have one man for 12 months and 3 men for two months each, this would be a total of 18 months of estimated hired labor which would require a $15 premium deposit.

The surplus share is $10 to every [illegible] and the policy fee $5.

DEFENDS TITLE IN NATIONAL MEET

Walter Olson, member of the Knox County Farm Bureau, and national champion corn husker, was scheduled to defend his title in the national meet near Kansas City on Nov. 15. Walter placed second in the recent state contest near Rio being bested by Harold Holmes of Henry county. Holmes turned in 34.95 bu. net, Olson 34.31 bu. Orville Welch of Piatt county placed third, Carl Seiler of Knox fourth, and Elmer Williams of Stark, former national champion, fifth. Eleven contestants husked more than 31 bu. net.

Dairymen Meet at Decatur

Preliminary steps toward the organization of a milk producers' co-operative organization were taken at Decatur on Oct. 24 in a meeting at the Macon County Farm Bureau office.

Representatives from every township in the county met with Farm Bureau officers and A. D. Lynch, dairy marketing director of the Illinois Agricultural Association, who told what organized dairymen were doing at other markets. A collective bargaining organization is contemplated similar to those now in existence at Champaign, Peoria, Bloomington, Chicago, and St. Louis.

THE most enthusiastic baseball gathering in the history of the Farm Bureau League describes the get-together banquet of baseball leaders, managers, players, and fans in division VI held at Jacksonville, Thursday night, Nov. 7. Nearly 100 representatives from Morgan, Cass, Menard, and Sangamon counties including Farm Bureau presidents, and farm advisers gathered for the post-season good-will dinner. Conflicting dates prevented Greene county from participating.

Credit for arranging the banquet and promoting sportsmanship and good will between the baseball officials and players goes to Charles Black, baseball director and dictator for this division.

Speakers included the president and secretary of the State League, L. R. Welk and George Thiem, respectively, T. H. Brockman of Jacksonville, former University of Illinois athlete who later played professional ball with the Denver team of the Western League, also with the Cleveland Indians, farm advisers and team managers, Umpires Kenneth Beerup and Roy Nichols, Farm Bureau presidents and others. Guy Husted, Cass county farm adviser, led community singing.

All-Star Team

Chas. Black

The following all-star team for the district was chosen by the team managers and reported by Farm Adviser Forest Fisher: Catcher R. Heaton of Morgan; Pitcher E. Keithley of Cass; 1st base R. Stilz of Menard; 2nd base Frank Fisher of Sangamon; 3rd base E. Webster of Morgan; short stop E. Roegge of Cass; right field R. Fanning of Cass; left field A. Beard of Menard; center field C. Jacobs of Sangamon; all-star manager Bill Witte of Cass; Umpire (in the box) Kenneth Beerup; base umpire Roy Nichols.

The selection was enthusiastically received and endorsed by the audience.

Umpire Beerup commented on the fine sportsmanship displayed by the Farm Bureau teams. "I have umpired for and against many teams," he said, "but the Farm Bureau teams have been exceptionally mannerly and courteous."

"Beerup is the first umpire I ever heard admit that he umpired 'for and against'," commented I. A. Madden of Springfield, amidst the cheers of the fans and players.

McLEAN county's state championship Farm Bureau baseball players and their wives and sweethearts were banqueted by the McLean County Farm Bureau on the night of Nov. 6 at Bloomington. W. H. Coultas who served as toastmaster was praised by members of the team for his help in bringing them through a successful season. Approximately 50 people attended the dinner.

Harrison Fahrnkopf, who organized the team three years ago, spoke briefly complimenting the team on its good work and sportsmanship displayed during the past three seasons. Secretary George Thiem of the State League presented the silver trophy awarded annually by the I. A. A.

The trophy is a beautiful silver design of a baseball player in action just after he has hit the ball.

A male quartet from Illinois Wesleyan furnished entertainment. Manager Fitzgerald, McLean's heavy-hitting first baseman, received the trophy and expressed thanks on behalf of his team-mates. McLean is the third county to win a state championship. Marshall-Putnam won the title three times, and Tazewell twice. Geo. L. Clarke, member of the state arbitration committee, and Mrs. Clarke were other guests.

THE change in the attitude of influential newspapers toward agriculture and its problems in recent years is worthy of comment. Today many of the country's most powerful dailies are consistent and aggressive supporters of organized agriculture. That farmers obtained such recognition from the federal government as they now have is due in no small part to their help in moulding public opinion.

The best newspapers are independent and fair. They will give their aid to a worthy cause when those behind it are sincere and constructive. And so when organized farmers pleaded their case, many fine newspapers sensing the importance of farm prosperity, came to the front as champions of "equality for agriculture."

Naturally, our middle western newspapers have shown most interest in the farm relief movement. By hammering away they have assisted materially in influencing public opinion in the east toward a more reasonable and friendly feeling for agriculture. More important, by giving support to farmers' efforts in reestablishing themselves economically, they smoothed the way for political parties to pledge agricultural aid, and politicians to vote for helpful legislation.

A politically-minded person is most sensitive to publicity. Many politicians are controlled entirely by their fears. They fear to take a bold step, to embrace a reform no matter how right or necessary, because it is human to oppose the new. Few politicians are courageous enough to fight for an issue or principle against odds. The few who do become famous and often win the highest honors in political life. Since newspapers mould public opinion they smooth the path for the office holder who invariably votes with the majority.

The Minneapolis Tribune has come around to see agriculture in its true light. In a recent editorial it made these significant statements:

"A literal fufillment of the Republican party's pledges would mean a substantial increase in the buying power of the agricultural area of the United States.

"The present income enjoyed by agricultural America is approximately 12 billion dollars.

"Were agriculture enjoying the same proportionate income that the rest of the United States is enjoying that income would be 18 billion dollars.

" 'Parity' for agriculture means just that: an added annual income of roughly 6 billion dollars.

"Were this ideal realized, who would get the additional 6 billion dollars—agriculture or industry?

"Obviously, both.

"Agriculture would promptly turn over the bulk of the sum to industry, in exchange for the products which industry has to sell.

"Industry would profit by the increased buying power of American agriculture just as it has already profited by the increased buying power of American labor.

" 'Parity' for agriculture means nothing more and nothing less than enormously increased sales for industry.

"Why, then, shouldn't industry exert all the vast influence it has at its command to hold the tariff revision to the purposes outlined by President Hoover?"

Here is a newspaper exerting its great influence to gain a square deal for the farmer. When the power of the press is brought to bear on a wrong to correct it, something usually happens. Had farmers not organized and presented their case through chosen leaders such might never have been forthcoming. Organized farmers fought against peasantry and by so doing developed an army of loyal supporters. —E. G. T.

Farmers' Institute Hires Chas. Durst

CHARLES E. DURST of Wheaton was recently employed to succeed H. E. Young as secretary of the Illinois Farmers' Institute. Durst will move to Springfield where he can be close to his new headquarters in the state capitol.

C. E. Durst

Mr. Durst has unusual qualifications for his new work. He is well acquainted with farm leaders throughout Illinois, having served as the first farm adviser both in Union and Cook counties, and later as director of fruit and vegetable marketing for the Illinois Agricultural Association.

Subsequently Durst became editor of the American Fruit Grower during which he built up a national acquaintance among horticultural leaders and growers. At present he is serving as secretary of the National Horticultural Council.

Durst was chosen from among some 30 applicants for secretary of the Farmers' Institute. Wm. Webb of Lockport, president of the state organization, formerly served on the executive committee of the I. A. A.

Harold Allison, vocational agricultural teacher at the Oblong high school, has been employed as county adviser by the Crawford County Farm Bureau.

Counties Show Increases in Membership

15th District Meets

ADAMS county livestock growers shipped 642 carloads through their county association from January 1 to October 1, 1929 as compared to 619 cars for the same period last year, Manager Mast of the Association reported at the I. A. A. conference in the 15th district held recently at Quincy. When it was suggested that Adams county farmers are more loyal to their association than in some other places, D. H. Meyers, president of the Adams County Farm Bureau said they were not doing it for the sake of loyalty alone but because their net returns were greater. Farm Adviser S. F. Russell explained how the educational livestock meetings held over the county had assisted in keeping the growers informed and so, loyal to their organization.

A. N. Skinner

Busy in Fulton

It was reported that farm organizers from another state were attempting to form co-operative creameries in Fulton county. The proposed contracts of the organization call for the delivery of all cream for 10 years. Leading farmers see in this effort needless waste in the duplication of facilities for processing cream. The small creamery in a community where milking cows is only a sideline is not justified, they said. Small creameries in such communities are giving way to centralized plants where the cost of making butter is much less.

Sentiment was expressed in favor of legislation to compel producers of agricultural limestone and rock phosphate to submit a guaranteed analysis before offering this material for sale. Reports are coming in from Knox and other western Illinois counties that certain companies are offering low-grade limestone and phosphate cheaper than it can be purchased for through the I. A. A.

Adviser Kemp reported that the Knox County Supply Company handled $180,000 of business with a net profit of $11,000 up to October 1, 1929.

Should Work Together

A. N. Skinner who presided, discussed the new Agricultural Marketing Act tracing the history of the struggle for farm relief up to the present time. It was the consensus of opinion among the delegates that farmers must be better organized and that antagonism and competition between farm organizations should be eliminated.

John Moore referred to Dr. C. L. Stewart's talk at Jacksonville in which the professor expressed the opinion that it would be quite a while before the Farm Board would force farmers to co-operate. D. H. Meyers urged farmers to support the Marketing Act and to make an effort to give this form of farm relief a fair trial.

"The Producers was organized for the benefit of the farmer." Robert Bohnenstiehl, Troy.

Getting Members Is Year Round Job Here

BUILDING up membership is a full-time, year 'round project in Champaign County according to county adviser Burns. Forgetting all about membership until the three-year period is up and then campaigning for another signup after which the process is repeated, is foreign to the plan followed for several years in this county.

Project leaders charged with responsibility for bringing in new members are appointed in every township or community. Non-members are prepared for membership before being asked to join. The member assigned to this task cultivates the prospect during his spare time when he is in town evenings or Saturday afternoons. Only men who show likelihood of being a credit to the Farm Bureau are asked to join. Some are considered unfit for membership and may do the organization more harm than good.

That this plan has produced wonderful results is seen in the increase of more than 400 members secured in Champaign county during the past three years. If membership work were given as much attention as other full time projects there would be a tremendous increase in the number of Farm Bureau members over the state in Burns' opinion.

Corn Pageant a Success

FARM advisers, leaders and representatives from a number of northern Illinois counties and from the I. A. A. office attended the corn pageant at the Sycamore community building in DeKalb county on November 21-22.

The pageant depicted the early history and development of the corn plant by the Indians, including the old Indian legend as to the origin of corn.

More than 150 people, most of them from Farm Bureau community units in DeKalb and adjoining counties were in the cast. An 80-piece symphony band selected from 18 towns and cities around Sycamore and DeKalb, provided the music.

Pioneer life with costumes historically accurate provided plenty of action and color to make the pageant of particular attraction to farmers. The old-fashioned corn shucking bee and barn dance proved most entertaining.

George A. Fox, former secretary of the I. A. A., was one of the moving spirits behind the project. The peageant was dramatized by the Playground and Recreation Association of America from C. V. Gregory's history of agriculture.

Membership Gains

Recent drives held in more than a score of Illinois counties resulted in substantial gains in Farm Bureau membership. A preliminary report received by the organization department revealed increases as follows: Iroquois 75, Champaign 82, Vermilion 62, Macon 52, Sangamon 100, McLean 50, Logan 46, Ogle 57, Winnebago 68, Boone 17, Coles 22, Douglas 46, DuPage 24, Macoupin 38, Henry 34, Montgomery 26, Peoria 25, St. Clair 51, and Scott 65 new members. Other counties which held special membership drives are yet to be heard from.

Many Counties Go Over The Top In 1929 Drives

Experience of Other States Cite Ink Membership Word

THE year's survey of organization activities since January 1 reveals that 37 counties started their regular triennial campaigns for membership during the year. A number of other counties finished drives that had been started in 1928. In addition there were a great many counties that held supplementary campaigns, most of which came in September when a nation-wide effort was made to bring in new members.

All Over the Top

The counties that went over the top or surpassed their membership totals of three years ago follow: (The increase in membership is represented by the figure to the right) Boone 112; Champaign 499; Clark 10; Crawford 155; DeWitt 3; Douglas 46; DuPage 66; Edgar 94; Grundy 31; Henderson 98; Jerse, 24; Kane 93; Lake 27; Woodford 76; LaSalle 136; Lawrence 96; McLean 207; Macon 95; Mercer 144; Morgan 88; Peoria 172; Pope 48; Saline 62; Sangamon 177; St. Clair 125; Stephenson 122; Vermilion 315; McDonough 104; Williamson 140; Moultrie even; Clinton 58; Hancock 66; Wabash even; Effingham 12; Kankakee 39; Cook 66; and Scott 4.

Within 50 in 12

Twelve other countries came within 50 members of equaling the signup of three years ago. A number of these counties, however, are still working on membership. The 12 are as follows: Carroll, DeKalb, Edwards, Jackson, Kendall, Knox, Logan, McHenry, Marion, Rock Island, Warren, and Will.

In certain other states where commercial activities of the Farm Bureau have been dominant, everything else except membership has been emphasized. The result has been a gradual dwindling in total membership simply because the financial incentive was not there to go out and sign new members. They secured considerable income from buying and selling.

Lack Vision

In such states there has been a lack of vision of the great importance of a large membership if farmers are to be properly represented where numbers have influence. In matters of legislation, taxation, transportation, the influence of the organization to some extent is directly proportional to the size of the membership. A small organization which controls few votes has little influence in legislative halls when the interests of the group it represents are at stake, unless it is a political campaign contributor.

Where the Farm Bureau membership is allowed to slip to a point where only enough are signed to insure the perpetuation of the local organization, it is plain that not enough emphasis is given to these far-reaching opportunities of organization.

"It takes co-operative selling on the large central markets to complete our marketing system. The bigger the Producers Livestock Commission Association grows the better it will be for the shipper." Benj. F. Oetken, Fosterburg.

Number 12 DECEMBER, 1929 Volume 7

Plan Three Busy Days For I. A. A. Annual Meet

Program Follows General Outline of Previous Years

PRELIMINARY plans for the I. A. A. annual meeting at Springfield, January 29, 30, 31, are completed. Further details to be arranged will be announced in the January issue.

The opening day, January 29, will be devoted to the annual meetings of allied organizations, including the Illinois Farm Bureau Baseball League, the Serum Association, the Illinois Agricultural Mutual Insurance Company, Country Life Insurance Company, and the Illinois Agricultural Co-operatives Association.

In addition to the Secretary of Agriculture, there will be outstanding speakers on the question of farm taxation and transportation. Important pronouncements from Secretary Hyde regarding future agricultural policies of the Hoover administration, are expected. While no definite arrangements have yet been made, several members of the Federal Farm Board will probably attend the convention in the state capitol.

Annual Banquet

The annual banquet will come on Thursday night, January 30, as in past years, and the annual luncheon where Secretary Hyde will speak, on January 31, the last day of the meeting. The luncheon will be held in the Springfield Armory to provide accommodations for 1200 to 1500 people. Headquarters will be established at the Abraham Lincoln Hotel.

There will be a series of five conferences on Thursday afternoon where delegates and members will have the floor. Free and open discussion of policy matters is the object of these meetings. Organization and marketing problems will be given prominence since both loom large in probable activities in 1930.

Lowden Coming

As we go to press, the announcement comes that Frank O. Lowden of Oregon has accepted an invitation to speak at the annual banquet on Thursday night. Complete details will be announced in the January issue of the Record.

More than 5,000 Illinois livestock growers have visited the terminal livestock markets as guests of the various Producer commission associations during the past two years.

Plan Early

Plan now to attend the coming meeting at Springfield, Jan. 29-30-31. Make reservations at once with your County Farm Bureau. Accommodations can be provided for all at the banquet and luncheon if the local committee is notified in advance.

Annual Meeting Speaker

Sec'y Hyde Accepts Invitation from Pres. Earl Smith in I. A. A. Offices

Apply for Reduced Rates

APPLICATION for reduced rates to Springfield for the annual I. A. A. convention has been made by the transportation department on all lines. If a reduction is granted as in former years, don't neglect to take advantage of it. Details of how this may be done will be explained in the January issue of the RECORD.

Springfield is ideally located and is accessible by train or hard road to all points in Illinois. Train service is available on the Chicago and Alton, the Illinois Central, the Wabash, the Burlington and the Baltimore and Ohio railways. Hard roads lead out in all directions and most of these have bus service. Excellent hotel and eating facilities are assured.

Sec'y Hyde Chief Speaker At Coming I. A. A. Meeting

Secretary Demonstrates Sincerity As Real Friend of Agriculture

HON. ARTHUR M. HYDE, former governor of Missouri, Secretary of Agriculture, the orator of the Hoover cabinet who already has demonstrated his sincerity as a real friend of agriculture, will deliver the principal address at the coming I. A. A. convention at Springfield. The Secretary accepted the invitation tendered by President Smith several months ago.

Secretary Hyde, a lawyer by profession, already has done much to win his way into the hearts of farmers. Born and reared in the corn belt, he made a splendid record as governor of his state. Good roads and better country schools were chief interests of his administration. He is an extensive land owner in Missouri and so has a direct monetary interest in agriculture.

Talks Surplus Control

In his public statements since becoming a member of the Hoover cabinet, Mr. Hyde has stressed the importance of organization and of taking marginal lands out of production and so controlling the farm surplus. What he says in his address at the I. A. A. meeting will be of nation-wide interest, coming as it will after six months' experience in carrying out the purposes of the Agricultural Marketing Act through the Federal Farm Board.

On his recent visit to the I. A. A. offices, the Secretary expressed surprise to find so large and complete a staff serving Illinois farmers. He spoke approvingly of the organization setup with insurance and other service rendered through associated companies.

Secretary Hyde will probably speak at the luncheon in the Springfield armory on Friday, Jan. 31. A crowd of 1200 to 1500 can be accommodated and barring unfavorable weather a record attendance is probable.

"A careful system of selling livestock in the National Stock Yards is practiced by the Producers. The organization has handed out about $800,000 in refunds to its members." J. King Eaton, Hamel.

Counties Show Increases in Membership

15th District Meets

ADAMS county livestock growers shipped 642 carloads through their county association from January 1 to October 1, 1929 as compared to 619 cars for the same period last year, Manager Mast of the Association reported at the I. A. A. conference in the 15th district held recently at Quincy. When it was suggested that Adams county farmers are more loyal to their association than in some other places, D. H. Meyers, president of the Adams County Farm Bureau said they were not doing it for the sake of loyalty alone but because their net returns were greater. Farm Adviser S. F. Russell explained how the educational livestock meetings held over the county had assisted in keeping the growers informed and so, loyal to their organization.

A. N. Skinner

Busy in Fulton

It was reported that farm organizers from another state were attempting to form co-operative creameries in Fulton county. The proposed contracts of the organization call for the delivery of all cream for 10 years. Leading farmers see in this effort needless waste in the duplication of facilities for processing cream. The small creamery in a community where milking cows is only a sideline is not justified, they said. Small creameries in such communities are giving way to centralized plants where the cost of making butter is much less.

Sentiment was expressed in favor of legislation to compel producers of agricultural limestone and rock phosphate to submit a guaranteed analysis before offering this material for sale. Reports are coming in from Knox and other western Illinois counties that certain companies are offering low-grade limestone and phosphate cheaper than it can be purchased for through the I. A. A.

Adviser Kemp reported that the Knox County Supply Company handled $180,000 of business with a net profit of $11,000 up to October 1, 1929.

Should Work Together

A. N. Skinner who presided, discussed the new Agricultural Marketing Act tracing the history of the struggle for farm relief up to the present time. It was the consensus of opinion among the delegates that farmers must be better organized and that antagonism and competition between farm organizations should be eliminated.

John Moore referred to Dr. C. L. Stewart's talk at Jacksonville in which the professor expressed the opinion that it would be quite a while before the Farm Board would force farmers to co-operate. D. H. Meyers urged farmers to support the Marketing Act and to make an effort to give this form of farm relief a fair trial.

"The Producers was organized for the benefit of the farmer." Robert Bohnenstiehl, Troy.

Getting Members Is Year Round Job Here

BUILDING up membership is a full-time, year 'round project in Champaign County according to county adviser Burns. Forgetting all about membership until the three-year period is up and then campaigning for another signup after which the process is repeated, is foreign to the plan followed for several years in this county.

Project leaders charged with responsibility for bringing in new members are appointed in every township or community. Non-members are prepared for membership before being asked to join. The member assigned to this task cultivates the prospect during his spare time when he is in town evenings or Saturday afternoons. Only men who show likelihood of being a credit to the Farm Bureau are asked to join. Some are considered unfit for membership and may do the organization more harm than good.

That this plan has produced wonderful results is seen in the increase of more than 400 members secured in Champaign county during the past three years. If membership work were given as much attention as other full time projects there would be a tremendous increase in the number of Farm Bureau members over the state in Burns' opinion.

Corn Pageant a Success

FARM advisers, leaders and representatives from a number of northern Illinois counties and from the I. A. A. office attended the corn pageant at the Sycamore community building in DeKalb county on November 21-22.

The pageant depicted the early history and development of the corn plant by the Indians, including the old Indian legend as to the origin of corn.

More than 150 people, most of them from Farm Bureau community units in DeKalb and adjoining counties were in the cast. An 80-piece symphony band selected from 18 towns and cities around Sycamore and DeKalb, provided the music.

Pioneer life with costumes historically accurate provided plenty of action and color to make the pageant of particular attraction to farmers. The old-fashioned corn shucking bee and barn dance proved most entertaining.

George A. Fox, former secretary of the I. A. A., was one of the moving spirits behind the project. The peageant was dramatized by the Playground and Recreation Association of America from C. V. Gregory's history of agriculture.

Membership Gains

Recent drives held in more than a score of Illinois counties resulted in substantial gains in Farm Bureau membership. A preliminary report received by the organization department revealed increases as follows: Iroquois 75, Champaign 82, Vermilion 62, Macon 52, Sangamon 100, McLean 50, Logan 46, Ogle 57, Winnebago 68, Boone 17, Coles 22, Douglas 46, DuPage 24, Macoupin 38, Henry 34, Montgomery 26, Peoria 25, St. Clair 51, and Scott 65 new members. Other counties which held special membership drives are yet to be heard from.

FIVE SPECIALISTS DIRECT THE CO-OPERATIVE MARKETING ACTIVITIES OF THE ILLINOIS AGRICULTURAL ASSOCIATION. IN ADDITION TO ASSISTING THE COUNTY FARM BUREAUS IN ORGANIZING PRODUCERS INTO NEW COMMODITY GROUPS, THESE MEN STUDY SUCCESSFUL CO-OPS. IN OTHER STATES, GATHER PRACTICAL INFORMATION AND MAKE IT AVAILABLE TO THOSE ALREADY ESTABLISHED HERE. EDUCATIONAL WORK AMONG PRODUCERS, AND MANAGEMENT SERVICE ARE IMPORTANT FEATURES OF I. A. A. MARKETING ACTIVITIES.

A Year of Progress In Co-operative Marketing

Substantial Gains Are Made In Co-op. Selling

Survey Shows Illinois Farmers Are Working Together

THE year 1929 saw more real co-operative marketing progress in Illinois than in any similar period in years.

Early in the year the Pure Milk Association, organized and sponsored by the northern Illinois County Farm Bureaus and the I. A. A., won its fight for recognition on the market. Today it is one of the largest collective bargaining associations in the country and controls substantially all of the whole milk going to the Chicago market from points in Illinois, northern Indiana, and southern Wisconsin.

With fluid milk co-operatives operating at Chicago, Peoria, Rockford, Springfield, Bloomington, Champaign, and Quincy, and with new collective bargaining associations now being formed at St. Louis, Decatur, and Rock Island, Illinois soon will be the best organized state in this respect in the middle west.

Producer To Consumer

At Quincy, Springfield, St. Louis, and Waukegan, farmer-owned companies are not only processing but also distributing milk and dairy products. The Highland Dairy Farms Company is an important factor in the distribution of milk on the St. Louis market and handles practically all the production of dairymen around Highland and adjoining communities in Madison county.

A move to organize northwestern Illinois dairymen who sell to the condenseries was launched at Dixon several weeks ago. Future activities of the dairy marketing department will be directed toward co-ordinating the various Illinois milk co-operatives.

Educational Program

Livestock marketing activities have centered in a broad program of education among livestock growers and shippers this year. Teaching the principles of co-operative marketing, the need for collective action in the sale of livestock has been the watchword of the livestock marketing department. Scores of tours to the terminal markets at Chicago, Peoria, East St. Louis, and Indianapolis have been held. There the growers have received first-hand information about the work of their own Producer co-operative selling agencies.

A thorough study and analysis of grain marketing both in the United States and Canada has been made by the grain marketing department, and now plans for further marketing activities in Illinois are rapidly materializing. The I. A. A. is working hand in hand with the Illinois Farmers' Grain Dealers Association and its leaders to this end. As these plans are definitely formulated they will be presented to the membership.

Soybean Men Organized

The first co-operative association of soybean growers in the United States was organized during the year by Farm Bureau and I. A. A. leaders. The Soybean Marketing Association, open to all growers, has established headquarters at Champaign. The membership signup is well underway. The association expects to have control of the bulk of the 3,000,000 bushel soybean crop grown annually in Illinois by the time the 1930 crop is harvested.

The grain marketing department assisted the Egyptian Seed Growers' Exchange in obtaining Federal Farm Board aid and the promise of ample funds to advance growers on red top seed. Further assistance to red top growers will be given in 1930.

During 1929 the number of co-operative produce marketing associations was nearly doubled until now more than 40 are operating throughout the state. These produce associations or cream clubs average about 150 producers each who deliver approximately 100,000 lbs. of butterfat in a year. Produce is sold a year in advance to the highest bidder. The cream clubs have been successful in reducing the cost of assembling cream. They have had a strong influence in improving quality and increasing the net price to the farmer from three to five cents per lb. Approximately 4,000,000 lbs. of fat are sold annually through these co-operatives.

Form State Co-op

More recently steps were taken to federate these marketing activities through the organization of the Illinois Produce Marketing Association. The centralized creameries in the state have shown a disposition to co-operate with the produce co-operatives of late and several conferences between creamery and producer representatives have been held. These augur well for a satisfactory arrangement between buyer and seller.

A start toward developing a chain of producer-owned roadside markets for selling fruit and vegetables was launched in July in northern, central, and southern Illinois. To market

(Continued on page 5)

Livestock Growers Talk Co-operative Marketing

Get First Hand Information On Market Towns

HOW Illinois livestock growers are spreading the gospel of co-operative marketing is revealed in the reports of community meetings held throughout the state received by the I. A. A. livestock marketing department. Marketing problems are discussed and information is presented by farmers who have studied co-operative marketing first-hand at the terminal livestock markets.

"During the month of November we held a series of 14 community meetings in different parts of the county," writes T. W. May, farm adviser in Madison county. "A number of men have given some excellent talks on livestock marketing and the Producers Commission Association. The men asked to speak were selected from those who attended the tour to the National Stock Yards. These men have proved themselves able to discuss very intelligently some of our marketing problems and to urge livestock growers to cooperate in selling their stock. These talks are stimulating increased interest in a better marketing system."

Best Ever Held

"The livestock marketing meetings have just been completed and without question have been the best series ever held," writes S. F. Russell of Adams county. "Local leaders had meetings well arranged and discussions were excellent. Reports were made on the tour to the National Stock Yards also on the county-wide marketing conference conducted here several weeks ago. Exactly 970 men and women attended the 12 meetings."

Approximately 400 attended a series of livestock marketing meetings held in Knox county, according to A. R. Kemp, farm adviser. These meetings were conducted at Altoona, Appleton, Victoria, Knoxville, Williamsfield, Oneida, and Hermon.

"Organized agriculture has been responsible for most of the progress in the farming business," said Harry C. Gehring, president of the Knox County Farm Bureau at the Altoona meeting. "That is why the Farm Bureau appointed a livestock marketing committee. A marketing system without producer control will never favor the farmer, but the system of co-operative selling now being followed on the big

Grain Marketing Is Big Project for 1930

When directors of the Illinois Farmers' Grain Dealers Association, and the Mutual Relations Committee of the Illinois Agricultural Association met in I. A. A. offices with Samuel R. McKelvie (in light-colored suit) grain member of the Federal Farm Board. The part Illinois will play in centralizing co-operative grain marketing was discussed.

Co-operative Marketing

(Continued from page 4)

terminal markets is the way to better marketing conditions and a fair price for our products."

Best Service

"The Producer salesmen are always working for the livestock grower and may be depended upon to get the best possible service," said A. T. McKie, director of the Victoria Shipping Association.

"The best meeting we ever held. Everyone favored the Producers," wrote Zina S. Crane in speaking of the livestock meeting at Oneida.

During the past two years more than 5000 livestock growers have toured to the terminal markets under the auspices of the Farm Bureaus and the I. A. A. First-hand information is obtained about the co-operative Producer selling agencies, the principles of efficient marketing, and the need for volume control.

Farmers are discussing their marketing problems as never before in open public meetings, in school houses, and town halls. They are acquiring a vision of what they must do collectively if they would meet the buyer on an equal footing.

Year '29 One of Progress

(Continued from page 4)

perishables direct from producer to consumer is the object of this movement. The Illinois Fruit Growers' Exchange continued its wholesale marketing activities and handled a greater volume of fruits this year than last. A renewed effort was made to market more of Illinois' perishables, particularly peaches, within the state.

Farm Boys Can Raise Bob-White

Make Farms Attractive to Birds and They Will Increase— Interesting and Profitable

Most people think growing game means putting it in a pen and taking care of it like chickens.

Game can be grown in this way, but it costs money, it requires lots of care, and the birds may die of disease.

There is another way to grow game which is more interesting, much cheaper, takes less care, and involves less risk of loss, says Aldo Leopold in the Wisconsin Arbor and Bird Day Annual and reported in the American Game Protective association news service. This other way is to fix up the farm so the game will grow itself.

It will work on any farm where there is a little "seed stock" to start with, and where the farm boy or girl has enough judgment to know what to do.

Farm boys and girls can grow quail by fixing up the farm so they will grow themselves.

One may not have much confidence in this method until it is realized that a dozen pairs of quail will increase to over 3000 in three years *if given ideal protection, cover, and food.* It is impossible and unneccessary to give ideal protection, cover, and food, but these figures show why even a slight improvement in protection, cover, and food will greatly increase the number of quail on the farm.

Do away with all hunting cats, kill the sharp-shinned hawks, reduce the skunks and nesting crows if abundant, and if possible keep down the foxes.

Cover and food is what is most often lacking on northern farms.

Any farm has plenty of cover and food in summer and fall. It is the winter and spring cover which counts. The time to prepare for winter is in the previous summer.

First of all, don't burn the grassy swamps, or the weedy bushy fence rows and thickets, unless the crops or cattle require it. Usually they do not. If they do, save an unburned corner here and there for the birds. Don't mow every fence corner.

Secondly, select a few definite places, preferably on land that is too steep or rocky to plough, on which to grow grapevines and other plants for winter cover. We will call these places refuge covers. There should be at least one refuge cover on every 40 acres. Each cover should be at least as much ground as an ordinary house. The shape doesn't matter. Creek banks, old gravel pits, gully banks, rocky knolls, and potholes offer good locations without using up good land. Refuge covers located on the edge of woods or in the open are better for quail than in the deep woods.

If the places you select are grazed by cattle, see if you can get permission to enclose them with a gateless fence. Cattle thin out the cover and destroy its value.

In each refuge cover plant a few wild grapevines. Let them run over the bushes and form tangles. Each tangle is a house for quail when deep snow comes, and the dried grapes are food.

Also plant in each refuge cover several groups of Norway spruce or white pine of half a dozen trees each. If you can plant these under locust trees they will grow twice as fast as elsewhere because the locust puts nitrogen into the soil just like alfalfa. These groups of evergreens are for winter cover.

If there are no locusts, plant some. The locust beans are a dependable winter food for quail. Next to grapes, they are the best standby in storms.

In severe weather, hang ears of corn under the grape tangles in each refuge cover, tying them up by their own shucks out of reach of rabbits. The quail will get them.

If possible leave weedy, bushy fence rows connecting the refuge cover with the grainfields and with the barnyard. These fence-lines are "streets" for the quail to travel on.

If you can build one refuge cover each year you will soon have lots of quail. They will benefit the farm crops and furnish you enough music to amply repay your trouble.

Joint Committee Seeks Centralized Sales Plan

Illinois Important Grain State, Ranks First in Commercial Shipments

THAT grain marketing development with the centralization of grain selling in a farmer-owned and farmer-controlled co-operative agency is the big task ahead of grain producers in 1930 is conceded by all who know the situation in Illinois.

Illinois ranks higher than any other state in the volume of grain sold into commercial channels, yet comparatively little of this corn, oats, wheat and other grains is sold on the terminal markets through farmer-owned co-operative agencies.

Grain growers realize that they must get control of their product if they are to market orderly, control surplus, establish proper terminal facilities for holding, and obtain cost of production plus a reasonable profit.

Plans to this end were discussed at a recent meeting of I. A. A. and farmers' elevator representatives in the presence of Samuel R. McKelvie, grain member of the Farm Board. As soon as policies are definitely formulated they will be presented to the membership. It is hoped that a definite recommendation from the joint committee may be ready by the time of the I. A. A. annual meeting at Springfield the latter part of January.

As we go to press, a second meeting between Farm Bureau and State Farmer Grain Dealers' officials is being held to discuss principles of a centralized grain marketing system for the state.

Whatever plan is adopted presumably will provide for co-operation with the Farmers' National Grain corporation, a national selling agency for all grain co-operatives in the country.

"Of course the Producers sold my hogs." John F. Renken, Worden, who recently produced a ton litter and sold them on the St. Louis market.

FIVE SPECIALISTS DIRECT THE CO-OPERATIVE MARKETING ACTIVITIES OF THE ILLINOIS AGRICULTURAL ASSOCIATION. IN ADDITION TO ASSISTING THE COUNTY FARM BUREAUS IN ORGANIZING PRODUCERS INTO NEW COMMODITY GROUPS, THESE MEN STUDY SUCCESSFUL CO-OPS. IN OTHER STATES, GATHER PRACTICAL INFORMATION AND MAKE IT AVAILABLE TO THOSE ALREADY ESTABLISHED HERE. EDUCATIONAL WORK AMONG PRODUCERS, AND MANAGEMENT SERVICE ARE IMPORTANT FEATURES OF I. A. A. MARKETING ACTIVITIES.

A Year of Progress In Co-operative Marketing

Substantial Gains Are Made In Co-op. Selling

Survey Shows Illinois Farmers Are Working Together

THE year 1929 saw more real co-operative marketing progress in Illinois than in any similar period in years.

Early in the year the Pure Milk Association, organized and sponsored by the northern Illinois County Farm Bureaus and the I. A. A., won its fight for recognition on the market. Today it is one of the largest collective bargaining associations in the country and controls substantially all of the whole milk going to the Chicago market from points in Illinois, northern Indiana, and southern Wisconsin.

With fluid milk co-operatives operating at Chicago, Peoria, Rockford, Springfield, Bloomington, Champaign, and Quincy, and with new collective bargaining associations now being formed at St. Louis, Decatur, and Rock Island, Illinois soon will be the best organized state in this respect in the middle west.

Producer To Consumer

At Quincy, Springfield, St. Louis, and Waukegan, farmer-owned companies are not only processing but also distributing milk and dairy products. The Highland Dairy Farms Company is an important factor in the distribution of milk on the St. Louis market and handles practically all the production of dairymen around Highland and adjoining communities in Madison county.

A move to organize northwestern Illinois dairymen who sell to the condenseries was launched at Dixon several weeks ago. Future activities of the dairy marketing department will be directed toward co-ordinating the various Illinois milk co-operatives.

Educational Program

Livestock marketing activities have centered in a broad program of education among livestock growers and shippers this year. Teaching the principles of co-operative marketing, the need for collective action in the sale of livestock has been the watchword of the livestock marketing department. Scores of tours to the terminal markets at Chicago, Peoria, East St. Louis, and Indianapolis have been held. There the growers have received first-hand information about the work of their own Producer co-operative selling agencies.

A thorough study and analysis of grain marketing both in the United States and Canada has been made by the grain marketing department, and now plans for further marketing activities in Illinois are rapidly materializing. The I. A. A. is working hand in hand with the Illinois Farmers' Grain Dealers Association and its leaders to this end. As these plans are definitely formulated they will be presented to the membership.

Soybean Men Organized

The first co-operative association of soybean growers in the United States was organized during the year by Farm Bureau and I. A. A. leaders. The Soybean Marketing Association, open to all growers, has established headquarters at Champaign. The membership signup is well underway. The association expects to have control of the bulk of the 3,000,000 bushel soybean crop grown annually in Illinois by the time the 1930 crop is harvested.

The grain marketing department assisted the Egyptian Seed Growers' Exchange in obtaining Federal Farm Board aid and the promise of ample funds to advance growers on red top seed. Further assistance to red top growers will be given in 1930.

During 1929 the number of co-operative produce marketing associations was nearly doubled until now more than 40 are operating throughout the state. These produce associations or cream clubs average about 150 producers each who deliver approximately 100,000 lbs. of butterfat in a year. Produce is sold a year in advance to the highest bidder. The cream clubs have been successful in reducing the cost of assembling cream. They have had a strong influence in improving quality and increasing the net price to the farmer from three to five cents per lb. Approximately 4,000,000 lbs. of fat are sold annually through these co-operatives.

Form State Co-op

More recently steps were taken to federate these marketing activities through the organization of the Illinois Produce Marketing Association. The centralized creameries in the state have shown a disposition to co-operate with the produce co-operatives of late and several conferences between creamery and producer representatives have been held. These augur well for a satisfactory arrangement between buyer and seller.

A start toward developing a chain of producer-owned roadside markets for selling fruit and vegetables was launched in July in northern, central, and southern Illinois. To market

Livestock Growers Talk Co-operative Marketing

Get First Hand Information On Market Towns

HOW Illinois livestock growers are spreading the gospel of co-operative marketing is revealed in the reports of community meetings held throughout the state received by the I. A. A. livestock marketing department. Marketing problems are discussed and information is presented by farmers who have studied co-operative marketing first-hand at the terminal livestock markets.

"During the month of November we held a series of 14 community meetings in different parts of the county," writes T. W. May, farm adviser in Madison county. "A number of men have given some excellent talks on livestock marketing and the Producers Commission Association. The men asked to speak were selected from those who attended the tour to the National Stock Yards. These men have proved themselves able to discuss very intelligently some of our marketing problems and to urge livestock growers to cooperate in selling their stock. These talks are stimulating increased interest in a better marketing system."

Best Ever Held

"The livestock marketing meetings have just been completed and without question have been the best series ever held," writes S. F. Russell of Adams county. "Local leaders had meetings well arranged and discussions were excellent. Reports were made on the tour to the National Stock Yards also on the county-wide marketing conference conducted here several weeks ago. Exactly 970 men and women attended the 12 meetings."

Approximately 400 attended a series of livestock marketing meetings held in Knox county, according to A. R. Kemp, farm adviser. These meetings were conducted at Altoona, Appleton, Victoria, Knoxville, Williamsfield, Oneida, and Hermon.

"Organized agriculture has been responsible for most of the progress in the farming business," said Harry C. Gehring, president of the Knox County Farm Bureau at the Altoona meeting. "That is why the Farm Bureau appointed a livestock marketing committee. A marketing system without producer control will never favor the farmer, but the system of co-operative selling now being followed on the big

Grain Marketing Is Big Project for 1930

When directors of the Illinois Farmers' Grain Dealers Association, and the Mutual Relations Committee of the Illinois Agricultural Association met in I. A. A. offices with Samuel R. McKelvie (in light-colored suit) grain member of the Federal Farm Board. The part Illinois will play in centralizing co-operative grain marketing was discussed.

Co-operative Marketing

(Continued from page 4)

terminal markets is the way to better marketing conditions and a fair price for our products."

Best Service

"The Producer salesmen are always working for the livestock grower and may be depended upon to get the best possible service," said A. T. McKie, director of the Victoria Shipping Association.

"The best meeting we ever held. Everyone favored the Producers," wrote Zina S. Crane in speaking of the livestock meeting at Oneida.

During the past two years more than 5000 livestock growers have toured to the terminal markets under the auspices of the Farm Bureaus and the I. A. A. First-hand information is obtained about the co-operative Producer selling agencies, the principles of efficient marketing, and the need for volume control.

Farmers are discussing their marketing problems as never before in open public meetings, in school houses, and town halls. They are acquiring a vision of what they must do collectively if they would meet the buyer on an equal footing.

Year '29 One of Progress

(Continued from page 4)

perishables direct from producer to consumer is the object of this movement. The Illinois Fruit Growers' Exchange continued its wholesale marketing activities and handled a greater volume of fruits this year than last. A renewed effort was made to market more of Illinois' perishables, particularly peaches, within the state.

Farm Boys Can Raise Bob-White

Make Farms Attractive to Birds and They Will Increase— Interesting and Profitable

Most people think growing game means putting it in a pen and taking care of it like chickens.

Game can be grown in this way, but it costs money, it requires lots of care, and the birds may die of disease.

There is another way to grow game which is more interesting, much cheaper, takes less care, and involves less risk of loss, says Aldo Leopold in the Wisconsin Arbor and Bird Day Annual and reported in the American Game Protective association news service. This other way is to fix up the farm so the game will grow itself.

It will work on any farm where there is a little "seed stock" to start with, and where the farm boy or girl has enough judgment to know what to do.

Farm boys and girls can grow quail by fixing up the farm so they will grow themselves.

One may not have much confidence in this method until it is realized that a dozen pairs of quail will increase to over 3000 in three years *if given ideal protection, cover, and food.* It is impossible and unnecessary to give ideal protection, cover, and food, but these figures show why even a slight improvement in protection, cover, and food will greatly increase the number of quail on the farm.

Do away with all hunting cats, kill the sharp-shinned hawks, reduce the skunks and nesting crows if abundant, and if possible keep down the foxes.

Cover and food is what is most often lacking on northern farms.

Any farm has plenty of cover and food in summer and fall. It is the winter and spring cover which counts. The time to prepare for winter is in the previous summer.

First of all, don't burn the grassy swamps, or the weedy bushy fence rows and thickets, unless the crops or cattle require it. Usually they do not. If they do, save an unburned corner here and there for the birds. Don't mow every fence corner.

Secondly, select a few definite places, preferably on land that is too steep or rocky to plough, on which to grow grapevines and other plants for winter cover. We will call these places refuge covers. There should be at least one refuge cover on every 40 acres. Each cover should be at least as much ground as an ordinary house. The shape doesn't matter. Creek banks, old gravel pits, gully banks, rocky knolls, and potholes offer good locations without using up good land. Refuge covers located on the edge of woods or in the open are better for quail than in the deep woods.

If the places you select are grazed by cattle, see if you can get permission to enclose them with a gateless fence. Cattle thin out the cover and destroy its value.

In each refuge cover plant a few wild grapevines. Let them run over the bushes and form tangles. Each tangle is a house for quail when deep snow comes, and the dried grapes are food.

Also plant in each refuge cover several groups of Norway spruce or white pine of half a dozen trees each. If you can plant these under locust trees they will grow twice as fast as elsewhere because the locust puts nitrogen into the soil just like alfalfa. These groups of evergreens are for winter cover.

If there are no locusts, plant some. The locust beans are a dependable winter food for quail. Next to grapes, they are the best standby in storms.

In severe weather, hang ears of corn under the grape tangles in each refuge cover, tying them up by their own shucks out of reach of rabbits. The quail will get them.

If possible leave weedy, bushy fence rows connecting the refuge cover with the grainfields and with the barnyard. These fence-lines are "streets" for the quail to travel on.

If you can build one refuge cover each year you will soon have lots of quail. They will benefit the farm crops and furnish you enough music to amply repay your trouble.

Joint Committee Seeks Centralized Sales Plan

Illinois Important Grain State, Ranks First in Commercial Shipments

THAT grain marketing development with the centralization of grain selling in a farmer-owned and farmer-controlled co-operative agency is the big task ahead of grain producers in 1930 is conceded by all who know the situation in Illinois.

Illinois ranks higher than any other state in the volume of grain sold into commercial channels, yet comparatively little of this corn, oats, wheat and other grains is sold on the terminal markets through farmer-owned co-operative agencies.

Grain growers realize that they must get control of their product if they are to market orderly, control surplus, establish proper terminal facilities for holding, and obtain cost of production plus a reasonable profit.

Plans to this end were discussed at a recent meeting of I. A. A. and farmers' elevator representatives in the presence of Samuel R. McKelvie, grain member of the Farm Board. As soon as policies are definitely formulated they will be presented to the membership. It is hoped that a definite recommendation from the joint committee may be ready by the time of the I. A. A. annual meeting at Springfield the latter part of January.

As we go to press, a second meeting between Farm Bureau and State Farmer Grain Dealers' officials is being held to discuss principles of a centralized grain marketing system for the state.

Whatever plan is adopted presumably will provide for co-operation with the Farmers' National Grain corporation, a national selling agency for all grain co-operatives in the country.

"Of course the Producers sold my hogs." John F. Renken, Worden, who recently produced a ton litter and sold them on the St. Louis market.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

Making Master Farmers

THE influence the Farm Bureau, the University of Illinois, and the farm press are exercising in making better farmers was vividly expressed at the recent banquet for the 1929 Master Farmers given by Prairie Farmer in Chicago.

Each of the 19 Illinois men so honored this year is a Farm Bureau member. Several are presidents and officers in their County Farm Bureaus. All are active supporters of their organization, and unstinted praise was given the county farm advisers responsible in many cases for the adoption of projects and farm practices which helped bring success.

The University of Illinois and such men as Cyril G. Hopkins came in for considerable honorable mention. Ample tribute was paid the power of the press for its influence, particularly the publication which initiated this worthy project. Deserved recognition to farm women, the helpmate in the home, concluded the remarks of nearly every man who received a medal. They modestly gave credit to others.

While all these forces are helpful, the fact remains that the individual intelligence, initiative, industry, character and progressiveness of the farmer and his wife determine their success as farm operators, good neighbors, and citizens. That the Farm Bureau membership roll includes nearly all farmers of this type, at least in Illinois, is the reason for its high standing and record of accomplishment. If the I. A. A. is a strong state farm organization, it is because Farm Bureau members made it so.

The organization can develop leadership, demonstrate and teach successful practices. It cannot change innate qualities that determine success. The high average of intelligence on Illinois farms is reflected not alone in the efficiency with which these farms are operated. It is revealed also in the successful organizations and co-operatives they have created here. It is an axiom that democratic government reflects the ability and intelligence of the voting citizens who make it. The same is true of organizations be they agricultural or otherwise. The organization doesn't make the man. The man makes the organization.

This Issue and Next

THE insurance services offered the Farm Bureau members of Illinois are presented in a little greater detail in this issue than usual. Each company has attempted to tell its story. Each has a story to tell and we are proud to say it is a story of achievement. The accomplishments of Country Life, the Illinois Agricultural Mutual, and the Farmers' Mutual Reinsurance Company in making available insurance at cost in farmer owned and controlled companies have been phenomenal. These enterprises are true co-operatives no less than co-operative marketing projects. They differ only in that they relate to buying rather than selling.

Farm Bureau leadership recognizes that the greatest opportunity for farmer self-help lies in the marketing field. It also realizes that success in co-operative marketing is achieved with greater difficulty and depends largely on farmers' experience and capacity to work together. For this reason progress in marketing, particularly centralized marketing, has been less rapid. With renewed federal interest in helping agriculture attack the most difficult phase of the marketing question, namely, surplus control, the outlook appears brighter. The best efforts of the I. A. A. next year as in 1929 will be directed toward developing marketing activities. And so we will start the new year with an issue of the RECORD devoted largely to marketing and organization.

Coming Up

MEMBERSHIP in the Farm Bureau and Illinois Agricultural Association is on the upturn as is evidenced by the fact that more than 35 counties showed increases this year compared with the previous three-year period. Reports are coming in constantly that Farm Bureau morale and sentiment the state over was never stronger since the post-war deflation period. Under such conditions, the job of building a larger state organization becomes merely a mechanical one. The substantial increases obtained in some counties like Champaign, Williamson, Vermilion, McLean, and others bears out this point. When membership is given prominence as a year 'round project a steady increase invariably results. Farm Bureau leaders are coming to appreciate this fact, judging from the gains made this year.

Cause for Optimism

THE most inspiring sight we saw during International week was not the splendid exhibits of blooded livestock out on the tan bark, but an army of Four-H club boys and girls more than 1000 strong gathered from almost every state in the Union.

A great sea of green and white caps bearing the clover leaf insignia, rosy cheeks and happy faces greeted us as we came upon the annual banquet given the winners from all the states in one of Chicago's loop hotels.

There was a spectacle that can't be duplicated anywhere in the world except at the annual boys and girls club congress. To hear these youngsters tell their experiences, their accomplishments unafraidly, enthusiastically, with well chosen words while facing large audiences is impressive. What a fine training for future responsibilities. The hope of agriculture of the country is that the best of them can be kept on the farm.

Boys and girls club work is doing more to develop a self-confident, self-respecting, clear-thinking and right-living farm leadership for the future than any other single force in rural life. The livestock and crops they grow, the prizes they win—these are all secondary. The important things are the lesson taught, the character developed, the life inspired by achievement. The fact that there were 16,000 such boys and girls in Illinois this year is cause for being optimistic over the future of agriculture in the state.

Tune in on the I. A. A. Forum from Station WLS every Tuesday night at 6:30 p. m., Central Standard Time.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (264 meters) is broadcast between 12:00 and 12:20 p. m., Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

AN address by R. W. Blackburn, president of the California Farm Bureau Federation, is scheduled for the I. A. A. Forum program from WLS on Tuesday night, Dec. 10. Mr. Blackburn has been invited to discuss some of the activities of his State Farm Bureau together with farm problems facing organized agriculture on the Pacific Coast.

"When Dairymen Work Together" was the subject of an interesting one-act playlet broadcast by Wilfred Show, Herman Keil, and John Hagenstoz of the Illinois Milk Producers' Association at Peoria, and A. D. Lynch of the I. A. A. on Tuesday night, November 26. The play dramatized marketing conditions at Peoria before and after this collective bargaining association was organized.

"Insurance Needs of the Farmer" was the subject discussed on the I. A. A. Forum program Tuesday night, Dec. 3. A special Country Life program during which news of the December campaign was broadcast, came on the air from WLS at 8:30 p. m. the same night.

Master Farmers All Farm Bureau Members

EVERY one of the 1929 Master Farmers honored by Prairie Farmer this year is a Farm Bureau member. Most of them are prominent in Farm Bureau work in their respective counties. Frederick W. Boebel of Naperville, one of the 19, is president of the DuPage County Farm Bureau.

The men who were honored at the annual Master Farmer banquet on the night of December 2 at the Stevens Hotel, Chicago, are as follows: Frank R. Hubert, Saybrook, McLean County; Clint Corrington, New Berlin, Sangamon; Frank L. Stout, Chatham, Sangamon; W. D. Mobley, Mt. Sterling, Brown; L. D. Armstrong, Monmouth, Warren; H. D. Lantz, Bushnell, McDonough; W. C. Harris, Aledo, Mercer; John P. Hanna, Geneseo, Henry; W. H. Lowe, Aroma Park, Kankakee; Carl F. Frey, Gilman, Iroquois; Dale Willard, Rossville, Vermilion; Chester Jackson, Joy, Mercer; F. I. Smucker, Tiskilwa, Bureau; B. W. Rocke, Tiskilwa, Bureau; Frank V. Wilson, Edgewod, Effingham; Otto Berlage, Galena, JoDaviess; Richard T. Hall, Bradford, Stark; Frederick W. Boebel, Naperville, DuPage; and J. W. Hemingway, Oregon, Ogle County.

These men were chosen not only because they are proficient in their profession, but also because they were active in community service.

"The Producers is the farmer's own company for the marketing of livestock and it is his duty to support it." John F. Chambers, Godfrey.

TO CHAMPION JUDGE

This beautiful plaque in the form of a shield contributed by the Illinois Agricultural Association will hang in the agricultural college at the University of Illinois in honor of the high man from Illinois in the annual college livestock judging contest held during the International Livestock Exposition at Chicago. Ample space is provided for engraving each year the name of the winner.

Tax Work Important In I. A. A. '29 Program

Reform in Revenue Legislation Sought Early In Year

THE year now closing saw further progress in efforts by the I. A. A. to bring about needed changes in the revenue system of Illinois.

The department of taxation spent a great deal of time early in 1929 on tax legislation introduced in the 56th general assembly at Springfield. The state income tax bill was the chief revenue measure sponsored. The bill passed in the senate and lacked only a few votes of passing in the House. A complete story of that effort was presented in the special legislative issue last August. It is apparent from newspaper comments that the public is coming to recognize the fact that the general property tax must be revised and supplemented with a tax on incomes.

Test Valuations

The department continued its work during the year in checking assessed valuations in a number of downstate counties. Tests of valuations were made in such counties as Franklin, Williamson, St. Clair, Effingham, Henry, Warren, Hardin, Pope, and Scott. An interesting study of land tax valuations was made in LaSalle county comparing the assessed valuations on different types of soil with the soil map of the county. This study showed considerable variation in the assessed valuations on farms having the same type of soil.

Director John Watson was called to Iowa and Utah to testify in hearings before state legislative and revenue commissions on tax reform legislation in those states. Orders of reassessment were made in Williamson and Franklin counties by the State Tax Commission following information presented by the local Farm Bureaus and the I. A. A. showing gross inequalities in assessments.

Banquet 4-H Champions

BOYS' and girls' club work is laying the foundation for greater progress in the coming generation by the development of an able, clear thinking and right living farm citizenship.

This was the keynote voiced by speakers at the annual banquet given to the champions of the Illinois 4-H clubs by the I. A. A. in the Auditorium Hotel, Chicago, December 4.

"To know that there are 16,000 Illinois boys and girls engaged in this great enterprise is inspiring," President Earl C. Smith said in congratulating the champions. "Developing a leadership capable of solving the problems of the future is more important than anything else. If we do that well we need not fear that agriculture will not achieve equality and its rightful place in the economic life of the nation."

In a few well-chosen remarks Prof. W. H. Smith of the University of Illinois emphasized the fact that the 4-H club champions have only begun their work, that their achievements are not the end but only the beginning of future efforts toward greater things. Prof. Smith is hopeful that club work may be so developed in the state that there will be as many boys and girls in 4-H Clubs as there are Farm Bureau members.

Nancy Grossboll and Homer Mendenhall spoke most ably for the 4-H club members expressing their appreciation for the honors bestowed upon them. Ray E. Miller, director of livestock marketing for the I. A. A., E. I. Pilchard and Miss Mary McKee, state club leaders, presented the medals.

The full list of Illinois members follows: Nancy Grossboll, Menard, clothing demonstration; Mary Jeanette Irwin, Menard, clothing demonstration; Irene Paust, Madison, clothing judging; Edna Eberhart, Madison, clothing judging; Enid Beal, Henderson, foods demonstration; Mary Louise Duke, Henderson, foods demonstration; Evelyn Matteson, Grundy, style show; Jean Pyatt, Grundy, outfit; Lucille Pifer, Edwards, health; Mona Bedford, Sangamon, first year clothing; Helen Sipp, Peoria, second year clothing; Belinda Hafenrichter, Will, third year clothing; Bessie Courtright, Wayne, meal planning; Joy Hardy, Hancock, room improvement; Freda Stockhecke, Adams, baking; Verna Murray, Richland, canning; Lester Eaves, Pulaski, strawberry; Paul Archer, Sangamon, corn; Lewis Butzow, Iroquois, ewe; Homer Edwards, Lake, flock management; Kenneth Beaird, Fulton, wether; Lester Biehler, Shelby, dairy heifer; Thomas Chamberlain, Coles, dairy cow; Carl Mast, Adams, gilt; Keith Brown, Knox, baby beef; Bert McKee, Marshall-Putnam, litter; Ward Harris, Randolph, alfalfa; Frank Bower, Richland, first year poultry; Ralph Parlier, Macon, dairy calf; Lloyd Inslee, Sangamon, barrow; Chelsea Marx, McLean, garden; Ferdinand Basting, McLean, health; Albert Kamm, Douglas, Alfred Kamm, Douglas, Robert Howey, Douglas, livestock judging team; Virgil Laible, Marshall-Putnam, livestock judging; Lloyd Espel, Bureau, Clyde Conley, Bureau, Loren Hoge, Bureau, dairy judging team; Tyron Roebrook, Lee, Lloyd Breisch, Lee, Arthur Schick, Lee, meat judging team; Joseph Boyle, Marshall-Putnam, demonstration team; and Joseph Bumgarner, Marshall-Putnam, demonstration team.

The Illinois delegation to the National Club Camp, Washington, D. C., are as follows: Casper Mast, Jr., Adams; Homer Mendenhall, Sangamon; Mildred Grossboll, Menard; and Lucile Gochanour, LaSalle.

Tune in on the I. A. A. Forum from Station WLS every Tuesday night at 6:30 p. m., Central Standard Time.

Reform in Revenue Legislation Sought Early In Year

THE year now closing saw further progress in efforts by the I. A. A. to bring about needed changes in the revenue system of Illinois.

The department of taxation spent a great deal of time early in 1929 on tax legislation introduced in the 56th general assembly at Springfield. The state income tax bill was the chief revenue measure sponsored. The bill passed in the senate and lacked only a few votes of passing in the House. A complete story of that effort was presented in the special legislative issue last August. It is apparent from newspaper comments that the public is coming to recognize the fact that the general property tax must be revised and supplemented with a tax on incomes.

Test Valuations

The department continued its work during the year in checking assessed valuations in a number of downstate counties. Tests of valuations were made in such counties as Franklin, Williamson, St. Clair, Effingham, Henry, Warren, Hardin, Pope, and Scott. An interesting study of land tax valuations was made in LaSalle county comparing the assessed valuations on different types of soil with the soil map of the county. This study showed considerable variation in the assessed valuations on farms having the same type of soil.

Director John Watson was called to Iowa and Utah to testify in hearings before state legislative and revenue commissions on tax reform legislation in those states. Orders of reassessment were made in Williamson and Franklin counties by the State Tax Commission following information presented by the local Farm Bureaus and the I. A. A. showing gross inequalities in assessments.

Banquet 4-H Champions

BOYS' and girls' club work is laying the foundation for greater progress in the coming generation by the development of an able, clear thinking and right living farm citizenship.

This was the keynote voiced by speakers at the annual banquet given to the champions of the Illinois 4-H clubs by the I. A. A. in the Auditorium Hotel, Chicago, December 4.

"To know that there are 16,000 Illinois boys and girls engaged in this great enterprise is inspiring," President Earl C. Smith said in congratulating the champions. "Developing a leadership capable of solving the problems of the future is more important than anything else. If we do that well we need not fear that agriculture will not achieve equality and its rightful place in the economic life of the nation."

In a few well-chosen remarks Prof. W. H. Smith of the University of Illinois emphasized the fact that the 4-H club champions have only begun their work, that their achievements are not the end but only the beginning of future efforts toward greater things. Prof. Smith is hopeful that club work may be so developed in the state that there will be as many boys and girls in 4-H Clubs as there are Farm Bureau members.

Nancy Grossboll and Homer Mendenhall spoke most ably for the 4-H club members expressing their appreciation for the honors bestowed upon them. Ray E. Miller, director of livestock marketing for the I. A. A., I. I. Pilchard and Miss Mary McKee, state club leaders, presented the medals.

The full list of Illinois members follows: Nancy Grossboll, Menard, clothing demonstration; Mary Jeanette Irwin, Menard, clothing demonstration; Irene Paust, Madison, clothing judging; Edna Eberhart, Madison, clothing judging; Enid Beal, Henderson, foods demonstration; Mary Louise Duke, Henderson, foods demonstration; Evelyn Matteson, Grundy, style show; Jean Pyatt, Grundy, outfit; Lucille Pifer, Edwards, health; Mona Bedford, Sangamon, first year clothing; Helen Sipp, Peoria, second year clothing; Belinda Hatenrichter, Will, third year clothing; Bessie Courtright, Wayne, meal planning; Joy Hardy, Hancock, room improvement; Freda Stockhecke, Adams, baking; Verna Murray, Richland, canning; Lester Eaves, Pulaski, strawberry; Paul Archer, Sangamon, corn; Lewis Butzow, Iroquois, ewe; Homer Edwards, Lake, flock management; Kenneth Beaird, Fulton, wether; Lester Biehler, Shelby, dairy heifer; Thomas Chamberlain, Cook, dairy cow; Carl Mast, Adams, gilt; Keith Brown, Knox, baby beef; Bert McKee, Marshall-Putnam, litter; Ward Harris, Randolph, alfalfa; Frank Bower, Richland, first year poultry; Ralph Parlier, Macon, dairy calf; Lloyd Inslee, Sangamon, barrow; Chelsea Marx, McLean, garden; Ferdinand Basting, McLean, health; Albert Kamm, Douglas, Alfred Kamm, Douglas, Robert Howey, Douglas, livestock judging team; Virgil Laible, Marshall-Putnam, livestock judging; Lloyd Espel, Bureau, Clyde Conley, Bureau, Loren Hoge, Bureau, dairy judging team; Tyron Rosbrook, Lee, Lloyd Breisch, Lee, Arthur Schick, Lee, meat judging team; Joseph Boyle, Marshall-Putnam, demonstration team; and Joseph Bumgarner, Marshall-Putnam, demonstration team.

The Illinois delegation to the National Club Camp, Washington, D. C., are as follows: Casper Mast, Jr., Adams; Homer Mendenhall, Sangamon; Mildred Grossboll, Menard; and Lucile Gochanour, LaSalle.

Transportation Service Covers Wide Field in '29

Representation In Freight Rate and Utility Questions Of Prime Importance

A CONTINUATION of the many services to members in transportation and utility rates, claims, and power line route problems marked the work of the I. A. A. Transportation Department in 1929.

The records show that groups of farmers were helped in more than a score of rural electrification cases. Many of these had to do with rates, others to service and arrangements with utility companies to take over farmer-owned transmission lines. Substantial refunds were obtained in several instances where rate adjustments were made.

L. J. Quasey
Transportation

Telephone Cases

A number of counties were represented before the Illinois Commerce Commission in telephone cases. An annual increase of $4,212 to farm telephone users in Logan county was prevented when facts were brought before the commission showing that the proposed raise demanded by the company was unwarranted. An annual increase of $1,000 to farm telephone users in Boone county likewise was averted.

Loss and damage claims collected from Jan. 1 to Nov. 1 by the Department aggregated slightly more than $28,000.

Arguments were prepared for presentation before the Interstate Commerce Commission in the western livestock freight rate case in which the carriers asked for increases of from 15 to 20 percent in rates. This case is still pending.

Pipe Line Case

Assistance was given members in a number of central Illinois counties toward protecting their rights and interests in connection with the Texas Empire pipe line which enters Illinois from the southwest oil fields, crossing farm lands in a northeasterly direction.

Two power line cases in which the Department has been active namely, the Superpower company high line from Kewanee to Dixon, and the Dixon-Freeport line are now up before the Commission. Farm Bureau members in four counties are interested in the outcome. In some instances the utility companies have charted their routes across the best farm lands without due regard to the interests of owners of such valuable lands. The I. A. A. has intervened in several cases to establish routes more acceptable to the landowners, and secure adequate compensation for damages to farm lands.

Service Problems

Proposed abandonment of railroad freight and passenger service in several parts of the state were postponed or prevented when it was shown that farmers and others residing in such localities would be greatly damaged thereby. The Illinois Central has deferred discontinuation of adequate passenger and express service between Centralia and Champaign pending the working out of a satisfactory solution to the problem. A similar case involving the Rock Island Southern Railway landowners and shippers in Mercer county is now under consideration by the State Commerce Commission. Maintaining the necessary contacts with carriers, public utilities, and those having to do with public utility and transportation matters is an important and valuable service to the farmers of Illinois.

Farm Bureau in Livestock Hearing

FINAL oral argument before the Interstate Commerce Commission as a whole was made at Washington recently in the western livestock rate case.

L. J. Quasey, director of transportation, represented the I. A. A. at the hearing. O. W. Sandburg of the American Farm Bureau Federation, and Fred S. Jackson, special attorney, were other Farm Bureau representatives who took a leading part in opposing substantial increases in freight rates asked by the railroads.

The written argument prepared by the I. A. A. and Farm Bureau representatives proved conclusively that livestock production in the corn belt was not enjoying the great prosperity claimed for it by the railroads, and at the same time clearly revealed that the western carriers are making more money than they have made for many years.

Eight representative western carriers, for example, show an increase of 22 per cent in net income for the first seven months of 1929 compared with a similar period in 1928.

It was shown that the rate of progression in livestock freight rates suggested by the examiner was too high. The examiner recommended substantial increases in short haul rates and decreases in long haul rates. Ninety per cent of the livestock traffic in the western territory comes from short hauls.

Several producer representatives stated that the examiner ignored the Hoch-Smith resolution and granted relief to the carriers rather than to the farmers.

The recent hearing at Washington concluded a series of 12 similar meetings held during the past two years in different parts of the United States. It is likely that a decision will be forthcoming from the Commission within the next three to four months.

If the proposed increases are granted, Illinois livestock growers will pay substantially higher freight rates.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL MUTUAL INSURANCE COMPANY

TAKE notice that the annual meeting of the members of the Illinois Agricultural Mutual Insurance Company will be held on Wednesday, the 29th day of January, 1930, at the hour of 1:00 o'clock P. M., at the Abraham Lincoln Hotel, Springfield, Illinois, to elect directors, receive, and, if approved, confirm the report of the board of directors of the company for the fiscal year ending December 31, 1929; and to consider, and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.
Dated at Chicago, Illinois,
December 2, 1929.

GEORGE F. TULLOCK,
Secretary.

Power Line Routes Are Reviewed By Commission

Farmers Demand High Lines Be Routed To Protect Best Lands Against Damage

A FURTHER hearing over the proposed route of the Superpower company high line from Dixon to Kawanee was held before the State Commerce Commission at Springfield on Dec. 4.

While the outcome of the controversy between the utility company and land owners along the proposed route is not yet learned, an adjustment of differences undoubtedly will be made.

Landowners complain that utility representatives entered their farms without permission, tramped down corn and other crops, and damaged fences while surveying for the proposed route. In attempting a second survey over a little different route, surveyors complain that they were driven off several farms.

Want Original Route

The utility company insists on standing by its original proposal which the Farm Bureau committees of landowners will not accept because valuable farm lands will be damaged by a high-voltage line supported by great steel towers planted out in the middle of cultivated fields.

Farmers hold that the route should follow roads and permanent fence lines wherever possible so as to minimize damages to the best lands. They feel that compensation offered heretofore has not been adequate to reimburse them for the permanent damage and inconvenience suffered.

A pole line is contemplated between Dixon and Freeport and committees have been appointed by the interested Farm Bureaus to see that the interests of their constitutents are protected.

Rock Island Southern Ry. Asked to Resume Service

A HEARING to bring about resumption of freight service on the Rock Island Southern Railroad south of Gilchrist to Norwood and Burgess in western Illinois was held before the Illinois Commerce Commission in Chicago on December 6. The transportation department of the Illinois Agricultural Association, the Mercer County Farm Bureau, the Warren-Henderson Oil Company, and others joined in the plea.

Bridges Need Repair

Service through Burgess and Norwood south to Monmouth was abandoned following the burning of a bridge north of Burgess in May, 1928. Since that time these communities have been without rail transportation necessitating long hauls of farm products over dirt roads. More than 50 sections of land are damaged by removal of train service, while grain elevators and livestock shipping associations in this community are subjected to heavy transportation costs.

Engineers for the railroad assert that the expenditure of at least $25,000 will be required to repair the Pope Creek bridge, in addition to expenses on other bridges along the right-of-way.

"The more livestock the Producers are shipped the better service they can give the farmer." Christ Bunte, Prairietown.

Here is an inside view of the offices of the Farmers Mutual Reinsurance Company Manager J. H. Kelker is seen at the rear

At Your Service

THE Farmers Mutual Reinsurance Company, organized in 1924, under the insurance laws of Illinois, is at your service in providing safe protection against fire, lightning, windstorm, cyclone and tornado at the lowest possible cost. Through a co-operative arrangement with the Illinois Agricultural Association, overhead is kept at a minimum. Efficiency in operation is the watchword.

ALL rates in the Farmers Mutual are based on classification of property. The policyholder is given the benefit of fire prevention measures such as lightning rods, fire proof roofs, fire extinguishers, fire proof walls, fire hose attached, and ladder permanently attached to provide easy access to the roof of the building.

THE Farmers Mutual makes it possible to secure all your fire, lightning, windstorm, cyclone and tornado, and farm crop hail insurance on a mutual at cost basis. No risk is too large.

WE are organized for service, not for profit. Our object is to co-operate with and supplement the fine service now being given by local township and county mutuals.

THE company has more than $24,000,000 of insurance in force. Its larger risks are in turn reinsured in a company with more than $1,000,000 of assets.

FARM crop hail insurance was provided this year at a cost of only $20 per $1000 of insurance. This represents a saving of $10 to $15 per $1000 compared with the cost of similar protection in other companies.

Auto Insurance—A Farm Bureau Service

PROTECTING Farm Bureau members against loss in their travels by auto and truck over the highways and by-ways of Illinois is the service rendered by the Illinois Agricultural Mutual Insurance Co.

Inaugurated only two and one-half years ago to provide auto insurance at cost for members, this Farm Bureau owned and controlled company has grown consistently until today it has nearly 20,000 members. This growth means satisfied policy holders and demonstrates the confidence members have in their organization.

M. E. Roberts
Field Service

The Company today has assets of almost $500,000 invested mostly in federal land bank notes, U. S. treasury notes, treasury certificates, and Liberty Loan bonds. These represent the premium deposit and surplus held in trust for the policy holders.

The Illinois Agricultural Service Co. is the corporate manager, A. E. Richardson the active manager. Acquisition and field service is under the supervision of V. Vaniman, director of insurance service for the Illinois Agricultural Association. M. E. Roberts of Edinburg assists in field work in central Illinois, and G. R. Williams of Salem in Southern Illinois.

The fact that the company has nearly doubled in assets and policy holders during the past year has necessitated an increase in office workers charged with the details of maintaining prompt, efficient service. A short sketch supplemented with a few pictures will help acquaint each member with the personnel in charge of the various divisions of work.

A. E. Richardson
Manager

Without the Farm Bureau organization the company could not have grown to its present size in only two and one half years. The success it has achieved is due to farmers' ability to work together, to do things for themselves. Every accomplishment inspires confidence and prepares the way for the more difficult tasks ahead.

The responsibility for insurance acquisition for the Illinois Agricultural Mutual now rests largely with the general insurance agents in the counties. That they have been active in the past year is revealed in the steady increase in number of policies since January 1.

More than one-third of the Farm Bureau members in Illinois have their automobiles and trucks insured in their own company. This record made in about two and one-half years is a tribute to the service given and ample proof of the demand for a Farm Bureau company.

G. R. Williams
Field Service

"I certainly appreciate my policy in the Farm Bureau company. Every member, it seems to me, ought to use his organization and its many kinds of service," wrote one satisfied policy holder. "I am telling my neighbors how much I appreciate insurance at cost in my own company, the Illinois Agricultural Mutual."

Letters of this kind have been numerous. They indicate that members are learning to use their organization, are appreciative of the service available.

The experience farmers gain through collective effort in making such services available to themselves at minimum cost, is cumulative and will fit them for the more difficult task of co-operative selling of farm products.

Writes Most Policies

HIGH man for the year in the number of auto policies written in the Illinois Agricultural Mutual is the record established by C. E. Hopkins, general agent in Livingston county. Mr. Hopkins served for a number of years as associate agricultural adviser before getting into the insurance field. While Livingston county is not yet in the upper crust in the percentage of members holding auto policies, it is coming to the front rapidly.

C. E. Hopkins

Following are the 10 highest counties in the percentage of Farm Bureau members holding policies in the company. The fact that several are over the 100 per cent mark means that nearly every member has a policy and that many have two or more cars or trucks insured in their own company.

DuPage	131%	Clinton	64%
Cook	102%	Williamson	63%
Winnebago	78%	Boone	59%
Will	73%	LaSalle	58%
Wabash	71%	Montgomery	56%

Frank Billings handles the claims in the office in co-operation with the local adjusters who are located in all the counties where policies are written. Evelyn J. Ernst is secretary to Manager A. E. Richardson, in the automobile division. Helen Ekberg is in charge of the Employers' Liability records and accounts, and Margaret Lauritzen supervises preparation of assessment notices.

Accident Prevention

By V. Vaniman

ACCIDENT prevention is a chief concern of the Illinois Agricultural Mutual because that is the surest way to low cost.

All auto accidents are regrettable—most of them preventable. Invariably the other fellow is at fault. "Why didn't the fool, etc., etc.," is often heard after an accident. Drive carefully you might meet a fool. Drive carelessly and two fools might meet with sad results.

"If I had known," said the man, about the gun that he thought wasn't loaded. "Bright lights were coming toward me and I couldn't see." is an excuse sometimes given for an accident. Isn't it good advice, when driving a car, to slow down if you can't see what is ahead? Stepping on the gas when you can't see what is ahead is one way to keep from growing old.

Good drivers don't take any more chances than necessary. They know it may be possible to be "dead right" and also be dead a long time.

Because people *think*, they become more intelligent. The thinking auto driver knows that there is the possibility of an accident, even while driving with care; consequently he avoids taking any unnecessary chances, and gives due consideration to the thought—"How can I avoid accidents?"

Forms of Auto Insurance

ALL forms of coverage to protect the farmer against loss by reason of the ownership or operation of his car are written.

Public liability which protects him against claims made by one who might be or claim to be injured by his car can be had in amounts ranging from $5,000 to $100,000.

Property damage which protects the farmer against claims made by other people for damaged property is a very popular form of coverage.

Collision insurance which protects the owner against loss by reason of the damage to his own car is also very popular for the reason that the cost of this insurance is so very reasonable. For example, in the last two and one-half years this form of coverage has cost the farmer $1.40 on a Ford.

Fire, theft, windstorm and theft of spare tires when locked to the car insurance is also available. In fact, most all of the policy holders of this Company carry a full coverage policy on their cars.

Over 4,600 claims have been filed with the company and prompt settlement has been the policy of this co-operative insurance project of the Illinois Agricultural Association. Checks ranging from 40c to $7,700 have been issued. No claim is too large or too small to receive careful attention.

Employers' Liability Insurance

ON September 1, 1929 the company made available employers' liability insurance for Farm Bureau members. The policy protects farm employers against claims for damages made against them by their hired help. Illinois farmers realize that while they do not come under the State Compensation Act, yet they are subject to the common law liability of negligence. For this reason there has been an appreciable demand for this type of insurance.

While insurance experience in this field is limited and no effort is being made to "sell" this service, that it is appreciated is seen by the fact that more than 1000 Farm Bureau members have taken out employers' liability policies. This branch of the company is expected to have a steady growth as farmers become aware of the need for this protection.

An interior view of the home office showing employees of the Illinois Agricultural Mutual Insurance Company. Office space was expanded recently when the walls to the rear were removed to provide additional room in an adjoining office.

Auto Insurance—A Farm Bureau Service

PROTECTING Farm Bureau members against loss in their travels by auto and truck over the highways and by-ways of Illinois is the service tendered by the Illinois Agricultural Mutual Insurance Co.

Inaugurated only two and one-half years ago to provide auto insurance at cost for members, this Farm Bureau owned and controlled company has grown consistently until today it has nearly 20,000 members. By V. Vaniman

ACCIDENT prevention is a chief concern of the Illinois Agricultural Mutual because that is the surest way to low cost.

All auto accidents are regrettable—most of them preventable. Invariably the other fellow is at fault. "Why didn't the fool, etc., etc.," is often heard after an accident. Drive carefully you might meet a fool. Drive carelessly and two fools might meet with sad results.

"If I had known," said the man, about the gun that he thought wasn't loaded. "Bright lights were coming toward me and I couldn't see," is an excuse sometimes given for an accident. Isn't it good advice, when driving a car, to slow down if you can't see what is ahead? Stepping on the gas when you can't see what is ahead is one way to keep from growing old.

Good drivers don't take any more chances than necessary. They know it may be possible to be "dead right" and also be dead a long time.

Because people *think*, they become more intelligent. The thinking auto driver knows that there is the possibility of an accident, even while driving with care; consequently he avoids taking any unnecessary chances, and gives due consideration to the thought—"How can I avoid accidents?"

Forms of Auto Insurance

ALL forms of coverage to protect the farmer against loss by reason of the ownership or operation of his car are written.

Public liability which protects him against claims made by one who might be or claim to be injured by his car can be had in amounts ranging from $5,000 to $100,000.

Property damage which protects the farmer against claims made by other people for damaged property is a very popular form of coverage.

Collision insurance which protects the owner against loss by reason of the damage to his own car is also very popular for the reason that the cost of this insurance is so very reasonable. For example, in the last two and one-half years this form of coverage has cost the farmer $1.40 on a Ford.

Fire, theft, windstorm and theft of spare tires when locked to the car insurance is also available. In fact, most all of the policy holders of this Company carry a full coverage policy on their cars.

Over 4,600 claims have been filed with the company and prompt settlement has been the policy of this co-operative insurance project of the Illinois Agricultural Association. Checks ranging from 40c to $7,700 have been issued. No claim is too large or too small to receive careful attention.

Employers' Liability Insurance

ON September 1, 1924 the company made available employers' liability insurance for Farm Bureau members. The policy protects farm employers against claims for damages made against them by their hired help. Illinois farmers realize that while they do not come under the State Compensation Act, yet they are subject to the common law liability of negligence. For this reason there has been an appreciable demand for this type of insurance.

While insurance experience in this field is limited and no effort is being made to "sell" this service, that it is appreciated is seen by the fact that more than 1000 Farm Bureau members have taken out employers' liability policies. This branch of the company is expected to have a steady growth as farmers become aware of the need for this protection.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second-class matter at post-office at Mount Morris, Ill., Oct. 20, 1925, under the Act of Mar. 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925.

Number 1 | January, 1930 | Volume 8

Sectional Conferences Are Always Interesting

Five Thursday Afternoon Meetings Planned

FIVE sectional conferences will be held between 1:00 and 4:00 P. M. on Thursday afternoon, Jan. 30. These will be devoted to Marketing, Public Relations, Organization and Information, Financial Business Service, and Home and Community.

The marketing conference promises to be of unusual interest in view of the rapid development in that field during recent months. Members of the Federal Farm Board have been invited to attend the convention and any who come will be given an opportunity to speak either during the marketing conference or at some other session of the convention.

Problems of organization will be given a prominent place at the Organization-Information conference. There will be a short discussion on publicity.

Program For Women

Mrs. Homer Johnson, president of the Illinois Home Bureau Federation, has framed an elaborate program for the women at the Home and Community conference. This program is presented more fully elsewhere.

The business and commercial activities of the I. A. A. and associated companies naturally will be considered at the Financial Business Service meeting.

Legislation, taxation, and transportation problems will be the drawing card for those who attend the Public Relations conference.

In past years many counties have followed the practice of organizing their delegations so that at least one from each county attended the various conferences. This practice is resulting in keeping every county in close touch with problems before the state organization and with experiences and developments in other counties.

Illinois Agricultural Mutual Ins. Co.

"Received your check today and I am well satisfied. I appreciate the promptness in the way you handled this matter."

C. J. Talbott,
Kirkwood, Warren County, Ill.

LAST CALL

This is the last call for reservations for rooms, banquet and luncheon tickets for the I. A. A. annual meeting. If you have not already done so, write the Sangamon County Farm Bureau, Springfield, at once. Send check with your order for dinner and luncheon reservations. Tickets are $1.50 each.

I. A. C. A. Meeting

The annual meeting of the Illinois Agricultural Co-operatives Association on January 29 will convene at 1:00 P. M., as indicated in the program on page 2.

Talks will be made by George Jewett, president of the Transportation Bank of Chicago, and Harrison Fahrnkopf, director of Grain Marketing for the I. A. A. President George L. Potter of Graymont will preside. Following the talks there will be an open discussion on three questions, as follows:

1. Natural fiscal years.
2. Preliminary checking to utilize spare time of the staff.
3. Organization work by member companies.

Following the reports of the various committees, directors will be elected for the ensuing year.

Delegates!

Soon after their arrival voting delegates should go to the east end of the lobby in the Abraham Lincoln hotel and obtain their credentials. All accredited delegates will be provided with free tickets for the banquet on Thursday night and for the luncheon the following day.

Lively Baseball Meet Expected At Capitol

A LIVELY time is expected at the annual meeting of the Illinois Farm Bureau Baseball League, Wednesday morning, Jan. 29.

While the League operated more smoothly with its 21 member teams last season than ever before, a number of problems were taken before the state arbitration committee for final settlement. More definite legislation undoubtedly will be asked for at the coming meeting to clear up misunderstandings and moot questions.

For the first time in its history the League voted to compel deposits of $25 each from the various teams to insure fulfilment of scheduled games. Failure to report for a regularly scheduled game, or to make satisfactory postponement arrangements, would have resulted in a forfeiture of the $25 deposit. This provision had a salutary affect in making all teams adhere closely to their schedules.

As in past years eligibility, the method of playing off the semi-final and final games, umpiring, and interpretation of rules and by-laws are questions expected to come before the business session. The entire meeting will be devoted to League business. No speaker has been scheduled.

Election Directors

The nomination of I. A. A. executive committeemen from the even-numbered districts will be held on Thursday afternoon at 4:00 P. M. The place for holding each district conference will be found on page 2. Delegates from the odd-numbered districts will hold short business sessions.

Following are the executive committeemen from the even numbered districts: 12th, G. F. Tullock; 14th, M. G. Lambert; 16th, A. R. Wright; 18th, R. F. Karr; 20th, Charles S. Black; 22nd, Frank Oexner; and 24th, Charles Marshall. The executive committeemen are elected for two-year terms. The election will take place after the dinner Thursday night.

Harry C. Butcher recently left the National Fertilizer Association to accept a job as Washington representative of the Columbia Broadcasting Company.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

The Cover

THE age of collective action and co-operation in merchandising the products of the farm is here. Farmers are sitting around the table today, as other groups long have done, bargaining collectively for a fair price; learning why there is so wide a spread between prices received by the producer and those paid by the consumer.

Organization and control of farm commodities by the producer is sending the buyer to the seller asking "how much will you take?" Under the old system it was the producer asking "how much will you give?" The organized farmer of today has a voice in the sale of his product. He is learning about markets, about surplus, what he must do to stabilize prices at a profitable level. He is placing himself in a position to profit by that knowledge.

The group of organized McDonough county cream producers opening bids for their annual output, shown on the cover page, illustrates the new order of things. With local co-operatives such as this one as a foundation will rise eventually the super-structure of state and national sales organizations with keen-minded representatives sitting in the markets of the world merchandising the commodities of the farm in a business-like way. The farmer is a manufacturer. He has developed a marvellously efficient production department. Now he is determined to build a sales organization capable of answering his needs.

Safeguarding Co-operation

MORE thought and effort toward developing co-operative marketing have been given by the Illinois Agricultural Association in the past 10 years than to any other single activity. The fact that there are now five distinct departments in the I. A. A. devoted to marketing reveals the emphasis placed upon this important work. Therefore it is entirely proper that this issue of the RECORD present more or less prominently the Farm Bureaus' marketing activities.

The Farm Bureaus' experiences of the past decade have revealed weaknesses and obstacles to be avoided by every new co-operative venture. If the new co-operative is to have the best chance for success it would be folly if farmers did not capitalize on their greater knowledge and experience using it most effectively in future effort. Perhaps the greatest need of the new co-operative is wise supervision and management by trained men experienced in the peculiar problems of this type of organization. The Illinois Agricultural Association has brought to its staff this kind of talent. It is well equipped to foster and protect the young co-operative against the pitfalls which confront every new organization.

The Farm Bureau and Illinois Agricultural Association have sponsored a large percentage of the co-operatives organized in Illinois since 1919. We cannot sidestep our responsibility for the welfare of these co-operatives; for their fulfilling the claims and promises made for them. The Farm Bureau has no wish to renounce that responsibility. It recognizes the intimate relationship existing between the two. Therefore the I. A. A. has established a policy whereby it retains the privilege of providing the young co-operative with the best it has in the way of service, experience, skill, and judgment.

There is nothing inimical in this policy to the development of full responsibility and leadership among the growers or producers directly interested in the commodity marketed. In fact the training of new leadership in the co-operative marketing field is one of the primary objectives of the I. A. A.-Farm Bureau marketing program. The confidence Illinois farmers have shown repeatedly in their organization must be preserved and protected. Therefore we must work and work hard to make all new ventures sponsored by the Farm Bureau, including co-operatives, succeed.

Champaign County's Challenge

"CHAMPAIGN county is the best county in the state. Therefore we ought to have the biggest Farm Bureau membership," G. C. Williams, one of the county's "go-getters" said at a meeting of 60 local organization leaders at Champaign on Saturday, January 4.

The hearty applause which greeted Williams' statement culminated in a statement authorizing George E. Metzger to announce that Champaign county challenges all comers to a race for the largest county membership in Illinois by Jan. 1, 1931.

The present membership in Champaign county is approximately 1200. McLean county, considerably larger in area has a long lead on Champaign with upwards of 1800 members, but enthusiastic leaders in Champaign county say that the records show approximately 3,460 farmers in the county and that at least 80 to 90 per cent of them should be members of the Farm Bureau. Therefore they are going out to overtake McLean county, to establish themselves as the largest and greatest county Farm Bureau organization in America.

The county has been organized into 22 units, each of which has an assistant director whose job it is to work on organization. The organization directors from 21 of the 22 units attended the meeting on January 4, each accompanied by two additional men who will be charged with the 1930 membership campaign. Champaign county members have adopted a unique plan for building a larger organization and the results obtained in striving for their announced goal will be watched with interest.

Lowden And Hyde Are Outstanding Speakers

Unusual Opportunity To Hear Both At Single Convention

AS WE go to press, plans are nearing completion for the coming convention of the Illinois Agricultural Association and associated companies at Springfield, January 29, 30, 31.

While the speaker for the Friday morning session has not yet been definitely secured an announcement will be made through the newspapers before the opening session.

Ex-Governor Frank O. Lowden is putting the finishing touches on his address to be delivered at the annual banquet on Thursday night. Mr. Lowden is always interesting and thought-provoking. His masterly speech before the recent Farm Bureau convention in Chicago was considered by many the most thorough analysis of the present day agricultural situation, with constructive suggestions for solving its most vexing problems, ever delivered before an American audience. The former governor will have a message that none can afford to miss.

Thinks Independently

Secretary of Agriculture Arthur M. Hyde will make his first appearance before an important gathering of Illinois farmers. He will speak at the luncheon in the Arsenal Friday noon. Secretary Hyde is doing a great deal of independent thinking on agricultural questions. The speeches he has delivered since becoming a member of the Hoover cabinet have been courageous, pointed, and filled with sound thought. More thorough organization of farmers, and control of crop surpluses have been the keynotes of his previous statements. He is using his influence to curb government reclamation projects that only aggravate the surplus question. Visitors and delegates to the I. A. A. meeting may expect to hear an important message from Mr. Hyde, coming as it will after six months' experience with the Agricultural Marketing Act and the Federal Farm Board. Never before have Illinois farmers had opportunity to hear two such outstanding speakers in a single I. A. A. convention.

A number of state officials including Governor Emmerson, and leaders of contemporary organizations have been invited to the convention as guests of the Association. Efforts are being made to secure radio hookups for both Mr. Lowden and Mr. Hyde.

Fourteen out of 19 Master Farmers from the 1929 group in Illinois carry auto insurance policies in the Illinois Agricultural Mutual Insurance Company. The entire 19 are Farm Bureau members.

Serum Association To Meet On Jan. 29

PROBLEMS involved in protection of the Illinois hog crop against cholera and other swine diseases, together with the centralized purchasing of immunization materials will be considered at the annual meeting of the State Farm Bureau Serum Association, January 29, at Springfield. Plans will be formulated for carrying on hog control work in some 70 Illinois counties.

Since the Farm Bureau took an active interest in teaching farmers to vaccinate their pigs and practice swine sanitation, there has been no important outbreak of hog cholera in Illinois. The influence of this project has meant millions of dollars saved to swine growers during the past decade.

At one time hog cholera losses were a serious menace to the swine industry. Today the farmer who vaccinates his pigs with the best serum obtained at minimum prices through the Farm Bureau is not only eliminating one of the hazards in pork production, but also he is securing the needed service at minimum cost. This self-help program is being fostered by the State Farm Bureau Serum Association. It provides another illustration of how farmers can profit through organization.

Country Life

A conference of agents of the Country Life Insurance Company is scheduled for Wednesday morning at 10:00 A. M., January 29, in the Ball Room of the Abraham Lincoln hotel. The general agents will have a banquet that night while all agents including special and general agents will meet at breakfast Thursday morning.

C. J. Gross, I. A. A. executive committeeman from the 19th district, recently retired as president of the Piatt County Farm Bureau.

MARKE

FROM TRADING POST TO MO DE

WE HAVE seen marketing in the middle west develop from the trading post era to the present with its gigantic modern terminals, almost within a lifetime. Under the old system buyer and seller were more nearly on an equal footing. Enterprise was largely individualistic. One man matched his wits against another's. Since then great corporations, mergers, and consolidations have been effected in the field of business. The small enterprise is fast disappearing. Buying and selling have become highly organized but the farmer has lagged behind in organization and now is suffering the consequences.

A RECENT issue of a prominent financial journal listed 393 leading industrial concerns of the United States having net profits for the first nine months in 1929 of $1,397,088,000, an increase of 28.3 per cent over the net income of the first nine months of 1928. Agriculture did not appear in the list. Contrasted with this very impressive record of net earnings the U. S. Department of Agriculture reports that the average farmer increased his net earnings practically nothing for the corresponding period. The same issue of this financial journal which is a review of financial and industrial development during 1929 features the tendency toward mergers and consolidations of industrial concerns everywhere.

THERE is a striking significance in these two facts. When two banks merge or a group of railroads consolidate these actions are termed mergers or consolidations. This tendency on the part of big business has unquestionably been one of the reasons why its earnings record has been so satisfactory.

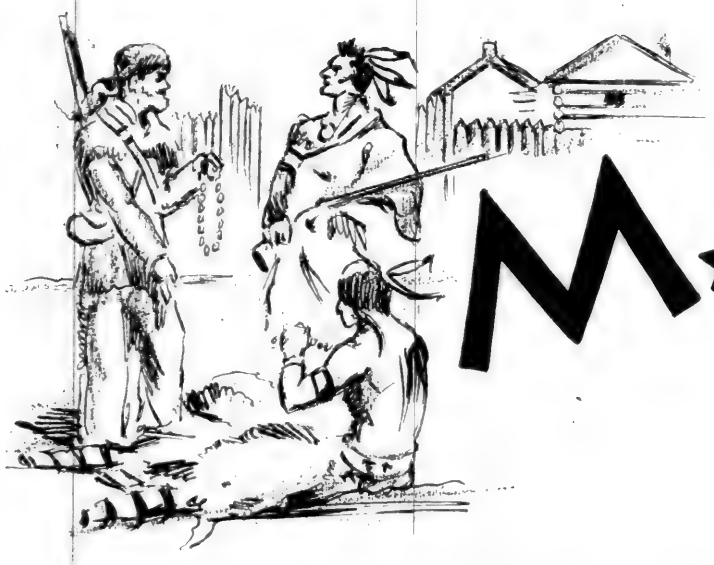
There are two factors that largely determine profit in any business, including agriculture. One is production cost, the other is net selling price. Production cost in agriculture is to a large extent an individual problem. Selling price is not an individual problem. It depends upon organization. Business has helped to solve its selling price problem through organized distribution. Agriculture is just entering this phase of development.

Co-operative marketing is the application of the merger principle to the selling end of the farm business. Industry, labor, and finance have helped to solve the problem of profits by consolidation. Both good business and necessity compel the farmer to do likewise.

DURING recent years the farmer has had reason to congratulate himself upon the great strides

KETING

MODERN TERMINAL MARKETS



that have been made toward applying collective action to his business. The U. S. Department of Agriculture reports that approximately 2,000,000 farmers are members of more than 12,000 co-operatives. From the orange groves of California to the vast whole milk markets of the eastern seaboard farmers are merging their interests into local co-operatives and these in turn are being merged into great bargaining organizations. From the cotton fields of the south to the sweeping wheat fields of the north and northwest producers have recognized the necessity of better marketing methods and have developed efficient distribution machinery. In the corn belt the live stock producers are annually selling through their own organization more than $300,000,000 worth of livestock. For every discouragement or failure there are hundreds of signs of progress and success. The complaints and criticisms of the non-co-operative distribution agencies are being met by the justice of the farmer's ambition to protect his interest and secure for himself and family a fair share of the nation's net income.

MORE efficient distribution of the farmer's products means as much to the consumer as it does to the producer. The consumer has been penalized by the high cost of the prevailing cumbersome and inefficient marketing system. He is joining the farmer in the latter's effort to transport essential food products to him at more reasonable cost.

DURING 1930 and succeeding years the Illinois Agricultural Association will carry on. The different marketing departments of the Association will develop more aggressively than ever their programs. More information about the aims and accomplishments in co-operative marketing will be disseminated. But information, however important, is not sufficient. Members of co-operatives must have understanding. They must be tolerant. Mistakes are made by all new enterprises. Time and experience will perfect co-operative organization and strengthen weaknesses. The member who thinks only of temporary profit, who lacks the vision of the great purposes in co-operative marketing will always be hard to satisfy. There are those who hold the penny so close to the eye that they cannot see the dollar beyond it. We must be patient with them.

Information, understanding, tolerance, personal contact are all essentials but in order to obtain results they must be crystallized into action. Let's have action in 1930.

CENTRALIZED GRAIN MARKETING

By Harrison Fahrnkopf

ILLINOIS is vitally interested in grain marketing. Our producers ship out of the counties where grown more corn and more oats than any other state. Approximately 215,000,000 bu. of corn, oats, and wheat are shipped annually out of Illinois counties. This is 15 per cent of the commercial supply of these crops sold annually in the United States. Illinois furnishes one-fourth of all the corn that enters the channels of trade in the United States. It lies closest to Chicago, one of the greatest primary grain markets in the world.

Corn is the largest of all agricultural crops in the United States in acreage, quantity and value, and in quantity it is the largest grain crop in the world. In terms of dollars from a world's standpoint it is second only to the wheat crop. Although the United States produces approximately 3,000,000,000 bu. of corn annually, only two per cent is exported, six-tenths of one per cent is required for seed, and between 15 and 20 per cent is milled and manufactured. The balance is fed to livestock. Approximately 500,000,000 bu. of corn move annually in the trade channels of the United States.

Three States Sell Half Corn

OUT of the 300,000,000 bu. of corn produced annually in Illinois, 120,000,000 bu. go into the market channels. Iowa ships 102,000,000 bu. to market and Nebraska 61,000,000 bu. These three states together produce more than 50 per cent of all the corn shipped into the market channels of the United States.

In Illinois we have 500 farmers' elevators many of which have been in operation for more than a quarter of a century. Of the 500 farmer-owned elevators only about 100 are fully co-operative. There are approximately 2,000 country elevators in Illinois. Thus, only about 25 per cent are farmer-owned, and approximately five per cent are wholly cooperative. It should be understood, however, that the farmers' elevators are usually larger and handle a little more than half of all grain marketed in Illinois. Farmers' elevators have been instrumental in developing leaders. The Farm Bureau has developed leaders. These men come from the same ranks—the ranks of the producer. We have a common problem. All must work together to solve that problem.

The Time To Advance

THE time is at hand for the farmer in Illinois to give the very best he has in the way of leadership and support toward perfecting local and terminal grain marketing machinery that will operate effectively in his behalf.

There appears to be no question but that marketing of grain will go forward in the name of cooperation. The big job for the organized farmer is to see that the movement renders him service in fact as well as in name.

Representatives of farmers' elevators and I. A. A.-Farm Bureau meet to discuss a centralized grain marketing organization for Illinois. S. R. McKelvie of the Federal Farm Board is the man in the light suit.

In circle above: Harrison Fahrnkopf, grain marketing director for the I. A. A. Below: Federal Farm Board launches movement to help grain growers. The Farmers' National Grain Corporation was the result.

Must Make System Effective

THE Agricultural Marketing Act has given us the Farm Board and this board has given us the Farmers' National Grain Corporation. Ample credit for marketing on a large scale is available. In Illinois we must apply ourselves assiduously to the task of seeing that both facilities and credit serve the producer to the maximum. It is entirely possible for opposing interests such as the organized grain trade to dominate the situation to such an extent that the entire movement may be rendered ineffective. All farm interests must pull together. We should build a cooperative marketing system that will enable us to get "an American price for an American product." Our marketing machinery should be producer-owned and producer-controlled—not producer-owned and "somebody else" controlled.

Need Control of Commodity

THE problem is to secure control of the large percentage of the commodity in order that it may be marketed through single hands. This control should lie within the farmer's own organizations. By all groups working together we can realize the long hoped for marketing system whereby the farmer can merchandise his crop to his own advantage and get a price for that product equivalent to the world price plus the American tariff.

The farmers' elevators, the Farm Bureau, and the Illinois Agricultural Association working hand in hand and giving support to the new national program should go far in setting up an effective organization in Illinois.

Still Back in the Country

SAMUEL R. McKELVIE, grain member of the Federal Farm Board, told members of the State Bar Association at Lincoln, Nebr., recently that mastery of the terminal markets was the next point for agricultural cooperatives to gain. "There are more than 12,000 farmers' cooperative societies in this country today having a membership of 2,000,000 and handling annually products of the value of over $2,500,000," he said. "For the most part these cooperatives are back in the country and have not reached the terminal markets where the greatest influence is exercised in orderly distribution and price control. It is the job of the Federal Farm Board to see that these cooperatives take the next step in organization which will give them mastery of the terminals."

LIVESTOCK MARKETING

Ray E. Miller, Director of Livestock Marketing

By Ray E. Miller

ORDERLY marketing is probably the most used and the least understood term extant today. The producer wonders what it means, the middleman resents it, and the consumer thinks it has nothing to do with him.

Probably no two persons would agree as to exact definition but merely for the purpose of understanding, orderly marketing might be defined as that movement of any product from the producer to the consumer in the most practical and economical manner for everyone concerned.

In 1928 a total of 49,795,000 hogs went to market, 21,496,000 head, or 43%, or almost half were marketed during the months of January, February, November and December. The consumption of fresh meat increased during these months only 9.6% over the average monthly consumption for the rest of the year. Fortunately this is the normal packing season so the surplus of fresh meat could be converted into cured products. Even so when nearly half of a yearly crop is marketed over a short period of time the fresh meat channels are clogged, the capacity of the packing plants is strained and the producer of the product takes the brunt of the situation in the form of reduced prices. The processors are placed at a disadvantage, the distributors have to operate on a narrower margin, and as a result the consumer pays just about as much for his product as he does when supplies are scarce.

This Is Not Orderly Marketing

IN the old days before artificial refrigeration and modern machinery came into vogue the winter months were necessarily the packing months. As a result it is probably true that the producers have fallen into the habit to a certain extent of raising hogs for the fall and winter market. There are admittedly some advantages and very important ones in producing hogs for the fall market but it is very doubtful if the privilege of marketing in these months is worth what it costs. In 1928 the statement is made by Mr. C. B. Denman, member of the Federal Farm Board, that 80% of the hog crop was marketed below the average price for the year. This is certainly not orderly marketing. The success of sound cooperatives everywhere satisfactorily refutes the claims of the opposition.

ORDERLY marketing cannot be achieved without orderly production. The situation referred to above is aggravated in any industry wherein the production is not closely related to and regulated by the distribution machinery. In 1923 the 53,000,000 hogs slaughtered under federal inspection had a farm value of $855,000,000. In 1926 only about 40,000,000 hogs were slaughtered but they returned to the farmer $1,078,000,000. In the former year the consumer paid $73,000,000 more for the crop but the farmers got $223,000,000 less than they did in 1926. When the production of 13,000,000 hogs results in the loss of $223,000,000 in the total return on the crop it certainly is not orderly production. In this instance neither the producer nor the consumer benefited. The farmer could have made more money by working less.

DURING the period from 1910-14 the hog raiser received an average of $7.25 per cwt. for live hogs. The consumer paid $14.16 for the products, distribution costs were $6.91. In 1928 the farmer received $8.75, the consumer paid $24.07 and the distribution cost was $15.32. The farmer's price increased $1.50 per cwt., the average retail price increased $9.91 and the distribution cost increased $8.41. In the 1910-14 period the farmer was getting about 50c out of the consumer's dollar; in 1928 he received about 36.3 cents. On a carload of hogs this decline in the producer's share of the consumer dollar amounts to approximately $520. On the hog crop for 1928 it amounted to approximately $350,000,000.

Increases Distribution Costs

THE old marketing system by means of which meat products were moved from the farm to the consumer's table does not meet the definition of orderly marketing. It has permitted wide cyclical swings; far too much one year, too little a few years later It has permitted radical fluctuations in seasonal movements. It has resulted in increasing distribution costs with higher prices to the consumer and lower prices to the producer. The cooperative marketing program has as its major objective the substitution of orderly marketing for the disorderly, expensive and uneconomic system which has obtained in the past. Critics of cooperative marketing say that it is idealistic and theoretical. Every step of progress throughout all the ages has been branded in the same manner by those whose interests were jeopardized by that very progress.

CENTRALIZED GRAIN MARKETING

By Harrison Fahrnkopf

ILLINOIS is vitally interested in grain marketing. Our producers ship out of the counties where grown more corn and more oats than any other state. Approximately 215,000,000 bu. of corn, oats, and wheat are shipped annually out of Illinois counties. This is 15 per cent of the commercial supply of these crops sold annually in the United States. Illinois furnishes one-fourth of all the corn that enters the channels of trade in the United States. It lies closest to Chicago, one of the greatest primary grain markets in the world.

Corn is the largest of all agricultural crops in the United States in acreage, quantity and value, and in quantity it is the largest grain crop in the world. In terms of dollars from a world's standpoint it is second only to the wheat crop. Although the United States produces approximately 3,000,000,000 bu. of corn annually, only two per cent is exported, six-tenths of one per cent is required for seed, and between 15 and 20 per cent is milled and manufactured. The balance is fed to livestock. Approximately 500,000,000 bu. of corn move annually in the trade channels of the United States.

Three States Sell Half Corn

OUT of the 300,000,000 bu. of corn produced annually in Illinois, 120,000,000 bu. go into the market channels. Iowa ships 102,000,000 bu. to market and Nebraska 61,000,000 bu. These three states together produce more than 50 per cent of all the corn shipped into the market channels of the United States.

In Illinois we have 500 farmers' elevators many of which have been in operation for more than a quarter of a century. Of the 500 farmer-owned elevators only about 100 are fully co-operative. There are approximately 2,000 country elevators in Illinois. Thus, only about 25 per cent are farmer-owned, and approximately five per cent are wholly cooperative. It should be understood, however, that the farmers' elevators are usually larger and handle a little more than half of all grain marketed in Illinois. Farmers' elevators have been instrumental in developing leaders. The Farm Bureau has developed leaders. These men come from the same ranks—the ranks of the producer. We have a common problem. All must work together to solve that problem.

LIVESTOCK MARKETING

Ray E. Miller, Director of Livestock Marketing

By Ray E. Miller

ORDERLY marketing is probably the most used and the least understood term extant today. The producer wonders what it means, the middleman resents it, and the consumer thinks it has nothing to do with him.

Probably no two persons would agree as to exact definition but merely for the purpose of understanding, orderly marketing might be defined as that movement of any product from the producer to the consumer in the most practical and economical manner for everyone concerned.

In 1928 a total of 49,795,000 hogs went to market, 21,496,000 head, or 43%, or almost half were marketed during the months of January, February, November and December. The consumption of fresh meat increased during these months only 9.6% over the average monthly consumption for the rest of the year. Fortunately this is the normal packing season so the surplus of fresh meat could be converted into cured products. Even so when nearly half of a yearly crop is marketed over a short period of time the fresh meat channels are clogged, the capacity of the packing plants is strained and the producer of the product takes the brunt of the situation in the form of reduced prices. The processors are placed at a disadvantage, the distributors have to operate on a narrower margin, and as a result the consumer pays just about as much for his product as he does when supplies are scarce.

This Is Not Orderly Marketing

IN the old days before artificial refrigeration and modern machinery came into vogue the winter months were necessarily the packing months. As a result it is probably true that the producers have fallen into the habit to a certain extent of raising hogs for the fall and winter market. There are admittedly some advantages and very important ones in producing hogs for the fall market but it is very doubtful if the privilege of marketing in these months is worth what it costs. In 1928 the statement is made by Mr. C. B. Denman, member of the Federal Farm Board, that 80% of the hog crop was marketed below the average price for the year. This is certainly not orderly marketing. The success of sound cooperatives everywhere satisfactorily refutes the claims of the opposition.

ORDERLY marketing cannot be achieved without orderly production. The situation referred to above is aggravated in any industry wherein the production is not closely related to and regulated by the distribution machinery. In 1923 the 53,000,000 hogs slaughtered under federal inspection had a farm value of $855,000,000. In 1926 only about 40,000,000 hogs were slaughtered but they returned to the farmer $1,078,000,000. In the former year the consumer paid $73,000,000 more for the crop but the farmers got $223,000,000 less than they did in 1926. When the production of 13,000,000 hogs results in the loss of $223,000,000 in the total return on the crop it certainly is not orderly production. In this instance neither the producer nor the consumer benefited. The farmer could have made more money by working less.

DURING the period from 1910-14 the hog raiser received an average of $7.25 per cwt. for live hogs. The consumer paid $14.16 for the products, distribution costs were $6.91. In 1928 the farmer received $8.75, the consumer paid $24.07 and the distribution cost was $15.32. The farmer's price increased $1.50 per cwt., the average retail price increased $9.91 and the distribution cost increased $8.41. In the 1910-14 period the farmer was getting about 50c out of the consumer's dollar; in 1928 he received about 36.3 cents. On a carload of hogs this decline in the producer's share of the consumer dollar amounts to approximately $520. On the hog crop for 1928 it amounted to approximately $350,000,000.

Increases Distribution Costs

THE old marketing system by means of which meat products were moved from the farm to the consumer's table does not meet the definition of orderly marketing. It has permitted wide cyclical swings; far too much one year, too little a few years later It has permitted radical fluctuations in seasonal movements. It has resulted in increasing distribution costs with higher prices to the consumer and lower prices to the producer. The cooperative marketing program has as its major objective the substitution of orderly marketing for the disorderly, expensive and uneconomic system which has obtained in the past. Critics of cooperative marketing say that it is idealistic and theoretical. Every step of progress throughout all the ages has been branded in the same manner by those whose interests were jeopardized by that very progress.

DAIRY MARKETING

Above: A. D. Lynch, Dairy Marketing Director, Illinois Agricultural Association. Right: Organized Producers and Dealers iron out their problems at Bloomington.

Officers and Directors of the Sanitary Milk Producers, new Cooperative representing the St. Louis Milk District, are shown in the group below. Check testing is an important service rendered members of the Pure Milk Association at the Chicago market.

By A. D. Lynch

MORE than 55% of the fluid milk produced in Illinois is now sold cooperatively. Through collective action organized dairymen are selling their product for what it is worth. They are improving quality, checking up on weights and tests. They are controlling their surplus through sound sales plans, studying their markets intensively, and are advertising their product to their city customers.

Peoria Controls Surplus

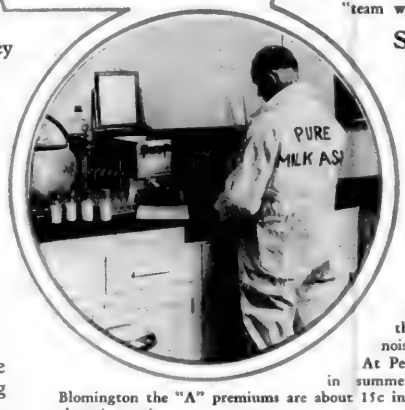
IN the Peoria district dairymen have just completed their third successful year under a straight pooling plan. They found they had not made the desired progress in creating a more even production. After careful study with the cooperation of Peoria milk buyers and the Illinois Agricultural Association a plan has been agreed to which adds the "base and surplus" idea to the pooling plan. This program will give the dairymen who produce milk most in line with the requirements of the Peoria market more money than those dairymen who elect to produce a heavy surplus part of the year and very little in the early fall months.

The Peoria plan will be watched with interest by other Illinois markets because it is the most comprehensive surplus control plan in operation in the middle west.

Chicago Producers Active

THE Pure Milk Association, representing dairymen in the Chicago dairy district, while less than one year old, is making wonderful progress in cleaning up bad conditions on that market. It has a laboratory field service that checks fat tests and helps members who are having difficulty in making a high quality product. The Chicago milk supply is still setting the pace for large cities as to quality.

The organization just sold the 1930 basic milk at a slight reduction from 1929 because in the basic period of September, October and November (1929) its membership produced 10% in excess of the needs of the market. Prices are about 20c per cwt. better at Chicago now than in years and the association will no doubt develop, as it grows, a permanent surplus control program.



State Organization Coming

FOR several years it has been the program of this department and of organized dairymen in the state to perfect a state organization through which the collective effort of all organized dairymen could be effectively centralized.

The many inter-market problems coming up daily make the necessity of setting up a state fluid milk organization imperative. Such an organization is at the moment genuinely needed to help develop means to sell more effectively some of the present surplus of milk products. These surpluses are clogging markets and depressing prices of fluid milk and butterfat. A long swing educational campaign to increase the use of milk and milk products both as human and animal foods has now a real opportunity. A state organization can handle and administer such a program to the benefit of all the member dairymen on the organized markets.

Uniform Practices

MORE uniformity in sales plans could be achieved through centralized selling in one state organization. In fact, actual competition between organized markets has been noted, not through viciousness on the part of anyone, but because the the organized dairymen have not yet perfected a state organization to get all "team work" possible into the game.

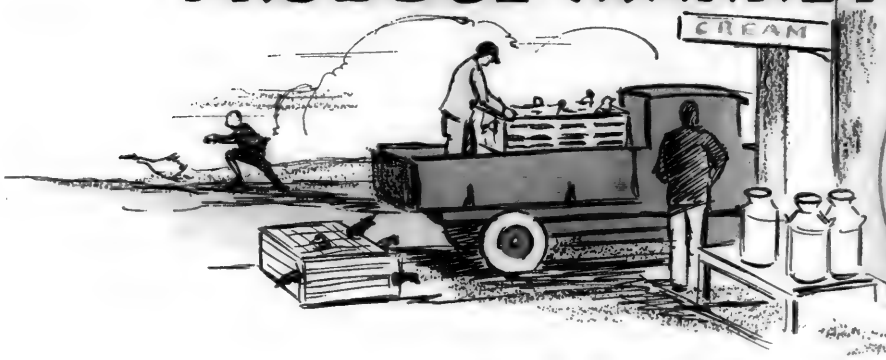
Selling On Grade

THE three markets at Champaign, Bloomington and Peoria are setting the pace when it comes to paying the members cash quality premiums. At Champaign the Grade A dairy men receive a bonus of 25c per cwt. while the Grade C fellows are "docked" 25c per cwt., the Grade B men receiving the regular pool price set each month by the association. These are the best premiums paid in Illnois.

At Peoria the "A" premium is 25c in summer and 15c in winter. At Blomington the "A" premiums are about 15c in summer and only 2 or 3c in the winter time.

Markets Organizing

DECATUR, Rock Island, Davenport, Moline and St. Louis are each forming organizations and will be having something to say at the market place in the near future. They have grown weary of taking what the buyers choose to give them and realize a business-like, equitable and positive sales organization will benefit them as individuals and the entire market as well.



A National Surplus

PRODUCTION points to the possibility of a national surplus of butter and other dairy products. Such a condition can be best met by a strong national organization well enough organized to segregate surplus from domestic needs, sell the surplus and spread the loss over all organized dairymen.

Many enthusiasts in businesses getting their revenue mostly from farmers have advised folks "to go into the dairy business." Thinking dairymen who are studying present day facts know better than to listen to such "bunk."

The smart dairyman today is selling his poorer cows to the butcher, raising only the best heifers and vealing the rest, and joining the cooperative in his community to sell his milk collectively. Why? Because it pays.

PRODUCE MARKETING

Frank Gougler, Director of Produce Marketing for the I. A. A.

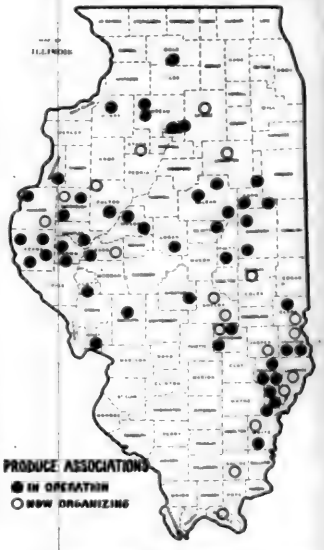
By Frank Gougler

ILLINOIS producers sell annually more than 80 million dollars worth of produce—poultry, eggs and cream. As these commodities are being sold today enormous wastes are entailed. One of the purposes of cooperative effort is to eliminate wherever possible the wastes unavoidable under the present system. What are some of these wastes?

In the marketing of cream, for example, keen competition between creameries for butterfat has resulted in the establishment of cream stations throughout the state far in excess of the actual needs for efficient service to farmers. There are somewhere near 4,000 such stations in Illinois where one-fourth this number could render the same service more efficiently. A given town may have from two to six such stations each handling on the average 25,000 lbs. butterfat annually. If the cream furnished these stations were handled through one large cooperative the assembly cost would be reduced from one-third to one-half. Before cooperatives entered the field this assembly cost amounted to from 3 to 6 cents per pound fat. Our large cooperatives are now performing this service at a cost as low as 1½ cents per pound.

Higher Prices—Fair Tests

TEN per cent of the 40,000,000 pounds of butterfat produced in Illinois is now being sold cooperatively. Members of these organizations are receiving from 3 to 5 cents more per pound butterfat than they would have received selling the old way. In addition to the higher price they are assured of correct weights and tests. The net gain to the member averages from $30 to $50 per 1,000 pounds of butterfat. On the total volume sold cooperatively it amounts to at least $120,000.00 annually.



Waste in Assembling Cream

ANOTHER needless waste results in the over-lapping of territory of the different creameries. The efficient method of moving cream from producer to creamery is to move it to the nearest creamery. This would not only lower transportation costs, but also would contribute to a better quality cream. Under the present competitive station method a large percentage of cream actually moves away from the very door of a nearby creamery to some distant creamery. The resulting waste in quality and transportation costs is inexcusable. Creameries cannot be criticized for this condition. It is a result of the natural development of the creamery industry, but it is a condition which private creameries cannot remedy. The solution to this problem is one that must be solved by farmers alone or jointly between representatives of organized producers and the butter manufacturers.

An attempt to solve this problem by the latter method is now being made in Illinois. The plan involves thorough organization of the producers in a given territory around a town where one or more creameries may be located. All the cream in this territory will be moved to the nearby creameries, provided a satisfactory price can be secured. If thoroughly organized much waste can be eliminated, not only by the shorter distance to the nearby creamery, but also through larger loads of cream that can be trucked to the nearby butter manufacturer.

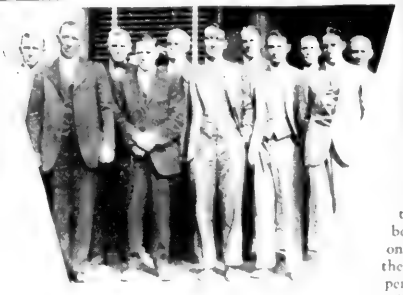
Need Premium For Quality

MORE efficient assembling and more efficient delivery of cream is now being given serious consideration by Illinois producers. The next phase of work to be taken up in connection with marketing which will eliminate still more waste is that of selling cream on a quality basis. This is very essential if we are to meet the standards that have been established by other states. A marketing system that will pay a producer just as much for a product of poor quality as another producer receives for a high quality product should be consigned to the scrap heap and replaced by a better system. Creamerymen admit that they alone cannot bring about this very necessary market improvement. In a limited way this has already been done at some points where pooled cream is being marketed and it is proving very satisfactory to both producers and creamerymen.

State Marketing Association

DURING 1930 cooperative produce marketing should move forward at a much more rapid rate than it has in the past. The purpose of this undertaking is being better understood throughout Illinois. Then too, very recently there has been organized the Illinois Produce Marketing Association with which all the county produce marketing associations will affiliate. The Association will be well financed so that field service can be rendered to local units now marketing. With this additional help it will be possible to strengthen the weaker associations, increase the volume of all of them and develop a worth while quality improvement program.

When the Illinois Produce Marketing Association was organized at Decatur. Representatives from more than 35 local Cooperatives gathered and unanimously endorsed the plan for the state-wide marketing agency.



DAIRY MARKETING

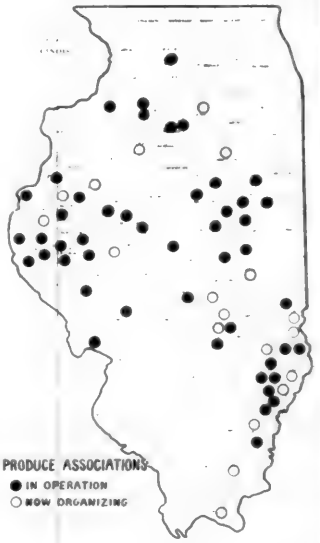
ILLINOIS producers sell annually more than 80 million dollars worth of produce—poultry, eggs and cream. As these commodities are being sold today enormous wastes are entailed. One of the purposes of cooperative effort is to eliminate wherever possible the wastes unavoidable under the present system. What are some of these wastes?

In the marketing of cream, for example, keen competition between creameries for butterfat has resulted in the establishment of cream stations throughout the state far in excess of the actual needs for efficient service to farmers. There are somewhere near 4,000 such stations in Illinois where one-fourth this number could render the same service more efficiently. A given town may have from two to six such stations each handling on the average 25,000 lbs. butterfat annually. If the cream furnished these stations were handled through one large cooperative the assembly cost would be reduced from one-third to one-half. Before cooperatives entered the field this assembly cost amounted to from 3 to 6 cents per pound fat. Our large cooperatives are now performing this service at a cost as low as 1½ cents per pound.

Higher Prices—Fair Tests

TEN per cent of the 40,000,000 pounds of butterfat produced in Illinois is now being sold cooperatively. Members of these organizations are receiving from 3 to 5 cents more per pound butterfat than they would have received selling the old way. In addition to the higher price they are assured of correct weights and tests. The net gain to the member averages from $30 to $50 per 1,000 pounds of butterfat. On the total volume sold cooperatively it amounts to at least $120,000.00 annually.



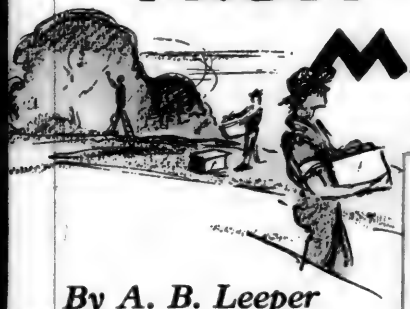
Waste in Assembling Cream

ANOTHER needless waste results in the over-lapping of territory of the different creameries. The efficient method of moving cream from producer to creamery is to move it to the nearest creamery. This would not only lower transportation costs, but also would contribute to a better quality cream. Under the present competitive station method a large percentage of cream actually moves away from the very door of a nearby creamery to some distant creamery. The resulting waste in quality and transportation costs is inexcusable. Creameries cannot be criticized for this condition. It is a result of the natural development of the creamery industry, but it is a condition which private creameries cannot remedy. The solution to this problem is one that must be solved by farmers alone or jointly between representatives of organized producers and the butter manufacturers.

An attempt to solve this problem by the latter method is now being made in Illinois. The plan involves thorough organization of the producers in a given territory around a town where one or more creameries may be located. All the cream in this territory will be moved to the nearby creameries, provided a satisfactory price can be secured. If thoroughly organized much waste can be eliminated, not only by the shorter distance to the nearby creamery, but also through larger loads of cream that can be trucked to the nearby butter manufacturer.

Need Premium For Quality

MORE efficient assembling and more efficient delivery of cream is now being given serious consideration by Illinois producers. The next phase of work to be taken up in connection with marketing which will eliminate still more waste is that of selling cream on a quality basis. This is very essential if we are to meet the standards that have been established by other states. A marketing system that will pay a producer just as much for a product of poor quality as another producer receives for a high quality product should be consigned to the scrap heap and replaced by a better system. Creamerymen admit that they alone cannot bring about this very necessary market improvement. In a limited way this has already been done at some points where pooled cream is being marketed and it is proving very satisfactory to both producers and creamerymen.

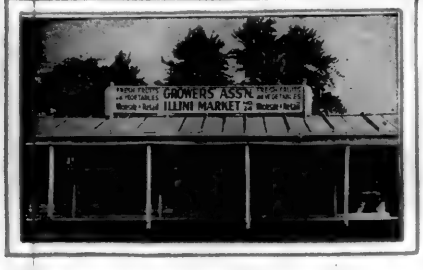


State Marketing Association

DURING 1930 cooperative produce marketing should move forward at a much more rapid rate than it has in the past. The purpose of this undertaking is being better understood throughout Illinois. Then too, very recently there has been organized the Illinois Produce Marketing Association with which all the county produce marketing associations will affiliate. The Association will be well financed so that field service can be rendered to local units now marketing. With this additional help it will be possible to strengthen the weaker associations, increase the volume of all of them and develop a worth while quality improvement program.

When the Illinois Produce Marketing Association was organized at Decatur. Representatives from more than 35 local Cooperatives gathered and unanimously endorsed the plan for the state-wide marketing agency.

FRUIT AND VEGETABLE MARKETING



ILLINOIS Brand Peaches Grown by Members of the Illinois Fruit Growers Exchange are the Best in the World.

By A. B. Leeper

THE methods of selling and distributing fruits and vegetables have changed rapidly in recent years. Some of the causes of these changes are:

1. Improvements in means of transportation.
2. Increased use of fruits and vegetables in the daily diet of most people.

Here is one of the Many Cooperative Road-Side Markets where Illinois Grown Fruit and Vegetables were sold last year.

A. B. Leeper, Director Fruit and Vegetable Marketing for the I. A. A.

Exhibit Illinois Apples at State Horticultural Meeting.

3. Changed living conditions in the modern city home.
4. Availability of fresh fruits and vegetables supplied from every section of the country at all times of the year.
5. The development of chain stores.

Two General Groups

IN actual practice the marketing of fruits and vegetables is divided into two general groups. One of these groups consists of growers who sell these products locally. The other group of growers depend upon selling their crops in distant markets. The group that produces crops to sell locally has three principal methods of selling, namely:

1. Selling on the farm where the crop is produced.
2. Selling in nearby markets.
3. Selling near the place of production in roadside markets.

Very little has been done in cooperative selling by these growers who produce only for local trade. Several of the Farm Bureaus have established central markets where the members cooperate in paying the overhead expenses. The growers bring their products to these markets on certain days and generally sell directly to the consumers.

Illinois Fruit Growers Exchange

IT is with the group of growers who produce fruit and vegetable crops to sell in distant markets that cooperative organizations for sale and distribution have been organized. The Illinois Fruit Growers Exchange, which is a central sales agency, was organized in 1921. This organization has confined its efforts principally toward the development of standardized products and to the establishment of brands, together with the sale and distribution of carlots of fruits and vegetables for its members.

During the past year, the Illinois Fruit Growers Exchange and its member associations sold approximately 1000 cars of fruits and vegetables. Of this number 675 straight carload lots were sold through the central office at Centralia. The others were sold to trucks which came to the packing sheds or were shipped in less-than-carlots by freight and express.

Roadside Market Chain

THE increased use of trucks and the completion of the Illinois hard road system have developed a factor in marketing of fruits and vegetables that was unforeseen a few years ago. In 1928 a group of growers, desiring to take advantage of this new method of transportation, organized the Illinois Growers' Marketing Association, to sell cooperatively through a system of roadside markets. The plan is for growers of fruits and vegetables in one section of the state to cooperate with growers in other sections who grow commodities that are not produced locally, and sell their products by way of the roadside markets.

Given Trial Last Year

THIS plan was given a trial last year. A number of markets were established in the central and northern parts of the state to aid the growers of tree fruits in other sections to dispose of their products. The sales of some of these markets were satisfactory. On others they were not. The experience indicates that if this type of marketing is to succeed, local growers where the markets are established must cooperate and support them. It is contemplated that this system of marketing will be continued and extended during the coming year. Care will be taken in selecting sites and markets will be established only where local growers are willing to cooperate in furnishing a supply of home-grown products for sale. The extent of expansion will depend upon the demand of growers for this form of marketing.

It is also part of the I. A. A. program for the coming year to further increase the membership of the Exchange in sections where fruits and vegetables are grown for carlot shipment. This will be done with a view of developing a stronger central organization so that if the Federal Farm Board desires to recommend the organization of a national association for the distribution of fruits and vegetables, Illinois will be in a position to cooperate in the larger movement.

MARKETING RED TOP SEED

Curt Anderson, Secretary-Treasurer Egyptian Seed Growers Exchange. The group presents officers, directors and delegates at the recent Exchange meeting at Flora where the co-operative was re-organized and a campaign for new members planned.

Seed Growers Meet at Flora.
In the group to the left are: left to right, front row:—Donald Kirkpatrick, legal counsel, Illinois Agricultural Association; C. L. Palmer, Noble; C. F. Sanders, Dix; John Rogier, Patoka, President; J. M. Luse, Flora, vice-president; T. F. Farmer, Cisne; P. W. Warner, Salem.
Left to right, second row:—Miss Large, office secretary; Geo. McElyea, Louisville; J. O. Coen, Olney; Curt Anderson, Xenia, secretary-treasurer; Clarence Barnard, Johnsonville; W. L. Outhouse, Patoka.
Left to right, third row:—G. A. Spaulding, Fairfield; Roy Charlton, warehouse supt.; Mr. Fleming, Noble; L. L. Corrie, farm adviser, Wayne county; W. T. Wooden, Mt. Vernon; C. T. Kibler, farm adviser, Clay county; S. M. Ruckman, Xenia; Harrison Fahrnkopf, grain marketing director, I. A. A.; R. R. Woomer, Xenia.

By Harrison Fahrnkopf

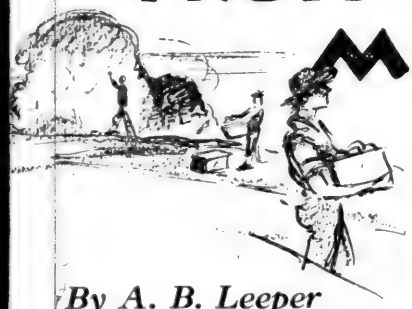
EIGHTY-FIVE per cent of the world supply of red top grass seed is produced in eight or nine counties of southern Illinois. The red top territory embraces all of the counties of Clay, Marion, Richland, Wayne, Jefferson, and parts of the counties of Effingham, Fayette, Jasper, Lawrence, Edwards, Hamilton, White, Washington, and Clinton. This area comprises two and one-half million acres or 4,000 square miles, and has 19,700 farms. Seven thousand of these farms produce all of the red top seed. The average tenancy is 23 per cent. The average production of 9,000,000 lbs. of seed for the territory has a value of $1,350,000. The average production per farm is 1,500 lbs. of red top seed annually, having a value of $200. The average production for this territory in the seven years ending with 1928 was 11,000,000 lbs. annually. The year 1927 was a record year with 18,000,000 lbs.; the year 1925 the lowest with only 6,000,000 lbs.

Red top seed is used for one purpose only, that is for sowing. It is used extensively in lawn grass and golf grass mixtures.

How Exchange Is Organized

MANY of the farmers in the red top territory were members of the Illinois Agricultural Association several years ago when the I. A. A. assisted in organizing the Egyptian Seed Growers' Exchange and the Red Top Growers' Warehouse Association. The Legal Department of the I. A. A. assisted in negotiating the corporate set-up, and the Organization Department helped to secure the present membership.

The Egyptian Seed Growers' Exchange is organized under the Illinois Agricultural Co-operative Act of 1923. It has an authorized capital of $250,000 composed of 10,000 shares of preferred stock of a par value of $25 per share. There is also authorized 10,000 shares of common stock of no par value. One share of this stock will be issued to each grower signing the new marketing agreement and will entitle the holder to patronage dividends from the Growers' Exchange.



The Red Top Growers' Warehouse Association is also a co-operative association incorporated under the Agricultural Co-operative Act of 1923. It is a subsidiary of the Exchange. The Warehouse Corporation is necessary so that a warehouse receipt can be issued by it to the Exchange, the receipt being used as collateral for loans obtained from local banks, from the Intermediate Credit Bank at St. Louis, and from the Federal Farm Board.

Increases Price To Grower

WHILE the Egyptian Seed Growers' Exchange at present handles less than 10 per cent of the seed produced in the territory, it has had a very material effect on the price paid growers throughout the southern Illinois counties. According to the U. S. Department of Agriculture, the average price of red top for the five years, 1917 to 1921 inclusive, was 12 3-5 cents per lb. According to the same authority the average price paid red top growers by all buyers during the five-year period, 1922 to 1926 inclusive, was 16 cents per lb. During this five-year period (the first five years of the pool) the Egyptian Seed Growers'

During this five-year period (the first five years of the pool) the Egyptian Seed Growers'

(Continued on page 14)

(Continued from page 13)

Exchange received an average of 18 2-5 cents per lb. for seed handled and was enabled to pay a net return to the member growers of 16 1-5 cents per lb. These figures indicate clearly what a tremendous influence the red top pool has had in raising the average price level for seed.

MISS LARGE
Office Secretary

Membership Campaign Begins Feb. 3

A SPECIAL membership campaign has been authorized by the board of directors of the Exchange beginning February 3 and will be intensely carried on for two weeks. A. B. Culp of the Organization Department of the Illinois Agricultural Association will manage the campaign with headquarters at Flora. Manager Culp will have a trained assistant in every county in the red top territory to assist in organizing and carrying on the campaign. The County Farm Bureaus will co-operate. Bankers and business men in the territory have promised their co-operation because an organization controlling 65 per cent of the crop will in normal years bring at least $500,000 more money into these counties. The objective of the campaign is 5,000 members with a sign-up of 75 per cent of the crop.

The new marketing agreement that has been adopted by the board of directors requires no membership fee. No subscriptions of stock will be solicited. Each grower signing a membership agreement will be issued one share of common stock.

Active Growers On Board

THE new board of directors is composed of active growers representing every important section of the red top seed territory. The directors shown in the group picture presented herewith are: John Rogier, Patoka, president; J. M. Luse, Flora, vice-president; C. L. Palmer, Noble; C. F. Sanders, Dix; T. F. Farmer, Cisne; P. W. Warner, Salem; Geo. McElyea, Louisville; J. O. Coen, Olney; Clarence Barnard, Johnsonville; and W. L. Outhouse, Patoka.

Curt Anderson of Xenia has been the secretary and manager of the Exchange since its organization and has done splendid work for the co-operative. The election of a new board of directors at the first annual meeting under the reorganization will be held at Flora soon after the membership campaign.

The Illinois Agricultural Association has a keen interest in the success of the Exchange. It is ready to assist in the special membership campaign and help it in every possible way. Curt Anderson has tendered his resignation as manager but the selection of a new manager will probably be postponed until after the annual meeting.

Warehouse at Flora where pooled Red Top Seed is cleaned and stored pending sale and shipment.

Can Raise Price Level

THOSE who have studied the possibilities of the red top seed organization believe that the price level for seed can be raised several cents per lb. to the grower over the price level of the last five years if a 75 per cent sign-up of the crop is maintained.

The red top association will be prepared to have available cleaning and warehousing facilities throughout the territory for handling the 1930 crop. All growers will be asked to sign the new marketing agreement. Any grower who signs the new agreement will be relieved from his obligations under the old contract. The new agreement will not free the Exchange from closing out the pool of 1929. This pool will be closed out as soon as possible and an accounting made to all members.

Under the new agreement the board of directors of the Exchange can adopt a crop or seasonal pool at the option of the grower. The plan of marketing will be as flexible as possible to accommodate itself to the choice of each producer.

Farm Board Aids

THE Egyptian Seed Growers' Exchange is the first co-operative in Illinois to be recognized by the Federal Farm Board with financial aid. A loan was authorized whereby an additional advance of two cents per lb. is made possible to the grower. This means that a total of nine cents per lb. will be advanced since seven cents had already been authorized by the intermediate credit bank.

The fact that the producer can now secure a loan of approximately 80 per cent of the value of his red top and still retain an equity in it until the end of the pool year leaves little argument for any producer to remain outside the pool. In other words, it is now possible for him to have the use of the greater share of the money due him on his red top and still gives him the added advantage of merchandising his crop effectively for the highest possible return.

An Opportunity

THE campaign to organize a powerful co-operative handling a substantial majority of all the red top seed produced in the territory is an opportunity for all growers in this area to stabilize prices, control surplus, market orderly, and insure a fair return.

The first annual meeting after the reorganization will probably be held early in March. New officers and directors and management will be chosen. Every grower signing an agreement is entitled to attend the meeting to be called, and vote.

The fact that approximately 90 per cent of the world's supply of red top seed is produced in this limited and contiguous territory of Southern Illinois means that conditions never were better for the success of a co-operative having a majority of the crop under contract.

Livestock Men Form Co-op. In Vermilion

THE Vermilion County Farm Bureau recently organized a county-wide co-operative livestock marketing association. A constitution and by-laws were adopted and a committee was appointed to incorporate with capital stock of $25,000. More than 30 members signed the marketing agreement at the first meeting. They agreed to ship their livestock through the association for at least one year. Construction of a stock yards at Danville at a cost of approximately $10,000 is contemplated.

Otis Kercher, Farm Adviser, Vermilion County

L. T. Skeffington of the I. A. A. livestock marketing department who covers the south half of Illinois is assisting Farm Adviser Otis Kercher in getting the new organization under way. The capital stock set-up is similar to that being used by other co-operatives organized in co-operation with the Farm Bureau and Illinois Agricultural Association.

The association will market livestock of non-members as well as members. Farm Bureau members will be favored with a differential under the plan of organization.

The incorporating committee was reported as follows: Mont Fox, Oakwood; Ray Cunningham, Bismarck; W. J. Sandusky, Indianola; A. J. Gunder, Fairmount; Charles Juvinall, Collison; H. H. Klayer, Fairmount; G. H. Broadman, Rossville; John T. Leemon, Hoopeston; J. L. White, Georgetown; C. B. Crawford, Potomac, and Earl Bass, Armstrong.

Record Limestone Year

THE year 1929 was a record year for the sale of agricultural limestone in Illinois. Approximately 950,000 tons were used according to estimates by J. R. Bent, director of the Limestone-Phosphate department. The previous high year was 1925 when around 750,000 tons were spread. All but three or four counties in Illinois purchased limestone from the 22 I. A. A. contract companies last year. Farm Bureau members buy limestone 10 cents a ton cheaper than non-members. The heavy sale of agricultural limestone in Illinois is due largely to the work of the county Farm Bureaus co-operating with the University of Illinois in advocating its use.

The Pawnee Four will be on hand to provide entertainment throughout the coming convention at Springfield. The Pawnee boys are perhaps the best known entertainers among Farm Bureau folks in Illinois. Not only have they sung at previous annual meetings of the I. A. A. but during the past three years they have appeared at many annual county Farm Bureau meetings, also at county and district picnics. Additional entertainment will be provided by the Springfield Chamber of Commerce and the Sangamon County Farm Bureau.

I. A. A. Trophy Awards Champs from McLean County.

Resolutions

The resolutions committee will meet at the I. A. A. office to consider resolutions on Thursday, Jan. 23. Members are requested to send their resolutions in at once. The resolutions committee will be in session at Springfield in Room 501 in the Abraham Lincoln hotel.

Members of the committee are as follows: A. R. Wright, R. F. Karr, Charles Black, M. G. Lambert, George J. Stoll, Chas. Marshall, and W. L. Cope.

Farm Bureau members in Scott county averaged a net yield of 174 per cent on their $15 per member investment in the organization in 1929 according to Farm Adviser Alfred Tate. Mr. Tate computed this figure from actual cash gains and savings from marketing, insurance, centralized purchasing, and personal service. Savings were computed at $13,060.48. Farm Bureau dues aggregated $4760.87. The net profit was $8299.61 or 174 per cent.

Life Insurance

By L. A. Williams

COUNTRY Life had no death claims in September, October or November and then in ten days in December had five death claims.

Country Life's largest day since the first special was nearly half a million paid-for business in the office on December 31. Second largest was December 30 with $260,000 paid business.

Homer Hitchcock is the first agent of the Company to write a million of business in one year. He is general agent in Winnebago County.

Marshall-Putnam County had more agents writing life insurance than any other county in the state. Sam Crabtree is the general agent.

The campaign and all quotas have been extended through January—30 days more. Let's go over the top.

Figures from L. A. Glover, our actuary, show Country Life saved an acquisition cost over the average acquisition cost of companies with less than $50,000,000, of $10 per thousand on the first year alone.

This acquisition cost plus the savings effected in rates to policy-holders is sufficient to prove Country Life's right to ascendancy. Think this over!

The marvel of the year is not the total of business sold, but the spread of information and insurance education. Hundreds of agents who, schooled in one year, are able to do the efficient work that is shown on the balance sheets. More schools will be held every two months in 1930.

Credentials

Members of the credentials committee who pass on the eligibility of delegates from the various counties are as follows: A. N. Skinner, Fred Dietz, F. G. Oexner, C. J. Gross, and Harold C. Vial.

The committee on constitution and by-laws includes F. D. Barton, Samuel Sorrells, G. F. Tullock, C. E. Bamborough, and A. R. Wright.

Annual Report

The Annual Report of the Illinois Agricultural Association and Associated Companies for 1929 will be bound in a single volume. It will appear with an attractive two-color cover. Copies will be available for distribution at the Majestic Theatre on Thursday, Jan. 30, at noon. The reports will not be given general circulation but copies will be placed in every Farm Bureau office for the use of those who do not come to the convention.

(Continued from page 13)

Exchange received an average of 18 2-5 cents per lb. for seed handled and was enabled to pay a net return to the member growers of 16 1-5 cents per lb. These figures indicate clearly what a tremendous influence the red top pool has had in raising the average price level for seed.

MISS LARGE
Office Secretary

The Illinois Agricultural Association has a keen interest in the success of the Exchange. It is ready to assist in the special membership campaign and help it in every possible way. Curt Anderson has tendered his resignation as manager but the selection of a new manager will probably be postponed until after the annual meeting.

Warehouse at Flora where pooled Red Top Seed is cleaned and stored pending sale and shipment.

Can Raise Price Level

THOSE who have studied the possibilities of the red top seed organization believe that the price level for seed can be raised several cents per lb. to the grower over the price level of the last five years if a 75 per cent sign-up of the crop is maintained.

The red top association will be prepared to have available cleaning and warehousing facilities throughout the territory for handling the 1930 crop. All growers will be asked to sign the new marketing agreement. Any grower who signs the new agreement will be relieved from his obligations under the old contract. The new agreement will not free the Exchange from closing out the pool of 1929. This pool will be closed out as soon as possible and an accounting made to all members.

Under the new agreement the board of directors of the Exchange can adopt a crop or seasonal pool at the option of the grower. The plan of marketing will be as flexible as possible to accommodate itself to the choice of each producer.

Farm Board Aids

THE Egyptian Seed Growers' Exchange is the first co-operative in Illinois to be recognized by the Federal Farm Board with financial aid. A loan was authorized whereby an additional advance of two cents per lb. is made possible to the grower. This means that a total of nine cents per lb. will be advanced since seven cents had already been authorized by the intermediate credit bank.

The fact that the producer can now secure a loan of approximately 80 per cent of the value of his red top and still retain an equity in it until the end of the pool year leaves little argument for any producer to remain outside the pool. In other words, it is now possible for him to have the use of the greater share of the money due him on his red top and still gives him the added advantage of merchandising his crop effectively for the highest possible return.

An Opportunity

THE campaign to organize a powerful co-operative handling a substantial majority of all the red top seed produced in the territory is an opportunity for all growers in this area to stabilize prices, control surplus, market orderly, and insure a fair return.

The first annual meeting after the reorganization will probably be held early in March. New officers and directors and management will be chosen. Every grower signing an agreement is entitled to attend the meeting to be called, and vote.

The fact that approximately 90 per cent of the world's supply of red top seed is produced in this limited and contiguous territory of Southern Illinois means that conditions never were better for the success of a co-operative having a majority of the crop under contract

Livestock Men Form Co-op. In Vermilion

THE Vermilion County Farm Bureau recently organized a county-wide co-operative livestock marketing association. A constitution and by-laws were adopted and a committee was appointed to incorporate with capital stock of $25,000. More than 30 members signed the marketing agreement at the first meeting. They agreed to ship their livestock through the association for at least one year. Construction of a stock yards at Danville at a cost of approximately $10,000 is contemplated.

Otis Kercher, Farm Adviser, Vermilion County

L. T. Skeffington of the I. A. A. livestock marketing department who covers the south half of Illinois is assisting Farm Adviser Otis Kercher in getting the new organization under way. The capital stock set-up is similar to that being used by other co-operatives organized in co-operation with the Farm Bureau and Illinois Agricultural Association.

The association will market livestock of non-members as well as members. Farm Bureau members will be favored with a differential under the plan of organization.

The incorporating committee was reported as follows: Mont Fox, Oakwood; Ray Cunningham, Bismarck; W. J. Sandusky, Indianola; A. J. Gunder, Fairmount; Charles Juvinall, Collison; H. H. Klayer, Fairmount; G. H. Broadman, Rossville; John T. Leemon, Hoopeston; J. L. White, Georgetown; C. B. Crawford, Potomac, and Earl Bass, Armstrong.

Record Limestone Year

THE year 1929 was a record year for the sale of agricultural limestone in Illinois. Approximately 950,000 tons were used according to estimates by J. R. Bent, director of the Limestone-Phosphate department. The previous high year was 1925 when around 750,000 tons were spread. All but three or four counties in Illinois purchased limestone from the 22 I. A. A. contract companies last year. Farm Bureau members buy limestone 10 cents a ton cheaper than non-members. The heavy sale of agricultural limestone in Illinois is due largely to the work of the county Farm Bureaus co-operating with the University of Illinois in advocating its use.

The Pawnee Four will be on hand to provide entertainment throughout the coming convention at Springfield. The Pawnee boys are perhaps the best known entertainers among Farm Bureau folks in Illinois. Not only have they sung at previous annual meetings of the I. A. A. but during the past three years they have appeared at many annual county Farm Bureau meetings, also at county and district picnics. Additional entertainment will be provided by the Springfield Chamber of Commerce and the Sangamon County Farm Bureau.

I. A. A. Trophy Awards Champs from McLean County.

Resolutions

The resolutions committee will meet at the I. A. A. office to consider resolutions on Thursday, Jan. 23. Members are requested to send their resolutions in at once. The resolutions committee will be in session at Springfield in Room 501 in the Abraham Lincoln hotel.

Members of the committee are as follows: A. R. Wright, R. F. Karr, Charles Black, M. G. Lambert, George J. Stoll, Chas. Marshall, and W. L. Cope.

Farm Bureau members in Scott county averaged a net yield of 174 per cent on their $15 per member investment in the organization in 1929 according to Farm Adviser Alfred Tate. Mr. Tate computed this figure from actual cash gains and savings from marketing, insurance, centralized purchasing, and personal service. Savings were computed at $13,060.48. Farm Bureau dues aggregated $4760.87. The net profit was $8299.61 or 174 per cent.

Life Insurance

By L. A. Williams

COUNTRY Life had no death claims in September, October or November and then in ten days in December had five death claims.

Country Life's largest day since the first special was nearly half a million paid-for business in the office on December 31. Second largest was December 30 with $260,000 paid business.

Homer Hitchcock is the first agent of the Company to write a million of business in one year. He is general agent in Winnebago County.

Marshall-Putnam County had more agents writing life insurance than any other county in the state. Sam Crabtree is the general agent.

The campaign and all quotas have been extended through January—30 days more. Let's go over the top.

Figures from L. A. Glover, our actuary, show Country Life saved an acquisition cost over the average acquisition cost of companies with less than $50,000,000, of $10 per thousand on the first year alone.

This acquisition cost plus the savings effected in rates to policy-holders is sufficient to prove Country Life's right to ascendancy. Think this over!

The marvel of the year is not the total of business sold, but the spread of information and insurance education. Hundreds of agents who, schooled in one year, are able to do the efficient work that is shown on the balance sheets. More schools will be held every two months in 1930.

Credentials

Members of the credentials committee who pass on the eligibility of delegates from the various counties are as follows: A. N. Skinner, Fred Dietz, F. G. Oexner, C. J. Gross, and Harold C. Vial.

The committee on constitution and by-laws includes F. D. Barton, Samuel Sorrells, G. E. Tullock, C. F. Bamborough, and A. R. Wright.

Annual Report

The Annual Report of the Illinois Agricultural Association and Associated Companies for 1929 will be bound in a single volume. It will appear with an attractive two-color cover. Copies will be available for distribution at the Majestic Theatre on Thursday, Jan. 30, at noon. The reports will not be given general circulation but copies will be placed in every Farm Bureau office for the use of those who do not come to the convention.

For Her Protection

WHAT KIND OF MEMORIES

Will You Leave?

"HERE is a life insurance policy I just took out, dear.

"I BOUGHT it from Bill, the Country Life agent. When he explained how easily we could arrange to pay off the mortgage in case I should die before my time, I was interested. That isn't all. I got to thinking about you, Mary, and how hard it would be for you if anything happened. So I bought a policy that will bring you a check as long as you live for $50 a month, and provide education for the children till they're through college. How's that, Honey? And if I live, I will have safely invested $350 a year for old age."

The Day of Sorrow

THEN a day of sorrow dawns and the stalwart provider is no more. His familiar voice is stilled. The widow mourns the loss of her life partner. The children miss their father. The home is silent. But his memory is a happy one. Somehow at every turn his unselfish devotion and thoughtfulness are seen. Money is available for expenses. The terrible worry that accompanies fear of poverty and privation is not present. His friends and all who knew him have the highest regard for him as a thoughtful provider.

The Mortgage

KINDLY aid is ready at the bank as she carries out her husband's wishes and pays off the mortgage. Respect is a heritage he left with his thoughtfulness. Her path has been smoothed because of his foresight.

Insurance for the Mortgage

WILL YOUR LIFE INSURANCE

Carry On?

Insurance to Educate the Children

Education for the Children

THE children grow up and go to college. Ample funds are ready to pay the bills and make better mental equipment possible for them. "Dad" comes as a sweet memory into the lives of the dear ones he so proudly planned for. How he would like to see these fine young people as they develop, fit and ready for life and work.

Mother's Memories

THE mail man comes each month with that check he so proudly and lovingly told her about years ago. Yes, many monthly checks have come since that day he placed the Country Life policy in her hands. She recalled his impulsive way as he told her of his plans for taking his responsibility off her shoulders. A kindly thought comes with these sweet memories. It is one of love that lasts through the ages. A love that was great enough to care for and provide for the dear ones. A love that makes memories live forever.

Country Life paid five death claims in December. Any one could have been yours. Mail the Coupon for rates.

Tune in on the I. A. A. Forum from Station WLS every Tuesday night at 6:30 p. m., Central Standard Time.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (264 meters is broadcast between 12:00 and 12:20 p. m., Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

"Resolved that every farm youth should marry a farm girl" was the subject of a debate on the I. A. A. radio Forum Tuesday night, January 21, at 6:30 P. M. Debaters came from Logan county and are active members of the Farm Bureau Forum organized by Farm Adviser J. H. Checkley and A. B. Culp. Clem Garton and Oscar Mountjoy comprised the affirmative team while Jack Lauer and O. D. Brisenden spoke for the negative. The radio audience was asked to be the judge. The decision will be announced the following Tuesday night, January 28, during the Forum period.

Quad-City Dairymen Join New Co-operative

Quality Milk Association Making Headway

PROGRESS in organizing the 2,000 whole milk shippers in the Rock Island, Davenport, Moline territory is reported by A. D. Lynch, dairy marketing director who recently returned from a conference with dairy leaders in the quad-city milk shed, at Rock Island.

Approximately 200 members from Rock Island county alone have already joined the new collective bargaining organization known as the Quality Milk Association. The counties interested in the new co-operative are Rock Island, Whiteside, Henry, and Mercer in Illinois and Muscatine, Scott, Cedar, and Clinton in Iowa. Dairymen of these eight counties supply approximately 175,000 consumers in the cities of Rock Island, Davenport, Moline, East Moline, and others in the industrial sections stretched out along the river.

The average consumption per capita on the quad-city market is only .72 pints. According to Mr. Lynch this average can be greatly increased by a joint advertising campaign between the dairymen and the dealers.

The organization will be set up on the same plan used by the fluid milk co-operatives in Chicago, Peoria, Bloomington, and Champaign. The Farm Bureaus in each county are taking charge of the solicitation work among their whole milk producers. This is a growing market because of the extensive industrial development on both sides of the river. With the opening up of the Mississippi for deep water navigation a further boom in population is expected.

Annual Meeting of Illinois Agricultural Association

NOTICE is hereby given that the annual meeting of the members of Illinois Agricultural Association will be held at the Majestic Theatre, in Springfield, Illinois, on the 30th day of January, 1930, at 9 o'clock a. m., for the following purposes:

For the consideration and vote upon approval and ratification of the reports of the president, secretary, and treasurer of the association, and the acts of the executive committee and officers in furtherance of the matters therein set forth, since the last annual meeting of the members of the association.

To approve, ratify and confirm the several purchases heretofore made by this association of stocks and evidences of indebtedness of corporations, whose activities will directly or indirectly promote agriculture, or the interests of those engaged therein.

To secure consent and authorization to acquire on behalf of this association, by purchase, certain stocks and evidences of indebtedness of corporations, whose activities will directly or indirectly promote agriculture, or the interests of those engaged therein.

To elect seven members to the executive committee for two-year terms.

To elect a president and vice-president.

To consider the amendment of the Articles of Association of the Illinois Agricultural Association.

To consider the amendment of the by-laws of the Illinois Agricultural Association.

For the transaction of such other business as may properly come before the meeting.

Jan. 2, 1930.
Chicago, Ill.

GEO. E. METZGER,
Secretary.

District Meeting at Galesburg

SEVENTY-SIX attended the I. A. A. district conference at Galesburg on December 17.

Taxation, direct buying of livestock, hog cholera control, the co-operative marketing of soybeans, the Federal Farm Board, and Attorney General Oscar Carlstrom's unpopular decision that farm tractors driving on the public highways to do custom work must have a state license were among the questions considered. Attention was directed to the recent court decision that a farmer is liable for damages if he shoots a neighbor's dog in his sheep pasture. It was suggested that the I. A. A. legislative committee look into both questions.

A. N. Skinner of the I. A. A. executive committee and D. H. Myers, president of the Adams County Farm Bureau discussed the Federal Farm Board and its work. Mr. Skinner expressed confidence in the leadership of Chairman Legge and in the sincerity of all members of the board.

John C. Watson discussed tax history and the need for a modern revenue system in Illinois. R. J. Hamilton, district organization manager, also attended.

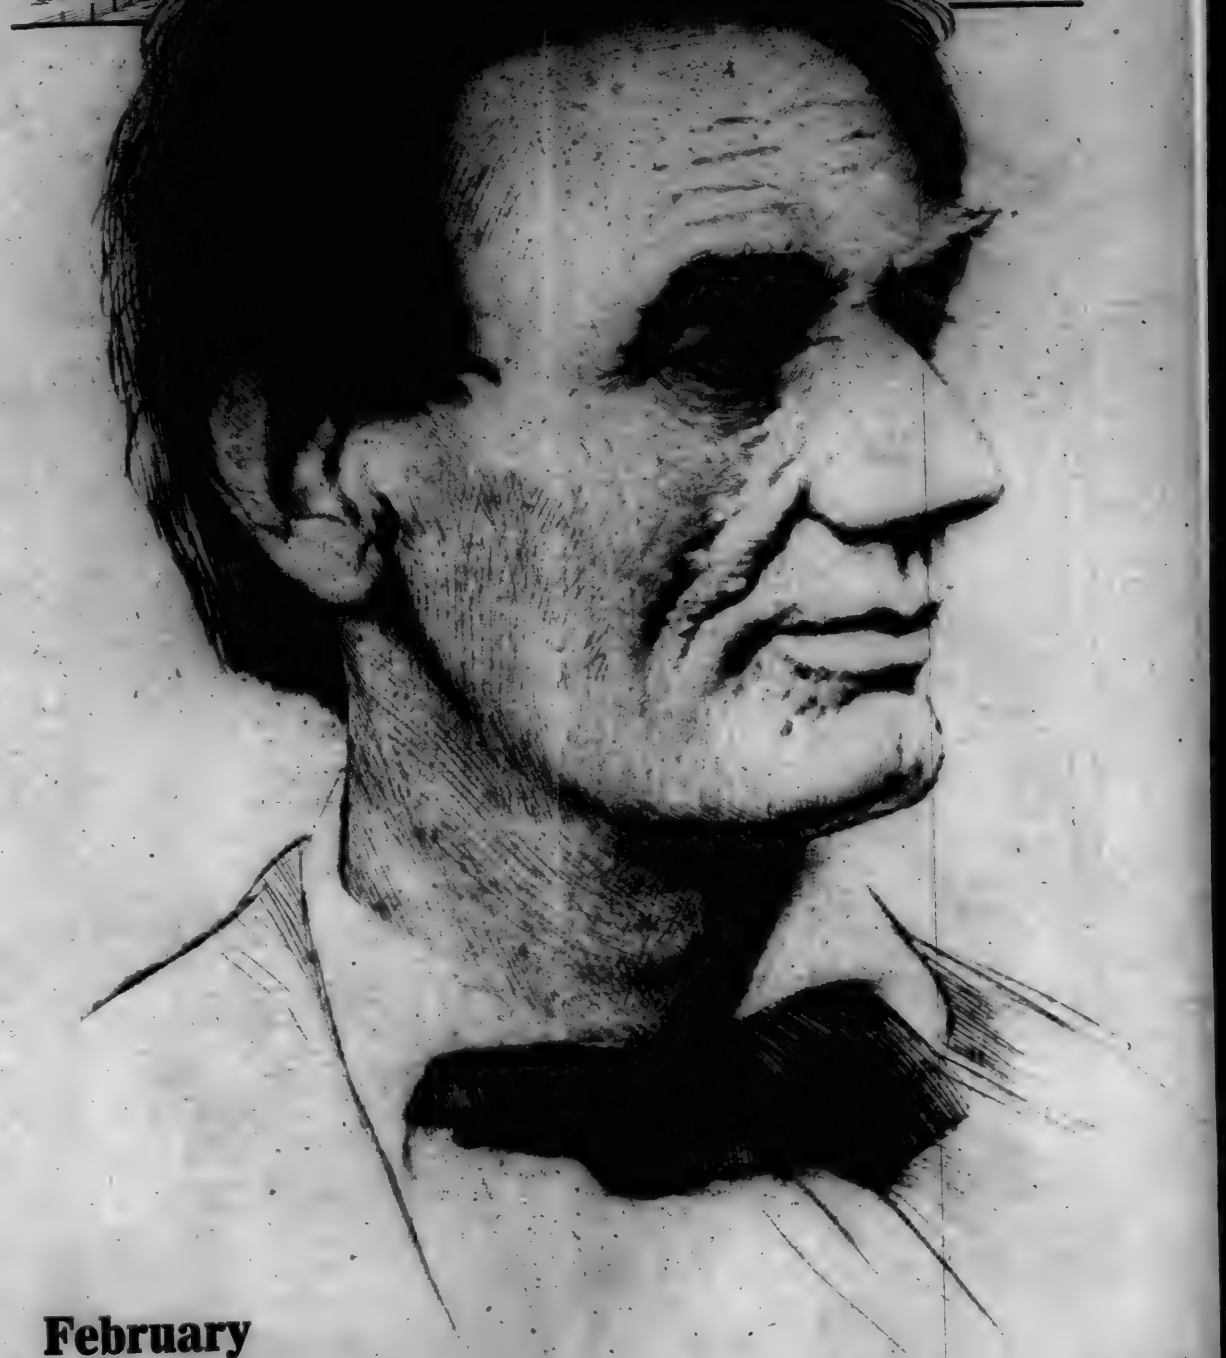
The discussion opposed direct buying of livestock as antagonistic to farmer's efforts in co-operative marketing. Knox, Schuyler, Adams, Henry, and Fulton counties were represented.

Don't forget to ask for fare and one-half rates when you go to the I. A. A. meeting at Springfield, Jan. 29-30-31. All steam and electric roads are offering reduced fares. Come early and be settled before the crowd arrives. It's going to be a great convention.

Champaign County Loses Farm Leader

FARMERS throughout central Illinois mourn the sudden death of Louis S. Burwash, prominent in agricultural activities in Champaign county and president of the Champaign County Milk Producers. The official organ of the Champaign County Farm Bureau says of him:

"Louis Burwash was unusually well liked in his community and throughout the county. He was a good neighbor, always companionable, and was interested in all the problems of his local community, as well as having an intelligent interest in the larger problems confronting agriculture.



"Louis Burwash was himself a good farmer, which gave others confidence in him. He led in the development of Farm Bureau units, the first meeting of the Savoy unit being held at his home. He served as director of this unit during its formational period. He had not only the vision for organized agriculture, but courage, faith, intelligence, and a driving force which made him a man who accomplished things. He saw the value of the work before it was widely recognized as it is today."

Mr. Burwash was a comparatively young man, a graduate of the University of Illinois, and was in excellent health until his sudden illness from indigestion. A subsequent operation proved fatal.

Two hundred and twenty Farm Bureau members in Peoria, Stark, Henry and Knox counties have employed Forest A. Fisher, farm adviser in Morgan county, to supervise their new farm management service. Mr. Fisher is the retiring president of the farm advisers' association.

ELECTIVE OFFICERS FOR 1930

EARL C. SMITH
President

A. R. WRIGHT
Vice-President

EARL C. SMITH, elected president for the fifth consecutive year, operates a 1,140 acre grain and livestock farm near the village of Detroit in Pike county.

He was born at Pittsfield, Illinois, in 1886 and began farming in Pike county at the age of 19.

Mr. Smith came up through the Farm Bureau ranks serving first on the county executive committee and later was elected, successively, vice-president and president of the Pike County Farm Bureau.

He is a director in the First National Bank of Pittsfield, served on his local school board many years, has served as chairman of the board of the Christian Church for more than 10 years, and prior to his election as president of the I. A. A. was a member of its executive committee for three years. Mr. Smith was the Illinois member of the resolutions committee at the Republican national convention in June, 1928, where he presented the minority report on the agricultural plank in the party platform.

A. R. WRIGHT of Varna, Marshall county, newly elected vice-president, is one of the oldest men in point of service on the board of directors.

He helped organize the Marshall-Putnam Farm Bureau serving first as president, then secretary, and later as a member of the executive committee. He assisted in organizing the Marshall-Putnam Oil Co., was its secretary three years and now is a director. Wright is treasurer of the Varna Co-operative Farmers Elevator which he previously served as president and secretary.

In 1912 Mr. Wright became vice-president and cashier of the Marshall County State Bank and in 1921 was elected as active president. He is chairman of the agricultural committee of the Marshall County Bankers Federation. Wright is out nearly every day actively managing the operation of his 700 acre grain and livestock farm.

In addition to his long service on the important finance committee of the Association the newly elected vice-president acts as secretary and a member of the board of the Illinois Farm Supply Co.

NEW DIRECTORS NAMED

Chas. L. Scott

Geo. B. Müller

"THE election of myself as a director of the I. A. A. came as a complete surprise to me," writes William A. Dennis of Edgar county, the new director from the 18th congressional district. "I was at the meeting Wednesday and part of Thursday when I felt obliged to return home.

"I have helped in a small way in Farm Bureau work ever since it was started as I have long been convinced of the necessity of farmers organizing. The demands of my own business of general farming have prevented me from spending as much time in the work as the importance of it requires.

"The I. A. A. is without question the most courageous, active, and successful state association, and I have the utmost respect for the ability of the officers and directors who have developed it. It can be only very inspiring to be associated in the manifold activities of the present officers, directors, and department executives.

"I have been farming 375 acres in a general system since graduating from college 20 years ago. The farm has been in the family ever since my maternal great grandfather bought it from the government in 1817.

"I am building up a pure bred Jersey herd with the assistance of a cow testing association. Last year I had the high herd and the two high cows in the association.

"Regarding your inquiry for a picture, I have had no pictures taken these many years, but will attend to it soon."

The father of Mr. Dennis is Charles H. Dennis, editor-in-chief of the Chicago Daily News.

CHARLES L. SCOTT of Grayville, the new member of the Board of Directors from the 24th district was reared on a farm in Edwards county, Illinois, was a charter member of the Edwards County Farm Bureau and for years was on its executive committee. He is a grain farmer and for the past five years has represented Illinois wheat growers on the board of directors of the Central States Soft Wheat Growers Association with headquarters at Indianapolis. He served as president of the association one year and now is vice-president of the Central States Grain Elevator Corporation.

GEO. B. MÜLLER, the new member of the board of directors from the 16th district, operates a 170 acre grain and dairy farm near Washington in Tazewell county. He raises Holstein cattle.

Mr. Müller has been an active member of the Tazewell County Farm Bureau since it was organized about 16 years ago. He is an active member of the Hopewell Grange which placed second in the state-wide community club contest conducted last year. In addition to being a township director for the Farm Bureau, he is treasurer of the Farmers' Mutual Automobile Association at Pekin, also treasurer of the County Fire Insurance Company. Mr. Müller is a member of the board of directors of the Washington Co-operative Grain Company.

He has been enrolled in the farm accounting project conducted by M. L. Mosher since 1925. The new director from the 16th district is 60 years old and for 55 years he has been a resident of Tazewell county. Mr. Müller is not a talkative man, but he inspires confidence.

The Illinois Agricultural Association RECORD

Economic Justice Through Organization

Agriculture's Strength Must Be Gathered and Co-ordinated

By HON. ARTHUR M. HYDE, Secretary of Agriculture, Springfield, Ill., Jan. 31, 1930

Note: There has been such a large call for copies of Mr. Hyde's recent address that we are printing it in full herewith. Mr. Lowden's speech will be found in the February Illinois Bureau Farmer.—Editor.

THERE is no shortage of plans for farm relief. I have read bales of them. They run the whole gamut of economic theories, and of human emotions. They plumb the depths of perpetual despair. They scale the heights of ecstatic prophecy. They advise the farmers to go to work and all will be well. They urge the farmers to rely on law makers as a sure path to glory. They ring the changes on truths as old as the centuries, and on fallacies which were exploded when Pharaoh was a boy. They propose the comfortable policy of leaving to Father Time the task of restoring economic balance to agriculture. They advocate enacting prices into law. From laissez faire to price fixing—such are the heterodox results when the problem is everybody's, and when everybody is thinking about it.

Hon. Arthur M. Hyde

Comes Too Late

From the farmer's standpoint, the weakness of the laissez faire theory is that an economic balance which is restored in bankruptcy is a wee bit too late,—and the defect of price fixing is that it will not work. Farmers should use their undoubted power more wisely than King Canute. The attempt to order economic tides to stand still will result exactly as did the order to stem the tides of the sea,—in wet feet. It is safer, surer and more effective to work in harmony with economic laws.

It is a happy and helpful thing that everybody is thinking on farm problems. Diverse results are to be expected. Nevertheless, you may start your reasoning at any given point on farm questions and your logic will, in the end, bring you inevitably at grips with the problem of the surplus. By surplus I do not mean merely the carry-over. Some carry-over is necessary. Nor does surplus always mean the margin over domestic consumption. Of some products, such as cotton, we shall always be exporters. The surplus with which farm thinking must busy itself, is that part of the crop which the market, domestic or foreign, cannot absorb without disastrously breaking the price.

American agriculture is over-expanded. We produce a price breaking surplus of many staple crops. Other factors contribute to complicate the farm problem. Over-expansion is fundamental.

> ***"AGRICULTURE must be organized. We mix plenty of brains with the soil in our production of crops, but we do not consider the market before we plant, nor can we follow our production through in the market after it is produced. We use scientific methods to plow, seed and reap; we use no method at all in regulating the size of the output or the movement to market. Unorganized, we have little voice in the sale of our own products. . . . . "Shall we continue annually to pile up mountains of foods and fibers, the very size of which reduces the world price, breaks the price at home, and leaves us poorer? Shall we perpetually attempt to pile the mountain higher? There is nothing economically sound or socially desirable about producing crops to sell at less than the cost of producing them."—Hon. Arthur M. Hyde before 15th annual convention I. A. A., January 31, 1930, Springfield.***

Too Much Expansion

The land policy of the United States has for over a century been a policy of expansion. Early in our histotry we ceded more than 100,000,000 acres to stimulate internal improvements. We have given our lands as bonuses to soldiers. We have offered them freely to homesteaders. We have held it to be economically wrong to permit land to be undeveloped.

Other forces have stimulated production. The war brought under plow many millions of acres which were needed for emergency food supply. Interest, taxes, and other fixed charges are operating to hold many of those acres in production. Scientific farming, purebred seeds, purebred sires, new varieties of plants have spread the acreage and increased its productivity. The use of improved machinery, and the increased efficiency of power driven appliances have expanded the productive power of farm labor. The automobile and the tractor have since 1920 displaced 5,819,000 horses, and released for other purposes 18,000,000 acres formerly required to feed them.

Consider the combine. This machine eliminates the grain binder, the shocking, the stacking and the threshing by combining them all in one machine. It reduces the cost of producing wheat to a small fraction of the former expense. It has revolutionized wheat growing, made possible the cultivation of a vast acreage, and precipitated the wheat crop of America into the market in an ungovernable torrent, which has choked elevators, embargoed ports, filled ships and thousands of railway cars,—in short has well nigh broken down the marketing and distribution machinery of America.

Constant Change

In 1926, Kansas had 8,000 combines. In 1928, she had 20,000. North Dakota in 1925, had its first combine:

three years later it had 1000. In 1929 more than half your hard winter wheat was harvested and threshed with combines.

Nor is this all. Changes in styles of women's clothes has reduced the market for cotton and wool which American farmers produce, and increased the market for silk and haircuts which they do not produce. The development of rayon has decreased the farm market.

Even changes in diet, due partly to the fact that the whole nation travels on wheels, have caused shifts in the markets for farm products. The development of substitutes for lard and butter has narrowed the market for the products of the dairymen and the hog farmers.

Instances might be multiplied indefinitely. Larger acreage, scientific methods and mechanized farming have vastly increased the production of the farmer, decrease in consumption and the development of substitutes have narrowed the markets.

Instinctively, we have turned to the foreign market as an outlet for this surplus.

But foreign agriculture has also expanded. The total area under cultivated crops in Canada, Argentine, and Australia, has increased 200 per cent since 1900. These three countries had over 40 million more acres sown to wheat in 1929 than in 1900, a gain of over 300 per cent. Their combined wheat acreage is now greater than that of the United States, while in 1900 it was only one-third as much. The area under corn in Argentine is four times what it was in 1900. That country is now the world's largest exporter of corn. The flaxseed acreage in Argentine increased from 1,500,000 acres in 1900 to 7,000,000 acres in 1929, and the United States is the principal market sought for this Argentine product.

World Production

Dairy products exports from the Southern Hemisphere have increased by leaps and bounds. The exports of butter from New Zealand, Australia and Argentine were, in 1900, 50 million pounds. They are now seven times as great. New Zealand exported 12 million pounds of cheese in 1900,—175 million pounds in 1928. The exports of casein from Australia have jumped from a few thousand pounds in 1900 to 40,000,000 pounds in 1928. In Europe, the most rapid agriculture recovery has been in livestock and dairy products. Production of milk, cheese, butter and pork now exceed the prewar level. Even more spectacular has been the expansion in the beef industry in the Southern Hemisphere. Australia, Uruguay and Argentine combined now export more than 2000 million pounds of beef as against 300 million pounds in 1900. Argentine alone has increased its exports from 50 million pounds in 1900 to 1800 million pounds in 1929. American beef has relaxed its hold on the European market. Our beef exports have declined to 132 million pounds in 1927, or about 7% of Argentine's exports for 1929.

The expansion in wool production has also been great. In Australia, the world's largest wool producer, the clip

HOW TO WIN A LADY FAIR

Courtesy Chicago Daily News.

now amounts to 900 million pounds, or double its production of three decades ago.

Exports Increase

Development of refrigeration methods and facilities has enabled Australia, the South African States, New Zealand, Brazil and Chile, to become important factors in the world's fruit trade. There has been a large increase in exports from those countries of oranges, grapefruit, raisins, currants, plums and apples.

Even Manchuria, in 1900, devoted to hunting, fishing and herding, now has 30,000,000 acres in cultivation, and exports nearly 5 million tons of soya beans and bean products.

Before the war, Asiatiac Russia had 1,500,000 acres in cotton. During 1929, she had 2,500,000 acres.

Tropical and sub-tropical agriculture have had a remarkable expansion in recent years. Among the products which compete with the United States are sugar and vegetable oils. The production of sugar in Cuba alone increased from a prewar average of less than 2,500,000 tons to over 5,000,000 tons in recent years. Java has increased her sugar production from a prewar average of 1,500,000 tons to a present average of 2,500,000 tons.

One of the most significant developments in world agriculture since 1900 has been the expansion in tropical vegetable oil production. These oils compete in use with such temperate zone vegetable oils as cottonseed, linseed, and soya bean, as well as with animal fats such as butter and lard. The main items in the tropical vegetable oil crop are palm oil, copra and cocoanut oil. The exports of copra from the Philippine Islands grew from around 100,000 tons in 1900 to about 450,000 tons in 1927. Cocoanut oil exports grew from nothing in 1900 to over 300 million pounds in 1927. Exports of palm and palm kernel oil from French West Africa are 50 per cent larger than before the war.

In short, farm production has increased since the war, not only in the United States but quite generally throughout the world.

Output Runs Ahead

The reason is plain. During the war production increased outside Europe to compensate for reduced production in Europe. When Europe largely restored its agriculture, the other countries did not correspondingly decrease theirs. Demand has increased somewhat, through the growth of population, but not proportionately. As a result, the world's output ran ahead of market requirements. Prices inevitably fell. Practically all agricultural countries today have an agricultural problem on their hands.

Some European countries are strongly urging a policy of agricultural expansion in their colonies in Asia and Africa. There is abundant new acreage available there, as well as in Argentine and the South American countries generally.

Soviet Russia has an ambitious program for expanding agriculture. It involves three activities. 1. To encourage the smaller peasants to expand acreage and increase yield. 2. To promote the so-called collective peasant farms, and, 3. To establish new enlarged government farms.

England has set up "The Empire Marketing Board" to encourage agriculture. Its work includes biological research, economic investigations, including the organization of producers associations, and a "Buy Within the Empire" campaign to promote the sale of products of the British dominions.

Other nations are striving also to emulate the efficiency of the American farmers. We hold no corner on scientific farming. Significant also is the increasing use by other countries of agricultural machinery. In five years, exports of American farm machinery have nearly doubled,—have risen from $60,000,000 in 1924 to $116,650,000 in

1928. These figures take no account of the production of American owned factories located in Canada, Sweden, Germany and France. The manufacture of agricultural implements in these countries has greatly expanded since the war. Notable among them is Germany, who has almost literally beaten her swords into plowshares by turning her great Krupp Gun Works over to the manufacture of farm machinery.

Facts Well Known

There is nothing new in all this. Agriculture has been greatly expanded, both at home and abroad. The facts are well known. The question is not as to conditions, but as to the method of dealing with them.

There are those who maintain that it is the duty of the farmer to express himself in the largest possible production, that he who makes two blades of grass grow where one grew before is a public benefactor; that the farmer has not only the right but the duty to produce as much of the crops which he raises as the greatest possible acreage, the most scientific methods and his own best efforts will permit.

A False Argument

If this theory is to prevail, then logically we should encourage a larger acreage per man; an increasingly scientific, mechanized and intensive cultivation; and the most efficient system of marketing. But before we embark on this program we are bound to recognize that enormous surpluses will be produced which must compete for the markets of the world. Inexorably they must be sold on the basis of a competitive price. This in turn means that American farmers must produce at so low a cost as to return a profit on the world price. If this is our program, then we must compete with a foreign agriculture, which is also expanded, which has the benefit of cheap lands, uses cheap labor; and, in increasing degree, modern machinery. Such expansion would mean ever increasing surpluses from America meeting foreign competition in the world market. No debenture, or other scheme of subsidy, could equalize such conditions. The American farmer cannot, and ought not, be compelled to meet the fierce competition of cheap lands and low standards of living of other countries.

Under the circumstances, shall we continue annually to pile up mountains of foods and fibers, the very size of which reduces the world price, breaks the price at home, and leaves us poorer? Shall we perpetually attempt to pile the mountain higher? There is nothing economically sound or socially desirable about producing crops to sell at less than the cost of producing them.

We mix plenty of brains with the soil in our production of crops, but we do not consider the market before we plant, nor can we follow our production through in the market after it is produced. We use scientific methods to plow, seed and reap; we use no method at all in regulating the size of the output or the movement to market. We have little voice in the sale of our own products.

Profit Determines Prosperity

But you say, shall we abandon scientific methods, scrap our machinery and let our lands lie idle while interest and taxes eat them up? Certainly not. Let us not forget that scientific principles and mechanical farming should apply to the method and cost of production and not to the size of the crop. Profit, not surplus products, will determine prosperity. Interest and expenses are met out of surplus profit, and not out of surplus production. Profit, not quantity of crop, determines the standard of living, and supports civic enterprises. What the nation needs is not more crops or less crops, but prosperous and contented farmers.

> **"We seek equality with industry. But we have observed that an ungovernable surplus production has wrecked many an industry. . . . . .**
>
> **"We work 365 days a year, every fellow for himself, refuse to co-operate with anybody, produce a surplus,—and reap a declining standard of living.**

Steel Men Organized

We seek equality with industry. But we have observed that an ungovernable surplus production has wrecked many an industry. With the opening of enormous deposits of iron ore north of Lake Superior and the development of the Bessemer converter, the steel industry expanded by leaps and bounds. The production of steel was divided among many independent plants which could and did make steel cheaply and rapidly. Production outran demand, prices sagged and fluctuated under the weight of the surplus. The solvency of every steel plant in the country was threatened. The answer was found in the organization of a merger of steel plants which controlled 65 per cent of the production. Production was regulated to demand, and the prices were stabilized. The several independent plants had used scientific and economical methods. They had been efficient, but they over-produced and broke the price. They merged. The resulting corporation has paid dividends for thirty years, and has doubled the value of its properties out of earnings.

For industry, regulated production means profit, and the standards of living of industry rise. For agriculture, an immense volume of production means lower prices, and our standards of living decline.

We look on admiringly while industry regulates production, and labor cuts its hours to eight per day. We are urged to dispose of speedometers and buy alarm clocks.

Work Too Hard

Industry organizes,—assembles its gigantic systems, welds them into great producing units through the cooperation of thousands of individuals, regulates production, and pays high wages and good profits. We work 365 days a year, every fellow for himself, refuse to cooperate with anybody, produce a surplus,—and reap a declining standard of living.

Such being the problem, what is to be done about it? First: there is the tariff. Tariff lies at the very foundation of all plans for organizing agricultural marketing, planning crop production, and surplus prevention. American agriculture is entitled to the American Market. National policy demands it.

Our agricultural imports amount annually to about $2,200,000,000. Of these, silk, coffee, rubber, and sugar account for $1,200,000,000 or 56.2 per cent. Chocolate, spices, and tea account for $106,000,000 or about 5 per cent. About 61 per cent of our agricultural imports consists therefore of products which we cannot produce at all or of which we cannot produce sufficiently. Except sugar, this 61% of all agricultural imports may be dismissed from tariff discussion. Since sugar accounts for one-fourth billion dollars of these imports, the beet sugar industry becomes important. The man who can develop or propagate a rubber producing plant which can profitably be grown on the farms of America and thus supplant the $312,000,000 of rubber imports will be entitled to the blessings of the American farmer.

These Compete

The remainder of the imports, 39% of the total, or $848,000,000 are competitive with American Agriculture.

Dairy Products—Total	$ 37,754,000
Eggs	3,700,000
Hides and Skins, exclusive of furs	146,423,000
Wool and Mohair	79,451,000
Animals and Animal Products	86,159,000
Grain and Grain Products	34,616,000

Cotton	44,860,000
Fruits and Nuts	85,343,000
Oilseeds and Oilseeds Products	144,000,000
Other seeds	8,516,000
Tobacco	58,800,000
Vegetables and Vegetable Products	118,500,000

In many, if not all of these products, a part of the imports are of qualities or varieties which we do not produce and which are needed for blending in manufacture. This is notably the case in cotton and tobacco. Nevertheless, these products present proper cases for tariff protection, and opportunity for the development of our own production. This is particularly true of oilseeds and their products, wool, dairy products and animal products.

Second, something can be done to enlarge the outlet, and the market for farm products. The development of new uses for products, the discovery of uses for by-products, and the cultivation of crops we do not now produce, are all possibilities. For those products which must go into export, quality production is important because superior quality offers the sole escape from competition on price only.

Proper Use of Land

Third, the proper use of land. The total acreage of the United States is about 1,900,000,000. Of this, 950 million acres are classed as lands in farms. Of the lands in farms, 505 million are classed as tillable. Of it all, 350 million acres are actually in cultivation. In my opinion, the cultivation of all the 505 million acres with intensive methods could easily double the present crop.

An economic use of land must be developed. There are millions of acres in cultivation in America which are submarginal in character. Such lands ought not to be farmed. They will not return to the farmer an American standard of living. Agriculture on submarginal lands is more mining than farming.

Plant to Trees

The withdrawal from use of such lands and their reforestation would be a profitable public enterprise. Much more is involved than our timber and pulp supply. The production of such lands, while small per farm, goes far in its contribution to the depressing surpluses. Reforestation would prove a substantial aid to flood control, and would go far to stopping the enormous erosion which results, in many cases, in complete destruction of the producing value of the farm. They should be taken out of cultivation and held for succeeding generations, which, as population grows, may probably need them.

I should like to see this association and others of its kind give serious thought to a program of State acquisition of submarginal land, with Federal aid. Private enterprise could also be stimulated to acquire and reforest such lands by exemption from taxation until such time as the forest crop is ready for harvest.

Fourth: A readjustment of farm taxation is needed. This subject has already been exhaustively treated in this hearing. I desire merely to point out that equality in the field of taxation is as desirable as equality in other fields. Taxes, should, so far as is possible, come out of income, not out of capital invested. Further, the farmer has an equity in the community which he himself has helped to create, but in which he shares little. Community life creates new values, social, cultural, economic. Opportunities are larger in community centers. Land values increase with concentration of population. Through his trade with the community, both as buyer and seller, through his contribution to the raw materials of trade and manufacture, the farmer helps to create these values.

READ Secretary Hyde's speech to the end and write your comments, if any, to Editor Illinois Agricultural Association RECORD, 608 So. Dearborn St., Chicago. We will publish the best letters in the March issue.

Better Tax System

On the other hand, the urban centers, in which wealth is concentrated, have a vital interest in the prosperity of the agriculture surrounding them. The whole nation has a deep and direct interest in the maintenance of equal educational opportunity for the boys and girls of the farm as well as of the city. It is no more than simple justice that the base of taxation be spread so that the burden of maintaining a vigorous and informed national life shall fall equally upon all classes of our citizens.

Fifth: Agriculture must be organized. Given a multitude of producing plants, a production too large for the demands of the market, and an annual surplus so great as to seriously depress the price, industry would meet the problem by mergers. But you cannot merge 6 million farms. We have no desire to do so. The farm family is a social unit of value so great as to demand its preservation. Its independence, its compactness, its ideals, must be maintained, but in maintaining them we must remember that we are preserving a small producing unit in a society in which all other forms of production are organized into large units. The farmer must have help, not only to reduce the competition within his own industry, but to see that the social, economic and industrial adjustments and combinations which are going on all about him do not bear too heavily upon him.

Organization the Answer

One general answer to farm problems, is organization. Organization to control marketing, to standardize output, to eliminate the waste and duplication in marketing and distribution, and to mobilize the economic power of agriculture. Thus the farmer can approximate the position of industry, or of other groups. By the long arm of his own organization, the farmer can make himself felt beyond his own line fences and in the markets of the world. Through his organization, the farmer can get information as to commodity supplies, can bring his production within the limits of demand, can control the surplus problem by preventing it. By organization, the farmer can take control of his own industry; reestablish the independence of his calling, win his own place in the sun of economic equality, and, having won it, hold it against all the changing vicissitudes of the future.

The modern organization of business and industry has complicated and enlarged the problems of agriculture. Organization has taken over every industry except agriculture. Competition in industry is no longer between individuals, but between organizations. Labor is organized. Agriculture alone interposes against the competitions of powerful organizations the bared breasts of its individual producers.

To assist in the organization of agriculture, to take the problems of the various farm commodities out of the realm of politics and partisan bickering, and to meet them in the realm of economics, to set up an authoritative, tribunal which shall study each separate problem, and afford leadership for agriculture in all its phases; and to do this, not by subsidy nor by governmental dabbling in business, but by helping the farmer to help himself through his own organizations, this is the purpose of the Agricultural Marketing Act.

Industry Should Help

Industry, which owes much to business organization, should welcome the opportunity to lend a helping hand in the organization of agriculture. With all due credit to the personal factor of initiative and ability, the fact remains that organization has played the predominant part in the rapid growth and prosperity in industrial and commercial fields. From the standpoint of self-interest, industry can well afford to

assume a helpful attitude toward securing economic equality for agriculture. Here are 27,000,000 consumers who know the value of American made products. No changes in packages, in credit facilities, or in sales departments of industry is needed. The increase in purchasing power of the farmer will mean enlarging markets and continued industrial expansion. Economic equality for the farmer means an increase in the net annual farm income. The larger part of this would soon find itself in the channels of trade.

We talk much of economic equality. We have set it as the goal of our quest.

We know what political equality is. It means equality of opportunity for every man,—a free field and a fair chance in the race of life. It means equality before the law,—the exemption of any citizen from any restraint or limitations not imposed upon every other citizen. It means that the doors of opportunity shall be kept open to all comers to achieve as great a success as their respective abilities merit.

Political equality does not mean that the stragglers in the race shall be picked up by the long arm of a benevolent government and set by the side of the leaders. It does mean that all take the same hurdles, cover the same course, and finish in order of their abilities and energies. The fact that this does mean equality is abundantly proven by the thousands of instances in American life of men who started with nothing, received no outside aid, and finished the race among the leaders. But no man has ever won who refused to put forth the effort to run.

Race Among Industries

Economic equality for agriculture means exactly the same thing. It means the same opportunities and the same hurdles as other industries. It means a free field and a fair chance to compete in the economic race on the same terms as other industries. It means no advantages and no hindrances over others. This is a race, run not by individuals, but by industries. In this race, agriculture must compete as an industry.

You recall the fabled race of the hare and the tortoise. Conscious of its speed, the hare slept, while slowly and painfully the tortoise covered the distance and won. Conscious of its titanic strength, agriculture has slept, failed or refused to gather its strength, dallied with economic forces while other industries have found their place in the sun, and in so doing have displaced and depressed agriculture.

Agriculture has the speed,—of what use if it drowses away the hours? It has the strength,—of what avail if it be not gathered and coordinated?

Frank D. Barton

R. F. Karr

Chas. Marshall

They Served Faithfully

THE outgoing vice-president, Frank D. Barton of Cornell, and Committeemen Robert F. Karr of Iroquois, and Charles Marshall of Belknap served the Farm Bureau members of Illinois faithfully during their years of association on the I. A. A. executive committee.

Mr. Barton was a committeeman and officer for eight years during most of which time he served as chairman of the legislative and public relations advisory committee. He seldom missed a meeting, and worked conscientiously at every task to which he was called by the organization.

R. F. Karr, president of the Iroquois County Farm Bureau was a member of the executive committee for six years. His ability and good judgment were a real asset to the organization. Karr served successively on the information, organization, and finance committees. Charles Marshall of Belknap was elected from the 24th district in 1926 to succeed Curt Anderson. He served on the marketing and public relations advisory committees during the past four years, performing his duties faithfully.

All Others Organized

Every industrial interest except agriculture is organized. In the race of the industrial giants, which have the combined organized strength of their separate parts, agriculture enters the strength and the fleetness of the individual farmer. Agriculture must organize.

In this city, the spirit of the Great Emancipator is all pervading. Though sixty-five years at rest, yet he lives. His cry was political equality for a people,—through emancipation. Our cry is economic justice for an industry,—through cooperation. His goal was achieved through four bitter bloody years of war. Not on fields, swept by shot and shell, lies our struggle; but in fields where clash the slower, less dramatic, but equally dynamic forces of the industrial and economic realm. Then the issue was Liberty through the perpetual and indissoluble Union of the States. Let us now organize an association of all branches of agriculture, to work together, think together, and achieve together the economic equality of the industry.

Greatest Convention Is Popular Belief

Springfield Proves An Excellent Host To Delegates

THE greatest annual convention in the history of the Illinois Agricultural Association!

This was the expression heard from many sources during and following the recent meeting in Springfield. The fact that nearly 1500 attended the banquet on Thursday night while a similar number assembled the next day for the luncheon in the great Springfield armory is evidence enough that all previous records were broken. That all visitors and delegates were well provided for and accommodations available for all meetings is due in no small part to the untiring efforts of Farm Adviser Edwin Bay of Sangamon county and the many committees of Farm Bureau members and Chamber of Commerce officials who smoothed the way.

Edwin Bay

Nation-Wide Hook-Up

The armory decorated with flags and bunting looked little different than the great arena at the Republican National Convention at Kansas City more than a year ago. Through the courtesy of Station WLS and the co-operation of the National Broadcasting Company the speeches of both Secretary Hyde and former Governor Lowden were broadcast far and wide. The NBC reports a nation-wide hook-up of greater proportions than that ever employed for a similar meeting. Broadcasting stations from Jacksonville, Florida, to New York and as far west as Tulsa and Oklahoma City picked up the convention program. Hundreds of letters came in from all parts of the country asking for copies of addresses.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Editor, George Thiem

Published once a month by the Illinois Agricultural Association, 608 So. Dearborn St., Chicago, Ill. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

I. A. A. Known Afar

THAT the Illinois Agricultural Association is one of the best known farm organizations in the world is revealed in inquiries, magazine and newspaper stories published in this and other countries, and in letters received from many sources.

During the past few years letters of inquiry have come in from Jerusalem in Palestine, from Australia, New Zealand, South America, England, Germany, and from Russia. President Earl C. Smith recently received a letter of congratulations from Charles J. Riley, Office District Attorney, Executive Department, the Panama Canal, Ancon, Canal Zone.

"I want to congratulate you upon your re-election as president of the Illinois Agricultural Association," the letter stated, "which I note from the report I received at my office today. I have farm land in Pike county with which I have tried to keep in touch during my vacation period. If I have the opportunity I want to meet you personally, as I have long admired your efforts in behalf of agriculture, and especially, the firm stand you took last year that brought about the declaration from both major parties that agriculture was in need of special consideration."

On Controlling Production

CONTROL surplus production. Keep the supply somewhere near the demand and the farm problem will be solved. This was the recent advice that came from both Alexander Legge and Arthur M. Hyde.

No great progress will be made in controlling crop surpluses in our judgment until farmers have control of the system of distribution. Why is this true? Simply because so many distributors and private commission houses thrive on the large crop marketed at low prices while their profits diminish when the supply is scarce and prices are high. The same is true of processors.

The following item from the pages of a prominent financial journal illustrates this point.

"Attempts are being made to capitalize on the grain situation in connection with Corn Products (Corn Products Refining Company), which has been firm during the recent weakness in corn prices. The fact that corn has been selling about ten cents a bushel below the price of a year ago is construed as a favorable factor in the operations of the company and has strengthened the belief that another record year is in store for the company. Share earnings for 1929 are estimated at around $5.50 as compared with $4.52 a share in 1928."

This statement clearly reveals the interest of at least one processor in buying the raw product—corn—cheap. Our meat processors have a similar interest. They invariably make more money from a large hog crop than from a small one. They are interested in volume. Most of them secure their percentage or toll regardless of whether the farmer makes or loses. This is true of the railroads. The butter manufacturer is no exception. The greater the volume of butter processed in his creamery, ordinarily, the more money he makes. The private commission man naturally favors large receipts of livestock and produce. He collects toll from every carload.

Only the farmers' interests will be served through a limited supply that will make the tariff effective on his crops. Organization to control production may have even greater possibilities than organization to control distribution, although there is no reason why both should not go hand in hand.

On The Sidelines

ANYONE reviewing this issue of the RECORD can get a fairly good idea of the broad interests and activities of the organized farmers of Illinois. The reviews of the many conferences and sessions held during the recent Springfield convention give one a clearer picture of the problems which Farm Bureau members are making an earnest effort to solve. How any able, self-respecting farmer can stand on the sidelines withholding his support while his organized neighbors grapple with tasks that concern all farmers is beyond our comprehension. The address of President Earl Smith well pointed out that the unorganized farmer constituted the greatest single obstacle to progress in working out agricultural relief.

I. A. A. Has Four Way Program Smith Shows

Unorganized Farmers Hinder Advancement He Says in Annual Message to Members

THE program of the Illinois Agricultural Association and County Farm Bureaus, while covering a vast field, may properly be classified in four major divisions, President Earl C. Smith said in his address opening the recent 15th annual meeting at Springfield on Jan. 30. These are as follows:

(1) To encourage the organization of farmers into cohesive community, county, state and national bodies in which the problems of each may be studied and acted upon in a united and constructive manner;

(2) To assist farmers in putting into operation the most efficient and economical production methods;

(3) Through collective effort, to reduce costs of commodities necessary in farm operations; and

(4) To regain for farmers their rightful bargaining power in the sale of their products; or stating it in another way, to secure and maintain price levels for American farm products equal to the level of costs entering into their production.

Hinder Progress

In carrying out the first phase of this program, the Association provided a larger budget in 1929 than in any of recent years. Illinois farmers are leading the way in the percentage of active farmers who have joined forces to further their rightful interests. Yet entirely too many farmers remain for one reason or another outside of organized ranks. *It is my opinion that the unorganized farmers constitute the greatest present obstacle hindering the advancement of the farming industry.* There could be no more helpful or constructive effort made in 1930 than to stimulate a revival of their interest.

Defending the efficiency of the American farmer Smith showed that while in numbers, he is only one-twentieth of the world's farmers, he produces two-thirds of the world's corn, three-fifths of its cotton, one-half of its tobacco, one-third of its hogs, one-third of its poultry, one-fourth of its oats, one-fifth of its wheat, one-seventh of its cattle, and one-tenth of its sheep. His other products, while comparatively small in percentage of the world's totals, yet bulk large in the feeding of the nation.

Policy on Buying

"There is a wide difference of opinion as to how far farmers should go in putting forth collective effort to reduce the cost of the many things they have to purchase. The Illinois Agricultural Association, in fact, a majority of the State Farm Bureaus, believe that in the field of collective purchasing, efforts should be confined to such commodities as enter directly into farm production costs.

Alluding to the I. A. A.'s policies on co-operative marketing development Smith said, "the Association has no desire to increase its power or add to its responsibilities in such matters. It has no other pleasure, however, than to put itself in a position where it can discharge its full responsibility to the farmers who alone make possible all such services. I predict that 1930 will witness the Association putting forth greater effort in marketing activities than at any time in its history."

The I. A. C. A.

Reviewing the service rendered by the Illinois Agricultural Co-operatives Association he said "only limited study is necessary to convince one that a vast majority of past failures of farm co-operative organizations were directly due to improper or delayed information as to business trends reaching their boards of directors.

READ carefully the statements and accomplishments of the I. A. A. and its associated companies set forth on this page. They reveal the broad program of service developed within a short period of time by the organized farmers of Illinois. Interest your neighbor in the Farm Bureau if he is not a member by telling him what organized farmers accomplished by working together last year.

"It is interesting to note that since the organization of this co-operative, only three of its members have failed, and in each of these cases, failure could have been avoided had the advice of the audit service been followed.

"The only complaint of this service reaching the management has been relative to some excessive cost over that of some available individual audit service. The management has exerted and will continue to put forth every effort to reduce charges to a minimum, commensurate with adequate and dependable service.

"It should be recognized that the supervision given all audits by this company, the institutional responsibility made possible thereby, and the exhaustive character of their uniform reports much more than offset any small additional cost for such service."

Large Growth Here

The Farmers Mutual Insurance, it was shown, had in force on Jan. 1, 1930, $15,154,593 of fire insurance, $5,909,266 windstorm insurance, and $4,086,276 growing crop hail insurance, an increase of $10,950,000 of insurance over the previous year's record.

Accomplishments Of I. A. A. In Brief

Secretary's Report to Members at Springfield Convention Reveals 1929 Results

(1) Saved approximately $227,500 on volume purchasing of agricultural limestone.

Geo. E. Metzger

(2) Saved approximately $78,000 on centralized buying of rock phosphate. Total savings on rock phosphate and limestone $305,500.

(3) Resisted increases in western livestock freight rates which, if allowed, will mean $500,000 per year additional freight on Illinois livestock.

(4) Represented farmers' interests in many other freight rate questions. Secured new classification of peaches from third to fourth class resulting in saving of approximately $29 a car from typical southern Illinois points to Chicago.

(5) Collected 981 loss and damage claims, 230 overcharge claims, and 56 general loss and damage claims, making a grand total of 1,267 claims with a total recovery of $35,758.80.

(6) Assisted many county Farm Bureaus in rural electrification and power line route cases. Assisted in a number of telephone rate and service cases. Represented farmers in 21 hearings before Illinois Commerce and Interstate Commerce Commissions.

(7) Department of Taxation tested land valuations in seven counties, and analyzed data in others. Result of previous reductions meant a saving of $4,700,000 in 1929 taxes if previous high valuations had remained unchanged.

(8) Carried on state-wide campaign to change present unfair and unjust taxing system so as to place taxation on ability to pay.

(9) Represented Illinois farmers before state legislature to protect their interests in government.

(10) Helped secure an increase of 925 carloads of livestock shipped to co-operative Producer agencies at Chicago, St. Louis, Indianapolis, and Chicago over 1928. During 1929 Illinois farmers contributed 49.27 per cent of the livestock handled by the four Producer agencies serving Illinois. Around 23 per cent of total livestock sold from Illinois farms was marketed through these farmer-owned co-operatives.

(11) Through Illinois Farm Bureau Serum Association saved 20 to 25 cents per 100 c. c. on centralized purchasing of 30,910,000 c. c. of anti-hog cholera serum and virus for members in 67 counties.

(12) Marketed 675 straight carloads of fruits and vegetables through the Illinois Fruit Growers Exchange. Marketed additional 90 cars in less than carlot shipments

Farm Bureau Families cooperate t

Glenn Saxe Family, Edwards County

EVERY MEMBER OF THE FAMILY INSURED

TWENTY-FOUR MILLION dollars of life insurance written and paid for from February 1, 1929, to February 1, 1930! A world's record for first year production of any company. This is the accomplishment of the Country Life Insurance Company; the answer of the organized farmers of Illinois to the doubters who said, "It can't be done."

Farm Bureau families in the organized counties of the state made this world's record possible. Moreover, Farm Bureau co-operation put this business on the books at $10 per thousand less for the first year's acquisition cost than the closest class of competitors. Low overhead made it possible. This is the secret of Country Life's low premiums. This record reveals how dividend returns will be made possible in the future. The opportunity lies ahead for Farm Bureau members through co-operation to establish an unheard-of low net cost record. Working together for a larger volume, Farm Bureau members can establish most attractive dividends.

Country Life is your company. You control the cost of insurance by determining how large the dividends shall be. These dividends will be directly proportional to the help Farm Bureau members give in rolling up a large volume in future years.

(Continued from page 9)

Facts and figures regarding the Illinois Farm Supply Co., Country Life Insurance Co., and the Illinois Agricultural Service Co., were presented in like manner. These are given elsewhere in this issue and in the 90-page Annual Report for 1929.

"While we all should and do feel proud of the successes and attainments of these so-called commercial services," said Smith, "we must not be unmindful that they are all incidental to, and not the main justification for the organization of farmers."

Doubles in Size

Referring to the year's progress of the Illinois Agricultural Mutual Insurance Company Mr. Smith pointed out that a year ago this company reported having 11,121 policyholders. On January 1, 1930, 19,072 policies had been issued. The company closed the year 1929 with assets totalling $427,185 and a net worth of $54,370.

That the company has been developed and operated along safe and conservative lines is best disclosed by the fact, that should it be dissolved as of January 1, not only would the policyholders receive a return of all investments in surplus shares and premium deposits, but would share equitably in the distribution of the net worth of the company.

National and State Problems

The various steps in the development of a national policy for agriculture, and the state tax problem next were dealt with in detail by President Smith. The history, views, and policies set forth are well known to most members.

"Should trial and practical experience develop the necessity of amending the Marketing Act, or supplementing it with additional legislation so as to make effective the full aims and purposes of the policy declared by Congress," he said, "farmers will be fully prepared and justified in seeking such changes."

27 Over The Top

TWENTY-SEVEN counties made their quotas in the December-January campaign to make life insurance available to every farm family according to a late checkup by the Country Life Insurance Co. The nine counties that went over the top by Jan. 1, 1930, are as follows:

Effingham, Pres.	Carroll
Wabash, Vice-Pres.	Henry
Lawrence	Grundy
Winnebago	Marshall-Putnam
Peoria	

Following are the counties that made their quotas by Feb. 1, 1930:

White	Macoupin
Morgan	Richland
McLean	McDonough
Tazewell	Stevenson

The Election

EARL C. SMITH was reelected president of the Illinois Agricultural Association for the fifth consecutive year following the mammoth banquet in the armory on Thursday night. A. R. Wright of Varna was elected vice-president to succeed Frank D. Barton who retired.

At the close of Mr. Lowden's address President Sam Thompson, the gray-haired leader of the A. F. B. F., was introduced. After expressing his congratulations to delegates and members for their great meeting, he picked up the gavel and presided while Mr. Smith retired from the platform.

E. C. Coulter of Sangamon county was duly recognized and mounting the platform nominated Earl Smith for reelection in a few well-chosen words. The nomination was seconded by L. E. Lingenfelter of Pulaski county. There were no other nominations. The secretary was instructed to cast a unanimous ballot for Mr. Smith.

J. E. Mummert of Fulton county next placed the name of A. R. Wright of Varna in nomination for vice-president which W. H. Moody of Rock Island county seconded. There were no other nominations. The secretary was instructed to cast a unanimous ballot for Mr. Wright.

In like manner elections were held for directors from the 12th, 14th, 16th, 18th, 20th, 22nd, and 24th districts. Only three changes were made. Geo. D. Muller of Washington, Tazewell county, was elected to fill the vacancy left by Mr. Wright in the 16th district; W. A. Dennis of Paris, Edgar county, was elected to succeed R. F. Karr in the 18th district; and Chas. L. Scott of Grayville, Edwards county, was elected to succeed Charles Marshall in the 24th district.

Selling is a game. Its success depends largely upon one's mental attitude.—Fred Russell.

Baseball League Report Shows 71 Games in '29

New Officers Elected, Rules Discussed at Annual Meeting, Springfield

A TOTAL of 71 official games were played by the 21 active Farm Bureau teams in five divisions last year, George Thiem, secretary of the Illinois Farm Bureau Baseball League, reported at the annual meeting in Springfield on Jan. 29. Approximately 100 delegates, officials, players and farm advisers attended.

The League operated more smoothly and effectively than at any time in its brief history, said Secretary Thiem. The few controversies that arose were settled with dispatch by the district dictators in most cases and in a few instances by the state arbitration committee composed of the president, vice president, and George L. Clark, director from McLean county.

"The fact that each team deposited a $25 certified check as a forfeit paid for failure to play scheduled games had a salutary effect in promoting regularity and adherence to schedules," the report declared. "The rules adopted at the spring meeting in Peoria were rigidly enforced."

The League opened on May 25. All preliminary games were played by August 18 when Henry, Tazewell, McDonough, McLean, and Cass were left as the divisional winners to play in the semi-finals. The race finally narrowed down to Tazewell and McLean. These two teams played the championship game on October 26. McLean county won.

George Thiem

Professionalism Barred

"The fact that the League is being kept free from professionalism and subsidized players is fortunate," stated the secretary's report. "It is to be hoped that this condition will be fostered in the future for if the teams allow their desire to win overcome their honesty and devotion to the purposes for which the League was organized, the downfall of organized Farm Bureau baseball will ultimately result.

"We can prevent situations like that which developed recently in the Big Ten football conference if the county baseball directors and farm advisers will co-operate in heading off all efforts to subsidize players and twist the rules to their own advantage. The League managers must realize that to win is of secondary interest. To play the game fair, abide by the rules, keep the sport clean that it may teach honesty and sportsmanship while providing wholesome recreation is far more important.

"Unless the county directors, team man-

Grain Marketing Plan Unanimously Adopted

Regional Grain Corporation for Illinois to Be Set Up

THE grain marketing plan of the I. A. A. which was carefully worked out after months of study was unanimously adopted at the business session of the fifteenth annual convention on Friday morning, January 31, at Springfield.

Harrison Fahrnkopf

The plan as explained by Harrison Fahrnkopf, grain marketing director, provides for the organization of an Illinois grain corporation based upon the principles used in setting up the Farmers National Grain Corporation. It will be organized under the co-operative laws of Illinois as a regional marketing agency co-operating with the National Grain Corporation.

The main purpose of the plan is to acquire through one of three different ways the largest possible centralized control of grain produced within the state so as to insure at all times its sale through centralized channels in the various nearby grain markets.

Three Methods

The three ways embody:

1. Entering into contractual relations with local elevators whereby all grain they handle will be sold through the Illinois grain corporation and the Farmers National Grain Corporation.

2 and 3. Where local elevators do not desire to contract for the sale of grain through these co-operative channels, efforts might be made by the State Corporation to acquire local elevator facilities through outright purchase, or lease.

Local Advisory Council

Where the present country elevators desire to sell their physical properties, it is proposed that the state agency purchase such facilities on an equitable basis; that when such properties be so purchased or leased, a local advisory council be set up and maintained, and at least one share of common stock in the state corporation be sold and issued to each grain producer patron, thus guaranteeing to each grower his right of participation in all earnings or savings brought about through the co-operative marketing of his grain. In such case, the patronage dividends would run direct from the state grain corporation to the common stock shareholder patron.

Where the local country elevator desires to lease its physical facilities to the state grain corporation it will be given opportunity to do so. When such properties are so leased, the state grain corporation will manage and operate them.

Must Be Co-operative

All local farmer-owned country elevators are to be given an opportunity to become members of the state grain corporation, provided that such country elevators which are not strictly co-operative under the Capper-Volstead Act and the Federal Farm Act, agree to reorganize on a co-operative basis.

Every elevator holding membership in the state grain corporation is to be solicited to purchase or underwrite for sale among its patrons a sufficient and equitable amount of stock in the state corporation for the purpose of furnishing needed operating capital and buying capital stock in the National Farmers Grain Corporation.

Stabilized Control

The state grain corporation in its authorized capital is to provide for a class of stock that will effect a stabilizing and continuing control. Such stock to be held by some agreed organization or organizations that might with the consent of the shareholders of the state grain corporation transfer such stabilizing stock control to the National Grain Corporation, when its management and operations will have proven their efficiency and place in a national grain marketing program.

Business Service Is Topic at Conference

Commercial Projects Help Farmer's Dollar Buy More

THE Financial Business Service conference on the afternoon of January 30 was held in the ball room of the St. Nicholas hotel in Springfield. One hundred sixty-nine delegates and visitors attended. J. R. Bent discussed the limestone and phosphate agreements with the producing companies and told of the supervisory work carried on by the Limestone-Phosphate Department of the I. A. A.

Geo. F. Tullock

F. E. Ringham, manager of the Illinois Agricultural Co-operative Association, reported briefly on the audit service available to Farm Bureaus and co-operatives. This service includes income tax help, credits and collections, accounting systems, financial reorganization, etc. Since the company was organized in 1924 approximately 1300 audits have been made. At present there are 233 member companies in the service which includes 62 Farm Bureaus, 3 Home Bureaus, 71 farmers elevators, 21 live stock co-operatives, 16 dairy and produce associations, 30 farm supply companies, 13 mutual insurance companies, 4 seed associations, 9 mercantile companies and 4 miscellaneous.

Advantages of Single Control

V. Vaniman discussed insurance service. He explained the advantages in the present plan of single control in setting up the last two mutual insurance companies. Manager Richardson of the Auto Insurance Company stated that working policies were formulated with the idea of fostering and promoting the Farm Bureau movement.

Manager Lawrence A. Williams of Country Life pointed out that the present attainment which culminated in $24,000,000 of life insurance signed in one year's time would have been impossible without the co-operation of the county Farm Bureaus. He stated that the Director of Insurance Service for the I. A. A. acted as the connecting link between the Country Life Insurance Company and the I. A. A. in carrying out a harmonious program.

$2,000,000 Business in '29

E. D. Lawrence, president, and L. R. Marchant, manager, of the Illinois Farm Supply Company, discussed the centralized purchasing of petroleum products for 31 Farm Bureau supply companies during the past year. These companies distributed more than $2,000,000 worth of products during 1929. Net income amounted to approximately $280,000 available for patronage dividends and reserve funds. Dividends ranging from four to 12 per cent were paid to Farm Bureau member customers after setting aside funds for reserves.

Five new companies became members of the organization during 1929. The state supply company like the county service companies pays dividends on the patronage basis. Although the sum of $21,518.85 was returned to the 21 member companies at the end of the fiscal year, the success of the state company cannot be measured by this dividend since its chief service was to purchase high quality merchandise at quantity prices.

Kirkpatrick Summarizes

Donald Kirkpatrick, legal counsel summed up the conference, stating that only a beginning had been made in rendering needed commercial service. The Board of Directors of the I. A. A., he stated, favor handling only those commodities used directly in farming operations. The Farmers Mutual Reinsurance Company, he said, is anxious to co-operate with the local mutual companies to the end that all fire, lightning, windstorm, cyclone and tornado, and farm crop hail insurance may be secured on a mutual basis. He stated that other forms of insurance undoubtedly would follow; that accident and health insurance as well as theft insurance had been requested by a number of members. He asked consideration of the suggestion to change the name of the Illinois Agricultural Mutual Insurance Company to "Country Casualty Company" from the standpoint of having a short name similar to Country Life Insurance Company.

George F. Tullock presided as chairman of the meeting.

F. E. Ringham, manager of the Illinois Agricultural Co-operative Association, reported briefly on the audit service available to Farm Bureaus and co-operatives. This service includes income tax help, credits and collections, accounting systems, financial reorganization, etc. Since the company was organized in 1924 approximately 1300 audits have been made. At present there are 233 member companies in the service which includes 62 Farm Bureaus, 3 Home Bureaus, 71 farmers elevators, 21 live stock co-operatives, 16 dairy and produce associations, 30 farm supply companies, 13 mutual insurance companies, 4 seed associations, 9 mercantile companies and 4 miscellaneous.

Advantages of Single Control

V. Vaniman discussed insurance service. He explained the advantages in the present plan of single control in setting up the last two mutual insurance companies. Manager Richardson of the Auto Insurance Company stated that working policies were formulated with the idea of fostering and promoting the Farm Bureau movement.

Manager Lawrence A. Williams of Country Life pointed out that the present attainment which culminated in $24,000,000 of life insurance signed in one year's time would have been impossible without the co-operation of the county Farm Bureaus. He stated that the Director of Insurance Service for the I. A. A. acted as the connecting link between the Country Life Insurance Company and the I. A. A. in carrying out a harmonious program.

$2,000,000 Business in '29

E. D. Lawrence, president, and L. R. Marchant, manager, of the Illinois Farm Supply Company, discussed the centralized purchasing of petroleum products for 31 Farm Bureau supply companies during the past year. These companies distributed more than $2,000,000 worth of products during 1929. Net income amounted to approximately $280,000 available for patronage dividends and reserve funds. Dividends ranging from four to 12 per cent were paid to Farm Bureau member customers after setting aside funds for reserves.

Five new companies became members of the organization during 1929. The state supply company like the county service companies pays dividends on the patronage basis. Although the sum of $21,518.85 was returned to the 21 member companies at the end of the fiscal year, the success of the state company cannot be measured by this dividend since its chief service was to purchase high quality merchandise at quantity prices.

Kirkpatrick Summarizes

Donald Kirkpatrick, legal counsel summed up the conference, stating that only a beginning had been made in rendering needed commercial service. The Board of Directors of the I. A. A., he stated, favor handling only those commodities used directly in farming operations. The Farmers Mutual Reinsurance Company, he said, is anxious to co-operate with the local mutual companies to the end that all fire, lightning, windstorm, cyclone and tornado, and farm crop hail insurance may be secured on a mutual basis. He stated that other forms of insurance undoubtedly would follow; that accident and health insurance as well as theft insurance had been requested by a number of members. He asked consideration of the suggestion to change the name of the Illinois Agricultural Mutual Insurance Company to "Country Casualty Company" from the standpoint of having a short name similar to Country Life Insurance Company.

George F. Tullock presided as chairman of the meeting.

SEEK 75,000 MEMBERS BY JAN. 31, 1931

Publicity Important In Farm Bureau Work

75,000 Members in 1930 Is Goal of I. A. A. Organization Department

A GOOD publicity program for the county Farm Bureau; relationship between publicity and size of membership, and the importance of co-operation with local newspapers were the opening subjects for discussion at the Organization-Information conference attended by some 400 delegates, farm advisers, and visitors on January 30 in the Leland hotel, Springfield. C. E. Bamborough presided.

C. E. Bamborough

George Thiem, director of information, opened the discussion by showing that without exception the county Farm Bureaus having large memberships give careful attention to publicity and have the support of the local newspapers.

Give It Time

"Make publicity a definite project," he advised, "give the local reporters the right of way, cultivate the newspaper editors, explain the Farm Bureau and its work to them. Send out a release every week containing well-written stories with local interest. Influence the editor not to print live news under heads such as 'Farm Bureau Notes.' Print a large number of short items in the official organ. Publish as little canned stuff as possible. Fill the Farm Bureau news bulletin with items about Farm Bureau activities and membership. Take time to write original stuff. Remember you are reaching all the members with the county bulletin. Therefore time spent in making it readable and informative is well spent."

Danforth Cites Experiences

Farm Adviser H. K. Danforth of Henry county stated that he considered their publicity work most effective in maintaining a strong organization. Mr. Danforth sends out a release every week to all the newspapers. The local editor at Cambridge said that the reason he gave the Farm Bureau so much publicity is that the news was sent to him regularly—he wasn't expected to come after it. "We find short, colorful news stories most acceptable," said Danforth. Attractive headlines are written above each story to save the time of the busy editor. Thus the news is not hidden under stereotyped heads.

Plan Carefully

The publicity program should be carefully planned, suggested C. E. Gates of LaSalle county. "The fact that LaSalle county signed approximately 900 members in one day during its last drive was seen as the result of effective publicity following a constructive and helpful program of service."

R. V. Watson of McLean county told how the Farm Bureau cooperated with the Bloomington Pantagraph, the chief newspaper of the county. "We give the editors a break," he said, "take them into our confidence and try to keep them informed on what's going on. We frequently invite Mr. Bill to accompany us to meetings and demonstrations over the county."

SEVENTY-FIVE THOUSAND members by the end of 1930 is the goal toward which the organization department will strive this year. Fifteen counties accepted Champaign county's challenge to have the highest percentage of farmers of any county in the Farm Bureau. An effective publicity program in every county will help surpass the 75,000 mark.

Collection Help

Robert Cowles, treasurer, outlined the new collection plan, explaining how the I. A. A. would co-operate in mailing out letters to delinquent members. All counties are requested to get in touch with the treasurer's office for further information regarding this plan.

"Let's establish as our goal 75,000 members by the end of 1930," Secretary George Metzger said in opening the discussion on organization. He told why a larger membership would be beneficial in the need for rendering greater service to Illinois agriculture. He discussed Champaign county's challenge to build a larger membership by 1931 than that of any county in the state. Fifteen other counties accepted the challenge on a percentage basis, that is they will sign up a higher percentage of farmers in the county by next January than Champaign. These counties are as follows: LaSalle, Stark, Scott, McLean, Marshall-Putnam, DuPage, Kane, Jersey, Knox, Logan, DeWitt, Tazewell, DeKalb, McDonough, Woodford. There was much enthusiasm expressed by the delegates regarding 1930 membership plans.

Who a Member?

The question of who should be a Farm Bureau member was brought up. One man offered the following as his suggestion:

1. Land owner operating a farm.
2. Tenant farmer with farm owner—joint membership.
3. A tenant alone where the owner will not co-operate.

Annual Audit Most Necessary—Jewett

Organize to Control Production as Well as to Sell Crop, He Says

"WE HEAR much about co-operative marketing but very little about one element or one requirement which I look upon as extremely important. I refer to the requirement that an adequate set of records be maintained at all times and that the affairs of each co-operative's Association be properly audited at least once each year," George C. Jewett, president of the Transportation Bank of Chicago told delegates and visitors at the Illinois Agricultural Co-operatives' Association annual meeting in Springfield on Jan. 29.

Geo. C. Jewett

"I do not know of any line of business that possesses a greater necessity for a proper auditing and an adequate auditor's report than co-operative institutions," said Jewett. "In addition to the records of ordinary industry you must maintain figures to use as a basis for the payment of patronage dividends. While the books of co-operatives are more complicated than those of a bank, yet I have found many a co-operative attempting to get along with inadequate records and I dare say the majority still do not avail themselves of an annual audit. Many failures can be blamed to inadequate and improper bookkeeping.

A Forward Step

"It was an important forward step when co-operative groups, working through their state Farm Bureau organization, arranged for an auditing service of their own. I happen to know that the I. A. C. A. auditing service is most excellent and compares favorably with that offered by the best auditors in the city of Chicago. They not only audit your books but they give you with the audit sound advice bearing on your operations.

"If you have ever tried to borrow money, you know and appreciate the importance of good books and adequate audits. Speaking from the banker's viewpoint, I would not care to loan money to anyone who is not in a position to make a proper financial statement and whose books cannot be checked at any time or all times. We are always pleased when an auditor's statement is furnished and many times find it necessary to require that one be furnished."

In his closing remarks, Mr. Jewett referred to a Chicago Tribune editorial on the surplus crop situation urging farmers

First Year Record of Country Life Cited

Manager L. A. Williams Talks to First Agents' Conference

"THE record established by the Country Life Insurance Company in 1929 so far as I know is unprecedented in the field of life insurance," Manager L. A. Williams told some 400 agents and visitors at their first conference held in Springfield on Jan. 29. "When Illinois farmers placed on the books of their company a total of $22,372,000 of paid-for life insurance in one year at $10 per thousand less for the first year than the average competitor in the closest field," he said, "they accomplished what old experienced life insurance men said could not be done. The outstanding life insurance actuary of the middle west, L. A. Glover of Chicago, has advised us that our first year cost and overhead was $10 per thousand less than the average of 16 companies in our class, that is, having $10,000,000 to $40,000,000 of insurance in force. Country Life did this with practically all new and inexperienced agents, wrote not a single dollar's worth of term insurance, nor touched one dollar of its original surplus.

L. A. Williams

It Can Be Done

"You will remember a year ago that much criticism was directed against the Farm Bureau for entering the life insurance field. Many ventured prophecies to the effect that dire consequences would result from this action. They predicted that farmers would be sadder but wiser within a short time. The fact that this great co-operative insurance program has succeeded beyond the dreams of its founders and to the amazement of the life insurance fraternity, is the answer of Illinois farmers to the doubting Thomases. The results speak for themselves. Nearly $23,000,000 of insurance taken by Illinois farmers in their own company in the first year of its existence is their reply to the time-worn prophecy, "it can't be done." The project succeeded because there was a place for this company. No first-year record of any company ever organized in America, nor anywhere else, approaches that of the Country Life Insurance Company.

80 Counties Organized

"Today we have an agency force organized in more than 80 counties. It is true that many of our agents are comparatively inexperienced in the selling field, but we have one tremendous advantage. The heart of Country Life differs from that of other insurance companies because of the enlisted sympathy and sentiment of nearly 60,000 Illinois Farm Bureau members for making available sound production at low cost. Every life insurance estate created for farmers means greater guaranteed farm wealth. There is no more certain way of guaranteeing the safety of the farm home and estate for the children and grandchildren of those who are now tilling the soil.

"Country Life Insurance Company is a great humanitarian enterprise unselfishly devoted to the future welfare of Illinois agriculture. It seeks to perpetuate the ownership of farms by men who till the soil. Its broad program includes education for farm children as good as that enjoyed by the children in our towns and cities. It provides a definite plan for guaranteeing the payment of the farm mortgage, for heading off bankruptcy, and the passing of farm ownership to non-resident landlords.

Uses Established Machinery

"The Country Life Insurance Company is owned and controlled by those who hold membership in the county Farm Bureaus of Illinois and the Illinois Agricultural Association. The company is using the machinery already established by this great state-wide organization to serve its members as well as other farmers who are not fortunate enough to be members.

"The heart of Country Life is strong because of its human and unselfish motives. It surpasses all other companies in its ideals of economy in production. It is inseparably bound to the ideals of the Farm Bureau—to gain for farmers equal privilege and protection in the world's markets with that of industrial and other groups."

Women Want Running Water in Farm Home

Many Speakers Address Conference at Springfield

A DISCUSSION of running water in every farm home, the chief interest for the moment of the Illinois Home Bureau Federation, featured the recent women's conference held Jan. 30 during the I. A. A. convention at Springfield.

"Our program is built upon the theory that running water is possible and within the reach of every farm and small town home," said Mrs. Henry Mies, newly elected president of the state Home Bureau. Mrs. Homer R. Johnson, retiring president who made the chief presentation of this topic related some of her personal experiences in getting conveniences installed in an old-fashioned farm house.

Women Must Demand

"Running water in every farm home in McLean county has been the aim of our Home Bureau since its organization," she said. Running water brings satisfaction to the family. Every home should have at least a sink, drain, force pump and pitcher. Women themselves, are often to blame for lack of conveniences in the farm home, said the speaker. They are not aggressive enough in demanding conveniences in the home equal to those installed about the farmstead.

The running water project will be continued over a five year period. The women want every county Farm Bureau to cooperate. It was pointed out that a woman carrying water an average distance for a family of five in one year walks 30 miles, and does enough work to plow 10 acres of land and lift 27 to 30 tons besides.

Home Should Train

Miss Attie Souder, extension specialist from Urbana, said that the aim of the home is to train its members to play the game of life. She asserted that the home must be democratic. She presented statistics revealing that city women spend much more time on children's care and in purchasing and planning than farm women. Miss Souder said that among 733 farm homes visited in McHenry county, only 86 had a complete water system, 352 had a pump and sink, and in 289 it was necessary to carry water from the well outside. "Owners do not appreciate that running water will bring better tenants," she said.

Other speakers who addressed the women briefly were Earl C. Smith, who extended greetings and a welcome from the I. A. A., Samuel R. McKelvie, member of the Federal Farm Board, who stated that sympathetic understanding of the farm problem by women was important, and Dean H. W. Mumford of the University of Illinois who among other things said that we often lose sight of the finer things in life because we are compelled to put so much attention on economic affairs.

Radio Talk Helps

Mrs. LaFayette Funk, Jr., of McLean county gave a detailed explanation of a simple installation of running water. Mrs. Funk stated that five sink and force pump installations were made in her vicinity as a result of a talk by Mrs. Johnson over WLS on this subject. The force pumps and sinks cost from $6.50 up.

Mrs. Arthur Sabin of Tazewell county talked about personal experiences in modernizing the farm home. Mrs. Harry Riefsteck of Champaign county discussed the electrically operated water system.

Following an interesting talk by Lawrence A. Williams, manager of Country Life Insurance Company, in which he urged life insurance as a safe and sound investment as well as a protection to farm women and the farm home, Mrs. W. F. Coolidge, Macoupin county, moved that the Illinois Agricultural Association be solicited to cooperate during the coming year in the "running water in every farm home" project. The motion was seconded and carried unanimously.

Approximately 200 attended the conference held Thursday afternoon in the Palm Room, Abraham Lincoln Hotel.

SEEK 75,000 MEMBERS BY JAN. 31, 1931

Publicity Important In Farm Bureau Work

75,000 Members in 1930 Is Goal of I. A. A. Organization Department

A GOOD publicity program for the county Farm Bureau; relationship between publicity and size of membership, and the importance of co-operation with local newspapers were the opening subjects for discussion at the Organization-Information conference attended by some 400 delegates, farm advisers, and visitors on January 30 in the Leland hotel, Springfield. C. E. Bamborough presided.

C. E. Bamborough

George Thiem, director of information, opened the discussion by showing that without exception the county Farm Bureaus having large memberships give careful attention to publicity and have the support of the local newspapers.

Give It Time

The motion was seconded and carried unanimously.

Approximately 200 attended the conference held Thursday afternoon in the Palm Room, Abraham Lincoln Hotel

Kirkpatrick Reviews Co-operative Legislation

Discusses Future Problems in Illinois Before Farm and Home Week Conference

A REVIEW of co-operative marketing legislation and the adjustment co-operatives in Illinois must make to meet the legal requirements of the Federal Farm Board were covered in an address by Donald Kirkpatrick, legal counsel for the Illinois Agricultural Association, before the Farm and Home Week conference at the University of Illinois, Urbana, on January 13.

Donald Kirkpatrick

20 Per Cent Co-ops

"An inquiry by the Department of Agriculture has disclosed that only 20 per cent of the farmer-owned and farmer-controlled country grain elevators in Illinois are organized on a purely co-operative basis and are operating as such," said Mr. Kirkpatrick. "The other 400 elevators can, therefore, only be classified as farmer-owned and farmer-controlled. These elevator associations, in my opinion, can reorganize without great difficulty by amending their articles of incorporation in some instances, and amending their by-laws in all instances, making it mandatory on the part of the board of directors that no capital dividend be paid in excess of eight per cent per annum, and additional earnings or savings be paid to stockholders and patrons on a patronage basis.

Can Reorganize

"The flexibility of the Marketing Act of 1923 would justify many country grain elevator associations that desire to be purely co-operative to reorganize under this Act. This can be done without difficulty or much expense."

The speaker stated that the great cash coarse grain belt of Illinois, Iowa and Nebraska is serviced with approximately 1,500 farmer-owned and farmer-controlled country grain elevator associations. Twenty per cent of those in Illinois come within the Capper-Volstead Act requirements, a lesser percentage of those in Iowa are co-operative, and about an equal percentage of those in Nebraska are strictly co-operative.

Chain 'Em Together

"The cash grain producers in this territory should at an early date look to the reorganization of their country elevator units so that such units will become Capper-Volstead associations and be permanently entitled to the favor and consideration of the Agricultural Marketing Act and the Federal Farm Board, and with this reorganization should develop a plan for chaining all these units together not only by contract, but also in a corporate way," said Kirkpatrick. "Big business has abused this method, not stopping with proper and effective control which can be obtained in this manner, but has used it for the sinister purpose of covering up profits and keeping from public commissions and others entitled to know, the inner workings of corporate transactions.

Will Help Agriculture

"The advantages which have inured to big business through corporate control and organic interrelationship should and are being mobilized for agriculture. One of the problems of the federal and state agencies, constituted to assist this basic industry, along with the educational farm organizations, is as I see it, to guide this development in the proper channel so that the virtues of organized co-operation may be realized with the minimum of abuse.

Co-ops. Must Co-operate

"The rank and file of middle-west producers of farm commodities believe in co-operative marketing and its possibilities. There are some, however, within the ranks and also some in positions of management of local co-operatives, who believe that co-operation stops with a community. When such leaders sense the larger problem, when they will practice more fully what they have pronounced to the men on the farms, in other words, when the co-operative associations themselves will co-operate, a tremendous impetus and inspiration will be given the movement. When the local co-operative is ready to assume a similar obligation to that which it expects the individual producer to assume, and will so rearrange its structure as to fit into a nation-wide co-operative commodity selling organization, then and in that event the full advantage of co-operation can be expected and realized."

Thanks for Promptness

"Illinois Agricultural Mutual Ins. Co.,
608 So. Dearborn St.,
Chicago, Illinois.

"I need not tell you that I received the check in payment of the damage to my car while on my way here as you have that evidence, but I do wish to show my appreciation of your promptness. You could not have received my bill and report before the 20th of January, your letter was written the 21st, check signed the 22nd and came through promptly. Appreciated more on account of my distance from the home office.

"Received check for $193.44 in full for damages to car. Nash, Coupe No. 95595, 80 per cent of damage. Should I not have another blank with me? If so please mail one. I hope I never need it."

Accomplishments of I. A. A.

(Continued from page 9)

making a grand total of 765 carloads which netted growers $411,398.55. Exchange purchased co-operatively $12,600 worth of fertilizers and $42,896.22 worth of packing supplies and equipment. Assisted in organizing Illinois Growers Marketing Association to sell Illinois fruits and vegetables co-operatively at roadside markets.

(13) Helped organize 17 new co-operative produce marketing associations. Twenty-eight counties now have 45 marketing units handling approximately 4,000,000 pounds of butterfat annually or about 10 per cent of the state production. Increased returns to producers estimated at $120,000 per year.

(14) Assisted in organizing milk producers' co-operatives on several new markets. Pure Milk Association members in Illinois received approximately $1,600,000 more money for their milk in 1929 than if they had no organization to represent them. Approximately 60 per cent of the Illinois fluid milk production is now sold co-operatively. Milk co-operatives now operating at Chicago, Peoria, Bloomington, Champaign, Quincy, Springfield, DeKalb, Waukegan, and other markets. Now assisting in organizing producers around St. Louis, Decatur, Rock Island and Moline.

(15) Co-operated with farmers' elevators and planned a regional co-operative grain marketing agency for Illinois to co-operate with the Farmers National Grain Corporation.

(16) Assisted red top seed growers in southern Illinois in reorganization plans to get control of bulk of commodity.

(17) Assisted in organizing co-operative for soybean growers to sell crop through one agency.

(18) Helped bring about material improvement in sampling and grading grain at Chicago market.

(19). Through the Organization and Information Departments the Association maintained a strong membership and brought about support and interest in the self-help efforts of Illinois farmers.

Annual Audit Necessary

(Continued from page 14)

to make effective use of the Agricultural Marketing Act by organizing to control production as well as to sell and distribute the crop after it is produced.

In the election following President George L. Potter refused to run again. B. W. DeBord of Princeville, Peoria county, was elected to the Board of Directors for the first time. Other directors for the coming year are Henry Shafer, Illiopolis, Henry H. Parke, Genoa, Albert Heckle, Quincy, A. J. Gilfillan, Watseka. The Board will choose its president and vice president at its next meeting. Geo. Metzger and Robt. Cowles are secretary and treasurer respectively.

Gov. McKelvie Okays Grain Marketing Plan

Conference Hears Farm Board Member Talk Tariff

THE marketing conference in the Abraham Lincoln Hotel, Jan. 30, was attended by 555 delegates and members of the Association and practically every Illinois county was represented. Samuel Sorrells presided.

Secretary G. E. Metzger opened the meeting with a talk emphasizing the importance of centralized control if marketing organizations are to be an effective factor in controlling surpluses and influencing prices.

Samuel Sorrells

A. D. Lynch, director of dairy marketing, told the conference that 60 per cent of the fluid milk shippers are now selling in co-operative organizations. He emphasized the need for further centralized control in this field by federating present milk-selling associations into a state marketing agency. The present butter storage situation, which is depressing all dairy products' prices, was discussed and the meeting went on record favoring the emergency program to stimulate the consumption of these temporary surpluses among all consumers, particularly rural consumers.

Following the discussion on dairy marketing F. A. Gougler, director of produce marketing, reported the progress of his work. Mr. Gougler called attention to the annual report which outlines the development of produce marketing in Illinois during 1929. He called attention to the diagram in the report which illustrates the principle of centralized control and pointed out the desire to develop produce marketing in Illinois according to this plan.

No New Markets

A. B. Leeper, director of fruit and vegetable marketing, reported on the new project undertaken during 1929, that of roadside marketing. He stated that no new markets would be established during 1930 unless there was urgent demand on the part of producers for such markets.

The director further suggested that the fruit and vegetable industry be so organized that in case a national sales agency be set up, Illinois would be in a position to affiliate with it.

Ray E. Miller reported progress in live stock marketing. For the year ending November 30, 1929, Illinois farmers marketed co-operatively 23,682 carloads of live stock with a sale value of about $40,000,000, for which the consumer paid about $100,000,000. Had the farmer received the same proportion of the consumer dollar that he did in 1910, his return would have been about $50,000,000 instead of $40,000,000. The farmer's share of the consumer's meat dollar shrunk from fifty cents to less than forty cents. On a carload this shrinkage amounts to approximately $300. It is to help correct this condition and other shortcomings of the present inadequate marketing system that the live stock marketing department is working. The principle of centralized control is essential.

Same Program in '30

During 1929 the department carried out a program of information as to the aims, accomplishments and operating methods of live stock co-operatives. During 1930 this same program will be carried out with especial emphasis on the new problems which are a natural outgrowth of the constantly changing marketing methods and with the further thought of working in the closest possible harmony with the plans and policies of the Federal Farm Board.

Harrison Fahrnkopf, director of grain marketing, outlined a plan of grain marketing which had been approved by the executive committee of the Illinois Agricultural Association. This plan is presented elsewhere in this issue.

Favor Grain Plan

Following some discussion it was moved, seconded and carried that the marketing conference go on record favoring the plan of grain marketing as presented and that it be referred to the delegates of the convention.

It was moved, seconded and carried that the marketing conference go on record as favoring an adequate tariff on soybeans, soybean oil, soybean meal and all other by-products of the soybean; and furthermore, that the executive board and officers of the Illinois Agricultural Association be requested to put forth every effort to secure for this important farm product an adequate tariff; and furthermore, that it be the sense of the marketing conference that a resolution to this effect be presented to the regular business session of the convention, January 31, 1930.

Gov. McKelvie Speaks

Following the discussion on grain marketing, President Earl C. Smith emphasized the fundamental importance and necessity for effective marketing, of the organization of a true co-operative having centralized control of the highest possible volume of the commodity. He pointed out that the executive committee, officials and members of the staff of the Illinois Agricultural Association had given much time and thought to the grain marketing program and that the plan as presented was the outgrowth of the best judgment of all those concerned.

Mr. Smith stated that the proposed plan of grain marketing had been presented to members of the Federal Farm Board, and that he was happy to report a surprise for the conference in the person of Governor McKelvie, member of the Federal Farm Board, who would personally address the group. Governor McKelvie gave a splendid address in which he expressed his approval of the principles of the plan outlined to the conference for a grain marketing regional organization for Illinois. Mr. McKelvie discussed the tariff at length showing the importance of protection in working out the farm problem.

Baseball League Report

(Continued from page 12)

agers, and farm advisers set a good example by being above petty bickering and ill feeling one can expect nothing more from the players. All who have watched the development of the League in recent years will agree that there was more evidence of real sportsmanship last season than in any previous year. The decisions of the district dictators and the state arbitration committee were generally respected."

The treasurer's report showed a balance in the treasury on January 25, 1930, of $315.17.

More Members in 1930

New counties which expressed their interest in becoming members of the League in 1930 are Kankakee, Montgomery, Macoupin, Iroquois, Livingston, Grundy, Jo Daviess, Stephenson, Kendall and LaSalle. Playing rules for 1930 and divisions to accommodate new members will be adopted at the annual spring meeting in March.

W. Brockman of Jacksonville, formerly a professional Big League player, gave an inspiring address on the subject of "Sportsmanship." After considerable discussion on the eligibility clause in the by-laws, the members voted to exclude hired hands because of the opportunity offered for securing professional players. The eligibility clause was left unchanged.

New officers elected for the ensuing year are George L. Clarke of McLean county, president, and Charles S. Black of Jacksonville, Morgan county, vice president. All except two or three county members were officially represented.

Many Inquiries

"We have been swamped with inquiries and requests for appointments to explain the Illinois Farm Supply Co. service following the back page ad in the January issue of the Illinois Agricultural Association RECORD," says L. R. Marchant, manager of the company.

"Adams, Lee, and Tazewell counties have raised enough capital to start operating within the next few weeks. Woodford, McDonough, Fulton, Carroll, Macoupin and other counties are at various stages in setting up local service companies to handle petroleum products."

The Adams Service Co., the Tazewell Service Co., and the Lee County Service Co., all county companies organized to handle petroleum products will begin operating very soon. All have applied for membership in the Illinois Farm Supply Company.

Many Problems Before Public Relations Conf.

Transportation, Legislation, Taxation Discussed

THE Public Relations Conference was called to order in the Y. W. C. A. Building, Springfield, January 30, 1930, at 1:00 P. M. Frank D. Barton acted as chairman.

Under the subject of freight rates there was active discussion. A request from a southern Illinois man for assistance in a complaint which a local fruit and vegetable shipping association had taken before the Illinois Commerce Commission concerning refrigeration charges was made.

In the discussion of freight loss and damage and overcharge claims, comments from the floor disclosed that shippers who filed claims through the department were far more successful than those endeavoring to handle them through their own efforts.

Considerable discussion followed on the subjects of farm crossings over railroads, drainage, and fences along right of ways.

Much Response

There was overwhelming response from the floor on the subject of easements over farm lands for high tension lines and pipe lines. A number of individuals recounted their success through group action in their localities. It was brought out that where land owners acted in groups on propositions of this character they could get the advantage of combined bargaining power in the matter of price for easements.

The discussion concerning rural electrification followed a similar trend; that by acting through groups the farmers were enabled to study the problems and uses of electricity and are not entirely dependent upon information from representatives of the public utilities.

Rates and Service

Discussion concerning telephone rates and service had to be curtailed for lack of time, but in response to a number of questions it was brought out that the Association was in position to render a service to County Farm Bureaus or organized communities in instances where telephone companies seek to increase rates or where complaints are made by subscribers regarding telephone service.

The degree of interest displayed by those in attendance showed clearly that the membership is far more actively interested in the services available through the department than ever before, and the consensus of the meeting was an unqualified endorsement of the program offered by the transportation department.

State Legislation

After the chairman, Frank D. Barton, had presented an account of some of the difficulties in securing support for the income tax bill in the General Assembly last year, the conference discussed at some length the question of how better legislative support could be secured for our program. In connection therewith a motion was adopted that the I. A. A. Executive Committee be asked to direct that the legislative voting records of down-state members of the 56th General Assembly which was published in the August, 1929, Illinois Agricultural Association *Record*, be published again in the March *Record* for the information of members.

John C. Watson briefly discussed the present Illinois Revenue Investigation Commission and its endeavors to secure an agreement by the major organizations in the state on the draft of a revenue amendment to the Constitution. In connection therewith Watson also briefly discussed the present outlook for income tax legislation in this state.

Gas Tax Fund

On the subject of improvement of state aid roads with gasoline tax funds, there was a general discussion. It was stated by the county superintendent of highways of Ogle county, who was present in the conference, that the state division of highways recognized the rights of the county boards under the motor fuel tax act to designate the roads which are to be improved and to designate the type of improvement. Specifications for the improvement, however, must be approved by the state division of highways.

After general discussion of a recent opinion of the attorney general of the state to the effect that farm tractors drawing agricultural implements of any kind upon the public highway for the purpose of doing custom work upon the premises of other farmers are subject to the requirements of motor licenses, and also a more recent opinion that implements drawn by tractors on roads are subject to the requirements of licenses for trailers, the motion was adopted that the Executive Committee be requested to seek, as soon as possible, amendment of the motor vehicle license act to relieve farm tractors and agricultural implements drawn by farm tractors on the public highway from the requirements of motor vehicle licenses when such tractors and agricultural implements are moved over the public highway only for the purpose of doing custom work on the farms of other persons.

Certain discriminations in the cost of motor licenses on trucks of different weights were brought to the attention of the conference. After general discussion a motion was adopted requesting the Executive Committee to seek the amendment of the motor vehicle license act to establish a fairer scale of license fees for trucks of different weights. About 200 attended the conference.

"Democracy in Taxation" will be the subject of an address by President Earl C. Smith before the Illinois Farmers' Institute at Galesburg on February 20.

Must Organize to Get Fair Return—Legge

ALEXANDER LEGGE, chairman of the Federal Farm Board, recently made the following statement:

"In the past, much effort and large sums of money have been spent trying to improve local conditions, but much of this effort has been directed toward improvement in methods of production; that is, to encourage the raising of more and better crops.

"However, all this effort meets only a part of the agricultural problem. Obviously, nothing is gained by raising a larger crop of better quality if, after having done so, you are unable to dispose of it on a basis that will yield a reasonable return for the effort expended.

"It is when we approach this part of the agricultural problem that the need for organization becomes imperative. There it is that the problem of the farmer most closely parallels that of every other industry, and it seems to us that the treatment to be applied can be described in one word, 'organization'.

"To illustrate, if a thousand farmers attempt to sell the same kind of product at the same time in the same market, and in most cases to a very limited number of buyers, the mere competition among themselves puts them at a disadvantage. But if these same thousand farmers place the same product in the hands of a single selling agency, that agency at once becomes an important factor in the market."

Publicity Important

(Continued from page 14)

4. That a man owning two or more farms should be required to buy a membership for each farm.

5. Any member without farming interests should not be allowed to hold office or vote on questions of farm interest although he may become a member.

Professor Fred Russell of the University of Illinois followed with an excellent talk on the subject of "Salesmanship."

Three Recommendations

The delegates and visitors present voted unanimously:

1. That County Farm Bureaus be urged to carry on an instructive and educational publicity program to pave the way for I. A. A. and Farm Bureau activities and particularly for aggressive and effective membership work.

2. That particular attention be given to the collection of membership dues and that the collection plan offered through the finance department of the I. A. A. be generally adopted in County, Farm Bureau collection programs throughout the State.

3. That organization work be pushed aggressively throughout the State during 1930 with a goal of 75,000 members and that the organization work be closely linked with the publicity and collection programs already recommended.

First Country Life Conference a Success

300 Attend Meeting to Discuss Life Insurance

THE Country Life Insurance conference opened at 10:00 A. M. Jan. 29 in the Abraham Lincoln Hotel with about 300 present.

Manager L. A. Williams talked to the agents on the importance of getting additional information about life insurance to equip them for selling in the new year. The correspondence course was introduced and 175 agents enrolled. An excellent spirit was shown throughout the entire morning session, and the meeting adjourned at 11:00 o'clock, giving way to the Holding Company Annual meeting.

V. Vaniman

Smith Opens

At 3:00 o'clock in the afternoon the Country Life conference reopened, with a short address by President Earl C. Smith. He congratulated the men of the County Farm Bureaus on the success of Country Life Insurance Company in its first year.

Manager Williams followed with a talk on the subject "The Heart of the Company."

Boland and Ramler

Dr. John Boland was introduced, and gave a very interesting address on "Risks and Ratings," illustrating his talk with mortality charts.

Mr. Ramler of the service department talked on ways of mutually beneficial service and understanding between the agents and home office. He presented methods of keeping records, and showed the unnecessary loss in incompleted cases, where approximately $5,000 in possible commissions were lost to the agents, and about a half million dollars in business was lost to the company, largely because of this indifference on the part of the agent. A surprising number of men participated in the general discussion which followed.

Banquet Held

The General Agency Club consisting of 50 qualifying special and general agents attended a banquet given by Manager L. A. Williams at the Sangamo Club, Wednesday night. Each general agent who had made his quota was eligible and any special agent who had written 15 applications in one month got in on the party.

H. O. Henry of Effingham county, first to make his quota, was made president, and H. H. Glick of Wabash county became vice-president. Mr. Henry acted as toastmaster calling upon members having to their credit various outstanding accomplishments in the past year.

THE PAWNEE FOUR

Left to right: D. C. Dragoo, H. B. Austin, W. L. Dragoo, E. V. Hoagland. These entertainers were the life of the convention. They did a great job on every occasion and were ready to sing out the high points of each speech in rhyme when the speaker finished.

At 7:00 A. M., January 30, 140 life insurance men breakfasted at the Leland Hotel to plan for greater accomplishments in 1930. L. A. Williams acted as toastmaster. Donald Kirkpatrick delivered an interesting talk on possibilities for accomplishment in the coming year. George F. Tullock, secretary of the company, reviewed some of the handicaps which had to be overcome, and the misgivings which confronted the directors while making the decision to build a life insurance company. He complimented the agents in the County Farm Bureaus on their great success, and prophesied continued progress in the coming year.

V. Vaniman made an enthusiastic appeal for a greater volume of business through intelligent effort. The meeting adjourned at 8:45 to make way for the morning session of the I. A. A. convention.

"All in all, the first conference of Country Life Insurance Company was as complete in its spirit of confidence and enthusiasm as that of any well seasoned organization," commented Williams. "On every hand confidence was expressed in possibilities for continued growth. Our agents sincerely believe in the unselfish goal of the company to produce sound life insurance at the lowest possible net cost. The desire on the part of new men to learn more about insurance was the most optimistic side of the entire conference.

"The manager wishes to express his gratitude for the consideration, time, and cooperation given by the officers and other members of the staff in making the first conference a success."

L. E. Webb, secretary of the Farmers National Grain Corporation, commenting on the yearly audit of the Graymont Farmers Elevator Co. of Livingston County, said: "It's the best farmers' elevator audit I ever saw." The Illinois Agricultural Cooperatives Association did the job.

Facts are not enough. They are only ammunition. The good salesman must know how to use the information about the thing he is selling.

Life Insurance

By L. A. Williams

A YEAR of confidence building with outstanding cooperation has ripened Country Life like the summer sun. The Company has grown in one year to the size attained by many companies only after 15 to 20 years' growth.

What will it mean in dividends to policyholders? Last year's economy shown by the actuary's statement proved all that Country Life has ever contended, namely, that we could manufacture our own life insurance on an old line basis cheaper than it could be manufactured elsewhere. The business of the year broke all records for first year production. It broke all records for low cost acquisition and overhead. This will all be reflected in dividends to policyholders in years to follow.

Service? Well, never before has one group of people learned so much about life insurance as Farm Bureau members on the whole learned last year. Intelligent policyholders mean few lapsed policies. It means, also, increased business. This year will see a host of experienced agents, who after one year of effort and schooling, will be able to render greater service than ever before. They have learned the value of working for the best interests of the Farm Bureau. They are more certain of the insurance program, policies, and entire set-up and can speak with greater conviction than they did last year.

We have discovered leaders who not only learn, but teach. We have the wholehearted support of the Farm Bureaus. They know the value of a group of life insurance men preaching the gospel of cooperation in their counties.

We also pay death claims to Farm Bureau folks, and taken all in all, that is the big thing this company does. It provides estates for people who face the day of appreciation of cash and insurance income.

When the volume that the Farm Bureaus make possible will warrant the dividends, they will come in just that proportion which volume and economy of management permit. Let's make the dividends another history-making, record-breaking event.

Growing Transportation by Motor Truck Greatly Increases the Hazards of Travel on the Public Highways. Public Liability and Property Damage, and Collision Insurance will Protect You Against Loss.

They Happen Every Day

SMASHUPS like this occur every day somewhere. Thousands of drivers who use the public highways have less serious but unpleasant mishaps each week. Many of these are purely accidental. Others are due to carelessness. In either case someone loses.

AUTOMOBILE insurance was made available by the Farm Bureau and Illinois Agricultural Association to protect their members at the lowest possible cost against such losses.

YOU insure your house and barn against fire and tornado damage. But if your auto or truck hits a child or person, damages awarded by a jury sympathetic to the injured, may sweep away your entire savings and estate. Even if you win such a suit, your court costs and attorneys fees will hit you much harder than the low semi-yearly assessment for insurance in YOUR OWN COMPANY AT COST.

Why Auto Insurance?

1. To protect your estate.
2. To free your mind from worry lest your car or truck hit someone.
3. To shift responsibility to the broad shoulders of your company which represents you in all damage controversies.
4. To avoid paying hospital bills, court costs, and attorneys fees.
5. To secure actual cash value of your car in case of fire or theft.
6. To protect you up to $1,000 for damage your car does to other property.

SOUND, LOW COST PROTECTION WITH HIGHEST SECURITY FOR FARM BUREAU MEMBERS

The
Illinois Agricultural Association
RECORD
March
1930

BUY 25 PER CENT MORE INSURANCE IN COUNTRY LIFE FOR THE SAME MONEY

IN THE average dividend paying company a $400 first yearly premium at age 35 will buy approximately $15,000 of ordinary life insurance.

A $400 first premium in Country Life will buy approximately $20,000 of life insurance, and Country Life is also a dividend paying company whose earnings will be passed on to the policyholder to reduce the net cost.

The fact that Country Life placed $24,172,000 of insurance on its books in its first twelve months of existence, an unheard of record for a new company, is an expression of the appreciation thousands of Illinois farm folks have for this new service.

Only One Farm Bureau Company

THERE is only one real Farm Bureau life insurance company—that is Country Life, organized and controlled by nearly 60,000 Farm Bureau members in Illinois. It is democratically operated without selfish motives or interests, to make available low cost protection.

Greater Volume Lowers Net Cost

YOUR further co-operation will mean greater dividends to the policyholder. Net cost will depend on volume and economy of operation. You can help by seeing that your county provides its quota.

Help make 1930 a greater year for Country Life. If you haven't had an opportunity to hear about the different policies offered by your own company to fit the needs of farm folks, mail the coupon on the back cover and get rates at your age.

Soybean Marketing Ass'n. Is Growing

Membership Exceeds 1700 Latest Reports Show

MORE than 1700 members who produce annually an estimated 1,200,000 bushels of soybeans now hold membership in the Soybean Marketing Association according to latest information received from John W. Armstrong, president of the recently organized co-operative.

The Association numbers among its members nearly all of the larger growers of beans in the central Illinois counties. It has not entered into any contract to sell the 1930 crop but will do so at the proper time.

Unsettled Market

Unsettled market conditions and the uncertainty of what action congress will take in protecting growers with a higher tariff on soybean oil imports have left many growers in a quandary over probable plantings this spring. Agricultural extension officials at Urbana are advocating a reduction in soybean acreage for 1930. Similar advice is being handed out by government experts for wheat, corn, poultry, dairy products, livestock, and what not.

"What would they have us do, sow the farm to grass and go fishing," commented one man. "We might enjoy loafing for a while but I'm afraid we could not pay our rent, taxes, and interest and make a living."

If a substantial tariff is voted on soybean oil, the market situation may look entirely different, particularly if the flaxseed crop from which linseed oil is obtained, happens to be light again. In such case, the grower with the granary full of beans may realize a handsome profit.

The total production of oleomargarine for 1929 was as follows: colored, 14,331,877 lbs.; uncolored, 338,143,072 lbs., making a total of a little more than 352,000,000. This is an increase of 11 per cent over last year's figures, and is 110,000,000 pounds more than was manufactured in 1926.

These figures are from the Internal Revenue Department at Washington from which we learn the exact volume manufactured. Whatever volume is manufactured in a given year is also consumed, as the product does not keep for any length of time.

More than 90 per cent of the fats in one popular brand was an imported vegetable oil.

Working At It

To build a modern sales organization of our own for our extensive manufacturing business, farm production, is the job that lies before organized farmers everywhere. We are working at it in Illinois and with the support of thinking producers we will succeed.

Advisory Committees Announced For 1930

The following sub-committees were selected to work in conjunction with the I. A. A. Board of Directors in 1930.

Finance Committee

A. R. Wright, Varna
A. N. Skinner, Yates City
M. G. Lambert, Ferris

Organization Committee

C. E. Bamborough, Polo
Frank G. Oexner, Waterloo
W. A. Dennis, Paris
B. W. Tillman (Farm Adviser), Belleville

Marketing Committee

Sam Sorrells, Raymond
Geo. J. Stoll, Chestnut
W. L. Cope, Salem
H. C. Vial, Downers Grove
C. E. Gates (Farm Adviser), Ottawa

Public Relations Committee

Charles Black, Jacksonville
C. J. Gross, Atwood
Geo. B. Müller, Washington
G. H. Iftner (Farm Adviser), Effingham

Financial Business Service Committee

Geo. F. Tullock, Rockford
Fred Dietz, DeSoto
Chas. L. Scott, Grayville
W. H. Coultas (Farm Adviser), Bloomington

Uphold Secretary

The U. S. Supreme Court recently upheld the right of the Secretary of Agriculture to prescribe rates for buying and selling livestock at public stockyards. The litigation arose from an order by the Secretary of Agriculture in November, 1926, announcing the maximum commission charges for handling livestock at the Omaha stockyards. The Supreme Court decided that the rates prescribed were reasonable as well as legal.

Ill. Grain Corporation Begins Signing Elevators

New Regional Now Receiving Applications For Membership

Bulletin: Following the approval of application forms on Mar. 3, directors of the Shirley Farmers Grain and Coal Co., and the Towanda Grain Co., on Mar. 4, voted unanimously to apply for membership in the Illinois Grain Corporation. The Stanford Grain Co., one of the largest and strongest farmers' elevators in Illinois, took similar action on Mar. 5. As we go to press inquiries from many counties indicate that this list will be substantially augmented by the time this issue is delivered

APPLICATIONS for membership in the Illinois Grain Corporation, new regional co-operative to represent Illinois grain producers in the national marketing system are now being received at the new co-operative's temporary headquarters, 608 So. Dearborn St., Chicago. G. C. "Lyle" Johnstone of Bloomington is president of the corporation, and J. C. Sailor of Cisna Park, vice-president. These men and John Stout of Chatham, E. E. Stevenson of Streator, and Geo. J. Stoll of Chestnut comprise the executive committee.

G. C. Johnstone

Under the new grain marketing plan endorsed by the Farm Bureaus and the Illinois Agricultural Association, local farmers, elevators are expected to purchase a nominal amount of stock in the Illinois Grain Corporation known as the "regional" which in turn will buy stock in the Farmers National Grain Corporation.

The Farmers National requires that the Regional subscribe for $100 par stock equal to the average amount of grain handled annually by the state or regional organization on a basis of one cent per bushel. The 1c per bu. investment is made only once, that is, if the Illinois Grain Corporation delivers 25,000,000 bu. of grain in a year to

IN THE average dividend paying company a $400 first yearly premium at age 35 will buy approximately $15,000 of ordinary life insurance.

A $400 first premium in Country Life will buy approximately $20,000 of life insurance, and Country Life is also a dividend paying company whose earnings will be passed on to the policyholder to reduce the net cost.

The fact that Country Life placed $24,172,000 of insurance on its books in its first twelve months of existence, an unheard of record for a new company, is an expression of the appreciation thousands of Illinois farm folks have for this new service.

THERE is only one real Farm Bureau life insurance company—that is Country Life, organized and controlled by nearly 60,000 Farm Bureau members in Illinois. It is democratically operated without selfish motives or interests, to make available low cost protection.

OUR further co-operation will mean greater dividends to the policyholder. Net cost will depend on volume and economy of operation. You can help by seeing that your county provides its quota.

Help make 1930 a greater year for Country Life. If you haven't had an opportunity to hear about the different policies offered by your own company to fit the needs of farm folks, mail the coupon on the back cover and get rates at your age.

COUNTRY LIFE INSURANCE COMPANY

608 So. Dearborn St., CHICAGO

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second-class matter at post-office at Mount Morris, Ill., Oct. 20, 1925, under the Act of Mar. 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925.

Number 3 | **March, 1930** | **Volume 8**

Soybean Marketing Ass'n. Is Growing

Membership Exceeds 1700 Latest Reports Show

MORE than 1700 members who produce annually an estimated 1,200,000 bushels of soybeans now hold membership in the Soybean Marketing Association according to latest information received from John W. Armstrong, president of the recently organized co-operative.

The Association numbers among its members nearly all of the larger growers of beans in the central Illinois counties. It has not entered into any contract to sell the 1930 crop but will do so at the proper time.

Unsettled Market

Unsettled market conditions and the uncertainty of what action congress will take in protecting growers with a higher tariff on soybean oil imports have left many growers in a quandary over probable plantings this spring. Agricultural extension officials at Urbana are advocating a reduction in soybean acreage for 1930. Similar advice is being handed out by government experts for wheat, corn, poultry, dairy products, livestock, and what not.

"What would they have us do, sow the farm to grass and go fishing," commented one man. "We might enjoy loafing for a while but I'm afraid we could not pay our rent, taxes, and interest and make a living."

If a substantial tariff is voted on soybean oil, the market situation may look entirely different, particularly if the flaxseed crop from which linseed oil is obtained, happens to be light again. In such case, the grower with the granary full of beans may realize a handsome profit.

The total production of oleomargarine for 1929 was as follows: colored, 14,331,877 lbs.; uncolored, 338,143,072 lbs., making a total of a little more than 352,000,000. This is an increase of 11 per cent over last year's figures, and is 110,000,000 pounds more than was manufactured in 1926.

These figures are from the Internal Revenue Department at Washington from which we learn the exact volume manufactured. Whatever volume is manufactured in a given year is also consumed, as the product does not keep for any length of time.

More than 90 per cent of the fats in one popular brand was an imported vegetable oil.

Working At It

To build a modern sales organization of our own for our extensive manufacturing business, farm production, is the job that lies before organized farmers everywhere. We are working at it in Illinois and with the support of thinking producers we will succeed.

Advisory Committees Announced For 1930

The following sub-committees were selected to work in conjunction with the I. A. A. Board of Directors in 1930.

Finance Committee

A. R. Wright, Varna
A. N. Skinner, Yates City
M. G. Lambert, Ferris

Organization Committee

C. E. Bamborough, Polo
Frank G. Oexner, Waterloo
W. A. Dennis, Paris
B. W. Tillman (Farm Adviser), Belleville

Marketing Committee

Sam Sorrells, Raymond
Geo. J. Stoll, Chestnut
W. L. Cope, Salem
H. C. Vial, Downers Grove
C. E. Gates (Farm Adviser), Ottawa

Public Relations Committee

Charles Black, Jacksonville
C. J. Gross, Atwood
Geo. B. Müller, Washington
G. H. Iftner (Farm Adviser), Effingham

Financial Business Service Committee

Geo. F. Tullock, Rockford
Fred Dietz, DeSoto
Chas. L. Scott, Grayville
W. H. Coultas (Farm Adviser), Bloomington

Uphold Secretary

The U. S. Supreme Court recently upheld the right of the Secretary of Agriculture to prescribe rates for buying and selling livestock at public stockyards. The litigation arose from an order by the Secretary of Agriculture in November, 1926, announcing the maximum commission charges for handling livestock at the Omaha stockyards. The Supreme Court decided that the rates prescribed were reasonable as well as legal.

Ill. Grain Corporation Begins Signing Elevators

New Regional Now Receiving Applications For Membership

Bulletin: Following the approval of application forms on Mar. 3, directors of the Shirley Farmers Grain and Coal Co., and the Towanda Grain Co., on Mar. 4, voted unanimously to apply for membership in the Illinois Grain Corporation. The Stanford Grain Co., one of the largest and strongest farmers' elevators in Illinois, took similar action on Mar. 5. As we go to press inquiries from many counties indicate that this list will be substantially augmented by the time this issue is delivered

APPLICATIONS for membership in the Illinois Grain Corporation, new regional co-operative to represent Illinois grain producers in the national marketing system are now being received at the new co-operative's temporary headquarters, 608 So. Dearborn St., Chicago. G. C. "Lyle" Johnstone of Bloomington is president of the corporation, and J. C. Sailor of Cissna Park, vice-president. These men and John Stout of Chatham, E. E. Stevenson of Streator, and Geo. J. Stoll of Chestnut comprise the executive committee.

G. C. Johnstone

Under the new grain marketing plan endorsed by the Farm Bureaus and the Illinois Agricultural Association, local farmers, elevators are expected to purchase a nominal amount of stock in the Illinois Grain Corporation known as the "regional" which in turn will buy stock in the Farmers National Grain Corporation.

The Farmers National requires that the Regional subscribe for $100 par stock equal to the average amount of grain handled annually by the state or regional organization on a basis of one cent per bushel. The 1c per bu. investment is made only once, that is, if the Illinois Grain Corporation delivers 25,000,000 bu. of grain in a year to

the national co-operative, it must purchase $250,000 worth of stock.

1½ Per Bushel

In the same way, the local farmers elevator must subscribe for $100 par preferred "A" stock in the regional co-operative, the Illinois Grain Corporation, at the rate of 1½ per bushel on all the grain it markets commercially in a year. Thus, if the local elevator ships 200,000 bu. of grain it will be required to take $3000 worth of stock in the regional. Two thousand dollars of this is used to buy stock in the national, and $1000 is retained for working capital.

Ten per cent of this stock must be paid in cash; the remainder must be paid in five equal notes, one note due each year for a period of five years. The fact that the stock subscription requirement is very modest removes any serious obstacle toward the development of a sound, secure, and definite co-operative grain marketing system in Illinois.

The state-wide grain marketing association or regional is formed under the Agricultural Cooperative Act of 1923 on a capital stock basis with the following classes of stock:

Preferred "A" stock for capital requirements 30,000 shares—par value $100.00.

Preferred "B" stock for stabilizing purposes 100,000 shares—no par value.

Common stock for producer membership 70,000 shares—no par value.

The Preferred "B" stock cannot participate in the earnings of the cooperative, has no par value and cannot be transferred without authorization from the board of directors of the regional.

Common Stock No Par

The shares of common stock will be of no par value and used as the producer-patron stock. It will be issued either direct to the producer or to the local co-operative elevator on a basis of approximately the number of producer-patrons of such local cooperative elevator.

Plans for establishing the proper relationship with local cooperative elevator companies may include:—

(a) Contract—The opportunity for contractual relations between the local elevator and the Illinois Grain Corporation whereby all grain handled by such local elevators would flow in the channels of trade to the Farmers National Grain Corporation.

(b) Lease—This plan provides for a direct lease of the elevator by the Illinois Grain Corporation. The elevator retains its identity and regular set-up, and has its own board of directors, who represent the shareholders in their contacts with the state cooperative.

Local Advisory Council

(c) Purchase or Build—That the proposed state grain cooperative, where the local producers desire it, make an effort to acquire local elevator facilities by buying or building same. That when such properties be so acquired, that a local advisory council be maintained. Producers in the community would be required to purchase stock, not in the local elevator but rather in the state-wide cooperative and the latter organization would own the elevator. Patronage dividends would run direct from the state cooperative to the producer.

In the "Lease" or "Purchase-Build" plan, in all matters such as the employment of the manager, formulation of policies for the local elevator, etc., the wishes of the local advisory council would be complied with as far as practicable. Advantages which all elevators would have in common would be those of group insurance, bonding, auditing and general supervision.

Must Be Co-ops.

All local farmer-owned country elevators are to be given an opportunity to become members of the State Grain Corporation, provided that such country elevators which are not cooperative associations under the Capper-Volstead Act and under definition of the Federal Farm Board Act, agree to reorganize on a cooperative basis within a reasonable length of time.

Every member country elevator of the State Grain Corporation will be required to purchase or underwrite for sale among its patrons a sufficient and equitable amount of stock in the State Grain Corporation for the purpose of furnishing needed operating capital and also capital to buy such an amount of capital stock in the Farmers National Grain Corporation as will fairly represent the regional's share of capital contribution.

Note that the contract method is mentioned first. By this method cooperative elevators will be enabled to retain their identity. They will employ their own manager and have their own board of directors, to look after their own business affairs, the same as before the Farm Board program was launched; in other words, this plan, by allowing the elevator to retain its identity, should meet the approval of that group of believers in the idea that the local elevator, should, just as far as possible in the program, retain its individuality.

Red Top Growers Sign

Advance reports show a 90 per cent sign-up of red top seed growers who have attended meetings, and have been interviewed in the membership sign-up of the Egyptian Seed Growers' Exchange, reports C. T. Kibler, farm adviser in Clay county. Nearly 500 members were signed up during the first 10 days of the drive in February, which was in charge of A. B. Culp and the district organization managers of the Illinois Agricultural Association.

In spite of mud roads and slow travel the campaign has gone forward in nine counties of southern Illinois, and new members are being added every week.

Butter Campaign Is Unnecessary In Texas

A Few Co-operatives Would Remedy This

"BUTTERFAT is selling here at 28 cents a lb.," writes County Agent Parker D. Hanna of Canadian, Texas, "whereas creamery butter on Feb. 19, 1930, was priced at 50 cents per lb.

"Our farmers are not going to buy 25 cent oleomargarine when they can churn their own butterfat," his letter continues. "So the butter campaign is unnecessary as far as the farmer in this section is concerned.

"If the consumer is told to eat more butter as there is a large surplus, he will ask why, if that is the case, he has to pay the same price for his creamery butter with butterfat at 28 cents per lb. as he paid when it was 44 cents.

Buy Cream Cheap

"It strikes me that if the manufacturers would get the retail price of their butter down in line with the price the farmer gets for his butterfat, consumption would take care of the surplus.

"The manufacturer may say that the butter he is selling today was churned from 40 cent butterfat. That may be true, but when production and consumption again become balanced he will probably be selling 50 cent butter churned from 25 cent butterfat, so the account will be evened.

"It would be foolish for me to push an 'Eat More Butter Campaign' locally when there is a spread of 22 cents between a pound of butterfat and a pound of butter."

Free 4-H Club Trip

A free educational trip to the Ninth National 4-H Club Congress during the week of the International Live Stock Exposition, which includes a week's visit to places of interest in and about Chicago, will be awarded to 58 county project champions in seven states, according to an announcement from the National Committee on Boys' and Girls' Club Work.

All 4-H Club members living in counties traversed by the Santa Fe Railway system may compete for these trips. The awards will be made to county champions doing the most outstanding club work in the crop, livestock or poultry projects. Previous winners of trips to the National Boys' and Girls' 4-H Club Congress are not eligible to compete in this contest.

States in which county club champions will be selected are: Arizona, Illinois, Iowa, Kansas, Missouri, Oklahoma and Texas.

The government of Uruguay recently ordered 136 educational films from the U. S. Department of Agriculture.

Members of the Illinois Agricultural Association staff will meet in conference on the Saturday following the second Monday of each month during 1930.

Resolutions Reveal I. A. A. Policies in '30

POLICIES adopted by the board of delegates as embodied in the resolutions at the recent Springfield convention reaffirmed the Association's pledge to co-operate with and support the Federal Farm Board in all its efforts to control crop surpluses and make the tariff effective on all farm crops. If necessary, the Association will later support supplemental slegislation to accomplish the purposes outlined in the declaration of principles found in the Agricultural Marketing Act.

A new taxing system for the state based upon ability to pay was requested in another resolution. Non-partisanship in elections, but urging members and friends to study the records of all public officials and, regardless of party, support those who prove themselves worthy was the basis of a third. The interest of the organization in the development and early completion of the inland waterway system was again set forth.

Co-op Marketing

The policy of exercising an influence in the building and development of co-operative marketing organizations commensurate with the responsibility the Farm Bureau assumes in promoting such organizations, was reaffirmed.

A resolution on reforestation places the Association on record in support of state and national legislation providing for planting marginal lands to trees.

An investigation of motor vehicles license fees will be made by officers and directors with the idea of bringing about such statutory changes as will make them fair to farmers.

Other Resolutions

Other resolutions called for adequate protection on soybeans and their products against foreign competition, licensing of handlers of fruits and vegetables, the establishment of uniform standards for market classes and grades of hogs, and for petitioning the state department of agriculture to investigate the introduction of bovine tuberculosis into the state through beef and dairy breeding animals.

Thanks were extended to Mr. Hyde, Mr. Lowden, and Mr. Brent for their inspiring addresses, and appreciation expressed for courtesies extended by the Chamber of Commerce, the Sangamon Co. Farm Bureau and other Springfield organizations.

The Meanest

SINCE the old problem of who is, or was, the meanest man on earth has never been settled it is still in order to enter nominations. So let the entries record those fraudulent stock salesmen who watch the obituary columns, keep an up-to-date list of new widows and subject them to their high-pressure salesmanship at about the time they receive their insurance money.

A warning has been issued to employees in various industries by the Better Business Bureau telling them to carefully scrutinize all solicitations from unknown firms following the death of a member of the family. Insurance companies issue cautions also, but in spite of all, states the Bureau, "these solicitations succeed too often in luring an inexperienced person to disaster through the hope of large profits."

If there is any lower form of thievery than this it must be low indeed.—Pathfinder.

LOGAN COUNTY DEBATING TEAM

Left to right:—O. D. Brissenden, Lincoln, mgr. State Farm; Oscar Mountjoy, Atlanta, seed corn specialist; Jake Lauer, Jr., Broadwell, the bachelor; and Clem Garton, Lincoln, the orator. These men recently debated on the I. A. A. Forum program from station WLS on the question "Resolved that Every Farm Youth Should Marry a Farm Girl." Farm Adviser J. H. Checkley, seen standing in the picture above, introduced the debate and the debaters.

THIS radio feature stirred up more interest than any similar broadcast from station WLS, according to Charley Stookey, farm program announcer. More than 150 letters came in from interested listeners all over the middle west giving their votes for the affirmative and negative. The honors were almost evenly divided although the affirmative debaters were credited with four votes to the good. Jake Lauer, the bachelor, was the principal object of attention. He received many requests for his photograph. These men have been active in the Logan County Farm Bureau monthly forum for the past two years. They acquired their ability in local debates at the regular meetings in Lincoln.

Represents 18th

WILLIAM A. DENNIS of Paris, Edgar county, whose picture was omitted from the last issue of the RECORD, is the new representative on the I. A. A. board of directors from the 18th district. He succeeded R. F. Karr of Iroquois. Mr. Dennis has been a member of the Illinois Farm Supply Company board for some time and has been active in organization activities in his home county.

Wm. A. Dennis

Dennis is a graduate of Harvard University, is a son of Charles H. Dennis, editor-in-chief of the Chicago Daily News, and is farming the old homestead which has been in the family since 1817. He specializes in dairying. His Jersey herd had the highest butterfat record and the two high cows in the local cow testing association last year.

T. W. Reed of Urbana has been employed by the Iroquois County Farm Bureau as general insurance agent.

Mr. Reed is a graduate of the College of Commerce, University of Illinois where he specialized in insurance.

Pierson Succeeds Buck As Director of Agriculture

Hon. Clarence F. Buck, who was appointed Director of Agriculture by Governor Emmerson last May tendered his resignation and retired from that office on Mar. 1st, so that he might actively promote his candidacy for State Treasurer of Illinois.

During his incumbency of office, the cordial relations, previously existing with the Department, were continued.

Immediately upon the retirement of Mr. Buck, Hon. Stuart E. Pierson of Carrollton, Illinois, was appointed as his successor. Mr. Pierson is both a banker and farmer and for many years has been an active member of the Greene County Farm Bureau. He was one of the delegates from the 20th Congressional District to the last National Republican Convention at Kansas City. He not only supported Governor Lowden's candidacy for President, but gave his undivided support in behalf of the farm organization's farm plank.

The Association has every reason to believe that the same friendly relations with the State Department of Agriculture that have existed for the past several years will continue during Mr. Pierson's administration of the Department.

A recent step taken by the Pepsodent Company now places Amos 'n' Andy, the world's highest salaried radio stars, in a class with the world's most valuable individuals. Because of the tremendous advertising value of this famous pair, life insurance to the amount of one million dollars was taken to cover any losses which might come as a result of the death of either one.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Editor, George Thiem

Published once a month by the Illinois Agricultural Association, 608 So. Dearborn St., Chicago, Ill. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

Stand By Your Friends

ON the opposite page will be found a reprint of the voting record of the members of the General Assembly outside of Cook County which appeared in the official legislative number of the I. A. A. RECORD last August. At that time, detailed information was given relative to legislation supported and opposed by the I. A. A. during the last session of the Illinois legislature. The voting record appearing on the following page was compiled so that our members might know the attitude of their representatives on controversial measures supported and opposed by the Association.

So many requests for a copy of the last August issue have come to the office, that our supply is now exhausted. The Board of Directors, therefore, authorized a reprint of the voting record in this issue. All members and friends of the Association should study this record carefully and make every constructive effort to return their proven friends to the Illinois General Assembly. In many of the districts in Illinois, the results of the primary in April are equivalent to election. This being true, it is very important that farmers and their friends take greater interest in the Illinois primaries.

Prolonging The Day

DURING the past six months Illinois shipping associations marketed 8,417 cars of livestock at Chicago of which 33 per cent was consigned to the Producers Commission Association. From Iowa the Producers received 1,344 carloads from shipping associations representing 11.8 per cent of all the shipping association business from that state.

Illinois livestock growers are outstripping those from neighboring states, it is apparent, both in their thinking and action on the question of real co-operative marketing.

While our record is encouraging yet there is still plenty of room for improvement. We can never understand the line of reasoning of growers who ship their livestock co-operatively, yet when they reach the terminal markets forget all they learned and pratice at home, and support the privately controlled commission system with its myriad of sellers. Rather than patronize their own co-operative agency which seeks to establish the producers bargaining power by eliminating wasteful seller competition they prolong the day when the farmer will really have control of his product.

The Speculators Squeal

THE squealing of the speculators in farmers' products following the action of the Grain Stabilization Corporation in buying wheat to prevent a price collapse would be pitiful were those gentlemen worthy of any sympathy.

As Mr. McKelvie of the Federal Farm Board pointed out a few weeks ago, the speculators dealing in imaginary grain, buy and sell annually more than 20 times the actual bushelage grown. Every bushel bought and sold must pay toll to some grain exchange member. The millions of dollars thus collected every year are charged back against the farmer in lower prices, for he ultimately pays the cost of distribution.

The stabilization corporation has disturbed the activities of the gamblers. It has tended to reduce their operations, hence the commissions charged against farmers' grain. Profits of brokers handling such transactions thus are jeopardized.

Every time a racket or an injustice of any kind is broken up or curbed there is wailing and complaining by those affected. It is too much to expect that modernization of the farmers' marketing system will be accomplished without treading on someone's toes. Few improvements or reforms are brought about without causing someone discomfort. Yet no thinking person would discard our modern labor-saving, time-saving, and money-saving machinery methods, and practices because people are temporarily thrown out of work, and obsolete equipment junked.

The federal government is at last making an effort to assist farmers who comprise one-fourth of the country's population secure the advantages of the tariff and man-made laws which other groups have been enjoying for decades. It is doing this as a matter of public policy. It realizes that the country's continued prosperity depends to a large extent on the welfare of its people who till the soil. Is it not more important to help lift the economic status of so large a portion of our people than to allow those who have been preying upon them go unmolested?

OUR READER'S FORUM

IF YOU read anything in the RECORD or elsewhere that stimulates your thought write your comments or observations for this page. Members of the I. A. A. we believe comprise the bulk of the thinking farmers of the state.

The officers, directors, and fellow members of your organization will appreciate having your ideas. Send your letters to the "Reader's Forum" Illinois Agricultural Association RECORD, 608 So. Dearborn St., Chicago.

Editor, I. A. A. Record.

"THE state farmers' elevator meeting at Peoria last week was one of the most interesting demonstrations of how farmers run their business, or rather don't run it, that I have ever seen. It seems that the conference was dominated by more elevator managers than farmers. I presume a great many elevators have sent their managers instead of going themselves, as they should have done.

"The board of trade was represented. I noticed that a good many managers went to their rooms with commission men. They went to meals with them, they went to shows with them, and when it came time to vote, they voted with them. It seems rather peculiar that the directors of a good many farmers' elevators are going to let their managers vote for them and represent them in this great business of the state which means hundreds of thousands of dollars. On election day we don't send our hired men to vote for us at the polls, but in our business dealings, especially as far as our elevators are concerned, we seem content to let our hired men determine policies for us.

We Are To Blame

"I think this situation is partly due to the fact that in some of our co-ops the members meet, elect, and vote on directors and then go home and forget all about it. The board of directors have a meeting, elect a manager and then they go home and forget all about it. Under this sort of system the manager soon feels, with some justification, that he runs the whole show. If we let him do it, we have nobody to blame but ourselves.

"But to get back to the Peoria meeting. They had a good program the first and second days, with some very interesting and instructive speakers. The business session and election of officers have always been left until the third day. The farmers are all supposed to go home on the evening of the second day. This time they didn't. We had a hot election on the third day, but the board of trade with the aid of our managers beat us. At previous meetings everybody has voted. There hasn't been very much question as to any delegate's right to vote. This time, however, a credentials committee was arranged and every voting delegate was supposed to have his credentials properly approved.

Votes Six Times

"When it came time to vote it seemed that we farmers couldn't manufacture credentials fast enough. I saw one manager vote six times representing, I suppose, six different elevators. In other words, our managers had been, apparently, previously informed that there was to be a fight on, and had seen to it that they had collected proxies enough to swing the election. The vote was 75 to 70 in favor of the grain trade and their managers. The farmers held the little end of the score. Well, it was a little tough to get licked, but perhaps it was a good thing in the long run because it was an interesting demonstration of how we farmers have been running a pretty big part of our business. After this little show, perhaps we will be more interested in seeing that things are done properly."

Earl Ericson,
Knox County, Ill.

A Masterpiece

THE writer read the recent address of Hon. Arthur M. Hyde at Springfield. It is a most comprehensive yet analytical exposition of present agricultural conditions.

Comprehensive, because world competition is brought face to face with the American farmer in a clear and conclusive manner.

Analytical, because the whole problem is treated in a practical way without savouring of an unworkable and theoretical utopia.

It is the finest production thus far "from one who knows" to those who are needy and eager to learn, and should be proclaimed a masterpiece and read by every pupil as well as every farmer, Am pleased to voice this little expression of appreciation.

Omar P. Wagner,
Livingston County, Ill.

Liked Hyde's Speech

I WAS present at the annual luncheon of the Illinois Agricultural Association in Springfield, and heard the address of the Hon. Arthur M. Hyde. The same speech has been read again and again in the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. I shall read the treatise many times.

It is so comprehensive in its treatment of the causes, present status and necessary remedial measures of the agricultural situation.

The positive, courageous statements in the address of the secretary of agriculture make me to believe that surely Hon. Arthur M. Hyde will prove to be the great emancipator of American agriculture.

G. H. Iftner,
Effingham County, Ill.

A Few Observations

"YOU invite comments on Secretary Hyde's address at Springfield, and I should like to respond with a few observations on what I regard as the two most significant points he brought out in his discussion of the agricultural situation.

"One of these has to do with crop acreage reduction. Secretary Hyde went no farther than to advocate the withdrawal from production of all marginal farming lands, and to reforest these under state and federal auspices. Certainly there can be no objection to such a program. However, when the Farm Board advocates acreage reduction it has in mind something much more direct than that. It is now urging reduction in the cotton and spring wheat acreages, pointing out that if this is not done it will not be responsible for the course of the markets in these two commodities. While acreage reduction offers the most effective remedy ever proposed for reducing surpluses, it is doubtless the most complex and difficult of all to administer positively and fairly.

Acreage Reduction

"Those of us who for years have kept a fair proportion of our farms in legumes would welcome a program of acreage reduction in grain crops, the acres going to legumes or forest. But this method requires time. It cannot be given effect over night, or in a single season, as the Farm Board wants done. The sort of reduction insisted upon just now will result either in acres lying idle, or in being planted to some other cash crop. To leave good farm land entirely out of production while still subject to taxation and other costs, seems scarcely worthy of discussion. To put it to some other crop coming under the paternalism of the Farm Board would merely be 'robbing Peter to pay Paul.'

"A short time ago in discussing the condition in the South with a friend who is familiar with conditions there, he made the statement that he believed the South would reduce its cotton acreage materially in 1930. I immediately asked if the released acres would not go into corn, and he said, 'Yes.'

"Now, there we have the whole situation. If the spring wheat belt could grow cotton and thereby replace a part of the wheat acreage, I suppose we would then have reductions in both cotton and wheat! Next summer we will hear a lot about reducing the acreage of fall wheat, and doubtless with some result. Except in the drier parts of the wheat country, corn will be substituted. But in the meantime, we of the corn belt will be hearing of how stupid we are for producing so much corn. . . .

"And because of just this condition, I venture to predict that if the Farm Board continues to stress acreage reduction along the present lines, the farmer will be in for a lot of abuse from those who are unable or unwilling to comprehend the situation; and in the meantime the Farm Board will have safely 'passed the buck.'

Save Home Market

"Another point of importance which the Secretary brought out is that of the tariff. If agriculture the world over is in trouble, as seems true; if there is over-production in the foreign markets as well as in the home market,

then we had better be looking to that home market, while there is yet time. When home consumption does catch up with home supply it will require every ounce of effort agriculture can muster to preserve protective tariff rates. If anyone is inclined to doubt this, he should read in the Congressional Record the tariff debates going on at the present time. Eastern members of Congress generally, Democrats and Republicans alike, are bitter against the farmer. They will defend any sort of an increase on a product of industry on the ground that industry must be kept employed so the country generally will be prosperous. Then there will be a demand for farm products. On the other hand, if it is proposed to place real protection on an agricultural product, these same gentlemen orate with passionate indignation against raising the cost of living. . . . .

"Let us not belittle too much the idea of tariff rates on those products of which we now produce a surplus. While these rates may not be effective now, they will be some day, and on that day agriculture will be fighting for its life in an effort to maintain them. To have them a part of the law at that time will be of tremendous advantage. The farmer's fight for tariff rates has not yet begun. I wonder if he is alive to the situation."

E. D. Lawrence,
McLean County, Ill.

Reforestation Important

I HAVE read the article in the February RECORD, by Secretary Arthur M. Hyde. It has stimulated my "thinking machine"—no doubt having done the same for others. The facts the secretary presented concerning the reforestation of marginal lands has interested me considerably.

It would seem to be economic folly to keep on using, and increasing the use of our poorer lands. In fact, considering the justice to future generations, it might even be declared to be criminal folly to use up our reserve food and lumber supplies in the depletion of our marginal lands, as we now use the term. We shall need those acres some day, far more than we do now. Incidentally by using such lands we have helped create a vicious circle, the center of which is the bug-a-bear, price-breaking surplus.

Shortsighted Policy

You only have to glance at some of the large river systems of the world to understand what is meant by deforestation. Wherever the trees have been removed and the grassy lands plowed up—specially on inclines—the rivers have carried the future food and wood supplies out into the oceans, in form of fertile, silty soil. Some of the abandoned lands of China are an example—and we have plenty here in our own country. Famine in the articles used by man has been the result and will continue to be the result of such national and individual shortsighted policy.

With the ever increasing shortage of lumber, for building purposes, industrial uses and farming needs, I believe the time is here now to do something about placing our poorer acres into growing future lumber supplies and soil conserving. To be sure we have our national parks with their growing timber; and some of the states own forest lands, many of which are only stump lands, reverting to the state for lack of tax payments. But as to actually doing something about the marginal lands, scattered all over the country, we practically have only growled about the production of surplus crops, of which they are capable.

Grow More Trees

It has occurred to me that a system might be developed, wherein the marginal acres on our farms, as well as large tracts, might be placed back to growing timber and conserving our soil resources. The county adviser, or some other county official, is in a position to know about the fertile, marginal and poor lands of every county in the United States. With the help of soil surveys developed by the state agricultural colleges, a record of such lands could be made. Adaptable trees could be secured and planted. And such land kept free from taxes, until production of lumber begins. . . . .

Emet N. Hopson,
Macoupin County, Ill.

HOW many of our readers will follow the advice of Secretary Hyde and Chairman Alex Legge of the Farm Board and plant 5 to 10 acres to trees? Who has a plan for acreage reduction to eliminate crop surpluses and how could it be enforced? Write your comments to the Reader's Forum, I. A. A. RECORD, 608 So. Dearborn St., Chicago.

SECRETARY HYDE'S address is an able exposition of the farmer's problem. Agriculture is fortunate in having such a strong defender. While Secretary Hyde does not discuss some of the vital issues, yet his discussion of surplus production, marketing, the tariff, sub-marginal land, taxation and organization will appeal in the main to farmers everywhere. Such themes as forced money deflation, price-fixing, speculation, market manipulation, credit, banking and legislation are themes that lie at the very heart of the farmer's plight but they are often overlooked in discussions of this sort.

Please bear with a few suggestions:

On nearly every farm there is a certain amount of submarginal land. If this is neglected or abandoned will not the interest and taxes thereon eat up the profit from the productive land? As a rule farmers aim to make every acre contribute something toward the total income.

Tariff On Imports

Why dismiss from tariff consideration the 61% of agricultural commodities which we do not produce? A tariff on these would of course increase the price to the consumer and therefore divert his food demands to the commodities which we do produce. If the 61% comes in duty free, then the consumer would be attracted to the cheaper imported foods and raw material and diverted from our own farm commodities. Why not go the full length with agriculture as with industry?

Why eliminate the surplus? There seldom is a world surplus. Taking one year with another the world consumes all the food produced and, at that, millions suffer the pangs of hunger. It is a question whether the elimination of the surpluses is wise, economic or humanitarian. The consuming public should be protected against a shortage of food. A surplus adds to our national income and fortifies the nation against disasters such as war, crop failures, and physical losses due to fire, flood, tornado and enemies. The aim of surplus control legislation should be not to eliminate the surplus but to prevent it from destroying the domestic price . . . . William Osburn, Grundy County, Ill.

From Union County

Editor I. A. A. Record:

AGRICULTURE must be organized, this is easily said; but cleaning an Augean stable is child's play in comparison with this job, uniting those six million farmers in a workable unit. Of this I am very doubtful. Now supposing it would come to this—the unification of us hayseeds—then the trouble would begin.

Suppose we would want to reduce the acreage. Will the big landowner who lives in city and town submit to a mandate to reduce his acreage in proportion to his holdings? And suppose we farmers were successful in controlling the acreage thereby getting more money in our hands, would that better our condition? For a year or so, and after that we would find ourselves in the same plight.

It is not that we raise too large crops. It is taxation. Take the income tax schedule. Sixty-five per cent of all the wealth is in the possession of two per cent, 25 per cent is owned by eight per cent, and 10 per cent by 90 per cent of the people. Thus 90 per cent of the people are the genuine taxpayers—and not all of them. The majority of the farmers are included in the 90 per cent. Mr. Lowden and Mr. Schwab form a class by themselves. Ten per cent of the people unload their taxes on our shoulders, and the result, foreclosures, until we have a few rich families and the rest their slaves—what next?

History Repeats

It might be that I see the future with the eyes of a pessimist; but history repeats itself. The drifting of our nation's wealth in lesser and lesser hands will bring more and more hardships and suffering to the common people because the Shylocks want their pound of flesh. How many farmers did lose their land since the world war? Do we know the exact number? From 1920-'23, 22 per cent of all who farmed lost their holdings—14 per cent renters, eight per cent landowners. Nineteen hundred and twenty-eight forecloures of farm mortgages were still six times greater than 1917. Surely wars will and do enslave the wealth-producing farmers and laborers, and to whom?

Farmers and laborers in all the last warring countries, except Russia, suffer on account of taxation, paying interest on war debts, pensions, standing armies and navies. To whom are the nations in debt? Not to the masses. I am, for one, to cancel all the war debts. I am willing to grant a person his bonds, if they don't call for millions, were they the last straw to support him. I know a good many persons who bought liberty bonds paid in full and sold them for less money because they needed money. That is one way to get rich. That last crash on the stock market swallowed up a good many sharks. The income tax should show this plainly.

Goes On

This digesting goes on undisturbed 'till the end comes. To prevent this end coming—it might not be so blessed—the best cure would be canceling all war debts, reducing the interest, and reducing the salaries of all our officers, and an inheritance tax high enough so no person will try to become a millionaire. That means to be more honest. No really honest person—to my thinking—can become a millionaire. Profit is the soul of all business. Look at our millionaires. They surely took profit by hook or crook. The last oil scandal should convince any person who thinks.

G. Rudert, the writer of this, is one of the charter members of our Farm Bureau in Union county. Politically a red blooded socialist, born in Germany, raised on a farm there. My relatives over there and forefathers were farmers and landowners say for centuries our family records show. When 16 years old wanderlust got hold of me, and I left for America—the point, to get rich.

Well, I never will get rich, and don't care. I always read a lot. I have in my possesion

(Continued on page 14)

SICKNESS and death are the common levelers of all humanity. Wealth and position can not stave off disease nor stem the hand of the Grim Reaper. Neither respect persons. To the man flat on his back worldly possessions fade into oblivion.

Men of power who have surmounted difficulties throughout their lives finally fall prey to the common enemy of all, diseases and ailments of the flesh. Baffled and defeated, they leave their fortunes to endow hospitals, sanitariums, and clinics to fight that which conquered them. This is one of the reasons why untold millions have been poured into hospitals and medical research by rich men.

People of means go south during the winter for their health and perhaps die. Most of us can find health abundantly in the bracing wintry climate of the north if we will. Old Doc Evans tells us that, "Sunlight over ice and snow is very rich in those ingredients which increase resistance to infections among adults and promote growth among children. The effects of cold air, snow, and rain on the complexion are superior to those of remedies sold over the counter. The fine complexions are found among people who expose themselves to winter cold." That is heartening information to us who from economic necessity must stay where we are the year 'round.

Nine out of ten are careless of their health. Doctors tell us that more than 90 per cent of all human ailments are preventable. Lack of a proper diet and irregular eating habits account perhaps for more than half of our troubles. Too little sleep and rest, foul air, lack of the right kind of exercise, improper clothing, and failure to observe the ordinary rules of health account for the rest.

The indoor worker weakens his vitality by too many hours in a warm, stuffy and often foul atmosphere. The outdoor worker, more fortunate in his environment from the standpoint of fresh air, may abuse himself in other ways. All must pay the price sooner or later for breaking the laws of nature. I knew a young man afflicted with diabetes who was too weak willed or stubborn to diet. He gormandized on starches and sweets against doctor's orders and dug an early grave with his teeth. What fools we are.—E. G. T.

More than 600 red top growers signed up to sell their red top seed through the Egyptian Seed Growers' Exchange during the first two weeks' drive early in February.

Farm Truck Licenses

"Just a few remarks in regard to farm truck licenses.

"I own a one and one-half ton truck. I drive about 2,500 miles in a season and pay $22.50 for my license, and the regular trucking man is on the road every day, pays $22.50 for licenses and drives about 25,000 a year.

"I think this is very unfair to the farmer. Any man who applies for a chauffeur's license can afford to pay the price, for he uses the road."

Jess S. Bachman,
Woodford County, Ill.

What Is A Farm?

Three acres is a farm, say officials in charge of the Census Bureau. A farm is all the land farmed by one person whether it is three acres or 3,000 acres. No tract of land of less than three acres will be registered as a farm unless it produced last year at least $250 worth of farm products either consumed on the farm or sold.

A large country place of 10, 15, or 20 acres may not necessarily qualify as a farm. Actual farming or agricultural operations must be carried out to qualify. Farm land is considered "operated" not only when cultivated, but also when it is used for pasture or for production of hay.

In 1925 when the last census was taken there were 15,151 farms of less than three acres. The total number of farms in the nation at that time was 6,371,640.

Livestock Sales Plan

A million dollar national livestock marketing association to co-ordinate and control sales and standardize rates is provided for in a plan recently presented by the Federal Farm Board to livestock growers in Chicago.

The program and proposal of the Farm Board was outlined by James C. Stone, the Board's vice-chairman, to representatives of 25 co-operatives. Mr. Stone stated that the organization could be launched just as soon as the plan is ratified by the board of directors of the co-operative livestock sales commission associations.

Grain Grading Film

A two-reel motion picture film showing methods of grain sampling and grading was recently completed by the U. S. Department of Agriculture.

Copies of this film can be obtained by county advisers and other extension agents free of charge by writing Fred G. Smith, Federal Grain Supervision, Room 1138, 327 So. LaSalle St., Chicago. The Chicago office also has a copy of an excellent one-reel film on the "Combine Harvester."

Other government films on a variety of subjects can be obtained by writing the Motion Picture Division, U. S. Department of Agriculture, Washington, D. C.

Obstruct T. B. Testing Vets Face Fines and Prison

Four cattle owners of Butler County, Ohio, were found guilty and convicted recently in the Federal Court at Dayton, Ohio, for conspiracy to assault and forcibly oppose employees of the Bureau of Animal Industry, U. S. Department of Agriculture, who attempted to test herds of cattle for tuberculosis in accordance with the State law. The defendants, among others, had endeavored to hold up the area plan of tuberculin-testing of cattle in the county by force and violence, after an injunction issued by the local court had expired. The men carried a shotgun, a blacksnake whip, pitchforks, clubs, and stones.

After most of the herds in the county had been tested, cattle owners and breeders appealed to the local Federal and State authorities to send veterinarians to test the remaining 52 herds in order that the county might become classed as a modified-accredited area. The violence occurred on July 23, 1929, when Drs. Solon Gillen and Chas. S. Elliott endeavored to complete the test on one of the herds.

The case was tried before Judge Robert R. Nevin and the trial lasted three weeks. The four persons convicted were James N. Griffin, Wert A. Whipp, John A. Donson, and Valeria Donson. They face imprisonment in a Federal penitentiary and fines up to $10,000, but have appealed to a higher court.

Soybean Oil

NO ONE knows much about soybean oil. It is difficult to sell for this reason. The edible field is as yet unopened and the tendency of soybean oil to become rancid is a bar to its ready sale, according to Otto Eisenschimel, expert oil chemist.

"Soybean oil is a semi-drying oil and is not considered as desirable as linseed oil for use in paints," he said. "It is being combined, however, with linseed and other oils with considerable success by paint manufacturers. More experience is needed. The oil situation today is deplorable. The outlook for next year is better, however. The soybean oil processors must cultivate the high priced markets, that is, they must try to sell larger quantities of the oil into those channels that pay the most money for it. The oil at present is being used largely as a fat. The market is at yet only scratched."

Employers' liability insurance is limited to Farm Bureau members. A minimum premium deposit of $10 based on a minimum payroll of $1,000 is required. A one per cent additional deposit is required for each $500 of payroll or major fraction thereof in excess of $1000 annual payroll. The policy fee in all cases is $5.

It is planned to make only one assessment a year, although assessments can be made semi-annually if necessary.

Earl C. Smith has been appointed a member of the state board of agricultural advisers by Governor Emmerson.

The Agricultural Situation

By ALEXANDER LEGGE, Chairman, Federal Farm Board

MR. LEGGE made the speech printed herewith before a group consisting largely of Chicago business men, several months ago. It came to our attention only recently. He talked estemporaneously at the dinner closing the Sixth Conference of Major Industries sponsored by the University of Chicago, the Institute of American Meat Packers, and nineteen other organizations.

Alex Legge's characteristic shrewdness, directness, and grasp of the essentials in the job before him are clearly revealed in this speech. It gives you an estimate of the kind of man we have at the head of the Farm Board. The common sense and ability to drive at the heart of a question that made Mr. Legge a $100,000 a year man can be read between the lines. Don't miss reading this article.—Editor.

ONE should not face an audience like this without adequate preparation, but my clients have been rather insistent since I agreed to come here that their problems in meat, wheat, cotton, and one thing and another were more important than anybody's speech—so, should my talk be rambling and disconnected, I ask your indulgence to that extent.

Going back—one of the questions is: When did the agricultural problem begin? How far have we any record? I can't answer that very clearly; it was before my time.

A New York paper recently put out in a Sunday supplement what purported to be a tablet dug up in the Valley of the Kings on which was an inscription by Argan, I think it is, the king of kings, who passed away in 3500 B. C. On the tablet the king admonished his people that, to protect the nation, they should try to correct the frivolous habits of the young women of the day and also the disparity between the earnings of agriculture and the villages. In other words, they had flapper and farm relief questions even in those days.

Drifting To City

I don't vouch for the story nor can I vouch for the story of some of the latest economists who think they see in our present situation a parallel with the history of Rome in its balmiest days. The drift of the people from the country to the city is certainly going on here at the present time and their experiences portray what it means—they had transferred people from the soil to the centers of population and you all know the result. I have seen a little in recent years of the reverse movement where the overcrowded city is being relieved. The people are being moved back to the farms under the escort of a government gentleman in a black shirt. I hope we won't have to do it that way.

Now we still hear the question, what is the problem; is there an agricultural problem, is it real? The National Industrial Conference Board, not made up of farmers or supported by farmers but supported by you people here, passed on that question, and answered it very fully and completely. I have never had any doubt about it myself. I was raised on the farm. I have always owned a farm and I know about how the thing runs, but I will not use my personal illustration. If any of you gentlemen have any question about it ask your esteemed fellow citizen, Mr. Samuel Insull. He has a record of being a wizard. He can take a gas company and a light plant and a railroad and what not and make it purr and make it move and make it pay dividends and profits, reduce the prices and make everybody happy, but he can't run a farm except in red ink. He admits it. He has as good a manager as I ever met trying to run it, but he can't make it pay expenses. I am sorry Mr. Insull is not here this evening, but I am sure he would verify that statement if he were.

Now there is a better understanding than there was a few years ago of this subject, but it is not well understood by the people of the country at large today. Some of the questions that come in to us are astounding in the lack of knowledge of the facts that exist all around you. The farmer has been lost in the shuffle, to a measurable extent, in the rapid progress of industry. To illustrate: One of these statistical "sharks" down at Washington has been compiling figures on gifts and donations made by philanthropic people during the last eight years. During that time the front pages of the papers have been filled with this farm problem most of the time, but out of gifts totalling nearly $17,000,000,000—$2,800,000,000 of which was given in 1928—$1,000,000, donated by Gianini to the University of California, is the only donation that you can trace to the agricultural interests of the nation. For the farmer to participate in any other donations he has to come to town.

Is Not Favoritism

I just quote that to show how completely the farmer has been lost out of the public consciousness of this great nation.

Then we have the question of this measure, the Agricultural Marketing Act, this law which we are trying to administer as being socialistic, paternalistic—favoritism of one kind or another. Is there the need of government action, and if so, why? What is it? Is it any greater measure of relief that is contemplated in this law than has been afforded to labor, to industry, to transportation or to finance? I think not. It does go, it seeks to go, many good ways.

In recent weeks, members of the Farm Board have received literally thousands of communications—editorials, newspaper clippings, telegrams, letters, telephone calls, personal commiseration—over the panning we got up on the "Hill" in the Senate inquiry. There is nothing to that from our standpoint, but out of all that not one single friend who tried to condole with us has seen through the picture of what is beyond.

Why is there a radical bloc? Why are there Progressives? In each and every instance, gentlemen, they represent distress at home. They are trying to find an expression for the distress in some part of this great nation. Remove the distress and you won't have any trouble with radical blocs in the government of this country. If you do not remove the distress, if some one does not find a way to do it, you will find conditions much worse in the future than you have seen them in the past.

I Can't Agree

Some people say that there cannot be any parity between industry and agriculture. I can't hold to that at all. They quote the repeal of the British corn law as a marking of the ways, or, to become a commercial nation and pass the farmer over to peasantry. I don't think that is literally true, but, if it were, I am not certain that it was a good move. You have the picture today of Great Britain, sturdy old Great Britain, which has the farm problem quite as acute as it is here, and, with it all, you have a Prime Minister, elected for the second time, representing the Socialists and rather radical Socialists of the British Commonwealth. The repeal of the corn law may not have worked out altogether happily.

Individualism The Reason

Why has agriculture lagged behind, particularly in this country? I think the answer is individualism, isolation. Collective action as compared to individual action is represented in every industry here except in agriculture. I don't mean by that any great combination of units. That is not the story at all. It is a combination of minds. Industries are run by a group of minds working together. It isn't any one man's guess that decides the best thing to do. It is the concerted action of many men, studied action, carefully reviewed, and reviewed again. You have to do all that to avoid making any mistakes, while the farmer acting individually gauges his program by the horizon, seeing but little beyond what there is in sight in making his plans.

Again in this day of high standards of living—now get that right (the high standard of living we boast about, you have all become accustomed to it)—many people, who years ago felt that every dollar they gave to the wage earner beyond what he

could possibly live on was a dollar wasted, today advocate a high rate of wages and make him a better buyer. If that is true of the wage earner, why not of the farmer?

If a manufacturer gives his men a raise in pay he quotes it in the price of the goods he sells. Naturally. Why shouldn't he? He passes it along. And in many cases this accumulative high standard of living cost is passed along again and again. A man gets a little higher price for making the brick or making the steel, the contractor has to pay a little more wages to build the building. In the end your rent goes up. Then you pass the rent along to somebody else, but eventually away off, clear out in the prairie, you pass part of this burden to somebody who hasn't any place to pass it, simply because he has no voice in the price put on his goods. His is a buyer's market. He takes what he can get and has absolutely no voice in saying what that price shall be. That is the trouble with agriculture, not only in America, but in many other places.

What Is Cure

Now, what is the cure? You hear a great many arguments now about mass production on the farm, production in great units and operating more economically. That is possible. It is being done successfully in a few instances, but it is very repugnant to the nation's ideals, to the homestead, to the man who tries to make a home for himself and his family on the land.

In my judgment it can be accomplished without the merging of farms. The farmer's handicap is not so much in the things that he buys. When my friend Rosenwald (Julius Rosenwald) here gets out his mail order book, somebody else gets the chain store right up to the door of the farmer, in addition to what service he has had in the past. His buying is fairly comparable with you people in town; he is not paying any great premium on the stuff he buys. What is wrong with him is in what he sells. He needs to get something for that.

That, I believe, can be done by collective action in the selling line only without disturbing what is established otherwise. In other words, by massing together in large units the product of any commodity, agricultural or otherwise, you have a better bargaining power than when you have a thousand people each competing with the other, while one should do the job.

Producer Has Control

Now you say, "Why do I assume that a co-operative run by a bunch of untrained farmers can do better in marketing their crops than the old time machinery that has been set up, the old system, the old agency now at work?" Don't lose sight of this fundamental, gentlemen, and that is, the private agency has no control over the flow of the commodity to the market. The producer has. The Producer can so regulate the marketings of his crop collectively that he never will have a glut, and if there is any surplus he will keep it at home and not pay freight on it.

To illustrate, I refer to my friend, Charlie Teague, member of the Federal Farm Board, with 25 years experience in the citrus business. Today we have the picture of possibly two or three concerns, shipping and handling practically all the citrus fruit that is krown on the Pacific Coast, while down in little Florida, which grows a very small percentage of the whole amount, there are some 132 different shippers. Florida growers bunch their products. It goes to Baltimore today, to New York tomorrow, but it goes in a bunch. It gluts the market and it is sacrificed. You don't find the gentlemen on the Pacific Coast doing that. Their market is studied and watched every day, and the flow of the goods to the market is based on what that market has been consuming in corresponding weeks of previous years, and, if there comes a little too much, by-product plants have been provided in which the surplus is salvaged at home without paying any freight on it. The central market does not get a chance to handle that at all.

If you haven't read this speech of Alex Legge's you have missed one of the most interesting and important documents and contributions to the voluminous literature on the subject, ever published. This article can not help but stimulate you to thought. Write your comments for the "Reader's Forum", c-o I. A. A. Record, 608 So. Dearborn St., Chicago.

That is the difference between organized marketing and the present disorganized system in general use. The ability to regulate supply to demand is the life of any business, of all our businesses. If you manufacture too much stuff and the market can't absorb it, what do you do? In the last analysis this organized marketing of agricultural products will do that same thing for farmers.

A Little Arithmetic

It isn't a happy thought to the average farmer to think he might have to reduce production, *but some day he will get it through his head that four bushels of wheat at $1.50 a bushel is $6.00, but that five bushels at $1.00 a bushel is only $5.00.* That percentage of reduced production, twenty per cent less, would easily result in a return of 20 per cent more, could it be applied this minute. A 20 per cent reduction in what he produces would bring his supply within the tariff barriers which today are practically of no use to grain growers. He wouldn't have any trouble in getting 20 per cent more for 20 per cent less gain.

No Need To Worry

This question comes in right there: Suppose this works out successfully? What is it going to do to the other fellow? The miller and the canner and every other fellow who processes farm products wants to know, "What is it going to do to me? Why don't you consult me before you do this or do that?"

The answer, gentlemen, is simple. If that processer, whoever he may be, is doing a useful service at a reasonable cost, he has nothing to worry about. Service has to be performed. If he can do it as cheaply, as well, and as efficiently as anybody else, why should he worry? He won't have to change. If he is not doing it effectively and economically, and furnishing good service for the revenue he gets out of it, he is going to pass out of the picture, anyway. It may be competition, it may be co-operation, but in any event he is going, because the inefficient has to go.

Now I am not going to take much more time, gentlemen. It is getting a bit late for us farmers.

The Consumer

Then we get the next question: How is it going to affect the consumer? To some extent it may increase the cost to the consumer on some farm products, but not on everything. We start with the wage earner who gets a raise of pay and he passes it along to the manufacturer and the wholesaler and the retailer and it finally gets back to the farmer. If he has to pay out a little bit of that wage for an increased cost of living, why, you have only made the circle complete. He hasn't any kick coming; only he will just try to get a little more when he gets the next advance.

You people living here in Chicago (I lived here for thirty years until quite recently) have been paying fourteen cents a quart for your milk in recent years. People in St. Paul or Minneapolis buy the same grade and the same quality of milk, all pasteurized and sterilized and whatever they do to it (it is a lot these days to comply with the health regulations), and they get it for twelve cents. Yet, the farmer in Minnesota gets thirty cents a hundred more for the milk than the farmer in Illinois. All that difference was taken out of obsolete methods of distribution—every cent of it.

The Modern Way

Instead of there being eight or ten or a dozen different milk wagons going down the alley, one goes down the alley. The distributors, the same men who grew up in the trade, are still doing the work. They have so many blocks allotted to them and nobody else goes on their territory. You don't have a case where you have five or six or ten apartment buildings together, and as many different men coming up, putting down a package of butter and a bottle of milk, and in a few minutes another

(Continued on page 13)

KEEPING WELL

By Dr. John E. Boland, Medical Director, Country Life Insurance Co.

THE purpose of the medical department of insurance companies is to pass on risks. In the past we have been satisfied to limit our activities to this. However, the Country Life Insurance Company, in keeping with its first principle of always to be of utmost service to its policyholders, has decided to go a step farther. We are planning a series of educational articles to be published periodically.

Dr. John E. Boland

Our stories will have to do with the promotion of health and the prevention of disease with an occasional one on life insurance. We hope to present these to our readers in a form that will be readily understood, keeping away from technical medical terms.

Our aim is to aid our policyholders in attaining the highest degree of health possible. This can only be brought about by periodic medical examinations made by dependable physicians.

Often Careless

A tendency of the family physician, who has known his patient for years, is to make light of these periodic examinations. He is very apt to say, "Why, you are in perfect health. I have known you from the date of your birth. Why bother me, my business is to care for the sick, not for healthy individuals like you."

Unless examinations are complete and thorough, they are of no value. Medical experience of the benefits derived from regular examinations of presumably healthy individuals is sufficiently widespread that we have all recognized its great value.

We know of the material reduction in infant deaths accomplished by the supervision of the feeding and hygiene of babies from birth to the age of two years. During the years prior to the entry of school life, some form of medical supervision of apparently healthy children is justified by the number of important defects discovered. Therefore, periodic examinations should begin at the age of two years. One can not estimate the number of cases of rheumatism, heart impairments, etc., that can be avoided by examination of teeth and the removal of diseased tonsils in early life.

Prevention The Thing

In the past a person consulted a physician only because of symptoms of disease that demanded diagnosis and treatment. Now we find people coming to physicians in increasing numbers for an estimate of their state of health and for guidance in maintaining or improving it. The latter point we are desirous of strongly emphasizing.

Do not wait for specific illnesses to consult your physician. The average adult accepts certain tendencies of departure from normal such as overweight, constipation, shortness of breath, loss of weight, etc., as predetermined and beyond his control and has resigned himself to these conditions. The attitude of resignation and acceptance of limitations is entirely out of accord with the present day demand for mechanical efficiencies.

Auto Gets More Care

The comparison of the human machine to an automobile is an illustration of the importance of periodic examination. To get the highest degree of efficiency out of our automobile it must be in the best mechanical condition possible. Automobile companies recognizing this fact advise automobile owners to have their cars serviced at regular intervals. Practically all automobile owners co-operate in this respect. Surely if we do this with our automobiles, it seems only plausible that we should do likewise with our bodies.

One naturally believes that prevention of illness should begin with children, therefore, in our larger cities this work has been widely developed. While results with adults will not at first be startling, any one who has had his defects pointed out and recommendations made for mending his ways, readily sees the great value in periodic examinations. See your family physician at least once a year for a complete physical examination. Visit your dentist at least twice a year.

Our aim is not only to add life to your years, but to add years to your life.

Endorse Co-op

The Iroquois County Farm Bureau board of directors in joint session with the Farm Bureau grain marketing committee on Feb. 22 unanimously endorsed the Illinois Grain Corporation.

THE annual spring meeting of the board of directors of the Illinois Farm Bureau Baseball League will be held Friday, March 21, 1930 at 1:00 p. m. in the Jefferson hotel, Peoria.

The directors and representatives of counties interested in baseball were polled regarding the choice for a meeting place. Ten voted in favor of Peoria, seven for Bloomington, and six for Springfield.

A third member of the state arbitration committee will be chosen, baseball divisions will be rearranged for the convenience of the member teams, rules and regulations governing the playing of games in 1930 will be adopted, games scheduled, and other business transacted.

An effort is being made to organize a new division in northern Illinois. Lee county, which played in the League last year with Henry, Knox, and Stark, has indicated its unwillingness to continue unless a new division can be formed to include neighboring counties. Jo Daviess and Stephenson counties may have teams, while farm advisers in Carroll, Whiteside, Winnebago, and DeKalb are being asked to sound the sentiment for farm baseball in those counties.

LaSalle county has announced its intentions of bringing out a team. Farm Adviser S. G. Turner of Livingston county had 25 players and fans at a recent meeting in Pontiac where it was decided to proceed in organizing a Farm Bureau team.

Iroquois county has joined the League and work has started toward organizing teams in Kankakee, Montgomery, and Macoupin counties.

The Agricultural Situation

(Continued from page 12)

fellow puts another one over there. That waste has been taken out of the Twin Cities; it has been going on for eight or nine years. It is not an experiment; it has been done long enough so that we know it can be done.

What are we doing about it? I don't know whether this Farm Board is going to solve this problem, gentlemen. I hope somebody solves the problem because, as I intimated a moment ago, if this board or some other agency doesn't make real progress towards its solution you are going to face it again and in a more drastic form.

We are trying to bring together these commodity groups for centralized action; trying to get for farmers a better regulation, a more orderly marketing of their product, and cut out this fifty and sixty per cent fluctuation up and down in the price, from day to day, from month to month, if we can. We hope that we are going to make some progress along that line. It looks encouraging at the moment. Something is being done.

There is one thing you can rest assured of—the American farmer is never going to become a peasant or a serf. Don't complain because he has a farm bloc. Don't criticize because he tries to obtain through the ballot that which a few centuries ago people obtained with a bullet. Balloting is the better method. Give him credit for going at it in the right way. Give him your encouragement, give him your support, your help. You are all interested—you are interested from the standpoint of citizens, you are interested from the standpoint of the future, of the government itself, as to whether he is going to survive and continue along sound, economic, sane lines or whether

Why Club Members Should Market Their Livestock Co-operatively

By GAILLORD WAGNER, *Pontiac, Livingston County, Ill.,*
Sweepstakes Prize Essay In State-wide Contest

THE co-operative marketing of livestock by 4-H Club members is necessary for many reasons.

Before our local producers' association was organized we had several stock buyers in our locality who bought our stock in a good many cases at prices below what they were actually worth to the producer. We sold this way simply because there was no other means of selling. The buyer would purchase the good along with the poor at lump prices. The prices paid were so low in many cases, it worked hardship on the producer. Hog growers were not acquainted with the kind and quality of livestock the market demanded.

The First Step

After our local association was organized, a manager was selected, with whom we listed the stock we wished to sell. As soon as a carload was ready for shipment, the manager notified the owners and they brought the stock to the local yards where it is loaded and shipped to the terminal market. After the stock is sold at the terminal market, the proceeds, with expenses deducted, are sent to the manager who remits the correct amounts to each of the owners.

We have not only done away with the local buyer, who was making large returns at our expense, but we also learned the kind of stock the market demands. If we have good stock to market that is the proper weight and quality or if we have a poor grade, each is sold in a class according to weight and quality and a fair market value less actual marketing expense is realized.

At the Terminal

The next important step in our co-operative marketing is a co-operative selling agency at the terminal market. This organization handles selling at cost and full profits are realized by the producer.

At the different terminal markets over the country there are numerous commission or old line selling agencies that handle livestock on a commission basis and their profits go to the owners of the firms. These commission firms greatly outnumber the actual buyers of our livestock which creates a situation that is not to the best interests of the producer. Instead of the buyer going out and bidding for his stock, he makes the rounds and finds out what the numerous agencies have to offer and of course buys from those who will sell the cheapest, which creates a competitive selling rather than a competitive buying market.

Too Many Sellers

In other words the bargaining power is in the hands of the buyer instead of the seller. If all livestock would be handled through the co-operative selling agency, the buyers would greatly outnumber the selling agencies and would naturally create a competitive buying system that would mean higher bidding on our livestock.

Every buyer knows, when he goes to the yards, what the firm he represents wants for that day and if there is only one agency selling that particular kind of stock, he is going to buy instead of bargaining with other commission firms. He knows also that if there is but one selling agency, he will have competition for that stock and will have to bid up to get it.

Gaillord Wagner

This method would also bring a closer relationship between the producer and the consumer in that the producer would know just what the consumer demanded and raise stock accordingly.

It is the duty of every 4-H Club member to market his livestock through the co-operative system. We clubbers of today are the stock producers of tomorrow. This system has been brought about by the efforts of our fathers and we should fall in line with them and help protect the co-operate system which is now well on its way to success.

We learn co-operation through our activities in 4-H Club work. Thus we can carry our training over into co-operative marketing and yet at the same time derive a further profit thereby.

THE essay by Gaillord Wagner published herewith was awarded first prize in the northern Illinois division, and grand sweepstakes prize in the state-wide essay contest conducted by the livestock marketing department of the Illinois Agricultural Association.

The county Farm Bureaus supervised the contest locally and submitted their first prize essays in the state contest. Gaillord will be presented with a $50 gold watch. First prize winners in the central and southern Illinois districts will be awarded gold watches valued at $25. Second prizes of $10 each will be awarded in each district.

As we go to press the judges are at work deciding the other prize winners among the many essays submitted.

The Agricultural Situation

(Continued from page 13)

we are looking forward to more drastic efforts being made purely of distress. The distress is real.

The preceding speaker spoke about this $2,000 income of the workers. There are 6,000,000 people raising cotton in this country whose average family income in cash is less than $300 per year. That can easily be proven. That income of $2,000 a year would be an immense fortune to any one of them. It doesn't sound very high or very large in these days, but compare it with the poor tillers who are raising the cotton that makes the cloth you wear; family after family working for a combined cash income of less than $300 a year.

That sort of thing must pass. If you can be more broad-gauged in dealing with the labor question, see merit in the laboring man in having money so he can buy more, why not apply it to agriculture? Somehow it will be done. I don't know how much of a part we may have in bringing it about. Some one is going to do it in the not distant future. Gentlemen, I thank you.

STOLEN!

HELP WAGNER FIND HIS CAR

TO the right appear the details of a $100 reward offered for the arrest and conviction of the thief and the return of the car stolen from Charles Wagner of Ogden, Champaign county, Illinois, a policyholder in the ILLINOIS AGRICULTURAL MUTUAL INSURANCE COMPANY.

MR. WAGNER'S policy covers public liability and property damage. He did not have fire and theft insurance. This is Mr. Wagner's misfortune. While we hold that public liability and property damage insurance are perhaps more essential than any other kinds, yet this case reveals the advisability of having full coverage protection on your automobile.

Six Month's Insurance $1.05

THE last six months' assessment for fire, theft, and windstorm insurance was only $1.05. Can you afford not to have your car insured in your Own Company At Cost?

THE ILLINOIS AGRICULTURAL MUTUAL settles its claims promptly and offers highest security. Many of our members more than save their Farm Bureau dues annually on this one service alone. Investigate.

(Mail the coupon for full information.)

Illinois Agricultural Mutual Ins. Co.,
608 South Dearborn St., Chicago.

Please send me information about your policies, also costs of higher limits on public liability insurance.

Name.....

Address.....

County.....

Make of Car.....

$100 Reward

$75 will be paid for arrest and conviction of thief.

$25 will be paid for return of car to owner (or authentic information.)

Description of Car

Four-door, Model A, Ford—town sedan, 1929 model.

Engine Number—2386873.

Illinois 1930 License (number unknown).

Equipped with full length bumper at rear, no rack, trunk, tire or tire carrier on rear. Body by Murray, spare tire in left front fender well.

Color of body is a Kewanee green (gray-green), black wire wheels.

Right front fender had been dented and straightened.

Upholstering was plush, had a grease spot on front cushion.

Car, when stolen, had 2200 miles on speedometer.

Equipped with Goodyear tires.

Commission Gets Facts On St. Louis Milk Case

Consumers Organize To Find Out Who Gets Milk Profits

A FACT-FINDING commission of consumers to investigate and make public the facts on the milk situation in the St. Louis territory is now at work. The commission grew out of a recent meeting attended by Sanitary Milk Producers' Association representatives at St. Louis.

Approximately 25 producers, farm advisers, and representatives of women's civic organizations were present. Dean Isidor Loeb of the School of Business and Public Administration of Washington University presided. Representatives of the milk distributing companies were invited, but apparently ignored the invitation.

Mrs. Comstock Chairman

The consumers' commission consists of authorized representatives of both women and men's civic organizations. Mrs. James B. Comstock, chairman of the Living Costs Committee of the League of Women Voters, assisted in organizing the commission. Mrs. F. H. Littlefield, president of the Eighth District of the Federation of Women's Clubs of Missouri, and Mrs. Virgil Loeb, chairman of the Efficiency in Government Committee of the League of Women Voters, also were active.

The Sanitary Milk Producers' Association, with a membership of 4,000 milk producers in 13 Illinois counties and four counties in Missouri, has pledged its support in making facts and information about milk production and prices available to the investigators.

In proposing the creation of a commission, E. W. Tiedeman of Belleville, Ill., secretary of the association, explained that the dairy industry is suffering from overproduction and underconsumption to such an extent that many producers are forced to sell their products at less than cost at the present time. The average price received by the producer for milk is 3.5 cents a quart, he declared.

These conditions, Tiedeman said, make it impossible for the better class of producers to stay in business and maintain the proper sanitary standards, and has forced many farmers to put their wives and small children to work in order to cut down operating costs.

"We believe the consumer is interested in obtaining milk produced under the proper

NOTICE

Election of Delegates

Illinois Agricultural Association

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the months of May and June, 1930, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureaus and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of Association, including the election of officers and directors as provided for in the by-laws of the Association.

During the month of May such meetings will be conducted in the following counties: **Massac.**

During the month of June, such meetings will be conducted in the following counties: **Ogle.**

Signed

G. E. METZGER, Secretary.

Seeks Clarification Of Marketing Plan

Await Reply to Questions Submitted to Farmers National Grain Corporation

MOVING conservatively toward its goal of erecting a safe but effective co-operative grain marketing structure within the state, the Illinois Grain Corporation recently submitted a list of nineteen questions to the Farmers National Grain Corporation for reply.

Pending an answer to the questionnaire designed to clarify misunderstandings existing among grain producers out in the field, the Illinois Grain Corporation filed its application for membership in the Farmers National.

In the meantime organization work among the grain producers has been held up. The officers and directors of the I. G. C. feel keenly their responsibility, realizing that in the Illinois Grain Corporation rests the hope and confidence of thousands of growers for a permanent state-wide marketing agency.

Need More Information

When representatives of the I. G. C. go before local co-operative elevator directors to explain the state and national plan of marketing, it is felt that they must be armed with more information regarding the detailed plans and policies of the Farmers National than have yet been divulged.

It became apparent in the solicitation work which began several weeks ago and which resulted in a number of elevators filing application for membership in the state-wide regional, that those anxious to affiliate with the Illinois Grain Corporation did not know the thought of the National Grain Corporation directors on many points of mutual interest.

The nineteen questions submitted to the Farmers National on Mar. 24 in which general interest has been expressed by prominent grain producers throughout Illinois are as follows:

1. What will be the administrative and

(Continued on page 4)

Commission Gets Facts

(Continued from page 3)

conditions, and is fair minded enough to want the producer to obtain a fair price for his product," Tiedeman continued. "The inevitable result of the present situation will be to force the farmer who attempts to maintain proper standards out of business, which will, in the long run, mean poorer milk for the consumer."

Would Avoid Milk War

"The producers feel that an impartial investigation will benefit all three sides of the triangle; the producer, the distributor and the consumer," he declared. "We are not proposing any radical movement, we do not want a milk war any more than anyone else does, and we are taking this step in the hope of avoiding a milk war."

The plan was indorsed by B. W. Tillman, farm adviser for St. Clair county, Ill.; O. W. Meyer, county agent for St. Louis county, Mo. S. H. Anderson, executive secretary of the National Dairy Show, and A. D. Lynch, director of dairy marketing for the Illinois Agricultural Association, in brief talks.

The Farm Bureaus and Illinois Agricultural Association organized and are back of the Sanitary Milk Producers determined to see that dairymen in the St. Louis district get a square deal.

The second meeting of the Fact Finding Commission investigating the milk situation at St. Louis was held at the Statler Hotel in that city on April 8.

Mrs. Wilbur Fribley of Chicago, who was the active representative of the Illinois Federation of Women's Clubs and a member of the Fact Finding Commission that made a report on the Chicago milk situation, was the guest speaker.

2. What will be the possible sources of income of a regional association?
3. What will be the obligation to deliver grain on the part of a regional association of its members to the national association?
4. Will it be necessary or advisable for a regional to maintain a sales organization?
5. Will the regional be obligated to guarantee all loans made by the Federal Farm Board through the national corporation to local country elevators which are members of such regional association?
6. If loans are handled and guaranteed by a regional for its member what interest rate spread will be allowed the regional?
7. When will the Farmers National Grain Corporation be prepared to handle cash operative functions of a regional association?
8. Should the member of a regional be obligated to deliver all grain for market to the regional?
9. Does the 50 per cent limitation of non-member grain obtain as to the aggregate of grain handled by local members or does the regional, if all its members are Capper-Volstead associations, have the right to handle a 50 per cent additional amount of grain from non-member elevators?
10. Can the capital stock of a local co-operative elevator, otherwise a Capper-Volstead association, be held by the regional grain corporation, other than such capital stock as runs to producer members?
11. Can the capital stock of a regional grain corporation, otherwise a Capper-Volstead association, be held by another Capper-Volstead association, except such stock as runs to the Capper-Volstead country elevator member of the regional?
12. What percentage of the voting stock shares of a member local elevator, if any, can be held by non-producers other than Capper-Volstead associations?
13. What percentage of the voting shares of stock of a regional can be held by non-producers other than Capper-Volstead associations?
14. What is a *producer* as specified in the Capper-Volstead Act and in the Agricultural Marketing Act?
15. If a country elevator is organized under a co-operative act that fixes the proprietary interest of its reserve or surplus in the stockholders as stockholders on a per capita basis, must such reserve or surplus be converted into a stock holding if a dividend return is to be allowed on such reserve and surplus?
16. Is it proposed to have a written contract between the national and regional, and if so, what will be the substance of such agreement?
17. Should there be a written contract between the regional and its members, and if so, what should be the substance of such contract?
18. Will the obligations for stock subscription by a member in the National be uniform with all other members and will there be any adjustments of required holdings as volume of grain handled changes, and if not, what plan is in hand to give those patronizing the national equitable representation?
19. Will it be sufficient for the purposes of the Farmers National Grain Corporation and with safety to the local elevator company, for a local elevator company to amend its by-laws limiting dividends to eight per centum per annum without amending the charter?

Real Co-operative Marketing Means Close Tieup Between Local and Terminal Organizations

THE prodigious efforts being made to propagandize the state with destructively critical literature on the Illinois Agricultural Association and the Illinois Grain Corporation only retard real co-operative marketing development. Back of the picture, of course, we see the subtle hand of the grain trade making a stand against an effective co-operative marketing program. Involved in the issue are two plans of co-operative marketing, namely, the voluntary and contract plans. It is to the interest of the enemies of co-operative marketing to fight a close tieup between local and terminal co-operative marketing organizations.

The Illinois Agricultural Association sees the best opportunity for enhancement of grain prices through the formation of a strong cooperative grain marketing development made effective through definite contractural relationships. As a result the agents of the old line interests, whose influence has been dominant in too many farmers' elevators, fight any plan that will weaken their grip on the local elevators.

What Is I. A. A.?

The Illinois Agricultural Association is still considered a "foreigner" by some folks whose interests are purely selfish. There are those who lack the ability to understand that 55,000 to 60,000 Illinois farmers can speak through a single organization.

They forget that the Illinois Agricultural Association itself can qualify as a Capper-Volstead association and in that respect is the largest single co-operative organization of its kind in the State of Illinois. So why all this criticism about the I. A. A.—60,000 farmers—taking an interest in grain marketing?

Here Are Reasons

The I. A. A. qualifies as a Capper-Volstead association because:

1. A Capper-Volstead association is composed of persons engaged in the production of agricultural products as farmers. A person to be qualified to become a member of the Illinois Agricultural Association must be engaged in the production of agricultural products.
2. A Capper-Volstead association may be organized with or without capital stock. The Illinois Agricultural Association is organized without capital stock, being organized under the membership act of Illinois for the purpose of promoting agriculture.
3. A Capper-Volstead association must be set up to market agricultural products, either directly or through agencies. The I. A. A. is authorized under its charter to engage either directly or indirectly in

Knox County Wins Publicity Trophy

LaSalle, Marshall-Putnam Close Second and Third. Iroquois and Monroe Get Honorable Mention

KNOX county was awarded first place for the third consecutive year in the county Farm Bureau publicity contest conducted by the publicity department of the I. A. A. LaSalle county placed second, and Marshall-Putnam third. Knox county will retain the cup permanently as a result of its third victory. The trophy was donated by Sam Thompson, former president of the Illinois Agricultural Association, over four years ago. Marshall-Putnam won it the first year, and Knox county the three years following.

Follow Score Card

Following the score card which gave 40 points for the official organ, 40 for news in papers of county, 10 for state news, and 10 for special publicity features, the committee of judges gave Knox a score of 88, LaSalle 84, and Marshall-Putnam 83.

Each farm adviser was asked to designate the five best issues of the Farm Bureau paper, the five best stories published by a newspaper or farm paper, and the five best pictures illustrating Farm Bureau projects.

The Farm Bureaus in Iroquois and Monroe counties received honorable mention for their good publicity work and co-operation with the local newspapers. C. A. Hughes of Monroe county was complimented for his success in making his mimeographed official publication interesting and readable. Hughes has been co-operating with radio station KMOX in broadcasting a farm program. C. E. Johnson, Iroquois county farm adviser, has made fine progress during the past year in developing Farm Bureau publicity.

The farm advisers in the three counties standing highest are A. R. Kemp, Knox county; C. E. Gates, LaSalle county; and R. J. Laible, Marshall-Putnam county.

The contest revealed that the counties having the most effective publicity projects and where the farm advisers co-operate with the local newspapers, have the largest memberships.

"We feel it is a real honor to win a trophy of this kind," writes A. R. Kemp, Knox county farm adviser. "I feel that we are indeed fortunate in view of the fact that there are so many fine Farm Bureau publications in the state, while many of our farm advisers have had special training in newspaper work.

Use Every Means

"The publicity service of the Knox County Farm Bureau has been developed with the idea of using every available means of reaching the farmer and the public at large, in telling the Farm Bureau story News releases have been given to the daily and weekly newspapers, and to farm papers

I. A. A. Trophies

THE three watches shown above were presented by the Illinois Agricultural Association in the boys' and girls' essay contest on the subject, "Why Club Members Should Market Their Livestock Co-operatively." The $50 watch shown at the top was awarded Gaillard Wagner of Livingston county in the northern Illinois district, who won the state sweepstakes prize.

The lower watch was awarded Alice Mast of Adams county, winner in the central section, and the middle watch to Louis Bierman of Effingham county, winner in the southern district.

Second prizes of $10 each were awarded to Robert Bear of Macon county, Arthur Noe of Woodford county, and Ruth Fitzgerrel of Pulaski county. Winning essays were submitted from twenty counties. Much interest in this contest was evidenced by 4-H club members throughout the state.

The judges of the contest were J. D. Harper, editor of the National Livestock Producer and George Thiem, Director of Information for the Illinois Agricultural Association.

"Watch Ball," Says G. Huff

A BASEBALL meeting was held in the Champaign County Farm Bureau office on Friday, March 28, at which G. Huff, Director of Athletics at the University of Illinois, told the boys to "watch the ball." "He made his whole talk upon this one point, it being the most fundamental thing in baseball," says C. C. Burns, farm adviser.

Meet At Freeport

FARM advisers and Farm Bureau representatives from counties in the 13th congressional district met at Freeport on Apr. 5 and organized a baseball division of four teams to compete in the Illinois Farm Bureau Baseball League.

Secretary George Thiem of the State League attended the meeting to explain the rules and regulations governing membership and play.

Farm Bureau nines from Stephenson, Lee, Carroll and Jo Daviess counties will enter the competition. Whiteside and Ogle counties it is hoped will come in later.

Games Scheduled

A tentative schedule of games was drawn up to begin an Saturday, May 24th. A trophy will be awarded the division champions at the close of the season. Additional games will be arranged at the completion of the tentative schedule.

Among the farm advisers who attended the meeting were, V. J. Banter of Freeport, H. R. Brunnemeyer of Elizabeth, and M. P. Roske of Mt. Garroll. Kelsye Baylor of Amboy represented Lee county. Among the team managers present were, Frank Bonjour of Jo Daviess and Martin Kramer and Ray Folgate of Stephenson county.

The tentative schedule is as follows:

Saturday, May 24
Lee at Carroll—(Lanark).
Jo Daviess at Stephenson—(Freeport).

Friday, May 30—Decoration Day
Stephenson at Lee—(Amboy).
Carroll at Jo Daviess (Woodbine).

Saturday, June 7
Lee at Jo Daviess—(Woodbine).
Carroll at Stephenson—(Freeport).

Saturday, June 14
Carroll at Lee—(Amboy).
Stephenson at Jo Daviess—(Woodbine).

Saturday, June 28
Lee at Stephenson—(Freeport).
Jo Daviess at Carroll—(Shannon).

Friday, July 4
Jo Daviess at Lee—(Amboy).
Stephenson at Carroll—(Lanark).

The Fulton County Farm Bureau applied for membership in the State Farm Bureau League on April 7 and was accepted.

Fulton will probably be placed in division II with Henry, Stark, and Knox counties. This will make necessary further changes in other divisions.

Commission Gets Facts

(Continued from page 3)

conditions, and is fair minded enough to want the producer to obtain a fair price for his product," Tiedeman continued. "The inevitable result of the present situation will be to force the farmer who attempts to maintain proper standards out of business, which will, in the long run, mean poorer milk for the consumer."

Would Avoid Milk War

"The producers feel that an impartial investigation will benefit all three sides of the triangle; the producer, the distributor and the consumer," he declared. "We are not proposing any radical movement, we do not want a milk war any more than anyone else does, and we are taking this step in the hope of avoiding a milk war."

The plan was indorsed by B. W. Tillman, farm adviser for St. Clair county, Ill.; O. W. Meyer, county agent for St. Louis county, Mo. S. H. Anderson, executive secretary of the National Dairy Show, and A. D. Lynch, director of dairy marketing for the Illinois Agricultural Association, in brief talks.

The Farm Bureaus and Illinois Agricultural Association organized and are back of the Sanitary Milk Producers determined to see that dairymen in the St. Louis district get a square deal.

The Farm Vote

RETURNS from the primaries on Apr. 8 reveal that Illinois farmers again voted to return to the state legislature those candidates whose past records showed them worthy of farm support.

We are pleased to note that a large majority of the candidates who voted for farmers' interests in the 56th general assembly were nominated by their rural constituents.

In several senatorial districts the issue was clearly drawn between candidates who voted for and against constructive revenue legislation designed to relieve farms and homes of part of their heavy tax burden. The votes cast in the state legislature on several important measures figured prominently in local campaigns. The fact that the candidate for the senate in one agricultural district who supported such legislation received the republican nomination over his opponent who worked against it, indicates that farmers are giving more and more attention to legislative records.

It is only by intelligent voting that we will secure adequate representation in law-making bodies.

Legge Stays On

MR. LEGGE'S consent to continue as chairman of the Federal Farm Board for another year assures it leadership by a man of marked ability in whom farmers have confidence.

Chairman Legge's sincerity of purpose and desire to do everything possible within the limitations of the Marketing Act for the stabilization of agriculture at satisfactory price levels, is without question. He made a sacrifice in taking his present job which is by far the most difficult he ever tackled. It will yield him small thanks and much criticism if history runs true to form. He can depend on being damned if he does, and cussed if he doesn't. The Board's first year's experience offers proof enough for this statement. The future may accentuate it.

The Game Broncho Buster

Courtesy Chicago Daily News

Mussolini Aids Farming

THE Farm Board's campaign of reduced production in America is in contrast to the crusade being waged by Mussolini in Italy, the Soviets in Russia, the Germans, and in fact most European countries for increased production. Our trans-Atlantic neighbors are heavily in debt. They propose to get out by consuming home-grown rations; by buying little and selling much. Thus, food that once was supplied to European consumers by American farmers, is now produced at home.

Mussolini is enforcing a 20 year old law which proclaims that property implies duties and that if owners do not make use of their landed possessions "so that these possessions shall contribute in promoting national prosperity the state will intervene." Run down farms are being involuntarily turned over to administrators. Read about it on page 14.

OUR READERS' FORUM

Likes The Record

Editor, I. A. A. RECORD:

"Permit me to congratulate you on the March 'I. A. A. RECORD.' The issue was interesting from beginning to end.

"My humble opinion is that you had a number of articles remarkably well written. The colors on the cover are very attractive.

"I think the present publication is indeed a credit to our state organization and many are the comments in Logan county on the recent issues. Keep up the good work."

L. R. Welk, Lincoln, Logan County, Ill.

A Word for the Managers

Editor, ILL. AGRIC. ASSN. RECORD:

I READ the letter of Earl Ericson of Knox County, published in the March issue of the I. A. A. RECORD with much interest. As far as the general trend of things is concerned, I can vouch for everything he said about the annual meeting of our state Farmers' Grain Dealers' Association at Peoria.

I hope no one will get the impression from this account of the meeting that all our farmers' elevator managers are like the ones he talked about who try to run the whole show and play into the hands of the grain commission men opposing the best interests of their farmer employers.

I have become acquainted with a great many managers while attending these meetings, and I believe you will find the majority of them fully in sympathy with real co-operative marketing and ready to see the program carried through to the terminal markets. I know that our elevator manager here at Beason is one hundred per cent loyal, and is always ready to do his best for the interests of the farmer patrons and stockholders.

Majority O. K.

There is considerable talk going about the state to the effect that the plan of marketing as laid down by the Ill. Grain Corp. is to go forward to the exclusion of the elevator manager. In fact, there are those who would try to prejudice the elevator managers against the Farm Bureau and Illinois Agricultural Association. I believe that farmer elevator managers in this state whose interests lie more closely to the grain trade than they do to the farmers of their own community are in the minority. And because a few elevator managers have sold out to the grain commission men, the majority may suffer for the shortcomings of the minority.

In any system of marketing an able and loyal manager is needed who has the interests of the producer at heart. Even though the grain trade interests would have all the managers believe to the contrary, the directors and members of the Illinois Grain Corporation have a high regard for managers as a whole and know that a great many of them are outstanding men and have the best interests of their communities at heart.

Our Own Fault

Mr. Ericson made a good point when he urged farmers who are patrons and stockholders of farmers' elevators to take more interest in their business and see that a real grain marketing program is developed. The grain trade has stolen a march on us and a lot of commission men are closer to the manager and the business than the elevator owners are themselves. We'll never get anywhere until we do take a more active interest in the marketing end. That has been the trouble with us. We've kept our noses to the grindstone producing food at prices set by the other fellow while he carries off the profit. If we can't succeed now in getting organized and having something to say about the price of our product, may the Almighty help us.

(Signed) Chas. Schmitt,
Beason, Logan County, Ill.

(Mr. Schmitt is president of the Beason-Skelton Elevator Co.)

75 to 70

Editor, I. A. A. RECORD:

SEVENTY-FIVE to seventy was the result of a hot contest at the annual meeting of the Farmers' Grain Dealers Association at Peoria the 11th, 12th and 13th of February and the vote that placed a slate of officers in charge of the Association that is friendly to the grain trade.

For many years, we understand, it has been customary for the election of officers to be held over to the morning of the third day after most of the real farmers have gone home, leaving the control in the hands of a few elevator managers and grain commission men. At no time before had credentials been recognized.

All Real Producers

But at the last session real farmers, directors and presidents of farmers' elevators thought it was high time that the board of directors who control the organization be men whose interests lie with true co-operative methods. In the district caucuses on the afternoon of the first day a nominating committee was elected representing the farmers' best interests. They submitted a slate of men for directors and officers, every one of whom was a president or director of his local elevator.

A minority ticket was submitted by an elevator manager and seconded by a manager. Through clever political work involving questionable tactics the enemies of co-operative marketing managed to get enough so-called credentials in their hands to swing the vote 75-70 in favor of the grain trade ticket. We know of no other organization that allows its paid employees to dictate the policies of the organization.

Votes Four Times

One hostile manager voted four times. They reelected a manager by this method who is said to hold a seat on the Chicago Board of Trade and seldom has a bushel from his elevators gone through the channels of the Rural Grain Company, the farmers' own commission firm.

Though real farmers lost their slate they forced a show-down on the condition of management of the Illinois Farmers' Grain Dealers Association. We are told that it has been customary in past years for commission men to pay expenses of many of the voting delegates.

The Real Issue

Since seventy real farmers' elevators voiced the fact that they were ready to help the farmer get control of his grain marketing facilities, there will be some effective work done in 1930. The I. A. A. plan, (Illinois Grain Corporation) which has been endorsed by the Federal Farm Board, is going ahead rapidly. A board of directors has been elected and policies adopted.

Even though there seemed to be quite a disturbance at the Peoria meeting on "slates," the real issue simmered down to the question as to whether or not elevators should contract their grain to the Farmers' National Grain Corporation, or whether they would have the option to sell to them or other commission firms.

G. L. Potter, Pres.,
Livingston County (Ill.) Farm Bureau.

(Mr. Potter is a director in the Rural Grain Co. and was formerly on the board of directors of the Farmers Grain Dealers Association of Illinois.)

For Collective Farming

Editor, I. A. A. RECORD:

". . . . . Mr. Legge compares the 'buying by means of the Sears Roebuck catalog and the chain store' and says that the farmer is not at a greater disadvantage than the city man. Agriculture can be divided into the farmer's home and the farmer's business, just as manufacturing can be divided up into the manufacturer's home and his business. Mr. Legge has confused the buying for the home and that for the business. I do not think that the superintendent of the shipping department of the International Harvester Company buys the supplies needed for his department either thru chain stores or the mail order catalog, even though he may buy a suit of clothes or his groceries from one of these organizations. I think the I. A. A. with

their Farm Supply Company, by cooperative buying of serum, oil, etc., has demonstrated that the farmer has been handicapped in his buying. We need to buy *more* of our supplies thru some such organization.

"Another angle about our buying. I read the other day that there are 561 farm magazines published in the United States, a tremendous industry involving millions of dollars. These magazines have repeatedly admitted that the farmer's subscription barely pays the postage; that their money is made from the advertising. Any reasonable person will agree that the seller puts his expenses, including advertising, onto the price that the consumer pays. The only conclusion that we can come to then, is that agriculture is carrying this millions of dollars spent annually in the advertising of farm commodities. Cooperative production, which includes cooperative buying would eliminate much of this overhead.

"Mr. Legge says that cooperative production is very repugnant to the nation's ideals, to the homestead and to the farmer. I ask why? Just what is the difference between the psychology of the farmers and the city men; between agriculture and other industries, between marketing and production, that cooperation in the one branch is 'repugnant,' when not in the other? My work is naturally with farmers and it is *very* seldom that I hear the farmer himself use the word 'independence.' Tell a healthy man often enough that he looks sick and he will eventually feel sick. The phrase 'independence of the farmer' is continually used by the farm press, and I am going to believe it is clever propaganda designed to make the farmer want to remain independent, for it is to the advantage of the farm press that the farmer remain independent.

"The same logic that Mr. Legge uses in showing why a marketing cooperative run by a bunch of untrained farmers can do better in marketing their crops than the old time machinery, that has been set up, will apply to the cooperative production of our crops. We can just as easily say that the individual farmer has no control over the production of his crop whereas in collective production we would have collective supervision. . . . . ."

Carl L. Anderson,
Putnam County, Ill.

I. A. A. Qualifies

(Continued from page 4)

the marketing of agricultural products. (See amended articles of association, Par. 2, Sub-section (f). See also By-laws, Article V, Sec. 1).

4. A Capper-Volstead association must be operated for the mutual benefit of its members. The I. A. A. is organized for the mutual benefit of its members. (See Par. 2 of purpose and power clause of articles of association.)
5. A Capper-Volstead association must limit the voting power to one member one-vote, or the capital used in marketing shall not be entitled to over eight per cent per annum return. The by-laws of the I. A. A. provide that each member shall have one vote and no more. The by-laws also provide that any co-operative marketing activity, either in the name of the association or through the agency, shall not allow a dividend in excess of eight per cent per annum to be paid on stock or membership capital. (See Article V, by-laws.)

After pondering this information is there any doubt that those who oppose so strongly the co-operative grain marketing activities of the Illinois Agricultural Association secretly feel that if given half a chance it will advance co-operative marketing for the best interests of the producer.

Power of Eminent Domain Explained

Quasey Tells WLS Audience Facts About Public Utilities

DEVELOPMENT in the transmission of electricity has brought new problems to land owners," L. J. Quasey, director of transportation for the I. A. A., told the WLS radio audience during the noon hour on April 8. "This development has given rise to many questions, the foremost of which is: by what right can the power companies build steel tower transmission lines over private lands without the consent of the land owner?

"The answer to this is, the power of eminent domain. What is this power? It is the power to take private property for public use. This power is nearly as old as organized government. It was originally exercised only by the government for government purposes, but later the authority was granted railroads and now power and utility companies because of their public interest.

Must Compensate

"We find there is a restriction on this power, however. This restriction is found in both the fifth and 14th amendments of the United States Constitution, and in Section 13, Article 2 of our State Constitution which provides that private property shall not be taken or damaged for public use without just compensation. Such compensation when not made by the State shall be ascertained by jury that shall be prescribed by law.

"Power companies are classed as public utilities and are subject to the jurisdiction of the Illinois Commerce Commission. The Illinois Commerce Commission has the power to determine whether or not extensions or improvements proposed by public utilities are a public convenience or necessity. If they are, then the Commission may confer upon a public utility the right to exercise the power of eminent domain where the land owners and the public utility have failed to reach an agreement. This power is exercised through condemnation proceedings and the question of damages is determined by jury.

Organize Committees

"Land owners who are confronted with problems of this kind should endeavor to inform themselves not only of their own rights but the rights of the power companies as well, so they may be in position to act intelligently. This can best be accomplished through representative committees.

"Power companies have in recent years been willing to negotiate with land owners rather than arbitrarily institute condemnation proceedings. Negotiations of land owners' committees and public utilities representatives have been generally successful. There is no other course of action that land owners can undertake that will meet with this problem more successfully than group action.

"The Illinois Agricultural Association has in the past been giving assistance to local Farm Bureau committees on matters of this kind and is working with a number of such committees at the present time."

Knox County Wins

(Continued from page 5)

such as the Daily Drovers Journal, Prairie Farmer, Illinois Farmer, I. A. A. RECORD, and Bureau Farmer.

"We have found our daily newspaper requires different types of stories than the weeklies. The daily prefers news items pertaining to events that demand immediate telling, and subject matter that has a bearing upon commercial and industrial activities. The excellent support given us we can at least attribute partially to having our stories carefully prepared, and ready for the reporter when he stops at the office early in the morning. We frequently have requests for special news from the editor and other reporters.

Write Some Heads

"In glancing through our releases you will note the absence of heads on all stories to the daily papers, as we have found from experience that the daily will properly edit all agricultural news releases.

"The weekly newspapers have also given us splendid co-operation, but we find that they prefer the shorter articles in which some local interest is used in connection with the release. We usually prepare heads for all releases that go to these papers, as we find quite frequently that they will just put a head on "Farm Bureau News," if a head has not already been prepared. Mrs. Ruth Carlson, our former office secretary deserves credit for making up an attractive exhibit."

Tax Commission Would Improve Revenue Laws

Offers 27 Recommendations In Tenth Annual Report

TWENTY-SEVEN specific recommendations for changes in the tax laws of Illinois, as well as proposals for the complete revision of the revenue article of the state constitution, are contained in the tenth annual report of the Illinois State Tax Commission, recently transmitted to the Governor and General Assembly by Chairman William H. Malone.

Wm. H. Malone

The report is a departure from the earlier reports of the Commission in that it contains an extended discussion of Illinois tax problems and recommendations for revenue legislation. The statistical part of the report covers the assessment year 1928.

Among the outstanding recommendations emphasized in the report are the following:

Want County Assessors

1. That property assessments be placed on an actual basis of full-value by 1931.

2. That the township assessor system be replaced by a county assessment system, with a full-time supervisor in charge in each county, working with the advice of five district supervisors appointed by the Tax Commission.

3. That the Commission be given broader powers of equalization, which would enable it to raise or lower the assessed valuations in any taxing district of any class of property or of any taxpayer.

4. That state tax administration in Illinois be consolidated in a single department.

5. That the Commission be empowered to substitute its own appointees for local assessors in making reassessments, where it judges necessary; and that it have the further power to compel local governments to adjust their tax rates to changes in valuations resulting from reassessments, in order that the revaluations will not affect the amount of revenue collected.

6. That the general property tax in its present form "has outlived its usefulness in Illinois" and "must be abolished," and that, to this end, a complete revision of the revenue provisions of the constitution must be effected at once. Broad discretion as to tax policies should be lodged in the General Assembly, the Commission recommends.

Malone Comments

Commenting upon the recommendations embodied in the report, Chairman Malone said: "Our purpose is to overhaul and modernize the antique taxing machinery of Illinois, place the assessment of property on a scientific and equitable basis, and wipe out tax fixing, favoritism, dishonesty, and inequalities wherever they may exist in the state.

"The Commission has done much during recent years to give relief to those who carried more than their just share of the tax burden. It has ordered several reassessments where the facts justified such action.

"Now we propose to get at the bottom of the assessment evil and root out the causes for inequalities. I am convinced we can do this only by strengthening the taxing system all along the line.

Need Uniformity

"By the assessment of property at full value we will eliminate confusion, and attending opportunities for tax evasion. Tax rates will be reduced so the levies will remain at their present amounts. This will safeguard the property owner against higher taxes.

"Few people complain about paying a fair tax. They do bitterly oppose paying more than their share of the burden. Real estate is paying more than its quota. It must have relief. Uniformity in assessments is the first step in the right direction.

"Our present methods of obtaining assessments are too haphazard. Large property owners invariably profit under such a system because they know how to obtain and can pay for privileges and low assessments. But the little taxpayer gets the worst of it. He must pay to the hilt and in addition stand part of his tax dodging neighbor's load. The recommendations outlined in the Commission's report will go far toward the correction of evils which have existed too long."

Statistical Data

The Commission would set up a statistical department to investigate assessed valuations, check up on complaints, and find out all pertinent facts necessary for the intelligent action of the Tax Commission in its various duties.

The preparation of tax maps for each taxing district setting forth the values of lands in each section so all may see them, together with a manual for each local assessor are part of the proposed system.

The commission would make all its equalizations on the basis of "sales data" and for this purpose would require all recorders of deeds to file information with the tax commission concerning every real estate transfer in their jurisdiction.

Gives Credit

The letter of transmittal to the Governor gives credit to John C. Watson of the Illinois Agricultural Association and to farm advisers, V. J. Banter of Stephenson county, E. E. Glick, Franklin county, H. P. Kelley, Kane county, C. T. Kibler, Jersey county, and J. W. Whisenand, Peoria county for assistance in the preparation of the report. The latter contains many tables on valuations prepared by John C. Watson.

Rock Island Dairymen Tour To Peoria Market

Milk Dealers Recommend Co-operative Plan To Tri-City Market

A COMMITTEE of 25 men representing the Quality Milk Association, the new collective bargaining association at the Moline-Rock Island-Davenport market drove in five cars to Peoria recently to get first-hand information about the operation of the Illinois Milk Producers Association.

Farm Adviser John Spencer of Rock Island county, County Agent Robert Combs of Scott county, Iowa, and A. D. Lynch of the I. A. A. accompanied the delegation.

Roszell Likes Plan

Lyle Roszell, president of the J. D. Roszell Company, one of the prominent Peoria milk distributors, talked briefly to the visiting dairymen.

"We wouldn't go back to the old uncertain and haphazard basis of doing business that existed here before the dealers and dairymen entered into a co-operative agreement to improve quality, stabilize the market, and boost sales through advertising," he said.

Mr. Roszell gave the Peoria plan a 100 per cent endorsement. "I recommend our plan for your market," he told the Rock Island delegation.

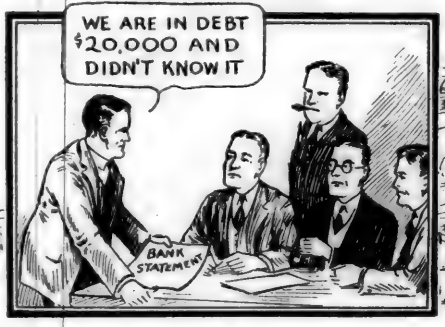
Decatur Busy

Milk dealers on the Decatur market, and the organized dairymen from Macon county have been holding conferences during recent weeks to work out a co-operative marketing program similar to that in operation on other Illinois markets. Approximately 450 dairymen and five dealers are co-operating. More than 80 per cent of all the producers now supplying the market belong to the Decatur Milk Association.

Farmers Mutual Directors Meet

HAIL insurance on growing crops was one of the principal subjects considered by the directors of the Farmers Mutual Reinsurance Company at their meeting on April 3 in Chicago.

It was decided to charge $25 per $1,000 of insurance on growing soybeans, while small grains and corn will cost $20 per $1,000. Last year the company had four million dollars of hail insurance in force. Seventy-one damage claims were paid in western, central, and southern Illinois last year.



Geo. F. Tullock of Rockford was elected president, L. E. Lingenfelter of Ullin, first vice-president; J. J. Hornung of Ottawa, second vice-president; Howard Jokisch of Virginia, secretary; J. H. Kelker of Chicago, assistant secretary; and R. A. Cowles of Bloomington, treasurer for the ensuing year.

Applications for hail insurance are already being received at the office of the company.

A Business Without a R

IT MAY RUN BUT IT
YOU WHAT YOU OU

A THOROUGH, systematic audit is as important to a business as a steering-wheel to an automobile. As the steering-wheel makes it possible for the driver to guide the car, so does an analytical audit assist the manager and board of directors in guiding the business.

The most successful business enterprises are built upon a thorough knowledge of that business. The directors should use the audit like the engineer uses signals to guide the train safely on its way.

A careful audit reveals the rocks and shoals blocking the way to success. It is a light house warning of dangers, pointing the way to a successful voyage. Ignorance is one of the chief obstacles to successful operation. The periodic audit turns on the searchlight revealing the weak spots as well as the strong points in the business.

DETECTS ERRORS

THE value of an audit can only be appreciated if its purposes are understood. An audit is a verification of accounting records. Errors and omissions are detected and corrected. The financial history of your organization is therefore made dependable.

A thorough audit will disclose defalcations and put a stop to dishonesty. It will throw the limelight on the unprofitable branches of the business and weaknesses that need strengthening.

An audit discloses the financial condition and summarizes the operations of a business enterprise. Groping in the dark is dangerous—the management and directors of an organization must have full information if they are to discharge properly their duties and obligations.

PEORIA MILK PRODUCERS BOARD IN SESSION
The auditing service of the I. A. C. A. assists the directors of the Illinois Milk Producers Association, Peoria, in keeping a careful check on the finances of this successful co-operative

SHOULD BE IMPARTIAL

A COMPREHENSIVE audit report prepared by a competent, disinterested and reliable auditing service furnishes the guide needed by those charged with the administration of a business. It is important that the service employed shall be impartial and free from undue influence.

Another function of the periodical audit is to provide comparisons with sufficient analytical detail to indicate the results of policies adopted. Comparisons with standards and with the operating data of other similar enterprises are also valuable.

SEVEN POINT SERVICE

THE Illinois Agricultural Co-operatives Association offers a seven point business service for farmers' elevators, shipping associations, and other co-operatives as follows:

1. Periodic audits and accounting service.

   c. Cost and replacement values of plant assets.
7. Budgets, operating analyses and general business advice.

A NON-PROFIT CO-OP.

THE I. A. C. A. is incorporated under the laws of the State of Illinois as a "non-profit co-operative agricultural association without capital stock, the members of which shall be composed of co-operative associations, farmers' elevators, Farm Bureaus, and other agricultural associations."

Its purposes as stated in the by-laws are "to promote the general welfare of its members, to furnish an auditing and accounting service, together with a general business advisory service and to co-operate with other organizations for the furtherance of mutual interest."

Service is rendered under a membership and service contract and charges are made upon a cost basis. No investment is required, but a small capital reserve is assessed on the basis of service charge.

HAS 233 MEMBERS

THE Illinois Agricultural Co-operatives Association inaugurated its service June 1, 1924. It completed over 1,200 assignments during the past five and one-half years. Last year 265 audits were made for the 233 member organizations involving the verification of more than $15,000,000 of assets, and covering a volume of gross business in excess of $100,000,000.

Let the I. A. C. A. help safeguard your investments in the local farmers' elevator, co-operative association, and supply company. See that your Farm Bureau avails itself of this valuable service? The Illinois Agricultural Association pays one-third the cost of all Farm Bureau audits.

WILL COUNTY FARM SUPPLY BOARD MEETS
Manager Fred E. Ringham reads and explains yearly audit to board of directors at Joliet meeting.

CONTACT with the forces of nature seems to draw humanity together. People drop their customary reserve and indifference toward each other when confronted with an unusual happening. The recent blizzard in Chicago demoralized transportation, disrupted business, and made hordes of daily commuters conscious of the brotherhood of man. The big snow was secretly enjoyed by all.

The storm broke the monotony of the daily trip to the office and shop. Trains normally filled with strangers coldly oblivious of each other, buzzed with conversation. Everyone had an experience to tell and told it. The majority accepted their plight with good humor. They got a kick out of it.

One man forcing his way through a packed coach yelled "Ouch" and was greeted with an uproar of hilarity. "Tickets please" yelled by the conductor as he sought in vain to penetrate an impenetrable wall of flesh and blood, was the signal for more laughter. The ticket-puncher good-naturedly made the best of the situation.

Paradoxically as it may seem the big city normally is the lonesomest place on earth. You get lost in a crowd. City people invariably let you severely alone. "Mind your own business and I'll mind mine" is the prevailing attitude. New York and Boston are even more that way than Chicago. Some people like this kind of solitude. They are temperamentally suited to city life. Affability is more characteristic of the small town and country; more noticeable in the South and West than in the North and East.

The United States is too rich to be loved, says Owen D. Young, president of General Electric. A wise observation. We may envy rich people but we seldom love them. And here in America we are more tolerant of wealth than in other countries. In Russia, Carroll Binder tells us in the Chicago News, poverty is considered a virtue. The poorest family in one village he visited received the most favors from the local Soviet officials, in spite of the fact that the man of the house squandered his earnings on vodka.

E. G. T.

"Too Many Farmers"

WHEELER McMILLEN'S new book, "Too Many Farmers," discusses everything agricultural from farm insects to fertilizers to farm relief. It is more or less a rehash of his many years experience and observations as a feature story writer for Farm and Fireside. While parts of the book are a bit draggy and elementary to those who are familiar with the problems of farm production, marketing, organization, and economics, yet it reveals much keen observation and a good sense of humor. The reading is enlivened with clever digs and quips.

The title of the book is catchy but not particularly relevent to the subject matter contained. Written in popular style and very readable, the book runs the whole gamut of farm subjects discussed in agricultural literature and from the legislative floor and platform during the last decade or more.

It is a scrambled eggs sort of a book, but interesting and worth reading. While you may not agree with all of McMillen's conclusions, you must admit he has been a close observer and offers many constructive suggestions to improve the lot of the man on the farm.

One Man in Washington

He suggests one legislative representative in Washington to speak for all the farm organizations. He believes that chemistry and the utilization of farm crops and crop wastes commercially offers the surest path to a more prosperous agriculture.

The author's point that politicians and politically-minded farm leaders have wrought fearful damage to agriculture by "exaggeration of every evidence of depression" so as to cause loss of confidence to farmers and discouragement in young people contemplating farm careers is not consistent with the point emphasized in the title, "Too Many Farmers."

One can argue that many should be discouraged from continuing with or going into farming. How would the government have been brought to a recognition of the need for a national policy for agriculture if farm spokesmen had not continued talking until something was done.

McMillen's sympathies in spite of his criticisms, most of which are fair, are with organized agriculture and co-operative marketing. He believes that agriculture needs a highly organized, intelligent, and ever functioning class consciousness willing to demand more than it needs and expects to get. He shows that farmers are a dwindling minority and must unite to get attention.

Must Reduce Costs

"I am not very hopeful of the results to be expected from the adjustment of production to demand; I am exceedingly hopeful of the results that can be obtained from the cost of production," he writes.

In conclusion he emphasizes the fact that there are too many farmers. "The shift from farm to city must go on. Had I the power I would hurry it up for the good of those who will be farmers in the years to come and for the good of the whole people. The change does not inevitably mean that the countryside must become deserted and the cities more congested. Some of it means that the country side will become richer, a better place to live." In like manner it is suggested that decentralization of industry into smaller towns and cities will make possible better living conditions for the thousands of workers so affected. The book is published by William Morrow & Co., New York, price $2.00.

By Harrison Fahrnkopf

JUST AS SURELY AS THE sun rises and sets the producer of Illinois is gradually waking up to the fact that *he is* "THE FARM BUREAU and the ILLINOIS AGRICULTURAL ASSOCIATION."

WHO RUNS the Illinois Agricultural Association? "Persons only engaged in the production of agricultural products, etc.," and furthermore, "The members of the Board of Directors must be members of this Association, in good standing, and whose principal occupation and interest is farming."

THE MANAGER OF AN elevator or the elevator itself, in functioning properly, is not and should not be buying grain from the community. The elevator should be a unit in an efficient machine that is selling grain. We have had our grain "bought" for a long time; let us become sellers of the grain we produce.

WE SHOULD NOT WASTE our time thinking of a grain marketing program that will increase prices a quarter cent or one cent per bushel. In joining forces we should aim for results that will raise the general level of prices fifteen or twenty cents per bushel. We can do this with corn.

THE SLOGAN—"Keep the Stockholder and Producer Ignorant" has prevailed altogether too long and can be applied in the *field of farmer elevators as dominated by the grain trade.*

IN GRAIN MARKETING we have not kept step with the trend of the times. We must go forward on a plan, the structure of which is sound. *We are not building for a day but for a hundred years.*

THEN THERE IS THAT term "contract" everybody is talking about. We should remember that the term "Contract" or "Agreement" in and with one's own

Seek Homes for Boys and Girls

How Illinois Society Brings Homeless Children and Childrenless Homes Together

FOR 47 years the Illinois Children's Home and Aid Society has been employed in the most serious business in which human beings can engage. It has been undertaking to find fathers and mothers for boys and girls who for various reasons have been deprived of their own parents through death or tragedy of any nature. During these years it has become the legal guardian of 11,000 children. These boys and girls have come from every county in the state, and the service of the Society is rendered to them regardless of their age or race.

JOHN WANTS A HOME

John is eleven years old. He is from central Illinois. He was deserted by his father, and his mother died. He is a fine boy, appreciative and eager to please and to learn. He loves country life and will be a credit to the family that will open their home to him. For information, communicate with the Illinois Children's Home and Aid Society, 203 N. Wabash Avenue, Chicago.

The beginning of this work is more than a matter of history. Martin Van Arsdale, a young clergyman, spent a portion of Sunday afternoons in teaching a Sunday School Class in a county poor farm—it was then the custom to send needy children to the poor farm. He saw attractive little homeless children with an unspeakable longing for the love of parents subjected to the miserable environment of the almshouse and their inadequate care through persons who by age, morals or infirmities were in no position to care for them properly.

One day as he left the institution following his customary Sunday afternoon service, a little girl took his hand and accompanied him to the top of the hill. Before she left Mr. Van Arsdale, she plead with him to find her a home with a father and with a mother so she could be like other children. Mr. Van Arsdale with a sinking heart, saw the little girl go back to the wretched conditions that she was daily obliged to face. He then went into the woods and on his knees in prayer to the "Father of the fatherless" dedicated his life to such little children and prayed that he might discover the way to help them.

Bring Them Together

One day while at work in his garden, he found the answer to his prayer. He rushed into the house and exclaimed to Mrs. Van Arsdale "I have found it! I have discovered the remedy. 'God setteth the solitary in families.' Why should not these little children who are starved for lack of parental care, be received into homes where there are no children?" Mr. Van Arsdale saw two needy conditions and he sought to bring them together.

When he gave up his pastorate in Illinois and devoted his entire time to the spreading of this gospel that children deprived of their own homes should have fathers and mothers, he pioneered a movement which is today recognized in every part of the civilized world as economic and practicable, for the Illinois Children's Home and Aid Society (of which he was the first superintendent) is the mother of the movement and the work rapidly spread from Illinois to other states.

Cover Entire State

The Illinois Children's Home and Aid Society now maintains a staff of trained field workers who cover the entire state. With the general office in Chicago and branch offices in Peoria, Springfield, Duquoin, E. St. Louis, Edwardsville, Salem and Lawrenceville, the members of the staff maintain their headquarters at Morris, Savanna, Rockford, Paxton, Champaign, Galesburg and Metropolis.

These trained workers undertake to solve the problems of children in trouble without removing them from their own homes, but when that cannot be done, they serve the Society in seeking to secure for these children permanently bereft of their own parents, homes in carefully selected private families.

The Society maintains three small institutions, Receiving Homes at Evanston and Duquoin for the temporary care of waiting children, and a Training School for girls in Vermilion County near Potomac where older girls receive intensive training in household arts. These institutions are incidental to the primary purpose of the organization which is to restore the children to their own homes if possible, and if that is not possible, to find for them, suitable foster homes.

Eight To Fourteen Years

The Society is making at this time, a special appeal for homes for boys from eight to fourteen years, and girls from twelve to sixteen years of age. A careful study has been made of their family background, and they are physically and mentally normal, and have no homes to which they can be returned. They need more than anything else in the world, a place in the hearts and affections of men and women who will give to them, a place in their own families.

Because of its experience of 47 years in the placing of 11,000 children in family homes, the Society is able to bring about these adjustments of children in families with scientific precision. There is nothing haphazard about it. Before the placement of the child, a member of the staff will visit the family who is interested, in order to secure a proper adaptation of child to the family. The child is placed with the family only on trial. He may be returned at any time. The greatest of care is exercised by the Society in the selection of families who will have regard for the proper training of the child from the standpoint of his spiritual, social, vocational and educational needs.

Illinois Grain Files Application

(Continued from page 4)

As we go to press the new board of directors of the Farmers National is in session in Chicago. New policies will probably be adopted which will clarify not only many of the issues raised above, but also other points not mentioned.

The fact that the I. G. C. plan involves individual contracts with each elevator member means that it is out to fulfill one of the chief objects of a sound co-operative grain marketing program, namely, to assemble and sell a large volume through co-operative channels. Other plans have been tried out not only in Illinois but elsewhere with indifferent success.

Grain Marketing

(Continued from page 12)

organization for the purpose of concentrating a large volume of grain into single hands, should not be confused with a contract that delegates to a few selfish and unscrupulous officials power that might be abused.

THE CONTRACT or agreement system is sound and has been very effective. It is recognized today in all life's activities. By "little business" by "Big Business" and by Babe Ruth—the papers are signed.

IN THE CORN BELT we have never tried the agreement system from the local co-operative elevator to the terminal market. Let's give it a chance. We ought to write "Let's give *ourselves* a chance."

(Continued on page 14)

Observations

CONTACT with the forces of nature seems to draw humanity together. People drop their customary reserve and indifference toward each other when confronted with an unusual happening. The recent blizzard in Chicago demoralized transportation, disrupted business, and made hordes of daily commuters conscious of the brotherhood of man. The big snow was secretly enjoyed by all.

The storm broke the monotony of the daily trip to the office and shop. Trains normally filled with strangers coldly oblivious of each other, buzzed with conversation. Everyone had an experience to tell and told it. The majority accepted their plight with good humor. They got a kick out of it.

One man forcing his way through a packed coach yelled "Ouch" and was greeted with an uproar of hilarity. "Tickets please" yelled by the conductor as he sought in vain to penetrate an impenetrable wall of flesh and blood, was the signal for more laughter. The ticket-puncher good-naturedly made the best of the situation.

Paradoxically as it may seem the big city normally is the lonesomest place on earth. You get lost in a crowd. City people invariably let you severely alone. "Mind your own business and I'll mind mine" is the prevailing attitude. New York and Boston are even more that way than Chicago. Some people like this kind of solitude. They are temperamentally suited to city life. Affability is more characteristic of the small town and country; more noticeable in the South and West than in the North and East.

The United States is too rich to be loved, says Owen D. Young, president of General Electric. A wise observation. We may envy rich people but we seldom love them. And here in America we are more tolerant of wealth than in other countries. In Russia, Carroll Binder tells us in the Chicago News, poverty is considered a virtue. The poorest family in one village he visited received the most favors from the local Soviet officials, in spite of the fact that the man of the house squandered his earnings on vodka.

E. G. T.

"Too Many Farmers"

WHEELER McMILLEN'S new book, "Too Many Farmers," discusses everything agricultural from farm insects to fertilizers to farm relief. It is more or less a rehash of his many years experience and observations as a feature story writer for Farm and Fireside. While parts of the book are a bit draggy and elementary to those who are familiar with the problems of farm production, marketing, organization, and economics, yet it reveals much keen observation and a good sense of humor. The reading is enlivened with clever digs and quips.

The title of the book is catchy but not particularly relevent to the subject matter contained. Written in popular style and very readable, the book runs the whole gamut of farm subjects discussed in agricultural literature and from the legislative floor and platform during the last decade or more.

It is a scrambled eggs sort of a book, but interesting and worth reading. While you may not agree with all of McMillen's conclusions, you must admit he has been a close observer and offers many constructive suggestions to improve the lot of the man on the farm.

One Man in Washington

He suggests one legislative representative in Washington to speak for all the farm organizations. He believes that chemistry and the utilization of farm crops and crop wastes commercially offers the surest path to a more prosperous agriculture.

The author's point that politicians and politically-minded farm leaders have wrought fearful damage to agriculture by "exaggeration of every evidence of depression" so as to cause loss of confidence to farmers and discouragement in young people contemplating farm careers is not consistent with the point emphasized in the title, "Too Many Farmers."

One can argue that many should be discouraged from continuing with or going into farming. How would the government have been brought to a recognition of the need for a national policy for agriculture if farm spokesmen had not continued talking until something was done.

McMillen's sympathies in spite of his criticisms, most of which are fair, are with organized agriculture and co-operative marketing. He believes that agriculture needs a highly organized, intelligent, and ever functioning class consciousness willing to demand more than it needs and expects to get. He shows that farmers are a dwindling minority and must unite to get attention.

Must Reduce Costs

"I am not very hopeful of the results to be expected from the adjustment of production to demand; I am exceedingly hopeful of the results that can be obtained from the cost of production," he writes.

In conclusion he emphasizes the fact that there are too many farmers. "The shift from farm to city must go on. Had I the power I would hurry it up for the good of those who will be farmers in the years to come and for the good of the whole people. The change does not inevitably mean that the countryside must become deserted and the cities more congested. Some of it means that the country side will become richer, a better place to live." In like manner it is suggested that decentralization of industry into smaller towns and cities will make possible better living conditions for the thousands of workers so affected. The book is published by William Morrow & Co., New York, price $2.00.

Mussolini After Absentee Landlords

Turns Estates Over To Administrators To Increase Farm Production

HOW Mussolini, Italy's dictator, is increasing the productive efficiency of Italian farm lands is revealed in the current issue of "The Countryman" in an article entitled "Mussolini's Short Way with Erring Landlords."

The decree issued by the Prefect of Rome which resulted in turning over the Menotti property, an extensive farm tract valued at more than a million dollars, to an administrator, is presented herewith:

"Whereas Dr. Mario Menotti is owner of an estate situated in the territory of the Commune of Fiano Romano, covering an area of approximately 2,467 hectares (roughly 6,000 acres), consisting of 52 lots of land, eight woods, and three large farms, with three farm houses, of which one is in ruins;

"Whereas, for the past six years the owner, Dr. Menotti, has gone abroad, constantly travelling in different distant countries, so that for long periods it has not been possible to get in touch with him;

"Whereas, it has been definitely ascertained by enquiries on the spot that it is solely due to the neglect and indifference of the owner, consequent on his continued absence and lack of interest, that the estate has fallen into a most shocking state of neglect, left to the tender mercies of a muddlesome administration, and yielding no appreciable returns from the agricultural standpoint, while the agricultural workers of the district are driven, by lack of adequate lands available for cultivation, to a permanent state of agitation, constantly endangering the social peace of that small locality;

"Whereas, this normal state of affairs, evidently injurious to the private interests of the owner, and still more so to the public interest, is anti-economic, anti-social, anachronistic, in entire contradiction with the vast, renewing and vivifying activities which the Fascist Government firmly desires and pursues in the interests of the individual and still more in those of the public and of the nation, with a view to ensuring more profitable return and larger yields from agriculture, and is moreover, in striking contrast with the duties implied by the wise legislation on agricultural land reclamation, which make it a civic duty to reclaim inch by inch the national soil so as to secure more scientific and profitable farming;

"Whereas, faced by such a deplorable state of affairs, the political authorities cannot look on passively at the impoverishment of a large and important estate, which could, under wise management, earn a very big income for its owner, and which cannot therefore be a matter of indifference to the economic life of the community with which it is connected;

"Whereas, the right of property cannot consist in the jus abutendi which would make it lawful for an owner to exercise his rights to the length of destroying the property owned, for on the contrary the essence of property rights is essentially social in its nature, as its purpose is to harmonize and conciliate the rights of the individual with those of the collectivity;

"Whereas, it is also in the interests of public order that the anomolous situation resulting from the state of affairs as above set forth should not and must not be further tolerated;

"Whereas it therefore becomes urgently necessary to take steps to save the estate belonging to Dr. Menotti from the state of complete neglect in which it is now left and to restore it to a condition of adequate productivity;

"Therefore in accordance with article 7 of the Act of 1865, on administrative litigation, and of article 3 of the Communal and Provincial Act sanctioned by Royal Decree of 1915, we hereby decree that the Hon. Orsolini Cencelli shall act as administrator of the estate in lieu and place of the delinquent owner."

An Old Law

The law authorizing this action was more than 20 years old, but no government before Mussolini's was strong enough nor sufficiently independent to enforce it. Estates in Sicily and Rovigo have been similarly treated.

The present government has proclaimed in the Labour Charter that property implies duties, and that if owners do not make good use of their landed possessions, so that these possessions shall play their part in promoting national prosperity, the State will intervene.

Mussolini is anxious to increase domestic production of farm products, whereas in the United States our problem for the moment is to decrease production.

$250 Song Prizes

A WORLD-WIDE contest to obtain the three best songs, including words and music, suitable for use in Farm Bureau meetings is announced by the American Farm Bureau Federation.

The first prize-winning song will be awarded $150 in cash, the second $75, and the third $25.

Songs must be appropriate, words and music must be entirely original, and it is suggested that songs be tuneful, simple, catchy, easily followed in community singing, and readily adaptable for orchestration.

Two or more persons may collaborate in writing a song.

The contest closes on July 15, 1930. Songs must be typewritten or in ink, written on one side of the paper. Send them to Mrs. Charles W. Sewell, American Farm Bureau Federation, 58 E. Washington St., Chicago. Only manuscripts accompanied by sufficient postage will be returned.

Talk At University

Sec'y. Geo. E. Metzger, A. D. Lynch, and Frank Gougler, dairy and produce marketing directors recently addressed classes in agricultural economics and marketing at the University of Illinois, Urbana.

President Earl C. Smith was scheduled to talk to faculty members of the College of Agriculture on Apr. 11.

More Oil Companies

Twenty-nine county and district cooperative oil companies now hold membership or have applied for membership in the Illinois Farm Supply Company. All of the new applicants expect to be operating within the next 60 days.

In view of present developments a total of at least 37 county and district companies affiliated with the state company is likely by the end of the year.

Grain Marketing

(Continued from page 13)

THE "AGREEMENT" plan operating from the local elevator to the Illinois Grain Corporation will give all producers an opportunity as one man to meet the purchaser of his grain. Concentrate! Concentrate!

AFTER ALL, in this grain marketing, no elevator can be made to sign an agreement against its will. When it does enter an agreement, however, it wants to be sure that the elevator "down the track" or over in the next county is going to live up to the rules. That is good business.

A MAN MAY NOT be required to join the army against his will. After he has become a part of the army, however, he cannot voluntarily withdraw. He must give his best for the good of all. He has confidence in his pals but he has greater confidence in Uncle Sam, for whom he signed the agreement.

WHEN THE FARMERS National Grain Corporation sets up with equipment and personnel to handle a large volume of grain, it wants to know that that volume is coming in, otherwise you have a high overhead and limited volume.

HO! HUM! This voluntary system has been in operation a long time, and under it there are thousands of corn-belt farmers who, during the last few months, have been marketing corn "at sixty cents per bushel" against their will.

MORE THAN A HATFUL

Worth L. Chubb is shown with hailstones larger than hen's eggs he found on the running board of his car after passing through a storm

GET READY FOR THE HAIL STORMS

HAILSTONES like these fall somewhere in Illinois every year. They invariably destroy all growing crops in their path, kill poultry, break windows, and damage buildings and property.

The prudent farmer protects his crops and property against loss with insurance. He will not take a chance when he can get protection at small cost in his own company—the Farmers Mutual.

Last year the Farmers Mutual paid 71 hail insurance claims in Champaign, Knox, Mercer, Bond, Williamson, Monroe, Mason, Sangamon, Henry, DeKalb, Kane, Rock Island, McDonough, Mercer, and other counties. Hailstones like those shown above fell in Williamson county. Jo Daviess county was visited by a smashing hailstorm in the growing season. And 1929 was a light hail year.

Look Out For 1930

THE old-time weather prophets are saying, "Look Out For Hail In 1930." You can depend on severe hail storms about every third year, they say. It's 1930's turn.

Hail Dangerous To Soybeans

GROWING corn, soybeans, small grains are all subject to hail damage. Soybeans are subject to a double hazard. Hail is fatal to beans when the young plants are coming through the ground. The crop may be destroyed also in the fall when the pods are on.

$960 for $20

Geo. Wiese of Greenville, Bond county, Ill., bet the Farmers Mutual $20 to $1,000 last year that he would have a hailstorm. He won the bet.

Wiese took out a $1,000 policy on his growing crops early in the season at a cost of $20, four dollars at time of application, and $16 at the close of the season.

On Aug. 18 a terrific hailstorm hit his farm. The small grain had been harvested but the big hailstones battered the standing corn to ribbons. The appraiser judged the field a 96 per cent loss. Mr. Wiese received a check from the company for $960 to reimburse him for the damage.

The first prize-winning song will be awarded $150 in cash, the second $75, and the third $25.

Songs must be appropriate, words and music must be entirely original, and it is suggested that songs be tuneful, simple, catchy, easily followed in community singing, and readily adaptable for orchestration.

Two or more persons may collaborate in writing a song.

The contest closes on July 15, 1930. Songs must be typewritten or in ink, written on one side of the paper. Send them to Mrs. Charles W. Sewell, American Farm Bureau Federation, 58 E. Washington St., Chicago. Only manuscripts accompanied by sufficient postage will be returned.

Talk At University

Sec'y. Geo. E. Metzger, A. D. Lynch, and Frank Gougler, dairy and produce marketing directors recently addressed classes in agricultural economics and marketing at the University of Illinois, Urbana.

President Earl C. Smith was scheduled to talk to faculty members of the College of Agriculture on Apr. 11.

More Oil Companies

Twenty-nine county and district cooperative oil companies now hold membership or have applied for membership in the Illinois Farm Supply Company. All of the new applicants expect to be operating within the next 60 days.

In view of present developments a total of at least 37 county and district companies affiliated with the state company is likely by the end of the year.

Grain Marketing

(Continued from page 13)

THE "AGREEMENT" plan operating from the local elevator to the Illinois Grain Corporation will give all producers an opportunity as one man to meet the purchaser of his grain. Concentrate! Concentrate!

AFTER ALL, in this grain marketing, no elevator can be made to sign an agreement against its will. When it does enter an agreement, however, it wants to be sure that the elevator "down the track" or over in the next county is going to live up to the rules. That is good business.

A MAN MAY NOT be required to join the army against his will. After he has become a part of the army, however, he cannot voluntarily withdraw. He must give his best for the good of all. He has confidence in his pals but he has greater confidence in Uncle Sam, for whom he signed the agreement.

WHEN THE FARMERS National Grain Corporation sets up with equipment and personnel to handle a large volume of grain, it wants to know that that volume is coming in, otherwise you have a high overhead and limited volume.

HO! HUM! This voluntary system has been in operation a long time, and under it there are thousands of corn-belt farmers who, during the last few months, have been marketing corn "at sixty cents per bushel" against their will.

MORE THAN A HATFUL

Worth L. Chubb is shown with hailstones larger than hen's eggs he found on the running board of his car after passing through a storm

GET READY FOR THE HAIL STORMS

HAILSTONES like these fall somewhere in Illinois every year. They invariably destroy all growing crops in their path, kill poultry, break windows, and damage buildings and property.

The prudent farmer protects his crops and property against loss with insurance. He will not take a chance when he can get protection at small cost in his own company—the Farmers Mutual.

Last year the Farmers Mutual paid 71 hail insurance claims in Champaign, Knox, Mercer, Bond, Williamson, Monroe, Mason, Sangamon, Henry, DeKalb, Kane, Rock Island, McDonough, Mercer, and other counties. Hailstones like those shown above fell in Williamson county. Jo Daviess county was visited by a smashing hailstorm in the growing season. And 1929 was a light hail year.

Look Out For 1930

THE old-time weather prophets are saying, "Look Out For Hail In 1930." You can depend on severe hail storms about every third year, they say. It's 1930's turn.

Hail Dangerous To Soybeans

GROWING corn, soybeans, small grains are all subject to hail damage. Soybeans are subject to a double hazard. Hail is fatal to beans when the young plants are coming through the ground. The crop may be destroyed also in the fall when the pods are on.

$960 for $20

Geo. Wiese of Greenville, Bond county, Ill., bet the Farmers Mutual $20 to $1,000 last year that he would have a hailstorm. He won the bet.

Wiese took out a $1,000 policy on his growing crops early in the season at a cost of $20, four dollars at time of application, and $16 at the close of the season.

On Aug. 13 a terrific hailstorm hit his farm. The small grain had been harvested but the big hailstones battered the standing corn to ribbons. The appraiser judged the field a 96 per cent loss. Mr. Wiese received a check from the company for $960 to reimburse him for the damage.

Colds

WHILE there has been much research to discover the cause of colds there is no general agreement regarding the nature of the infectious agent. Until more is known it is unlikely that any general preventive will be developed.

The nasal secretions from the patient with a cold are highly contagious. Those closely associated with an infected person frequently acquire colds unless scrupulous preventive measures are used. The face and hands are contaminated from the handkerchief, and these touching the table, desk, towel, or other objects spread the disease.

John E. Boland

The hands are the most common agents for spreading the cold germ. They become contaminated every time the patient blows his nose. The patient usually infects everything he touches. Coughing and sneezing spread the disease. The spread of this ailment might be checked if every patient would wash his hands frequently, and guard against unprotected coughing and sneezing.

Colds may be followed by more serious complications including middle ear, mastoid, brain complications, sinus infections, bronchitis, pneumonia, influenza, etc. Anything that minimizes the amount of secretion, therefore, is important in prevention and treatment.

Douching the nose with a simple antiseptic or disinfectant at frequent intervals using a medicine dropper, nasal spray or douche is most effective. Acute colds are usually accompanied by a condition known as "Acidosis." This is a generally accepted belief. Citrous fruit juices such as lemon, orange, or grapefruit taken in sufficient quantities, or ordinary bicarbonate of soda —a teaspoonful about four times a day— aid materially in neutralizing the acid condition and will help break up a most stubborn cold. Citrous fruit juices, strange as it may seem, have an alkaline effect internally. Thus hot lemonade, a simple home remedy, is useful in getting rid of colds.

Family Living Expenses

FAMILY living expenses averaged $772 for 195 farm families in Tompkins County in 1928, according to a survey conducted by the New York state college of home economics. The family living expenses ranged from $462 for the lowest income group to $1147 for the highest income group. The income for these groups ranged from $505 to $5394. The number dependent on the income increased from 3.2 in the lowest group to 4.4 in the highest, the average being 3.6 persons.

Cash receipts from all sources averaged about $2300 for these 195 families, but it was pointed out that this income is not comparable with a wage or salary because part of the farmer's income goes back into the farm business. Moreover, about $400 worth of farm produce was used by the family instead of being sold to add to the cash income.

Food Big Item

The largest household expenditure was for food, $225 being the average for the year. The value of food purchased was 47 per cent of the value of all food consumed by these farm families. Next came clothing, with an average yearly expenditure of $163 a family, ranging from $74 in the lowest income groups to $250 in the highest group. The average inventory value of the farm family wardrobe was $242.

Savings and investments by these farm families averaged $404. This took the form of reducing mortgages, making deposits in savings banks, buying land, making loans, paying on life insurance, and the like. Forty-one per cent of these farm families carry life insurance, the average amount being $1952; over half of the families with insurance had less than $2000, and only 11 per cent were carrying between $5000 and $9500.

Admitted To Bar

LEE J. QUASEY, our studious director of transportation, recently passed the state bar examination as a result of which he is entitled to practice law anywhere in Illinois.

L. J. Quasey

Quasey studied law at night during the past three years at the John Marshall Law School, Chicago. His knowledge of law will be of great assistance to him in working with Farm Bureau members on claim and utility problems.

Life Insurance

By L. A. Williams

The Certain Estate

A DEATH claim is not charity. The insured purchased the estate just as he would purchase real estate or bonds. A $10,000 policy is as certain a piece of property as a farmer can own. It is more certain in value than land.

L. A. Williams

Years ago your grandfather bought land at $1 an acre in Illinois that grew in value during the war to $300 and $400 an acre. Perhaps you became ambitious and bought more land. With what result? You lost everything. Thus land purchased at $1 per acre lost money for heirs who valued it at $400 per acre.

Life insurance represents a guaranteed estate for an average premium deposit of two per cent per year. There is no worry about the estate. There is no fluctuation.

In 1920 when the Federal Reserve Board inaugurated its deflation policy the country was drained of its watered values and bled dry of its collateral. This action was presumed to have avoided a panic. We know it precipitated the country into a prolonged decade of farm losses and bankruptcy.

Turning America's investment funds into more unstable securities than that of agriculture has thrice proved even more injurious to the nation than inflated farm land values. The Florida fizzle, the overbuilding program in every city, and the stock market crash are all monumental to the error that brought about rapid agricultural deflation.

Any policy of finance that can create such turmoil, and influence values up or down is as unsafe as permitting one group or board to change the constitution at will. So long as money interests can maneuver to cancel foreign debts through establishing an international bank for an ostensibly different purpose, and so long as federal reserve funds can be loaned to bolster stock market enterprises, just so long will our estates be in constant jeopardy, and the value of any one class of property be uncertain.

Life insurance will be the one certain protection and estate of the American citizen under any form or policy of government finance or control.

MEASURE YOURSELF FOR LIFE INSURANCE

Most Farmers Are Under-Insured

EIGHT thousand replies to a life insurance questionnaire circulated among Farm Bureau members prior to the organization of COUNTRY LIFE revealed that 40 per cent carried no life insurance while 90 per cent were under-insured.

You may have a life insurance policy but have you enough life insurance?

Is your mind closed on this important subject or are you willing to secure an estimate of your insurance requirements based on years of insurance experience?

I WILL BE glad to review, personally, the case of every Farm Bureau member who fills out and returns the questionnaire printed below. We will give you a close approximation of the amount of life insurance that should be carried by a man in your position.

You will be under no obligation to buy. All information given will be held in confidence at your wish.

Signed,

L. A. WILLIAMS, Mgr.,

Tax Legislation Now Before General Assembly

I. A. A. Presents Plea For a Fair Revenue Amendment

THE Illinois Agricultural Association was represented at Springfield, May 12, when the special session of the legislature called by Governor Emmerson convened.

In addition to emergency legislation validating tax anticipation warrants in Cook county, and the consideration of bills prepared by the Strawn committee of Chicago, the legislature is expected to consider an amendment to the revenue clause of the state constitution.

The I. A. A. made known its views on the question of a revenue amendment in a letter to the Legislative Revenue Investigation Committee, of which Senator Huebsch is chairman, several weeks ago.

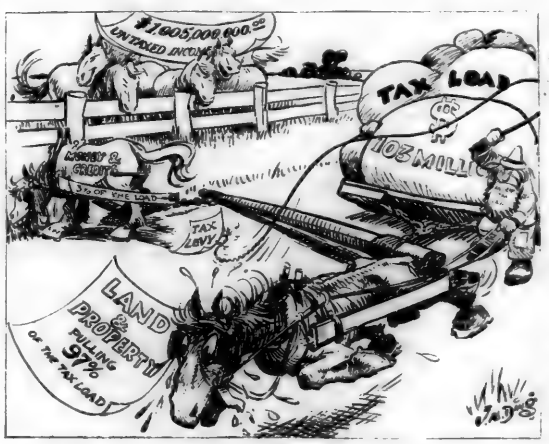
Power To Assembly

The amendment proposed by the I. A. A. would give the General Assembly full authority and power to revise the state taxing system. If an income tax is imposed it is recommended that as far as practicable the General Assembly provide for deductions or credits to compensate for taxes on property from which any part of the taxed income is derived. The Association's proposal provides further "that the net proceeds of any funds which may be collected from any new sources of revenue after the adoption of this amendment shall be paid into the state treasury. The General Assembly may appropriate any portion of such funds for any state purposes, including a state fund for the support of the public schools."

Distribution of Fund

The suggested amendment sets forth also that "the General Assembly may also provide for the distribution of any portion of such funds among the several counties in the ratio which the total amount of such funds collected in each county shall bear to the total amount thereof collected in the

(Continued on page 9)



DETAILS of the attack on the Agricultural Marketing Act by business groups at Washington together with the defence offered by Chairman Alexander Legge of the Federal Farm Board and Secretary of Agriculture Arthur M. Hyde, are presented on this and following pages.

WORKING A GOOD HORSE TO DEATH

THE cartoon below was drawn by Ding for the Iowa Farm Bureau Federation in its campaign for an equitable state taxing system.

Iowa's tax problem is similar to that in Illinois. Certain low-rent lands in that state are paying at least 40 per cent of their net income in taxes. Less than one-third of the net income from the state is paying the entire tax burden. The other two-thirds escapes.

John C. Watson of the Illinois Agricultural Association presented an analysis of the Iowa tax situation some time ago before the Iowa Farm Bureau. According to this investigation moneys and credits in the three years, 1919-'20-'21 produced 7.21 per cent of the net income in the state, tangible property 26.73 per cent, wages and salaries 47.79 per cent, labor and management of all owner-operators of property, including fees paid professional workers, brokers, agents, and salesmen, 18.27 per cent. Yet the income (26.73 per cent of total) from real estate paid the bulk of the taxes.

Chairman Legge Speaks Before U. S. Chamber

Derides Business Group for Antagonistic Attitude Toward Farmer

IN A speech ringing with sarcasm and denunciation of the National Chamber of Commerce's attitude toward the Agricultural Marketing Act and the Farm Board, Chairman Alexander Legge defended the Act and the policies of the Board before the Chamber of Commerce convention in Washington on April 30.

Declaring that the Farm Board hopes to help farmers organize so that in the future they will be able to protect themselves in the marketing of crops, Mr. Legge recounted the events leading up to the organization of this federal agency. "It asks the support of you business men, not as a generous act of charity to someone else, but because it is to your own best interests," he asserted.

Good For Farmer Too

"With the Farm Board's assistance farmers by acting together are trying to apply the same methods and business principles to their industry that were adopted in other lines long since," Mr. Legge continued. "If they were good for you fellows, they are likewise good for the farmer."

Mr. Legge outlined the history of farmers' efforts to help themselves, and recalled for the Chamber its action passed on the referendum taken in 1928 to determine that organization's position on the farm question.

Alexander Legge

"That referendum," he continued, "committed the Chamber to the creation of a federal farm board with authority to investigate

(Continued on page 4)

Legge Issues Comment Following Resolution

FOLLOWING the resolution adopted by the U. S. Chamber of Commerce in its convention on April 30 at Washington Chairman Alexander Legge issued the following statement:

"The Chamber of Commerce proposes to make the Farm Board impotent and would sponsor another national conference to adopt some more resolutions of sympathy for agriculture.

"That action simply confirms what we told the membership of that organization Wednesday—They are for something to help the farmer only until they find out it works.

"Naturally, we had hoped they would support our efforts to aid agriculture, but if they are going to oppose us we are glad they have come out in the open. It's much easier to deal with an enemy who is squarely against you than one who pretends to be friendly but fights you behind your back.

"Our client is the farmer and we are going to continue to serve him just as the Agricultural Marketing Act intended we should—for his benefit, not the benefit of someone else."

Following is the resolution in full passed by the convention attended by some 1,800 representatives of business organizations throughout the country:—

"We reaffirm the earlier declarations of the Chamber of Commerce of the United States made through referendum vote of its membership upon a carefully matured report of a representative committee, in supporting the principle that the producers of agricultural commodities should have the benefits which cooperative marketing of their products along sound economic lines can confer; in pointing out that all agricultural credit requirements could be met by full development and adaptation of existing credit facilities to local and commodity needs, rather than by the creation of new credit facilities; and in advocating a federal farm board to assist agricultural producers and their organizations in solving the problems peculiar to agriculture.

Recognize Emergency

"The legislation which was enacted in June, 1929, was in contravention of the Chamber's proposals in its provision of new credit facilities in the form of large sums of money from the public treasury to be used under the Act as the farm board might decide. During the business crisis of some magnitude which has occurred during the last six months these funds have been brought into use in various ways.

"We recognize the emergency considerations which may have impelled this resort to the federal treasury, but the experience which has been gained now permits an appraisal both as to immediate effect and long-range results.

Continue Opposition

"The anticipated benefits to the farming interest as a whole have not been realized. On the contrary there has been impairment of the marketing structure and prevention of support which otherwise would have been given to the marketing of agricultural products which were affected by the use of public monies. Without benefit to agriculture there has been imposed unbearable hardship upon business enterprises unable to maintain their position against discriminatory competition from the government.

"We accordingly express our continued opposition to the use of government funds in providing capital for the operation of agricultural cooperatives, and for the buying and selling of commodities for the purpose of attempted stabilization. We condemn as a permanent policy of government the employment of public funds for the purpose of participation in business in competition with established agencies and support the proposal for an amendment of the agricultural marketing act to repeal the authority of the Federal Farm Board to use federal funds for such a purpose.

"We advocate the continuance of the Federal Farm Board as a proper agency, conducted at federal expense, for the gathering and circulation of authoritative information, for ascertaining conditions of overproduction, for advice as to its prevention, and for assistance toward the solution of the numerous and important business problems affecting agriculture both in production and in marketing.

"We believe it is desirable to apply sober and devoted study to methods by which cooperative organizations on their own resources may find their warranted place, without the present danger of undermining marketing facilities and thus unfavorably affecting farm product prices. We, therefore, recommend that the Chamber with adequate preparation call a conference of wide representation, including farm cooperative leaders, to study and define measures of sound and effective aid to agriculture."

Will Crystallize Farm Sentiment, Says Smith

"THE courageous and defensible position taken by Chairman Legge of the Federal Farm Board and Secretary of Agriculture Arthur M. Hyde, before the annual meeting of the United States Chamber of Commerce, will serve to stimulate and crystallize farm sentiment in support of the Farm Board and its policies as has nothing else since the passage of the Agricultural Marketing Act," President Earl C. Smith stated following press reports of the recent chamber of commerce convention.

"The resolution reported by the press as having been adopted by the United States Chamber of Commerce, criticizing the Farm Board and asking for repeal or modification of the Agricultural Marketing Act, merely discloses the selfish interests that have been prospering at the expense of the farm producers.

"I feel sure this resolution does not reflect the true sentiment of a large percentage of the business men of Illinois and the mid-west."

Short Story—A girl from a telephone exchange fell asleep while at church. The preacher announcing the hymn, said "Number 426." At that moment the girl awoke and murmured: "I'll ring them again."

Alex. Legge Speaks Before U. S. Chamber

(Continued from page 3)

and make recommendations to congress, but none to go ahead with the solution of the agricultural problem which was characterized as such a serious one by both the industrial conference board report and report of the Nagel commission.

"In addition to that, however, it did go on record very definitely in favor of the principles of co-operative marketing based upon the established right of the producers of agricultural commodities to act together in associations corporate or otherwise, with or without capital stock, in collectively processing and manufacturing, preparing for market, handling and marketing in interstate and foreign commerce such products of persons so engaged.

"Results of the referendum were announced on November 14, 1928. The vote in favor of the co-operative principle was overwhelming, 2,816 to 117, and as you all know, these were member associations and not individuals doing the voting.

Sarcastic in Comments

"I am sure that most of you will agree that you know more about the agricultural situation and how to meet it than I do. A considerable percentage of your membership have made that quite clear, and perhaps the best answer I can make is the statement that if this be true, and you really do know so much about it, that the situation presents a very severe indictment of the organization which, having full information of the facts, has made so little effort to remedy the situation. Certainly none of you have seen any evidence of constructive action on the part of the chamber of commerce or the part of any of its affiliated organizations with the doubtful exception of taking a referendum two years ago, looking to a remedy for and permanent improvement in the situation, which your own investigators had warned, required substantial assistance if not from you, then from the government.

"Perhaps I should mention the fact, that while your national organization did adopt a policy of silence when congress was framing the agricultural marketing act, spokesmen of some of your member organizations appeared before the house committee on agriculture and indorsed the principles of that legislation.

Attitude of Indifference

"One might find much justification in the statement that your attitude generally has been one of indifference if indeed not of antagonism; that you regarded the farm problem like the poor as 'something we have with us always' and that you who are more fortunately situated, discussed it much along the same lines as the ladies are apt to refer to the household question—something that had to be endured if one was to avoid having to do the work oneself.

"After many years of discussion and deliberation congress finally passed the agricultural marketing act which many of you people are now branding as socialistic, or anarchistic, and complaining of interference with, or necessitating some readjustment in the present system of handling certain commodities.

"Nearly 10 years of discussion, controversy and compromise led congress, in its wisdom, to declare that permanent solution of the agricultural problems lies in collective action on the part of the farmers. It created the farm board to help producers organize for such action, both as to production and marketing of their crops, the purpose being to enable them to put their industry on economic parity with other industries. In that legislation congress definitely committed this country to the principle of co-operative marketing of farm products.

"The farm board believes that principle is sound and the only one that really will give the farmer a chance to get his fair share of the national income. The country generally and business men for the most part gave their approval of the agricultural marketing act before it became a law. I am sorry to say that there has been considerable evidence the past several months that entirely too many of your members were for the principle of co-operation only so long as it didn't work. When it became apparent that a means had been provided that really would help the farmer get organized co-operatively so that he, like other producers, would have some voice in determining the sale price of his commodity, the effort was branded as government price fixing, putting the government in business, etc. And all of this notwithstanding the fact they had declared unmistakably for the principle of co-operative marketing only a year previously.

Farmers Third of Nation

"I do not recall in years gone by of hearing your business men making any such complaint against government aid that was extended to the manufacturing industry, to transportation and to finance. And these all played their part in adding to the disadvantages of the farmer as did also the preferential treatment to labor through immigration restriction and other measures.

"We are not complaining about what the government has done for others but it does seem to us that these beneficiaries ought to be willing that the farmer also be given a helping hand from the same source so that he, too, will be in position to take care of himself in the economic system that has been built up in this country so largely by special favors.

"Farmers constitute nearly one-third of our population. For the most part they have been producing and selling blindly as individuals with the result they have little or nothing to say about what their product brings. Costs of production can be passed

THE HEN'S HELPERS

Courtesy, Chicago Daily News

along to the buyer by nearly every one but the farmer. Unorganized, he has to take for his product what the other fellow is willing to give him.

"All the farmers are trying to do, with farm board assistance, is, by acting together, to apply the same methods and business principles to their industry that were adopted in other lines long since. If they were good for you fellows they are likewise good for the farmer.

"The farm board hopes to help farmers organize so that in the future they will be able to protect themselves in the marketing of their crops. It asks the support of you business men, not as a generous act of charity to someone else, but because it is to your own best interests.

"We hear much to the effect that these operations are putting the government permanently into business. We wish to assure you that on this point every commodity organization is set upon a basis where, as it gains financial strength and experience, it can and will become entirely independent of government aid or supervision. In all these organizations provision is made for the farm board having a voice in their policies only so long as they are indebted to it.

"The natural opposition which so many of you have felt in the past against interference or dictation on the part of your banker or financial backer is quite as pronounced on the part of the farmer as in the case of those engaged in other lines of industry, thus affording constant incentive to work away from it as rapidly as possible."

At the close of his formal address, Mr. Legge threw out a challenge to the convention to match a contribution which he offered to make for the establishment of a national agricultural foundation in accordance with the recommendation of the Business Men's Commission. He got no immediate response but later in the meeting, Julius Barnes told the convention that he would undertake to match this contribution dollar for dollar by raising the money from business interests.

Millett Asks For Repeal

A proposal that the agricultural marketing act be repealed was made by Daniel A. Millett, investment banker and stockman, of Denver, Colo., before the recent Chamber of Commerce convention.

"The agricultural marketing act," said Mr. Millett, "in its intent and language violates the sound and proven rule of business, that penalty of loss must rest on the loser, as an ever-present controlling factor, in order to insure efficiency.

"The men in the great marketing and distributing businesses of this country, with their enormous investments of capital in plant and organization, properly fear the working of this act. It is evident that in the long run they cannot compete with the Government, which they support and supply with funds through taxes—which taxes are used to their undoing."

Mr. Millett concluded his prepared address as follows:

"The farm marketing act is part and parcel of what is to me the fantastic dream, world-wide, of stabilization, with or without governmental agency, so that every producer in every line will be assured a profit through control of production, and without the discipline of the economic law of supply and demand working through price, which eliminates the marginal producer.

"I have tried to show that interference with the economic law, by private combinations, direct governmental control, and indirect action by Government through tariff, tends to failure, but that such interference, in its attempt, brings not stability but unsettlement and distress in business, with disaster indicated, if continued.

Tariff Revision Downward

"For myself, the conclusion has been reached, that as practical public policies, in the interest of the farmer and business alike we should:

"1. Repeal the agricultural marketing act and cease any such governmental attempts, and,

"2. Revise our tariff downward, not upward, with its elimination save in the few respects theretofore mentioned as speedily as possible, as our ideal.

"I believe the time has come, if it is not already overdue, for the people of America to take down that priceless heritage of the English-speaking peoples of the world, the King James version of the Book of Books, and turning to the 12th chapter of the Gospel according to St. Luke, commence to read at the 16th verse:

"'And He spake a parable unto them, saying, The ground of a certain rich man (the United States) brought forth plentifully: (that is the surplus.)

"'And He thought within himself, saying, What shall I do, because I have no room where to bestow my fruits?

"'And He said, This will I do: I will pull down My barns and build greater; and there will I bestow all My fruits and My goods. (That is the withholding program.)

"'And I will say to my soul, Soul, thou hast much goods laid up for many years; take thine ease, eat, drink and be merry. (That is the high price that will be realized.)

"'But God (the economic law) said unto him, Thou fool, this night thy soul shall be required of thee.'"

Opposition to the agricultural marketing act was expressed by the following:

H. W. Jones, representing the National Poultry and Egg Dealers Association; L. W. Smith, Michigan canning industry; C. E. Webb, Philadelphia Wool and Textile Association; F. C. Adams, Boston Wool Trade Association; W. F. Jensen, American Association of Creamery Butter Manufacturers; S. Stephens, National Retail Coal Merchants Association; H. C. Netterau, New York Mercantile Exchange; W. J. McCabe, of Duluth, Minn., grain exchanges and grain trade.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Editor, George Thiem

Published once a month by the Illinois Agricultural Association, 608 So. Dearborn St., Chicago, Ill. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

Organization and Bargaining Power

ALMOST convincing testimonial of the value of organized farm bargaining power is contained in a summary of weighted average prices paid producers for 3.5 per cent fluid milk per 100 lbs. (including surplus) during 1929. This list, prepared by our dairy marketing director, A. D. Lynch, shows that producers who supply St. Louis with milk are the lowest paid, by far, of any dairymen supplying a large city market, in the United States.

Contrast the $2.18 average price per 100 lbs. for the year paid at country points around St. Louis with Chicago's $2.64, Boston's $2.64 and New York's $2.70. All these prices are F. O. B. country points. Compare the St. Louis price with the F. O. B. city prices paid producers on other large markets as follows: Detroit $2.84; Hartford, Conn., $3.94; Philadelphia $3.45; Pittsburgh $3.14; Washington $3.45, etc.

Perhaps the fact that St. Louis dairymen lacked a strong collective bargaining association to sell their milk for somewhere near its value last year while at the other cities the producers were well organized, had nothing to do with the unequal milk prices. Perhaps.

That Price Question

THE Illinois Grain Corporation is a Capper-Volstead co-operative and a member of the Farmers National Grain Corporation, the national grain sales agency set up under the direction of the Federal Farm Board.

The Illinois Grain Corporation will be prepared to help the individual farmer and his local farmers' elevator receive any benefits available under the provisions of the Agricultural Marketing Act. These benefits include among others, loans to co-operative elevators and money advances to farmers on grain in storage.

Lending the farmer and his co-operative money, however, will not by itself improve the farmer's position in the market. The concentration of a large volume of grain in a single selling agency will give the producer bargaining power and influence in getting a price in line with market demands. This he does not always get under the present system.

No thinking farmer believes that any co-operative or government agency can fix prices arbitrarily regardless of supply and demand. No legislation ever proposed by the Farm Bureau, Mr. Coolidge notwithstanding, advocated price fixing. We do believe a well organized co-operative can exercise some influence on prices. By collective action in marketing farmers can reduce violent price fluctuations, learn more about quality and market demands, own their own terminal elevators and marketing machinery, develop better control over production, cut distribution and selling costs, reduce wastes in handling, shake off the surplus of sellers under the present system who greatly outnumber the buyers, and thereby divert some of the money which now stays in the city, back to the country.

On Contracts

THE specious arguments used by the grain trade in attacking the Federal Farm Board policy in favor of definite contracts between the producer and his co-operative have been answered with characteristic vigor and firmness by Chairman Legge.

"Some of the private commission companies for years have required co-operatives borrowing money from them to sign a binding marketing agreement," said Mr. Legge. "In one state where some opposition has been voiced to signing a marketing agreement with the Farmers' National Grain Corporation a private commission company is boasting that it has 50 co-operative elevators tied up under a five-year binding contract to deliver grain to it in return for financing.

"The marketing agreements between the Farmers' National and the co-operatives and the co-operative's members can be complied with easily," Mr. Legge continued. "The agreements give the farmer the advantage of the competitive market at all times."

Commission merchants would have farmers believe that many mysterious evils beset the man who enters into an agreement with his own organization to sell his grain. Who can live and carry on any kind of work or occupation without many agreements, written or otherwise? You can't rent a farm or house, buy or sell anything, ride on the train, go to the movies, or in fact do anything of a business nature without entering a contract spoken or written, or performing your part of an agreement. The world's business is done by contract. It is possible that contracts are only bad when they divert grain into co-operative channels and away from private commission companies. Presumably the contract method of doing business is only virtuous when employed by the trade. It is also possible that pure selfishness and no other reason prompts the antagonism to farmers signing agreements to co-operate with each other.

Hyde Defends Act

Secretary Hyde was called upon by Vice President Broussard, of the chamber, who was presiding. Mr. Hyde's remarks follow in part:

In the beginning I want you to know that in all I shall say I have the most profound respect for the judgment, the patriotism and the ability of the members of this very great institution, but I think many important elements of this problem have been overlooked and, even at the expense of butting into a program upon which I was not invited to appear, I wish you would forbear for me for a few minutes.

It is dangerous for a grass-growing farmer to horn in between two cowboys. I realize my difficulties on that score.

Let me, first of all, take exception to the religious portion of this program. I noted with great interest the parable, the location of which I can not now cite, with reference to the storage of the surplus.

From my youth up I have listened to dissertations upon that parable but never before have I heard it applied in any such manner as it was applied here.

Most of the clergy, and I think a large proportion of the populace believe that parable was properly applicable to the sin of covetousness and to that kind of fat-headed satisfaction with things as they are; and to that I shall also refer to the egotism of the well-to-do and to the story of the glass-eyed sympathy with the underdog.

I am persuaded, however, to think that the trouble is not the abuses in this hearing. All I ask you to do is to take a look at the wild men over in the Senate and view the rising tide of discontent and then look at your whole market and see whether you want to store up your surplus and whether it is safe for you to store it.

"Thou fool, this day shall thy soul be required of thee." So much for religion.

Denies Price Pegging

More misapprehension with reference to the meaning and purpose of the agricultural marketing act have been produced here in this highly respectable and influential audience than I have read in all the farm journals in America. The Farm Board does not expect to peg prices; the Farm Board has made no attempt to peg prices; price pegging is not in the act, and price pegging is not found in our program.

You have heard from Mr. Legge the reasons which impelled the Board to project itself into the wheat situation through loans rather than through a stabilization corporation. Maybe it was a mistake; if so, I glory in it. We have made others. We shall make more.

We do not intend to do and we are not willing to do anything that is unsound economically, but I thank God, and the sentiments I utter are my own. I am serving a Chief who sees through the mistakes to the ultimate welfare of 27,500,000 American citizens.

This loan upon farm products—upon wheat for example—the Farm Board made the same mistake that a banker makes when he loans too much. If it is unsound in the Farm Board it is also unsound in finance.

As to that there can be no debate, but look at the surrounding circumstances: Everybody believed last Fall that wheat should go anywhere from $1.40 up to $1.60; the grain trade believed it, the economist believed it, we believed it—not on any fictitious price but on the unrestrained utterance of the proposition of the law of supply and demand.

I know the grain trade believed it because they bought two-thirds of the crop at that price. Then came the deflation upon the stock market in New York. The price sagged unduly under the weight of that octupus and they paid a considerable penalty for it.

Slide Continued

The slide continued just as it may have continued if a banker had loaned too much per bushel on the wheat. Was there anything unsound in it? Was there any attempt to make undue prices? We operated on the basis of the prices fixed.

I am afraid I have already exceeded my five minutes. You can not discuss this thing in five hours. Before me are, no doubt, many, many, men whose origin is not more than one generation removed from the farm; but the farm has afforded the leadership in times gone by for industrial parties, and, consider, my friends, for a minute the fact that it was the farms of America which, for the first 100 years of our history, furnished the exports and the balance of trade behind which the lands of our magnificent industrial organization has been formed.

I claim that agriculture has a bit which it is entitled to have liquidated at the hands of industry, based solely upon the contribution of men and money which agriculture has made to American industry.

Ah, my friends, not many of you are far removed from agriculture. In the name of all that is holy; in the name of all that is sacred, do not be satisfied with the United States of America—that country founded upon the proposition that all men are going to have a fair chance—do not be satisfied with your country until all men do have a fair chance.

Nobody is going to be displaced. If somebody has to move over at the dinner table to let others sit down, it is merely an evidence of a growing and enlarging country.

Jewett Scores Action Of U. S. Chamber Meet

McLean County Elevator Men Assemble at Bloomington

ELEVATOR directors, managers and patrons representing 18 farmers' elevators in McLean county met in Bloomington recently to discuss cooperative grain marketing.

Before adjournment the meeting voted unanimously to send a telegram to Alexander Legge, chairman of the Federal Farm Board, commending him for his firm stand in favor of cooperative marketing against attacks of middlemen before the national convention of the chamber of commerce.

Geo. Jewett

George C. Jewett, president of the Transportation Bank of Chicago, who was the principal speaker, defended the stand taken by Chairman Legge and Secretary Hyde, and condemned the resolution of the U. S. Chamber of Commerce as unfriendly to the farmer.

True to Form

"The U. S. Chamber of Commerce in condemning the operation of the Agricultural Marketing Act has in my opinion run true to form," said Jewett. "I have observed its attitude for a number of years, and I have found that its desire to aid agriculture stops short of any plan that would in any degree interfere with the profits of the middlemen dealing in agricultural products.

"In 1920 when we tried to develop wheat pools in this country we found business interests almost unanimously opposed. This was particularly true on the Pacific Coast and at the large grain markets of the middle west.

"The U. S. Chamber of Commerce favors the development of a farm board to tell the farmers how to run their farms, or as it stated, to give the farmers authoritative information. The chamber knows and farmers know that all this has been favorable for years and is still favorable through the Department of Agriculture, but it does not provide an answer nor a solution to the farmer's marketing problem.

Is Offer Sincere?

"The chamber of commerce now indicates that it would like to take the initiative in gathering in private funds to take the place of government funds authorized by congress for service to farmers. If this desire is an honest one I think it is well for farmers to inquire why it has not manifested itself over these many years of farm distress.

"As citizens of our nation farmers have a degree of control over a government fund which they would not possess over any fund that might be raised by such an organization as the U. S. Chamber of Commerce.

"I trust the farmers of America will not be deceived by any such program.

Always Opposed

"The business interests of this country as a whole appreciate the effect on their business, but there is a powerful group with far-reaching, interlocking strength, whose members make their livelihood from dealing in the farmers' product, and that group has always been and always will be opposed to any plan whereby the farmer follows his commodity through from his local market to the processor or exporter," the banker said. "In my judgment it would be a far wiser course if they would try to revamp their own business to the needs of agriculture and fit themselves into a sounder and more economic program of distribution. Until they do this they should discontinue passing resolutions professing a desire to aid the farmer."

Four hundred and fifty club members, representing 28 girls' clubs and 23 boys' clubs, gathered at Quincy on April 26 for the annual spring rally in Adams county.

Following a cafeteria luncheon the group paraded to the Armory for games. Club members formed a procession nearly two blocks long.

A REPORT from Alaska indicates that reindeer meat can be produced in abundance there at low cost. It is predicted that large quantities of this meat will be shipped into the United States duty free since Alaska is a part of the United States.

There are said to be three million head of reindeer in Alaska. The deer subsist largely upon abundant natural feeds, and as a result their up-keep is negligible.

A REPORT from Alaska indicates that reindeer meat can be produced in abundance there at low cost. It is predicted that large quantities of this meat will be shipped into the United States duty free since Alaska is a part of the United States.

There are said to be three million head of reindeer in Alaska. The deer subsist largely upon abundant natural feeds, and as a result their up-keep is negligible.

Some Facts About the Illinois Grain Corporation

THE ILLINOIS GRAIN CORPORATION is a Capper-Volstead co-operative formed for the purpose of serving as a regional marketing association for Illinois functioning between the Farmers' National Grain Corporation, set up under the supervision of the Federal Farm Board, and the local cooperative or farmers' elevator.

Membership

Any local co-operative grain marketing agency (in Illinois, usually means a farmers elevator) may become a member of the Illinois Grain Corporation. The farmers' elevator must make formal application for membership. This action can be taken by the board of directors of the elevator. If the application discloses that the elevator does not qualify as a Capper-Volstead co-operative it is given a reasonable time in which to do so.

Cost of Membership

For a farmers' elevator to become a member of the ILLINOIS GRAIN CORPORATION it is required that the elevator subscribe for capital stock in the regional in an amount equal to one cent per bushel based on the last three-year average annual handlings of grain. For example, if a farmers' elevator during the last three years handled an average of two hundred thousand bushels of grain each year, its stock subscription would be one cent times 200,000, which is equivalent to two thousand dollars. Ten per cent of this amount, which is $200, is payable in cash and for the remainder, five equal notes of three hundred and sixty ($360.00) dollars drawing five per cent interest, are to be given. One of these notes is due each year during the next five years. Thus the stock subscription really amounts to one-fifth of one cent per bushel each year for the next five years.

Stock Subscription Not Excessive

The capital stock requirement payable in the amount of one-fifth of one cent per bushel over a five year period is small. The wonder is that it can be done for so small an amount.

Why Subscription is Necessary

The ILLINOIS GRAIN CORPORATION is just as much a state-wide grain marketing agency as the farmers elevator is a local grain marketing unit. Too many cooperatives have either failed or been ineffective because of lack of sufficient capital.

Not a Donation

The stock purchased in the ILLINOIS GRAIN CORPORATION has a par value of one hundred dollars per share and pays seven per cent cumulative dividends. It is a sound investment in an organization which will handle the farmers' own product.

Who May Purchase Stock

The "A" Preferred Stock to which we refer above may be purchased by producers or Capper-Volstead cooperatives.

The Illinois Agricultural Association meets the requirements of the Capper-Volstead Act. It is purchasing a substantial amount of this stock.

Highest Grade Service

A successful cooperative must render service. The ILLINOIS GRAIN CORPORATION will give its member elevators unexcelled service in all departments. It will employ men who have a broad background of training in the fundamentals of grain marketing and who in addition are "cooperative-minded."

The Farmer Elevator Manager

The directors of the ILLINOIS GRAIN CORPORATION are directors of farmer elevators. They recognize that there is no substitute for a good farmers' elevator manager—one who at all times works for the best interests of grain producers.

Advantages of State-wide Co-op.

1.—Farmers' elevators banding together to form a single state-wide selling agency for using the Farmers' National Grain Corporation, set up by the Farm Board, are following sound principles as practiced in all successful lines of business and industry today.

2.—The ILLINOIS GRAIN CORPORATION will serve to concentrate a large volume of business through single selling agency hands. It will eliminate duplication of service. It will reduce *competition* in selling and in its place develop *cooperation* in selling.

3.—The foregoing system will enable the producer to place his products upon both the domestic terminal and export markets and merchandise his grain to the best possible advantage under a strictly cooperative plan.

4.—When they become members of the ILLINOIS GRAIN CORPORATION farmer elevators are becoming a part of an Illinois grain cooperative, owned and controlled by Illinois producers working for the best interests of Illinois farmers and one which will safeguard the investments of the Illinois farmer.

5.—Affiliation of the local elevator association with the ILLINOIS GRAIN CORPORATION will render the local elevator and its farmer members eligible to participate in the general activities and benefits of the Agricultural Marketing Act. These benefits include the protection of the grower in the matter of price under the Farm Board stabilization program and also the advantages of any surplus control action taken by the Federal Farm Board in the future.

6.—Illinois farmers are vitally interested in the marketing of corn. One-fourth of all the corn that goes to market in the United States is produced in Illinois. It is believed that the ILLINOIS GRAIN CORPORATION, if properly supported by the producer through his local elevator, can be very effective in raising the general price level for corn.

7.—The entire marketing structure is upon a cooperative basis and the farmer stockholder will participate in the earnings of his local elevator association, of the ILLINOIS GRAIN CORPORATION and of the Farmers' National Grain Corporation. It is believed that substantial earnings, particularly from the terminal processing and storing activities, will be returnable to farmer members.

There Must be Leaders

The strong elevators must blaze the way in this program and assume the task of leadership. The directors and leaders of the ILLINOIS GRAIN CORPORATION realize that the financial assets of our elevators were not easily accumulated. They should be safely guarded—but it is false economy to "hold the penny so close that we lose sight of the dollar beyond."

Price of Belief

From the "Price of Belief" by Bruce Barton are taken these few significant words as follows: "And there are more honest business men than crooks," I said. "More good businesses than bad businesses. More years of prosperity than of panic; more reward for faith than for doubt.

"J. P. Morgan said that he often loaned money without collateral, relying on his faith in the borrowers. When he died there were several million dollars of worthless stocks in his box, testifying that he had sometimes believed too much. But there were many times several millions of good stocks to prove that his faith had been much more often justified than not.

"It costs something to belong to the believers. But the rewards are the big successes; the big fortunes and the big fun."

THE majority of the eight baseball divisions will open the season on Saturday, May 24. Schedules of games have been largely adopted, and more than 30 teams have been practicing in readiness for the 1930 season. McLean and Logan counties scheduled practice games for May 10 and May 17, although the first official game between these two teams will not open until May 24 at Normal. Champaign will meet Ford at Champaign the same day after which the following schedule will be carried out:

May 31

McLean vs. Ford at Elliot.
Logan vs. Champaign at Lincoln.

June 7
Logan vs. Ford at Lincoln.
McLean vs. Champaign at Champaign

June 14
Logan vs. McLean at Lincoln.
Champaign vs. Ford at Elliot.

June 21
McLean vs. Ford at Normal.
Logan vs. Champaign at Champaign.

June 28
Logan vs. Ford at Elliot.
McLean vs. Champaign at Normal.

Over in division II Knox will play Peoria on May 24 in Peoria county, while Stark meets Henry at Cambridge.

May 31
Peoria vs. Stark in Stark County.
Henry vs. Knox in Knox County.

June 7
Knox vs. Stark in Stark County.
Peoria vs. Henry in Henry County.

June 14
Stark vs. Peoria in Peoria County.
Knox vs. Henry in Henry County.

June 21
Henry vs. Stark in Stark County.
Peoria vs. Knox in Knox County.

June 28
Henry vs. Peoria in Peoria County.
Stark vs. Knox in Knox County.

Other divisions have adopted similar schedules and it is anticipated that all of the 32 teams will be in action the fourth Saturday in May.

Open at Peoria

KNOX and Peoria counties will open the baseball season in that division with a game at Peoria on Saturday, May 24. The following Saturday Knox will play Henry county on its home grounds. On June 7 Knox and Stark meet in Stark county, and on June 14 Knox and Henry counties will meet at Cambridge. It will be Knox vs. Peoria in Knox county, June 21, and Knox vs. Stark in Knox county, June 28.

D. P. Robinson of Cambridge was elected divisional chairman and dictator at a recent meeting in the Farm Bureau office at Galesburg.

It was decided that the home teams should furnish one umpire for each game. The visiting team will have the privilege of providing a second umpire if it so desires. Games will be called at two o'clock.

The following men attend the meeting: E. E. Brown, Stark county; D. P. Robinson and J. R. Johnson, Henry county; J. W. Whisenand and Max J. Wyman, Peoria county; T. J. Sullivan and F. G. Campbell, Knox county.

Champaign County League

CECIL HUDSON of the Urbana unit was elected manager of the Champaign County Farm Bureau baseball team at a meeting on April 29.

On May 24 Champaign will play Ford county at Champaign, and on May 31 Champaign will play Logan at Lincoln.

Seven community Farm Bureau teams are expected to compete in the county league. Unit teams are required to play at least six players who are Farm Bureau members or who are from families of members.

Tax Legislation Now Before Gen. Assembly

(Continued from page 3)

state. Any such funds which may be allocated to any county of more than 100,000 population, according to the last preceding federal census, may be further distributed among the several taxing districts situated wholly or partly therein as the General Assembly shall from time to time direct."

A highly desirable provision of a revenue amendment suggested by the I. A. A. will give the General Assembly power to classify or sub-classify any object or subject of taxation and may exempt any class or subclass thereof from taxation by one method if it is taxed directly by any other method or methods. The proposal provides that all real estate shall be in one class, except that mineral lands and lands devoted to reforestation shall be in different classes.

Representatives of the Association will be on hand throughout the special session carefully watching all developments, that farm and home owners may be relieved of at least part of the unequal and unjust tax burden they are now carrying.

Co-op Marketing From Station WENR

"New styles in Co-operative Live Stock Shipping Associations" was the subject of a radio talk by Ray E. Miller, director of livestock marketing, from Station WENR, Chicago, on Tuesday, May 13.

Several more talks to be delivered by marketing officials are as follows:

Tuesday, May 20th: "A Practical Cream Marketing Program," F. A. Gougler, director produce marketing.

Tuesday, May 27th: "Problems Confronting the Illinois Dairyman in the Co-operative Marketing of His Product," A. D. Lynch, director of dairy marketing.

Tuesday, June 3d: "From Producer to Consumer," Jack Connery, manager, Quincy Cooperative Marketing Association.

The talks will be broadcast at 7:30-8:00 p. m. *central standard time.*

Seek Clarification Motor License Law

LEGISLATION providing for the exemption of farm tractors which use the public highways only when going from one field to another, from paying the state motor license tax will be sought by the Illinois Agricultural Association in the next regular session of the General Assembly.

The I. A. A. has had many inquiries from its members regarding the licensing of farm tractors using the public highways in going from field to field. The Association has interested itself in this question and has received information from responsible authorities to the effect that no effort will be made to compel farmers to buy motor licenses for tractors pending the passage of legislation clarifying the law on this point.

The Agreement System is Sound

THE enemies of co-operative grain marketing are not nearly so concerned over the chances of its failure as over the likelihood of its success according to Harrison Fahrnhopf, director of grain marketing.

If the five-hundred farmer elevators in Illinois would agree or contract to handle all of their grain through single selling agency hands as is contemplated by the Illinois Grain Corporation, they would not only be adopting sound business principles but they would cease selling in competition with each other.

To substantiate this view Fahrnhopf points to a recent statement by Alexander Legge which appeared in Chicago newspaper:

"Replying to critics who have protested that the farm board is forcing farmers' co-operatives into distasteful contracts for the marketing of their grain, Chairman Alexander Legge declared today that the terms of the farm board compare favorably with those always required by commission companies.

" 'Some of the private commission companies for years have required cooperatives borrowing money from them to sign a binding marketing agreement,' said Mr. Legge. 'In one state where some opposition has been voiced to signing a marketing agreement with the Farmers' National Grain Corporation a private commission company is boasting that it has fifty co-operative elevators tied up under a five year binding contract to deliver grain to it in return for financing.'

"The marketing agreements between the Farmers' National and the cooperatives and the cooperative's members 'can be complied with easily,' Mr. Legge asserted, adding that the agreements give them the advantage of the competitive market at all times.

"Under the provisions of the agreements, he explained, the farmer or his cooperative may market the grain for cash in the competitive market on the day of delivery at the highest price bid; they may store grain in public warehouse and borrow money on that grain pending ultimate sale, which can be made only at the option of the owner; and the farmer may enter his grain in a common pool and borrow on it in public warehouses, the final settlement to be based upon an average for the period of the pool."

New Definition—An optimist is a man who buys a car on time to go looking for a job.

Business Note—A real executive is one who can return a letter three times to a red-headed stenographer.

Adopt Definite Plan of Bureau Organization

Year 'Round Project Seen as Way To Build Membership

A DEFINITE plan for carrying on organization work through the state was adopted on April 21 and 22 at a conference of district organization managers and the I. A. A. organization department in Chicago. C. E. Bamborough, chairman of the organization-information advisory committee, and all the district managers attended the conference.

Geo. E. Metzger

Under the new plan organization will become a major county project of every Farm Bureau in the state. The plan involves the selection of a county organization committee of three members and an organization project leader in every township or unit if the county is organized that way. It is recommended that the organization committee of three be appointed by the Farm Bureau president with the approval of the executive committee.

Details of Plan

Each township organization leader is to have a list of the Farm Bureau members and non-members in his township; illustrations setting forth the accomplishments of the Farm Bureau and the Illinois Agricultural Association; and a supply of membership agreement blanks and other necessary supplies. It is contemplated that each township will be placed on a quota basis and that the township leader will assume responsibility for securing a quota. The project leader within the township will appoint his helpers and form his own organization.

Under the new plan organization will be a 12 months a year project. Periodic meetings of the organization leaders will be held and the I. A. A. district managers are to work directly with this group checking up on work and results as frequently as possible.

75,000 Is Goal

The organization-information conference at the last annual meeting of the Illinois Agricultural Association went on record unanimously to strive for 75,000 members by the end of 1930. It is realized that if this goal is to be reached there must be well-oiled organization machinery operating in every county. The district managers will be expected to have that organization machinery set up in every county by fall.

Secretary and Director of organization, George E. Metzger, believes that this plan when put into operation will get results. Mr. Metzger points to the fact that Farm Bureau membership in Illinois is on the increase and that a gain has been made every month since September, 1929. This gain has averaged 495 members per month. The largest increase of 1933 members was secured last October.

Preparation is now under way for membership drives in Cumberland, Clay, Tazewell, and Gallatin counties. The Tazewell County Farm Bureau will concentrate its force on May 28 when it proposes to sign 1,200 members which means a substantial increase over the present membership.

Mercer County Folks Visit I. A. A. Office

A DELEGATION of approximately 250 men and women from Mercer county who toured through the Union Stock Yards as guests of the Chicago Producers Commission Association, visited the I. A. A. offices on Wednesday, April 30.

Many of the delegates expressed surprise at the extensive offices now occupied by the I. A. A. and associated companies in the Transportation Building.

The group came by special train over the Burlington railroad, arriving early in the morning and departing late the same evening.

The tour was conducted by the Mercer County Farm Bureau. Farm Adviser J. E. Harris, P. B. Scott, Miss Zentmire, Farm Bureau office secretary, and local officials accompanied the delegation. They were entertained at luncheon by Swift & Company and Armour & Company. It was one of the largest groups that ever toured through the Union Stock Yards.

Illinois Woman Writes Play

THE Farm Bureau play "Running Water" will feature the May 24 broadcast of the American Farm Bureau over a chain of 44 stations. The Farm Bureau program will go on the air at 11:45 a. m. central standard time from the Chicago studios of the National Broadcasting Company.

The play "Running Water" was written by Miss Dorothea Barton of Elizabeth, Jo Daviess county, Illinois, and was one of 12 prize-winning plays selected among the large number in the American Farm Bureau Federation contest.

The Farm Bureau has published and is now circulating the prize-winning plays.

Milk $1.60 at St. Louis

Milk producers in the St. Louis territory will receive $1.60 per cwt. for 3.5 per cent milk delivered in May according to a recent announcement of the dealers.

This price includes the premium paid for T. B. tested milk. It is 10 cents more than the current price of $1.50 per cwt. paid for Surplus Milk at Chicago where dairymen are represented by the Pure Milk Association.

Will Incorporate Live Stock Marketing Assn.

Name Directors Subject to Approval of Incorporators

STEPS toward incorporating the new million dollar national livestock marketing association were taken at a meeting of livestock producers and members of the Federal Farm Board in Chicago on May 6. Incorporation papers were to be filed in Delaware without delay. It is estimated that the marketing association will control approximately 52 per cent of the co-operative livestock marketing of the country, E. A. Beamer of Blissfield, Michigan, president of the National Livestock Producers Association, and one of the three incorporators, stated.

J. R. Fulkerson of Jerseyville, Ill., and O. O. Wolf of Kansas City were named as the other two incorporating officers who will also become directors.

Here Are Directors

The following livestock producers were nominated to the board subject to the approval of the incorporators: Murray Barker, Indianapolis; Henry H. Parke, Genoa, Ill.; George Wilson, Peoria, Ill.; Oscar Swank, Evansville, Ind.; E. C. Rector, Pittsburgh, Pa.; Joe L. Snook, Sioux City, Iowa; Lee Highlen, Cincinnati, Ohio; and Ben B. Brumley, Cleveland, Ohio, each representing a branch of the National Livestock Producers Association. In addition there were named: H. L. Kokernot, Fort Worth, Tex.; L. O. Greaser, Chicago, National Order Buying Association; John O'Mealy, Michigan Livestock Exchange, Detroit, and Walter Hagen, Western Cattle Marketing Association of California.

President Earl C. Smith of the I. A. A. presided at the afternoon session of the livestock growers who represented most of the co-operative livestock marketing organizations of the country.

Two subsidiaries of the association will also be incorporated with identical directorates, the National Feeder and Finance Corporation, and the National Live Stock Publishing Association.

Alexander Legge, chairman of the Farm Board, who attended the meeting along with Vice-Chairman James C. Stone and C. B. Denman, livestock member predicted that the new setup will give stock farmers ample opportunity to develop a unified organization.

The Champaign County Farm Bureau is organizing a co-operative oil company. Three hundred and thirteen shares of stock amounting to $7,825 had been subscribed the first week in May.

Secretary Geo. E. Metzger will address the annual meeting of the Ogle County Farm Bureau on June 3.

Grain Marketing

COWAN A. GRAY, secretary of the Southwest Co-operative Wheat Growers Association, and Arthur T. Riley, manager of the Salina, Kansas, branch of the Farmers Union Jobbing Association of Kansas City have accepted positions with the Farmers National Grain Stabilization Corporation.

GEORGE S. MILNOR, formerly president of the Sparks Milling Company of Alton, Ill., was recently elected president of the Grain Stabilization Corporation, and general manager of the Farmers National Grain Corporation, according to n announcement by President C. E. Huff.

Joshua M. Chilton, formerly manager of the grain merchandising department of the Checkerboard Elevator Company of St. Louis, was named as assistant to the general manager.

Mr. Chilton has had 20 years' experience in the grain business at St. Louis, Kansas City, and Denver.

R. T. Paradis of Minneapolis will continue as a representative of the Farmers National Grain Corporation on that market.

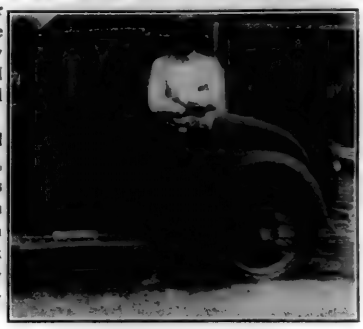
WALTER I. BEAM is the new treasurer of the Farmers National Grain Corporation. He served as controller of the $500,000,000 U. S. Grain Corporation during the war.

Deposits of potash salts of such thickness and purity that they may be mined cheaply have been discovered by the Bureau of Mines in Texas and New Mexico.

The principal potash mineral disclosed by the government drilling is polyhalite, a sulphate of lime, magnesia, and potash, which contains an average of 12 to 15 per cent of potash (K_2O).

Milk Bond Law

JUSTICE Pound of the New York State Court of Appeals recently upheld the law requiring milk dealers to take out a license to deal in milk and to file a bond to insure payment for milk to producers in that state.



The law was attacked as unconstitutional and so held by the Appellate Division at Rochester. The State Court of Appeals reversed the decision of the lower court and so now the law is sustained by the court of last resort in New York state. The commissioner of agriculture had $2,000,000 of bonds on file.

Speak For Limestone-Phosphate Service

The following letter received by R. J. Laible, farm adviser in Marshall-Putnam county came in response to an inquiry regarding results from the use of rock phosphate.

"MY LANDLORD, Mr. James Foster of Varna, has purchased in the last two years, more than 75 tons of raw rock phosphate for use on the farm which I operate in Roberts Township, Marshall County.

"The use of this phosphate has enabled us to greatly increase our yield of grain, and it has also helped us in securing stands of red clover. I am writing to let you know that I appreciate the work the Farm Bureau has done in helping me sell the rock phosphate idea to my landlord, as it is now working out to both his advantage and my own.

Carl O. Johnson, Marshall County

"Inasmuch as both Mr. Foster and myself are Farm Bureau members, we of course appreciate the 50c per ton discount received on these shipments. In addition, we know that we are getting what we pay for because of the analysis of each carload by the Illinois Agricultural Association when the phosphate is loaded at the mines in Tennessee. I want you to put me down as one hundred per cent in favor of the work the Farm Bureau is doing in this direction."

CARL O. JOHNSON.

Stanard Heads New Dairy Products Co.

STILLMAN J. STANARD, of Edgar county, former state director of agriculture and well known to farmers throughout Illinois, is president of the newly incorporated Egyptian Dairy Products Company which operates butter, ice cream, and milk plants at McLeansboro, Fairfield, and Eldorado in southern Illinois. The new organization was incorporated early this year. The supply of milk and cream for the first plants is being bought in Hamilton, Saline, Wayne, White, Gallatin, and adjoining counties.

S. J. Stanard

The McLeansboro Creamery Company, one of the three plants operated by John Stelle, secretary of the new organization, bought the first co-operative pool cream in the state according to Mr. Stanard. Farmers about Dahlgren in Hamilton county organized a co-operative cream pool in the winter of 1922-'23 with the help of Burt Abney then farm adviser in Jefferson county. This cream pool not only obtained a better price for local producers but it influenced the organization of similar co-operative pools in southern Illinois.

Competition For Cream

The Dahlgren pool later disintegrated, but now assistance is being given by the Jefferson County Farm Bureau in reorganizing it. Swift & Company has been buying cream about Dahlgren, paying three cents above the station price. Local competition for cream has influenced buyers to offer a higher price during recent weeks.

The Egyptian Dairy Products Company is now getting the total output of the co-operative produce marketing association at Enfield in White county, which controls about 75,000 lbs. of butterfat a year.

The company which Stanard heads is co-operating with the Illinois Produce Marketing Association under the new marketing agreement announced a short time ago.

Appel Disappears

THE advisability of bonding treasurers of local mutual insurance companies as a matter of good business judgment is revealed in a recent press report. Edward O. Appel, secretary of three mutual insurance companies in Madison county, Ill., according to press reports, disappeared on April 29 when officials told him they planned an examination of his books.

Charles Rozier told authorities that there is an apparent shortage of $15,000 to $20,000 in Appel's accounts. Policyholders in insurance companies endorsed by the Illinois Agricultural Association have their investments in these organizations protected since the officers charged with responsibility for moneys are bonded.

Iroquois' Schedule

THE Iroquois County Farm Bureau baseball team has adopted a schedule of games as follows:

May 31 Iroquois vs. Grundy at Morris
June 14 Iroquois vs. LaSalle at Watseka
June 28 Iroquois vs. Kankakee at Kankakee
July 12 Iroquois vs. Grundy at Watseka
July 26 Iroquois vs. LaSalle at Ottawa
Aug. 9 Iroquois vs. Kankakee at Watseka

H. G. Pendergrast has been appointed as manager. Baseball suits and equipment have been purchased in readiness for the first game.

Adopt Definite Plan of Bureau Organization

Year 'Round Project Seen as Way To Build Membership

A DEFINITE plan for carrying on organization work through the state was adopted on April 21 and 22 at a conference of district organization managers and the I. A. A. organization department in Chicago. C. E. Bamborough, chairman of the organization-information advisory committee, and all the district managers attended the conference.

Geo. E. Metzger

The commissioner of agriculture had $2,000,000 of bonds on file.

Speak For Limestone-Phosphate Service

The following letter received by R. J. Laible, farm adviser in Marshall-Putnam county came in response to an inquiry regarding results from the use of rock phosphate.

Carl O. Johnson, Marshall County

"MY LANDLORD, Mr. James Foster of Varna, has purchased in the last two years, more than 75 tons of raw rock phosphate for use on the farm which I operate in Roberts Township, Marshall County.

"The use of this phosphate has enabled us to greatly increase our yield of grain, and it has also helped us in securing stands of red clover. I am writing to let you know that I appreciate the work the Farm Bureau has done in helping me sell the rock phosphate idea to my landlord, as it is now working out to both his advantage and my own.

"Inasmuch as both Mr. Foster and myself are Farm Bureau members, we of course appreciate the 50c per ton discount received on these shipments. In addition, we know that we are getting what we pay for because of the analysis of each carload by the Illinois Agricultural Association when the phosphate is loaded at the mines in Tennessee. I want you to put me down as one hundred per cent in favor of the work the Farm Bureau is doing in this direction."

CARL O. JOHNSON.

Stanard Heads New Dairy Products Co.

STILLMAN J. STANARD, of Edgar county, former state director of agriculture and well known to farmers throughout Illinois, is president of the newly incorporated Egyptian Dairy Products Company which operates butter, ice cream, and milk plants at McLeansboro, Fairfield, and Eldorado in southern Illinois. The new organization was incorporated early this year. The supply of milk and cream for the first plants is being bought in Hamilton, Saline, Wayne, White, Gallatin, and adjoining counties.

S. J. Stanard

The McLeansboro Creamery Company, one of the three plants operated by John Stelle, secretary of the new organization, bought the first co-operative pool cream in the state according to Mr. Stanard. Farmers about Dahlgren in Hamilton county organized a co-operative cream pool in the winter of 1922-'23 with the help of Burt Abney then farm adviser in Jefferson county. This cream pool not only obtained a better price for local producers but it influenced the organization of similar co-operative pools in southern Illinois.

Competition For Cream

The Dahlgren pool later disintegrated, but now assistance is being given by the Jefferson County Farm Bureau in reorganizing it. Swift & Company has been buying cream about Dahlgren, paying three cents above the station price. Local competition for cream has influenced buyers to offer a higher price during recent weeks.

The Egyptian Dairy Products Company is now getting the total output of the co-operative produce marketing association at Enfield in White county, which controls about 75,000 lbs. of butterfat a year.

The company which Stanard heads is co operating with the Illinois Produce Marketing Association under the new marketing agreement announced a short time ago.

Appel Disappears

THE advisability of bonding treasurers of local mutual insurance companies as a matter of good business judgment is revealed in a recent press report. Edward O. Appel, secretary of three mutual insurance companies in Madison county, Ill., according to press reports, disappeared on April 29 when officials told him they planned an examination of his books.

Charles Rozier told authorities that there is an apparent shortage of $15,000 to $20,000 in Appel's accounts. Policyholders in insurance companies endorsed by the Illinois Agricultural Association have their investments in these organizations protected since the officers charged with responsibility for moneys are bonded.

Iroquois' Schedule

THE Iroquois County Farm Bureau baseball team has adopted a schedule of games as follows:

May 31 Iroquois vs. Grundy at Morris
June 14 Iroquois vs. LaSalle at Watseka
June 28 Iroquois vs. Kankakee at Kankakee
July 12 Iroquois vs. Grundy at Watseka
July 26 Iroquois vs. LaSalle at Ottawa
Aug. 9 Iroquois vs. Kankakee at Watseka

H. G. Pendergrast has been appointed as manager. Baseball suits and equipment have been purchased in readiness for the first game.

Observations

THE ideas of the national chamber of commerce about the farm problem as evidenced by action taken in the recent convention at Washington appear to have undergone decided changes since the Agricultural Marketing Act became operative. Not more than a year ago, the chamber was shouting for co-operative marketing with federal assistance as the way to farm relief. Today it is for u Farm Board with clipped wings, without money, and inactive except to provide information and give the farmer advice.

In other words the chamber now stands for a "do-nothing" policy. Secretary Hyde aptly named it "fat-headed self-complacency," content with things as they are, the laissez-faire policy. The loud wailing of commission men who fear the competition of effective co-operative terminal marketing associations created all the disturbance. The chamber of commerce resolution thus places the organization on record as against anything that promises to help the farm industry if it interferes with the present tolls exacted by any of its members.

There's nothing illegitimate nor criminal about my group fighting for economic advantage. Just so it is honest in doing so and does not misrepresent its intentions. The national chamber of commerce a short time ago campaigned for members among farmers claiming that it was doing much for agriculture, apparently to justify the request for contributions. When it came to a show down, the organization went on record against co-operative marketing, and against the interests of the farmer.

Alexander Legge, the scrappy chairman of the Federal Farm Board bluntly told the disappointed business men, "There has been considerable evidence the last several months that entirely too many of your members were for the principle of co-operation only so long as it didn't work." Mr. Legge and Mr. Hyde made a host of fast friends among American farmers when they stood their ground against the selfish attacks of insincere men.

Our friend and contemporary, Bill Stahl, of the Farmer's National Grain Corporation describes the pilgrimage to Washington in picturesque terms as follows: "Several carloads of grain traders invaded Washington a few days ago for the purpose of asking the Farm Board, the Congress or somebody to keep the farmers from shaking them off. When Coxey's army invaded the capital, you'll remember, it hoofed it. The more modern army, of grain traders, travels in parlor cars. Paid for by whom, please? Why, by the grain producers, of course. The grain trade's wailing that the government has gone into the grain business is, of course, mere camouflage. The real fear is that the profits of grain marketing may get into the farmers' hands.

"The co-operative marketing movement seeks to tear down no business structure. If, in its development, older marketing systems become obsolete and pass out of the picture, it is merely history repeating itself. There is no sound reason why the profits that come from the marketing of a product should not belong to the producers of the product.

"Vast elevator and warehousing systems have been built from the profits of grain handling and processing. Farmer co-operative marketing contemplates ownership and control of these systems by those who made them possible.

"Enemies of co-operative grain marketing are not nearly so concerned over the chances of its failure as over the likelihood of its success." E. G. T.

Franklin County Reassesses

A REASSESSMENT of all property is now under way in Franklin county. The assessment was begun following a meeting of the local officials with Chairman William H. Malone of the State Tax Commission who pledged the aid of that body in bringing about a fair and equitable valuation of all property.

According to press reports the system used for assessing property will be patterned after that used in Cook county. Each assessor, according to this plan, will be given written instructions so that uniformity will prevail in the valuation of property.

No reassessment will be ordered in Williamson county at the present time because of the depressing state of finances in that county following the closing of a number of banks it was reported. The Franklin and Williamson County Farm Bureaus together with the I. A. A. appeared before the Tax Commission last year asking that inequalities in the valuation of farm lands and city property be eliminated. Orders of reassessment were issued, but were later rescinded when local officials agreed to reassess property in 1930.

Soybean Marketing

JOHN W. ARMSTRONG, of Champaign, president of the Soybean Marketing Association, reports a membership of 2,187.

A plan of merchandising the 1930 crop will be announced in the near future.

The members of the Soybean Marketing Association it is estimated will produce 1,600,000 bushels of beans this year to be sold through the association.

Readers' Forum

Editor I. A. A. RECORD:

"I HAVE just read the new I. A. A. RECORD. It is very attractively put up and full of good information."

J. W. Whisenand, Adviser,
Peoria County Farm Bureau,
Peoria, Illinois.

From a Railroad Man

HAVING seen several statements and arguments in the daily press by different organizations which seemed to me to be detrimental to the interests of the American farmer, and being interested in the farmers' welfare through the ownership of some Joint Stock Land Bank stocks, the thought occurred to me that it was my duty to look after my own interests which I could best express by joining the Farm Bureau. Surely farming, our largest American industry, is entitled to some consideration by our government. In view of the taxes that the farmers pay, they are, I feel, entitled to all the help our President and Congress are giving them through the present Farm Board.

I paid $150.00 per share for stock in the Joint Stock Land Bank, which shares have dwindled to about $10.00 per share through the inability of the farmer to pay even the interest on the loans our bank made on farm land. My viewpoint is that if the farmer gets in a fairly prosperous condition, my land bank stock will again rise in value, and if the small investment of $15.00 per year in the Farm Bureau will give them my moral and financial assistance, it is money well spent. The rise of $15.00 in one share will pay a whole year's dues in the Farm Bureau.

I am not a farm owner, nor interested in any farm lands except through the ownership of stock in the Joint Stock Land Bank. I will write to our president that he might suggest to other owners of Joint Land Bank Stock that they can further their best interests by joining their local Farm Bureau.

Jacob Buss, Boone county, Ill.

Mr. Buss is a railroad trainman at Belvidere and now a member of the I. A. A. and Boone County Farm Bureau.

A State Play Tournament sponsored by the Farm Bureaus of Champaign, Kankakee, LaSalle, and DeKalb counties will be held at the Little Theatre of the University of Illinois in Urbana at 8:00 P. M. on Friday evening, May 23.

Illinois Agricultural Mutual Insurance Co.,
608 South Dearborn Street,
Chicago, Ill.

This will acknowledge receipt of your letter of April 21st, and your check for $48.50 covering the loss which I sustained as a result of my car catching on fire.

Please accept my thanks for this check and the prompt manner in which you adjusted this claim. It is a pleasure to insure with companies like yours. N. E. Dressor, Bond County, Ill.

Cream Producers and Butter Mfgrs. Cooperate

First Contracts with Ill. Produce Marketing Assn. Arrive

AS we go to press the first signed agreements between the Illinois Produce Marketing Association and butter manufacturers who buy Illinois cream are being received.

Signed contracts have come in from the Pioneer Creamery Co. of Galesburg, Ernster Bros. of Chicago, which are now buying the total output of five local produce marketing associations, the Murphy Butter and Egg Company, Chicago, and the Egyptian Dairy Products Company of McLeansboro, Illinois.

The new plan of producer-manufacturer co-operation recently announced in the press represents a departure from the usual method of marketing farm products. The marketing agreement is to run between the Illinois Produce Marketing Association, a co-operative representing some 10,000 organized producers of butterfat from 36 counties of the state, and butter manufacturers who buy Illinois cream.

The plan provides that the farmers are to share equally with processors in all profits left after expenses of operation are paid and three-fourths of a cent per lb. is allowed the manufacturer as interest on invested and operating capital and good will.

The price schedule varies with the 90 score Chicago butter market as follows:

Price Range	*Premium*
25—29¾	Minus ¾¢
30—34¾	Plus ¼¢
35—39¾	" 1¼¢
40—44¾	" 2¼¢
45—49¾	" 3¼¢
50—54¾	" 4¼¢
55—59¾	" 4¾¢

The premiums above are added to the Chicago 90 score butter prices on a sliding scale basis.

Three Grades Cream

Three grades of cream are to be recognized, namely, sweet cream, No. 1 sour cream, and No. 2 sour cream. The prices quoted above apply on No. 1 sour cream which ranges in acidity from .3 to .6 per cent at point of delivery. When 25 per cent of the total current receipts at any local marketing unit consist of sweet cream, the processor agrees to pay for the sweet cream on the basis of the foregoing schedule based on the 93 score butter price. The No. 2 sour price is based on the 88 score butter market and onion cream is to be docked five cents per lb. below the No. 2 price.

The Marketing Association is to have exclusive control of the weighing, grading, and testing of all butterfat, and to assume all obligations for the cost of such weighing, grading, and testing. The processor has the privilege of rechecking on grades, weights, and tests.

Eliminate Waste

"One of the chief advantages of this co-operative agreement," states Frank Gougler, director of produce marketing for the Illinois Agricultural Association, "is that much waste and expense in assembling the product will be eliminated. An effort will be made to allocate cream to the nearest butter manufacturer and save criss-cross hauling," continued Gougler. "Wasteful competition between processors fighting to secure a larger volume of the raw product will eventually be eliminated when the producers of every county are organized.

"At present some towns have as many as five or six local cream buying stations representing as many manufacturers. By co-operative organization farmers hope to replace these private cream stations in a given town, with one co-operative marketing unit where all the cream in the adjacent territory will be assembled and sold through one channel."

Committee of Three

The administration of the plan is left to a committee composed of three producer and three processor representatives. The following have been designated to serve until their successors are chosen: Earl C. Smith, president, and Geo. E. Metzger, secretary of the Illinois Agricultural Association; and S. M. Elkins, president of the Illinois Produce Marketing Association for the producers. For the processors; T. F. Canfield of Swift & Co., Chicago; T. A. Borman of the Beatrice Creamery Co., Chicago; and N. W. Hepburn of the Peoria Creamery Co., Peoria.

The processors on the Administration Committee are elected for one year. Each processor signing the agreement is entitled to one vote, and in addition to one vote, each is entitled to another vote for every 500,000 lbs. or major fraction thereof, of butter churned in plants receiving sour and sweet cream from the Association during its last fiscal year.

This Committee is charged with the arbitration of all controversies, allocation and reallocation of cream to the processors, adjustment of grades, weights, and tests when differences arise, and encouragement of co-operative produce marketing.

May Select Referees

In case of disagreement the members of the Administration Committee are to select two referees; one representing the producers, the other the processors. If they cannot agree the two referees shall select an umpire. The unanimous decision of a matter by the referees, or a majority vote of the referees acting with the umpire will be binding upon all parties.

If the producers are not satisfied with the report and accounting of the processors on net profits, the Administration Committee shall appoint an independent auditor to check all records. The finding of such report and audit shall be binding upon both parties, and the cost thereof shall be borne equally by processors and producers.

Supply Cans, Etc.

The manufacturer agrees to furnish all cans, tags, seals, and other equipment used in the transportation of cream. If farmers can deliver cream cheaper to the manufacturing plant than the present cost, they will have the right to do so, the processor allowing the producer the true per lb. cost of transportation from the country assembling point to the plant.

The right of contract is extended to all processors who buy cream in Illinois. The contract is to remain in force until December 31, 1931, and continues thereafter unless either party gives notice during September or October of its desire to terminate the agreement, at the end of that year.

The Illinois Produce Marketing Association already has a membership of 22 counties. The rest of the county co-operatives are expected to affiliate with the State Association shortly.

Several Conferences

The agreement was drawn up following frequent conferences between producers and processors during the past six months.

"The producers recognize that the building of co-operative butter manufacturing plants would more or less duplicate those already in existence," according to Mr. Gougler. "The purpose of the plan is to promote efficiency in the assembling and manufacturing of butterfat so as to give the manufacturer a chance to make a fair profit and at the same time to assure the producer a fair price."

Gougler predicts that the plan will have a far-reaching influence in improving the quality of Illinois butter because of the grading system established, shortening of the haul to the creamery, and payment based on quality of cream delivered.

NOTICE

ELECTION OF DELEGATES ILLINOIS AGRICULTURAL ASSOCIATION

Notice is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the months of May and June, 1930, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureaus and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of Association, including the election of officers and directors as provided for in the by-laws of the Association.

During the month of June, such meetings will be conducted in the following counties: Ogle, June 3.

During the month of July no such meetings will be conducted.

Signed

G. E. METZGER, Secretary.

April 4, 1930.

Stomach Ache and Appendicitis

PROBABLY no other minor ailment carries with it the seriousness and takes the toll in human lives as the old fashioned "stomach ache." This no doubt is due to the attitude of the lay people and the physician regarding this condition. From time memorial we have all had stomach aches and by virtue of this we attach very little importance to it. Unfortunately certain percentages of our so-called stomach aches are the first symptoms of an Acute Appendicitis.

Dr. John E. Boland

IT is not an easy matter to differentiate between a true Appendicitis and an ordinary stomach ache. The first symptom of Acute Appendicitis is a pain or a severe cramp in the pit of the stomach. As a rule for the first twelve hours of the disease the pain is generalized throughout the abdomen. After that the condition is prone to localize and the pain is more pronounced in the lower right side. The abdominal pain is followed within a very short time by a nausea. This is followed by vomiting. In this we have the three cardinal symptoms of Appendicitis, viz., pain in the abdomen, nausea and vomiting. Always think of Acute Appendicitis in all cases of stomach ache that do not yield immediately to the ordinary treatment. Do not continue to give cathartics as this is positively contra-indicated in Appendicitis.

IT is rather unfortunate that the causes of stomach ache and Appendicitis are approximately the same, viz., over-eating, constipation, diarrhea, eating of certain foods such as green apples, cucumbers, fresh pork, etc. For this reason individuals, especially children, are treated for stomach cramps and the possibility of an Acute Appendicitis is lost, due to the fact that they attribute the condition to the eating of certain foods.

APPENDICITIES in children is much more serious than in adults, due to the fact that the appendix rapidly goes on to suppuration and is apt to rupture within twenty-four hours. The diagnosis in children should be made early and the operation should take place within the first eighteen hours.

Appendicitis is a very simple condition when operated early. The mortality rate after an appendix has ruptured is approximately 46%. In all stomach aches that do not yield immediately to treatment consult your doctor at once, insist on an early diagnosis and do not hestitate if your physician advises an operation.

First Agency Convention

THE first convention of all the general agents of Country Life was held at the Farm Bureau hall in Bloomington, Ill., on May 14. The meeting was called to order by H. O. Henry, president of the General Agency Club. The general agents were introduced by H. H. Glick, vice-president.

Greetings from President Earl C. Smith were read by Manager L. A. Williams, and the program was under way by 10:15 a. m. Seventy-two general agents attended and the total attendance including candidates for general agencies and insurance committees was 122.

Addresses were made by H. O. Henry, V. Vaniman, W. E. Hedgcock, Claude Hicks, A. P. Cooper, Otis Kercher, Homer Hitchcock, G. O. Chenoweth, M. E. Roberts, G. R. Williams. Manager Larry Williams talked on the subject of "The Easiest Way is Usualy Hard." Ways and means of acquiring county quotas were discussed by V. Vaniman of the I. A. A. Insurance Department.

Open Forum Held

The open forum in the afternoon brought forth a barrage of questions and comment. "Without any question this enthusiastic meeting was helpful to all the participants and will result in more intelligent solicitation and organization in all of the counties," said Mr. Williams.

A demonstration of team work was put on by Messrs. Chenoweth and Oxley, who solicited Larry Williams as the prospect. They kept the entire audience interested, and resulted in breaking down the idea which many amateurs had, that they should never use the general agent, or that the general agent should never use a special agent in soliciting unless he is sure he can't sell the case himself.

Advantage Team Work

"The fact that two men enlist greater confidence and bring out more information of an assuring nature to the prospect than is possible for the individual to command, is the greatest advantage of team work," said Williams. "Without any question the business written by two men working together will be more than three times what either individual can do working alone. This has been proved time and again by expert solicitors working country business, where one man is the local man, the other man the general agent. The prospect would much prefer to have two men call, if one man is a local man. The prospect wants to place the responsibility on someone who lives in his community, someone who has to answer for any mistakes."

Interesting discussions of new developments of the company, and the experience of other agents, gave the convention a tone of information and enthusiasm which was keenly appreciated throughout.

Country Life has approximately $28,500,000 of insurance in force at the present time.

Ill. Wool Growers Have Chance To Co-operate

Plan To Work With National Wool Marketing Corporation

A PLAN for making available to Illinois farmers the Federal Farm Board's co-operative wool marketing program is being developed by the I. A. A.'s livestock marketing department.

County wool marketing conferences to be called by Farm Bureaus interested in this project are proposed for Friday, May 23. Each county, of course, will have the privilege of naming another date if such action seems more advisable.

Since Illinois does not have a regional wool marketing association the privilege of using the facilities of the Central Wool Marketing Corporation of Concord, New Hampshire, which in turn is affiliated with the National Wool Marketing Corporation, the Farm Board organization with headquarters at Boston, Mass.

Ship to Boston

The plan provides for assembling wool from a given county at a centrally-located place, and shipping direct to Boston. Each grower's wool will be properly identified with tags and on arrival at Boston will be weighed and graded. The wool will be sold by the National Wool Marketing Corporation.

The Corporation is prepared to advance to wool growers 90 per cent of the value of clip based on the Boston price less marketing costs. Thus, if wool is actually worth 30 cents in the grease at Boston and assuming a total expense of five cents per pound, the amount of the advance would be 90 per cent of 25 or 22.5 cents per pound, which in many localities exceeds the price now being offered. This advance will be made direct to growers as soon as the wool is appraised at Boston.

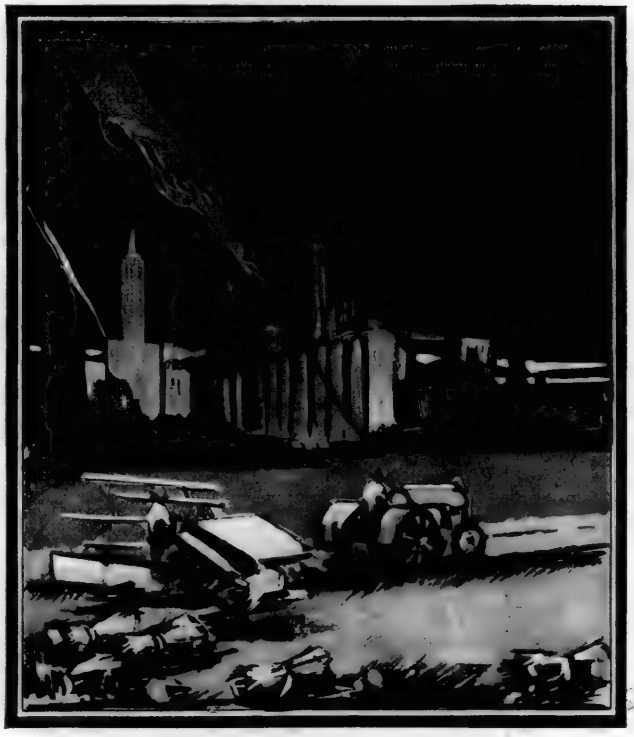
Members interested in pooling their wool can secure additional information at the County Farm Bureau office.

Meat And Hard Times

The hard times of the past winter and early spring have had only a slight effect on the demand for meats, says the Bureau of Agricultural Economics.

Meat sales during the four months November, 1929 to February, 1930, compare favorably with the corresponding months of the previous winter. Prices have been influenced, says the report, chiefly by changes in supply.

Worth a Lot



The livestock sanitation and disease prevention teachings of the Farm Bureau are worth a lot to me. Through our organized Farm Bureau buying power we have been able to reduce serum costs nearly one-half which alone means an annual saving of $75.00 on our farm.

F. R. Hubert,
Saybrook, McLean County.

The Illinois Agricultural Association RECORD

JUNE, 1930

The cameraman happened along just in time to see firemen save an automobile from burning at Forty-fifth and Grand Ave. in Chicago.

FIRE DESTROYS MANY A CAR

TRAINED firemen ready for action are not always near when danger threatens. A car afire in the open country far from help usually means a total loss. Insurance in your own company costs little and protects you against such hazards.

A car valued around $1,500 can be insured against fire in the Illinois Agricultural Mutual, experience shows, for approximately $2.80 a year; insurance on lower priced cars costs proportionately less. In case of loss by fire you will be reimbursed for the full value of your auto or truck, at the time of the accident.

Farm Bureau Co-Operation Benefits Policy Holder

The ILLINOIS AGRICULTURAL MUTUAL is a non-profit company. Like all services of the Farm Bureau and I. A. A., automobile insurance is offered at the lowest possible cost. Savings effected by state-wide Farm Bureau co-operation are reflected in low assessments. You can insure your car in your own company for less than half the premiums charged by most privately-controlled, old line companies.

Earl C. Smith Discusses Grain Market Program

Growers Assemble at Bloomington June 6 to Review Recent Developments

"THROUGHOUT the development of the commercial services which have been initiated and organized by the Illinois Agricultural Association, it has moved forward only after securing the approval of representative leaders and members of the organization. In line with that policy, this meeting has been called for the purpose of discussing various elements that have developed affecting the future welfare of the Illinois Grain Corporation," Earl C. Smith, president of the Illinois Agricultural Association, said before a state-wide gathering of grain producers at Bloomington on June 6.

Reviews Efforts

"In order that we may get a proper understanding of all that is involved, I think it may be well to take just a few moments in reviewing the efforts made by the I. A. A. and County Farm Bureaus covering many years to develop a sound grain marketing program," he continued.

"Since my first election to the Executive Committee of the I. A. A. in 1923, there has been no subject matter that has received as much consideration and with apparently so little result as that of grain marketing. Throughout the years urgent and continuing requests for a stimulation of grain marketing activity have come to the administration. Committees have been appointed and given much time and study to all phases of the question and the various possibilities. In each case it was recognized that any successful grain marketing plan must be founded upon the local co-operative elevator. Recognizing that the Farmers Grain Dealers' Association of Illinois, while not a marketing organization, was constituted from many of the farmers' elevators in Illinois, the Illinois Agricultural Association early in 1927 invited the Farmers Grain Dealers' Association of Illinois to select a small committee, which would be available to meet with a similar committee representing the Illinois Agricultural Association. This invitation was premised upon the desire to work out, if possible, a grain marketing program that would justify and carry the full support of all who were anxious to serve the best interests of the grain producers. This committee, which was known as the (Mutual Relations Committee,) held many meetings throughout 1927, 1928 and most of 1929, but were unable to agree upon the main essentials for a grain marketing program.

"Those representing the Farmers Grain Dealers' Association have insisted

More Than 800 Attend Bloomington Meeting

40 Counties Represented at Grain Marketing Conference

MORE than 800 grain producers, most of them farmers' elevator directors and stockholders, assembled at Bloomington on June 6 in a state-wide gathering to hear about recent developments in the efforts of Illinois farmers to organize an effective co-operative grain marketing program.

By 1:45 p. m. the lower floor and balcony of the Illini Theatre were filled. It was a serious-minded audience assembled to get facts, and defend, if necessary, the efforts of their organization in serving the interests of grain producer members.

The meeting was dignified throughout. Consideration of the problem before the producer was kept on a high plane without the injection of personalities into the discussion. The bulk of the three-hour program was confined to statements pertaining to co-operative grain marketing, the Illinois Grain Corporation, and plans for the future.

Johnstone Presides

G. C. Johnstone of Bloomington, president of the Illinois Grain Corporation, presided. After short opening remarks by Harrison Fahrnkopf, secretary of the I. G. C., President Earl C. Smith told of efforts put forth in years past on grain marketing and answered charges given most prominence in propaganda disseminated among elevator directors and stockholders.

Secretary Geo. E. Metzger gave an interesting talk illustrating the present system of grain marketing and disclosing the need for volume control of grain to give the producer bargaining

The cameraman happened along just in time to see firemen save an automobile from burning at Forty-fifth and Grand Ave. in Chicago.

FIRE DESTROYS MANY A CAR

TRAINED firemen ready for action are not always near when danger threatens. A car afire in the open country far from help usually means a total loss. Insurance in your own company costs little and protects you against such hazards.

A car valued around $1,500 can be insured against fire in the Illinois Agricultural Mutual, experience shows, for approximately $2.80 a year; insurance on lower priced cars costs proportionately less. In case of loss by fire you will be reimbursed for the full value of your auto or truck, at the time of the accident.

Farm Bureau Co-Operation Benefits Policy Holder

The ILLINOIS AGRICULTURAL MUTUAL is a non-profit company. Like all services of the Farm Bureau and I. A. A., automobile insurance is offered at the lowest possible cost. Savings effected by state-wide Farm Bureau co-operation are reflected in low assessments. You can insure your car in your own company for less than half the premiums charged by most privately-controlled, old line companies.

power. Donald Kirkpatrick, legal counsel for the I. A. A., outlined the legal set-up of the Illinois Grain Corporation and closed with a stirring and vigorous review of the accomplishments of organized Illinois farmers through the Farm Bureaus and I. A. A. that drew much applause. Howard Leonard of Eureka, former president of the Association, spoke briefly at the close of the session giving his whole-hearted endorsement to the Illinois Grain Corporation. The meeting adjourned about 4:00 p. m.

Nearly every major grain producing county in Illinois was represented. Many drove more than 200 miles from as far as Jackson and Henderson counties on the south and west, to the Wisconsin line on the north to attend the conference.

(Continued from page 3)

throughout all negotiations that anything tending to disturb the present set-up and operation of the elevators, including the curtailment of the right of a local elevator to go, when and where it might please, with its grain, would not succeed.

"Those representing the Illinois Agricultural Association were convinced that to be effective it would be necessary to merge a large volume of any given commodity, if bargaining power and resultant price increase was to be reflected back to the grain producer.

Last Meeting December, 1929

"The last meeting of the Mutual Relations Committee was held in December of 1929 and those representing the Farmers Grain Dealers' Association stated they were convinced there was no necessity for futher meetings, as apparently the fundamental difference above outlined could not be reconciled. Later learning that the Board of Directors of the Farmers Grain Dealers' Association had approved the report of those representing the Grain Dealers' Association and the principles for which they stood, the Illinois Agricultural Association had no other pleasure, if it were to respond to the demands of the grain producers of Illinois, than to report its best thought and recommendations to the annual meeting of last January. This was done only after advising with and securing the approval of representatives of the Federal Farm Board as to what would be embodied in the plan and principles of the Illinois Grain Corporation. The marketing conference at the annual meeting went on record unanimously in favor of setting in motion the recommendations placed before the conference, and the charter for the Illinois Grain Corporation was secured in February of this year.

Directors Chosen

"The director of the Grain Marketing Department of the Illinois Agricultural Association called a meeting of the representative Farm Bureau members and grain producers of the state, at which time, the first board of directors of Illinois Grain Corporation was elected. They have been giving much time and effort looking to the development of this new organization. The officers and directors of the I. A. A. are not unmindful of the tremendous responsibility assumed in this attempt to build a strong and effective grain marketing organization. We are not forgetful of the disastrous results of efforts made in earlier years in the life of the I. A. A.

"We are not surprised at efforts being made to thwart the development of this newest project of the Farm Bureau movement of Illinois. We are somewhat surprised, however, at the lengths to which some seem willing to go in displaying and spreading most malicious and untruthful attacks and propaganda. Although, in each case, it would be very easy to conclusively answer the charges that have been made, the Illinois Agricultural Association, as yet, has been unwilling to dignify the unworthy and unjust tactics used by even making an attempt to reply.

"While the American public seems universally sold to the slogan of "Equality for Agriculture"; yet grain marketing is like all other efforts made to restore equality. It brings to light the selfish interests that seem willing to go to any length rather than have removed the advantages they have been enjoying for so many years at the expense of the producer.

Years of Study

"The Illinois Grain Corporation may not be perfect in its set-up. It is, however, the result of years of study and earnest effort made by the men elected by the farmers of Illinois to guide the policies and destiny of their organization. Complete control of the corporation and its policies is vested in the Board of Directors. No one is eligible for the directorate, except a member grain producer. Its set-up is such that no one officially connected with the Illinois Agricultural Association can participate in or receive any benefits from the corporation. This places the policies and administration of the Illinois Grain Corporation in as direct control of the grain producers themselves as is legally possible to provide. This, within itself, is sufficient answer to the unjust propaganda that is being circulated by self-styled friends of the farmer. The most optimistic friends of the Agricultural Marketing Act and those now charged with its administration do not hesitate to say that its chief—if not only virtue, may be stated in one phrase, namely, Provides the opportunity for the farmer producers to merge a large volume of any given commodity in central hands and with such control being enabled to feed the commodity into the market, according to demand. If there can be any stabilization of price or appreciable advance in price brought about by the enactment of this legislation, it will come only in and through a program of this kind. So in offering the Illinois Grain Corporation first to the annual meeting of the Illinois Agricultural Association and now to the farmer grain producers of Illinois, the Illinois Agricultural Association has discharged its first duty. The Illinois Grain Corporation will prosper just to the extent that the farmers themselves take an interest and see that their grain is handled by those who are willing and anxious to do their full part in building this volume control program.

"While we regret the extent and character of efforts that are being made to slow up, if not stifle, this newest farmer corporation; yet, we have every confidence in the fairness and the determination of the farmers themselves

(Continued on page 9)

Vicious Attacks On Co-operative Marketing

VICIOUS attacks on the Federal Farm Board, the Agricultural Marketing Act, the Illinois Agricultural Association, and all efforts of grain farmers in developing an effective co-operative marketing program in Illinois featured recent meetings held at Gilman and Ottawa which were widely advertised by hand bills as being called by the Illinois Farmers Grain Dealers Association.

Lawrence Farlow, secretary of the Grain Dealers Association, has attempted to deny responsibility of his association for these meetings. We cannot reconcile these attempts to be relieved of responsibility with the well known fact that not only did Farlow sit on the platform but appeared on the program at each meeting without voicing a word of protest against the vicious and baseless charges that emanated from the different speakers who had been advertised to appear.

The Illinois Agricultural Association will not dignify such charges and unworthy attacks by making reply. Its position is made clear in the editorial on page 6.

Facts For The Grain Producer

By HARRISON FAHRNKOPF
Director Grain Marketing, Illinois Agricultural Association

LETTERS have come to our office calling attention to a comparison sheet sent out from the office of the Illinois Farmers Grain Dealers' Association. There are set forth various points for comparison between the ILLINOIS GRAIN CORPORATION and the National Farmers' Elevator Grain Company Co-Operative (Rural Grain Company).

The ILLINOIS AGRICULTURAL ASSOCIATION and the ILLINOIS GRAIN CORPORATION believe that the producer is best served by his organization when that organization uses its time, funds and personnel in promoting its own program rather than talking against the other fellows. The producer gets little if any service from an organization whose officers and employees spend their time endeavoring to halt the progress of a sound program. This opposition perhaps is inspired by other than producer interests.

Harrison Fahrnkopf

The ILLINOIS AGRICULTURAL ASSOCIATION *is not opposing the existence and operation* of the Rural Grain Company. The real issue is contract or agreement marketing versus the "voluntary" plan of marketing. The ILLINOIS GRAIN CORPORATION is going forward basing its activities on the need for concentrating the largest possible volume of grain through single selling agency hands. It believes that this can most effectively be done through the medium of the contract or agreement plan.

Let's Go Down The Line

The following "headings" were used in the above mentioned comparison:

No. 1—*Form of Organization.* The ILLINOIS GRAIN CORPORATION was organized under the 1923 Illinois law, known as the "Agricultural Co-Operative Act." This law has many advantages over some of the other acts under which our co-operatives are operating.

A country elevator association organized or reorganized under the "Agricultural Co-Operative Act of Illinois" is a corporation organized for the mutual benefit of its members and is not organized for profit.

A co-operative country elevator association organized under the "Corporation Act of 1872," or "The Co-Operative Association for Pecuniary Profit Act of 1915," or the "General Corporation Act of 1919," is a corporation organized for pecuniary profit.

1. From a legal angle, the distinction is important and the Supreme Court of the United States during the year 1929, in what is known as "The Oklahoma Cotton Gin Case," made a very unfavorable ruling against a co-operative, because it was not organized under an act "not for profit."

2. A country elevator association organized under the Agricultural Co-Operative Act (1923) of Illinois, is not required to obtain a license from the Secretary of State to sell its stock. This is not true of country elevator associations or other co-operative associations organized under the other acts.

3. The annual franchise fees of corporations organized under the acts other than the 1923 act are based upon the amount of capital stock outstanding, whereas, the franchise fees for a co-operative association organized under the 1923 act are only ten dollars ($10) per year, regardless of the amount of stock issued and outstanding.

4. A country elevator association organized under the act of 1923 can have different classes of stock and of different par values, or of no par value. A country elevator association organized under the 1915 act cannot have classes of stock. The 1923 act permits greater flexibility in providing for classes of stock to meet the local condition.

5. The limit of stockholding in a co-operative association organized under the 1923 act is five (5%) per cent of the authorized common stock, and no limitation on the preferred, whereas, the limit of the other acts is five (5) shares.

6. The liability of directors of a co-operative association organized either under the act of 1915 or of 1919 is possible in certain instances. This is not true under the 1923 act. If directors borrow money or create obligations in excess of the paid-in capital stock and surplus, there is a personal liability on the directors under the other corporation acts. This is not true under the act of 1923.

What Is The I. A. A.?

No. 2—*Sponsored by.* Sponsored by ILLINOIS AGRICULTURAL ASSOCIATION, which has 58,000 farmer members in Illinois. It is not only the outstanding farm organization in Illinois but one of the strongest state organizations in the entire country. It is absurd for anyone to infer that this organization does not represent the best interests of the farmer.

No. 3—*Authorized Capital Stock.* It is true that the ILLINOIS AGRICULTURAL ASSOCIATION holds 100,000 shares of preferred "B" stock of no par value. This stock cannot participate in the earnings nor in dividends in case of dissolution, furthermore, neither can it be voted in excess of the number of shares of common stock outstanding; in other words, where member elevators hold both common and preferred stock, it is never possible for the preferred "B" stock to out-vote. For example, if the average elevator buys $2,000 of stock, which would be 20 shares, it would own 20 shares of preferred and if it had 200 farmer patrons it would have issued to it 200 shares of common, and altogether have 240 votes as against 200 votes from the Illinois Agricultural Association.

Then remember, that the Illinois Agricultural Association admits any farmer who desires to be a member. Many of these votes cast by the Illinois Agricultural Association are represented by the same farmers who enable the elevator to qualify for common stock; in other words, the preferred "B" stock should be looked upon *as a double control stock in the hands of the producer.* It is merely a plan instituted for the purpose of restraining private or independent or old line business concerns from getting control of our co-operatives. Today too many of our local co-operatives are dominated by other interests than those of the producer; in fact, the grain trade now has a controlling interest in many of our farmer elevators.

Another Falsehood Nailed

No. 4—*Voting Control.* The comparison says, giving the Illinois Agricultural Association "absolute control without any investment." This is absolutely untrue. The Illinois Agricultural Association has placed at the dis-

(Continued on page 7)

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

On Grain Marketing

THE Illinois Agricultural Association is attempting to render service to Illinois grain producers by helping them build an effective co-operative selling agency for grain. It has no intention nor is any effort being made to force on the producers or their elevators a grain marketing program that is not wanted. The Association has been vey deliberate, as everyone knows, in making recommendations because of the peculiar problems and relationships existing within the state. Those charged with responsibility have received much criticism for alleged inactivity in grain marketing.

After years of patient study and effort to co-ordinate all producer interests in support of an effective plan, the Illinois Grain Corporation was organized. Its chief virtue and bid for producer support is that it provides a definite plan for concentrating a large volume of grain in a real farmer-owned and controlled agency.

President Smith on pages 3 and 4 of this issue presents a background of information revealing to what ends the organization has gone to compromise differences of opinion and work with the state farmers' elevator association.

The I. A. A. has always recognized that the farmers' elevator is a necessary institution rendering important services to its patrons. It realizes that the farmers' elevator is the bulwark and foundation for an effective grain marketing program. The I. A. A. has used its kindly offices to help and strengthen the farmers' elevator movement in Illinois for by so doing it renders a service to the man on the farm who supports all farm institutions.

Producers who have studied the marketing question know that co-operative selling is ineffective unless the farmer-owned agency controls a large enough volume of the commodity to have some influence in the market. Certainly there is nothing new in this plan. Consolidation and mergers to reduce waste and needless expense are the order of the day in the business world. In seeking volume control grain producers seek to apply to their business what has proved successful in other industries.

The Illinois Grain Corporation was established by progressive grain growers using their organization, the I. A. A., to help bring it about. The advice and counsel of both the chairman and grain member of the Federal Farm Board was had during its formation. The Illinois Grain Corporation was not forced on the producers but was accepted and endorsed after due deliberation by a great convention of growers nearly all of whom produce grain. We refer to the annual meeting of the I. A. A. at Springfield last January.

The Illinois Grain Corporation is merely a medium through which producer-owned elevators can co-operate with each other in the sale of their grain. Through it is made possible co-operation among the co-operatives. Control of the organization rests absolutely with the grain producers of the state. No organization could be more democratically controlled. Therefore, it is inconceivable that any group or individual having the interests of the producer at heart should oppose this unselfish co-operative enterprise.

We believe the campaign of malicious propaganda now being circulated about the state will have little influence, if any, with thinking farmers. The I. A. A. will not stoop nor take time to answer the deliberate misstatement of facts concocted in the minds of those who by their acts have shown their unfriendliness to effective co-operative marketing.

Whenever farmers have sought to help themselves through co-operation they have met with the same kind of opposition from those who thought their business would suffer from the competition. Farmers represented by the I. A. A. have not hesitated, however, to advance in the face of such opposition. They do not and will not hesitate in this case.

We believe the Illinois Grain Corporation offers the soundest plan for real grain marketing progress in the state. The opposition of selfish interests may retard and delay self-help by farmers but it will never stop it. The only thing that will ever prevent the achievement of real co-operative grain marketing is the loss of faith of farmers in themselves, in their organization, and in their ability to solve this problem.

Facts for the Grain Producer

(Continued from page 5)

posal of the ILLINOIS GRAIN CORPORATION the personnel of the Grain Marketing Department, the Publicity Department and Legal Department during the early stages of organization; furthermore, the Illinois Agricultural Association has purchased a large block of the preferred "A" stock. In addition, as stated above, class "B" stock is not in control inasmuch as it can only be voted in shares equal to the number of shares of common stock.

No. 5—*Directors.* The fifteen directors enable the co-operative to have representation fairly well distributed over the entire grain territory. The detailed executive work is in the hands of an executive committee of five men selected from this board of directors. This executive committee has practically the same power as the board of directors, but its action is subject to the approval of the board. The by-laws provide that all directors must be grain producers.

No. 6—*Grain Handling Facilities.* The ILLINOIS GRAIN CORPORATION is a member of the FARMERS' NATIONAL GRAIN CORPORATION. Grain handling facilities, both as to grain sales service and terminal storage, will be provided directly by the ILLINOIS GRAIN CORPORATION or by and with the co-operation of the FARMERS' NATIONAL GRAIN CORPORATION. If the grain trade, which spends so much time resolving against the farmer, can make money in mixing, processing and otherwise enhancing the value of the grain after it leaves the producers' hands, the producer himself can make money in the same way, through his own organizations.

Moving Conservatively

Had the ILLINOIS GRAIN CORPORATION employed men with grain sales training obligating itself to heavy financial outlay before securing a suitable membership it would of course have been criticised for providing a big overhead and no grain to market. Now that it has adopted the more conservative course of first building up a substantial membership and then providing the sales service, there are those who point out that it has no facilities. Have no fear but that the grain can be handled effectively and efficiently when once it is flowing through single selling agency hands.

7.—*Experience.* The experience of a co-operative is determined by the experience of its employees. When the producers, through their co-operatives, support the ILLINOIS GRAIN CORPORATION with memberships, those same producers can rest assured that that same support will enable their officers and directors to employ outstanding grain men with ability and experience.

No. 8—*Financial Standing.* The ILLINOIS GRAIN CORPORATION is set up with capital stock background to provide ample capital for a good strong organization. A state-wide co-operative is being built to serve the producer through his local co-operative. The ILLINOIS GRAIN CORPORATION is more than a commission company. When the member elevators send all of their grain, instead of ten or fifteen per cent of it, through their own terminal agency, these members will be agreeably surprised at the financial rating of their organization. Furthermore, we are going forward on the contract or agreement basis. Government funds will not be available to advance the interests of "voluntary marketing" for when funds are used the contract must be signed.

Need Volume Concentration

No. 9—*Territory.* Fifteen per cent (approximately one-seventh) of all the grain which goes into market channels in the United States originates in Illinois. We believe that our farm organizations can best serve their members by sparing no efforts to mobilize this large volume of grain through single selling agency hands. The ILLINOIS GRAIN CORPORATION is confining its activities to Illinois.

No. 10—*Membership.* The first twelve days after the membership application was approved by the executive committee, the boards of directors of twelve farmer elevators representing three million one hundred thousand (3,100,000) bushels of grain, voted to apply for membership in the ILLINOIS GRAIN CORPORATION. The first elevator to come in that was operating on a basis that would enable it to qualify under the Capper-Volstead Act was the Farmers' Elevator Company of Ransom, in LaSalle County. This elevator was then used with which to apply for membership in the Farmers' National Grain Corporation. After filing this membership, a period of one month elapsed before it was approved.

For several weeks we have attempted to work out a suitable agreement (contract) to be used by our member elevators. We felt that certain details of this agreement depended upon requirements of the Farmers' National Grain Corporation of the regional and these were not forthcoming. Our own agreement will be ready in a few days and we shall then take up in earnest the task of interviewing elevators in regard to membership.

A Sound Program

No. 11 — *Contract Requirements.* The ILLINOIS GRAIN CORPORATION is going forward on the contract or agreement basis, as an improvement over the voluntary system. The voluntary system of marketing is advocated by those people who apparently object to improvement. The "satisfied-with-things-as-they-are" spirit never discovered America or electricity or won our national independence. Today, the contract is recognized in all lines of business—both large and small. You don't mind signing an agreement as an evidence of good faith when you really mean to keep your word. Furthermore, the agreement method is an asset to those elevators which contribute money to the capital stock of the ILLINOIS GRAIN CORPORATION. They have the assurance that the organization in which they are investing will have grain to handle. They know that by agreement all members will stand hitched. It increases the soundness of the investment to know that there is an assured volume of grain.

No. 12—*Amount Required to Join.* The "A" preferred stock purchase required is two shares for each twenty thousand (20,000) bushels of grain handled based on the average of the last three years, which is approximately an equivalent of one cent (1c) per bushel. Ten per cent of this amount is payable in cash and the remainder is secured by five equal notes, one due each year for the next five years. This amounts to approximately one-fifth (1/5) of one cent per bushel the next five years. Remember that this stock subscription is for a seven per cent preferred stock. In some cases this stock can be purchased by the board of directors (depends upon the law under which the elevator is organized) and in others a *majority vote* approval of the *members* is required.

No. 13—*Connection with Federal Farm Board.* The ILLINOIS GRAIN CORPORATION is a member of the Farmers' National Grain Corporation holding fifty (50) shares of stock.

Editor,
I. A. A. RECORD

"I think a lot of your set-up and information in the last several issues of the I. A. A. RECORD. They have been attractive in every way and full of good readable information.

IROQUOIS COUNTY
FARM BUREAU,
C. E. Johnson, Farm Adviser."

"Chamber of Commerce Action a Big Mistake"

C. C. Teague, Member of Farm Board, Discusses Marketing Act in Recent N. B. C. Radio Talk from Washington

(By C. C. Teague)

THERE has been a great deal of discussion lately about the need of a closer understanding and relationship between business and agriculture which has been welcomed by agriculture generally. This has taken the form of invitation and solicitation by the United States Chamber of Commerce to agricultural organizations to join the Chamber, which has been generally accepted where these organizations had any money to join with, but which I will have to admit was not in a large number of cases.

There was witnessed here in Washington recently a spectacle which seemed to demonstrate how far commercial business interests will go in the support of agriculture whenever the aid extended in any way interferes with established business. It has been the purpose of the Federal Farm Board in making effective the Agricultural Marketing Act to interfere just as little as possible with established business, but it has been impossible to carry out the primary purpose of the act, which is to establish a system of grower-owned-and-controlled co-operative marketing for the agriculture of the country, without in some cases disturbing commercial operators particularly at the point of production.

Cotton and Wheat

The operations of the Board that have brought about the most criticism from certain quarters are those in wheat and cotton. During October and November there was a stock panic when probably 50 per cent of the supposed values of industrial stocks was squeezed out. The country has been suffering from the effect of this ever since; wheat and cotton were headed in the same downward direction.

In an effort to prevent any further serious decline in these commodity prices the Farm Board offered to loan to co-operatives $1.25 a bushel on wheat and 16 cents a pound on cotton with the customary grade, variety and freight differentials to the various terminal markets. This proved effective for several months, but later when there was a sharp decline in the price of wheat the Board, under the terms of the Agricultural Marketing Act, authorized an emergency stabilization operation in wheat. The purpose of this stabilization operation was to take off the market whatever quantity of wheat was necessary to prevent any considerable decline in the price.

In accordance with its announcement last October the Board continued making these loans to the wheat and cotton co-operatives over a period of more than six months, regardless of the fact that the market part of this time was below the loan values. The policy of fixed loan values on cotton and wheat, together with the subsequent stabilization operation in wheat, undoubtedly saved a panic in these commodities which would have cost the farmers of the country many millions of dollars and if this depression had been added to the business depression caused by industrial stock losses it perhaps might have cost the country billions of dollars. This action was taken in a national emergency and in the opinion of the Board was entirely justified and in the interest of all of the people even if later this action cost the taxpayers some money.

Helped Prevent Panic

If these efforts to prevent a serious decline in wheat and cotton prices have made any important contribution toward the prevention of a general crisis or panic in this country, it may be that this alone justifies the Agricultural Marketing Act.

Stabilization operations as contemplated by the act probably are only warranted in cases of emergency when the laws of supply and demand do not normally operate and should be approached with great care. These operations in wheat and cotton have brought on a most vociferous howl, which has reverberated throughout the country until it reached the halls of the United States Chamber of Commerce in annual session Wednesday, April 30. This was the day set by the Chamber when the Farm Board was placed on trial and was called upon to defend itself. Chairman Legge made a splendid statement of the purposes and activities of the Board and the reasons for its actions, as did also Secretary Hyde. Congressman Fort, who was a member of the Agricultural Committee, which after extended hearings drafted and sponsored the act, made a strong statement in support of it as wise legislation in the interest of the general public and to assist the agriculture of the country, which generally was recognized to be in great distress and which formed an important part of the social and economic structure of the country.

Millett's Philosophy

Mr. Dan A. Millett, investment banker and stockman of Denver, Colorado, was selected by the Chamber to lead the attack, the essence of which was that it would be better to go back to first principles, with no artificial interference with economic laws; to abolish tariffs and all artificial aids to business, labor and industry. Mr. Millett's philosophy seems to be expressed in the following quotation from his address: "Let no man think that living standards of America can be permanently maintained at a measurably higher level than those of other civilized countries."

We have been measurably successful for over a hundred years in keeping the living standards of American labor and American farmers above the peasantry of Europe and the earning power of American capital above that of Europe and I do not believe that our people are yet ready to abandon that policy.

Speculators Howl Most

Following the statements of the prosecution and defense, discussion was limited to five minutes per person. It was interesting to note that all of the speakers who demanded the repeal of the Agricultural Marketing Act represented national organizations of commercial and speculative operators, bonded together for mutual protection, who were attacking the attempt of the Government to assist the farmers in organizing so as to be in position to in some measure protect themselves. The Resolutions Committee reported a resolution, which was passed by the Chamber, pledging it to work for the amendment of the act so as to make it ineffective. In my opinion the United States Chamber of Commerce has made the greatest mistake in its history.

It is quite probable that the same interests responsible for this resolution are also responsible for publicity directed toward discrediting the Agricultural Marketing Act and the activities of the Farm Board, in suggesting that this legislation will raise price levels to consumers of agricultural products.

The main purpose of the act is not to raise prices to the consumers but to give the producer a larger share of the consumer's dollar. In fact, the act directly charges the Board not to support co-operative organization or stabilization operations to a point that brings on any distress to the consumers. Another reason that consumers need have no fear is that it is not possible to get a monopoly in food products because of the ease and quickness with which producers can get into agricultural production, the small amount of capital required and because of the always available land inviting the producer whenever there is an opportunity for profit. Therefore, any attempt to arbitrarily raise prices to a level where unreasonable profits are given the producer is

sure to bring a flood of production that will defeat the attempt and bring disaster to the producer.

Old System Wasteful

The old speculative system of distribution has been proved often times wasteful and inefficient. It has often failed to pay the producer a living price for his products and at the same time the consumer has often had to pay high prices. On the other hand, it has been demonstrated that in many cases where producers are organized into effective co-operative sales organizations they have been able to prosper and at the same time not to put a burden on the consumers of the country. That which makes this seeming inconsistency possible is that through co-operative organization producers are able to effect many savings in wastes and improper charges between the producer and the consumer which are reflected in a larger percentage of the consumer's dollar being returned to the producer.

Let us consider for a moment some of the things that may be accomplished through effective co-operative organization of producers. First is the elimination of the element of speculation in the product of the farmer at the point of production. Until the farmer is organized and is in position to collectively bargain for the sale of his product he has to take the best price he can obtain from commercial buyers, who, of course, are in business to buy as cheaply and sell as dearly as they can. The result is that the farmer on account of lack of knowledge of quickly changing markets and inability to protect himself against manipulation of markets does not get the full value of his product.

Too Many Middlemen

Most farm products are bought and sold by commercial operators at the point of production. The number of these operators in most commodities is very large. Each buys, packs and distributes without much knowledge of the other's operation and the result is a disorderly unscientific distribution, which often results in demoralization of markets, gluts and famines, and losses to the wholesale distributing trade as well as to farmers. It is not uncommon to have a demoralized wholesale market which is quickly reflected back to the producer and still not affect appreciably the retail prices to the consumer. In other words rapidly changing markets due to poor distribution often make losses to producer, shipper and wholesale dealers that are not reflected back to the consumer in lower prices. On the contrary, particularly with annual crops such as fruits and vegetables, the producer following years of disastrous prices often becomes discouraged and does not plant sufficiently to take care of the demand the succeeding year and the result is high consumer prices. To put it in another way, it is better for both the producer and consumer to iron out the peaks and valleys in prices by a more uniform supply brought about by orderly marketing and production.

Co-Operation Cuts Cost

If the producer is organized so that he can control, through co-operative marketing organizations, a large percentage of the product of his industry he can properly distribute so as to place on the market the maximum quantity that the market will take and maintain a reasonable price. Through control of a large volume his cost is low. He can largely eliminate the losses and sometimes unreasonably large profits of commercial operators at point of production. He can adopt and enforce standards of grade and quality, which are impossible under other conditions and which benefit the consumer. He can spread the cost of national advertising over a large volume at a low per package or unit cost, thus keeping the consumption of his product in pace with increasing production. He can collectively handle railroad claims and rate questions and even make proper representation on tariff matters. In short, through co-operative action he can eliminate speculation, distribute efficiently at low cost and eliminate many of the wastes and unnecessary costs between the producer and the consumer.

The Loaf of Bread Legend

ONE of the ardent detractors of the federal farm aid program recently laid eloquent stress on the fact that back in 1921 the grain dealer and flour miller combined got only 3.4 cents out of every dollar the housewife paid for bread; whereas the farmer got 28.1 cents out of the same dollar.

Figures such as these are rather useful in helping to perpetuate the myth concerning the efficiency of the grain trade. They are enough to convince an unthinking person that the grain trade operates on a very narrow margin indeed. Three and four-tenths per cent is little enough to pay for such services as they render.

The fallacy in this line of figuring, of course, is that neither the farmer nor the grain dealer deal in bread. Their commodity happens to be wheat, and the bread figures, adapted to a bushel of wheat, tell an entirely different story.

Thus from $6.50 worth of bread (which is the amount secured from a bushel of wheat) the dealer and miller in 1921 got 22 cents plus about 22 cents for bran. In other words, the dealer and miller got 44 cents on the bushel of wheat the farmer sold for $1.82. Instead of three and one-half per cent, the dealer's and miller's gross profit on handling the wheat was about 25 per cent.

Today, on 90 cent wheat, the dealer and miller still make about 44 cents, according to the "bread figures." Their combined profits are almost 50 per cent.

In refuting these figures the grain trade advocate might state that the miller gets a large share of this 50 per cent; and that we are using a wrong basis for figuring. Very well, then—who started using these "bread figures" in the first place?—Allen Sandy.

Discusses Grain Marketing

(Continued from page 4)

once they come to understand the motives and purposes of those responsible for such propaganda.

"Those selected by the farmers to administer the affairs of the Illinois Grain Corporation will find their full time needed in constructive activities. I hope they will not be led astray by attempts to answer malicious propagandists, but will rest content in steering a straight course to the end that the grain producers of Illinois will receive the fullest possible benefits from the Illinois Grain Corporation.

"The I. A. A. has been similarly attacked by selfish interests in and during the development of other commercial services by the organization. In every case it has been found that by following a straight course and confining our full time and attention to the welfare of those participating in the program, has been much more successful and certainly more meritorious than by dividing our time in attempts to answer baseless charges. The success of the I. A. A. in developing these services has in large part been due to the interest manifested and the support given by the farmers of the state. So it will be with the Illinois Grain Corporation. It will move forward just to the extent that the farmers, whom it is intended to serve, respond with that zeal and determination that has been so characteristic of them in the past.

"The Illinois Agricultural Association believes in its soundness, accepts full responsibility for the principles upon which it is founded; and to its last man will give every possible support to those charged with the direct responsibility of handling the affairs of the Illinois Grain Corporation."

Bloomington C. of C. Condemns U. S. Chamber

Recommends Marketing Act Be Strengthened at Next Session of Congress

A RESOLUTION condemning the action of the U. S. Chamber of Commerce at Washington against the Federal Farm Board and the Marketing Act was adopted at a meeting of the Bloomington (Ill.) Chamber of Commerce directors on May 22. Carl Vrooman, former assistant secretary of agriculture, was active in drawing it up.

The resolution follows:

WHEREAS, We realize that a prosperous agriculture is the only sound foundation for a permanently prosperous super-structure of finance, business and industry, and

WHEREAS, During the past year the Hoover Administration has been making a sincere, if not yet wholly successful, effort to "help the farmer to help himself," and

WHEREAS, The leadership and backing of the Federal Government is a necessary factor in the long talked of rehabilitation of agriculture, therefore be it

RESOLVED, By the Association of Commerce of Bloomington, Illinois, that we completely dissociate ourselves from the action of the United States Chamber of Commerce at its recent annual meeting in condemning the President's agricultural policy without proposing anything better to take its place, and be it further

RESOLVED, That the disagreement between the Chamber of Commerce of the United States and the Federal Farm Board is not not only undesirable but wholly unnecessary, inasmuch as a policy of farm relief unquestionably can be put into operation that will give the farmer quicker and more real relief than the present policy has been able to do, while at the same time arousing little or no opposition among intelligent, fair-minded business men, and be it further

RESOLVED, That relying on President Hoover's well-known sincerity, open-mindedness, courage and ability, we desire to express our confidence in the Federal Farm Board, but should the Federal Farm Board and President Hoover later realize the inadequacy of the present agricultural policy, we feel sure that he will be more than willing to cooperate with agricultural economists and Congressional leaders on the crucially important task of so amending the present law as to insure a square deal for the farmers of America, and be it further

RESOLVED, That as the efficiency of the present law seems to have been seriously impaired by the provision that the Federal Farm Board can only function through co-operative associations of farmers (of which very few have yet been organized) that are competent to economically and effectively carry out the provisions of the law, it begins to look as though the law instead of accomplishing its primary purpose, that of securing "equality for agriculture," has thus unwittingly deferred attainment of actual results until such time as the Federal Farm Board shall have succeeded in the gigantic and necessarily long drawn out task of changing our national marketing system from a competitive to a co-operative basis, therefore be it further

RESOLVED, That at the next session of Congress the law should be so amended as to empower the Federal Farm Board to proceed promptly through such efficient farmers' co-operative associations as are available, also through regular business channels, and, when efficiency cannot be achieved through either of these agencies, by direct action on its part.

First, to put into operation a Crop Storage policy that will tend to stabilize fairly and equitably the price of farm products in time of excess supply and to lower prices for consumers in times of scarcity.

Second, to finance the merchandising of our surplus crops in the markets of the world on properly secured credit, or on any other sound and business-like basis, and

Third, to make more effective the Farm Board's present Crop Acreage Limitation plan by organizing a National Crop Acreage Limitation Drive to carry out the long established recommendation of the United States Department of Agriculture, as taught by its extension workers, the county advisors, that a certain percentage of each farm be planted each year in Legumes in order to curtail production and maintain soil fertility. Such a drive with the highest official leadership in Washington supported by the highest official backing in each state, and with local public opinion harnessed and made to function by means of Township Acreage Limitation Committees in every township in the United States similar to the local Draft Boards and Liberty Loan Committee that functioned during the world war, unquestionably could be made very effective.

Approved by the Agricultural Committee Association of Commerce, Bloomington, Illinois.

Sam Elkins, farmer and ex-president McLean County Farm Bureau, Chairman.

E. J. Carmody, farmer and vice-president State Farm Mutual Auto Insurance Co.

G. C. Johnstone, farmer and president Illinois Grain Corporation.

P. N. Jones, farmer, retired.

Carl Vrooman, farm owner and former assistant Secretary of Agriculture, U. S. A.

E. D. Funk, Sr., president Funk Brothers Seed Co.

W. G. Cole, farmer, retired.

W. L. Rust, president McLean County Bank.

P. F. Thielen, secretary Farmers' Elevator Co-Operative Supply Co.

Endorsed by the Bloomington Association of Commerce.

H. K. Hoblit, President.
F. D. E. Babcock, Secretary.

Farm Board Plans To Aid Apple Men

THE Federal Farm Board will assist apple growers in the development of local and regional co-operative marketing associations looking toward the handling of the commodity on a national basis according to a recent statement.

Immediate activities in connection with the project to assist apple growers are as follows:

1. The Federal Farm Board will encourage and assist in the organization and development of local and regional associations in the apple-growing districts of the Cumberland-Potomac-Shenandoah area, Western New York area, the New England states, the Mid-Western states, and the Mountain states. The Board will aid in strengthening existing co-operatives and will help in the organization of new ones.

2. Local co-operatives will be encouraged to unify their marketing activities and establish regional sales agencies with the hope that eventually there will be sufficient co-operative organization of apple growers to warrant the development of a national sales program.

A. B. Leeper, of the Illinois Agricultural Association, is co-operating in the development of the Farm Board plan. The Western Illinois Apple Growers' Association and the Illinois Fruit Growers' Exchange will probably be the regionals through which Illinois apple growers will participate in the national program.

Farm Bureau committees are at work gathering facts and information with reference to the proposed high tension power line between Pekin and Blackstone, Illinois. Approximately 40 attended the meeting in Eureka on May 20, where L. J. Quasey of the Illinois Agricultural Association discussed general transportation and utility problems and answered many questions regarding the rights of land owners in power line and other right-of-way cases.

I. A. A. Advertises In Ill. Farm Papers

Prairie Farmer and Illinois Farmer Carry Appeals for United Front

"LET'S PRESENT A SOLID FRONT" is the first of a series of advertisements published in the interest of the Illinois Agricultural Association and the Farm Bureau, in the Prairie Farmer and Illinois Farmer. The purpose of the ads is to appeal to non-members to add the support of their memberships to the organization in its many services to agriculture, and to acquaint him with the benefits of Farm Bureau membership.

The first ad signed by President Earl C. Smith appeared almost simultaneously in the two state-wide publications mentioned above. The substance of the ad is as follows:

"All authorities agree that organization is essential to future agricultural welfare and progress.

"The greatest obstacle confronting agriculture in its steady march toward equality of opportunity with industry, is the large number of farmers who fail or refuse to recognize the need and possibilities of organization.

"They are unconsciously furnishing the opposition with the basis of statements that 'Farmers are divided,' 'Won't co-operate' and 'Don't know what they need or want.'

"It was organized, representative farmer-inspired and farmer-directed effort that brought about the awakening of public consciousness to the fact that there is a farm problem.

"The first victory of agriculture has been won. Government has accepted the responsibility for correcting the serious inequalities existing between agriculture and industry. Only the continuance and the strengthening of organized farm effort will assure the final establishment of policies that will benefit agriculture and make national prosperity permanent.

"The greatest immediate problem confronting Illinois farmers is to secure a proper correction of our revenue system.

"Do not be misled by any soft-spoken phrases as to what will constitute a solution to this great question. The I. A. A. is demanding justice for the farm and home owners of Illinois.

"Opportunities of organization are limited only by the extent of interest manifested through membership. Whether in county, state or nation, the effectiveness of organization can and will be greatly increased by an enlarged membership.

"Do you believe agriculture has had a square deal?

"Do you believe farmers can secure equality of opportunity except by and through organization?

"Have you and are you doing your utmost to bring agriculture out of the throes of economic distress?

"Every additional member in your County Farm Bureau increases the effectiveness of the organization in the state.

"Give agriculture a chance to win NOW by joining with your neighbors.

"LET'S PRESENT A SOLID FRONT."

Signed: EARL C. SMITH,
President,
Illinois Agricultural Association.

A second general ad on the subject of organization will appear in Illinois Farmer June 15 under the caption "KEEP THE BIG PICTURE IN MIND." Quarter-page ads telling of the many services offered by the Farm Bureau, the Illinois Agricultural Association, and associated companies have appeared nearly every week during the past month in Prairie Farmer.

The series of ads will appear in these two publications of general circulation in Illinois throughout 1930. Watch for them and refer them to your neighbor if he is not a Farm Bureau member.

Tazewell Goes Over Top in Membership

BY rolling up a membership of 1,188 in one day the Tazewell County Farm Bureau broke all records and exceeded by a substantial margin the one-day record of some 973 members signed by the LaSalle County Farm Bureau a year ago.

The drive for membership on May 28 in Tazewell County came after weeks of preparation by local Farm Bureau officials, volunteer solicitors, and R. J. Hamilton, district organization manager for the I. A. A.

A staff of volunteers was organized in every township and these men were schooled in the services offered by the Farm Bureau and the Illinois Agricultural Association. A goal of 1,200 members the first day was established prior to the drive. The solicitors failed only by 12 members in reaching the mark. All except two townships had gained in membership at the close of the first day. The last report from Tazewell indicated a membership of well over 1,200 with some clean-up work still in progress.

Income Tax Issue Triumphs in Iowa

Dan W. Turner Nominated for Governor by Heavy Plurality

THE recent nomination of Dan W. Turner of Corning, Republican nominee for governor of Iowa, by a large plurality, is being heralded as a victory for farm and home owners of that state in their battle for an equitable taxing system based on ability to pay.

Mr. Turner won the nomination in a field of three candidates. The principal issue in the campaign was the state income tax which Turner vigorously supported. The other candidates, Ed M. Smith and Otto Lange, opposed it.

"SHALL FARMERS GO ON PAYING 33 PER CENT OF THEIR INCOME IN TAXES?" was the battle cry of Candidate Turner.

Privileged Interests

"Do not be deceived," said Turner, in his appeal for the vote of the Iowa farmer. "A terrific fight is being made by special privilege interests to defeat me and my farm tax relief program. Certain moneyed groups, private interests, and people of large wealth—who want to see land go on carrying 97 per cent of the tax load in this state—are using every possible force at their command.

"Some are trying to prove that the old method is good enough. Others say 'another tax.' All kinds of arguments have been conjured up to try to mislead and side-track the voter. Such false issues as these, together with high-sounding statements and every other available method are being employed to throw dust in the voter's eyes.

Favor Replacement Tax

"But if the farmers of Iowa will get out and vote on June 2 all the money and all the machine politics in the state cannot defeat us in this campaign.

"I am in favor of a replacement income tax, to replace and relieve, dollar for dollar, a part of the heavy burden now being borne by our farms and homes.

"Both of the other candidates have come out against an income tax. Otto Lange says: 'I will veto an income tax.' Ed M. Smith says: "I am opposed to an income tax.'

"For eight years our farm organizations have been fighting for this Replacement Income Tax. And Dan Turner is the only candidate in the present campaign who has taken his stand shoulder to shoulder with them, and who will honestly and fearlessly work with them to bring about this

(Continued on page 13, col. 1)

"Madame, Your Husband's Policy Lapsed Two Months Ago. I Can Do Nothing for You"

ONE of the saddest stories of daily life is the story of the lapsed insurance policy. Carelessness in neglecting to pay premiums when due may become a tragedy.

"My barn burned the next day after my fire insurance expired" is akin to the well-known story, "My husband's life insurance lapsed just before his death."

You Can Avoid Bad Luck

So-called bad luck can be avoided by attention to this matter of importance. The man who takes out a policy and then allows it to lapse wastes money. Every payment increases the cash value of your policy. Every payment represents an investment in the future. Every premium paid means that those dependent upon you will be protected if you are suddenly removed from the picture.

The prudent man will take out a policy in COUNTRY LIFE and keep it in force. Life insurance in your own company offering low guaranteed rates with dividends is a good investment. Mail the coupon for sample rates at your age.

THE week ending May 31 saw all of the eight divisions in the Illinois Farm Bureau Baseball League active, and all teams playing ball with the exception of LaSalle, Kankakee and Fulton.

With 29 teams already in the field the league this year is at the heighth of seven years of growth. Every year has shown a steady increase in the number of active teams and games played.

Following are baseball scores for May 24, May 30 and May 31:

MAY 24

McLean, 9; Logan, 8.
Morgan, 10; Menard, 1.
Lee, 10; Carroll, 6.
McDonough, 6; Henderson, 1.
Woodford, 20; Tazewell, 5.
Livingston, 4; Marshall-Putnam, 1.
Knox, 11; Peoria, 8.
Henry, 17; Stark, 0.
Sangamon, 7; Macoupin, 1.
Ford, 9; Champaign, 8.
JoDaviess, 12; Stephenson, 4.

MAY 30

Carroll, 12; JoDaviess, 7.
Lee, 14; Stephenson, 4.

MAY 31

McDonough, 24; Warren, 1.
McLean, 9; Ford, 7.
Woodford, 9; Livingston, 6.
Grundy, 20; Iroquois, 4.
Logan, 18; Champaign, 6.
Sangamon, 14; Montgomery, 2.
Henry, 6; Knox, 2.
Greene, 8; Morgan, 7.
Cass, 10; Menard, 1.
Peoria, 10; Stark, 6.
Marshall-Putnam, 6; Tazewell, 3.
Macoupin, 8; Macon, 3.

Income Tax Wins

long needed relief." Turner received the endorsement of Ex-Gov. Frank O. Lowden of Illinois and former Gov. N. E. Kendall of Iowa.

Mr. Turner used facts and statistics compiled by the Illinois Agricultural Association and presented at a hearing in Des Moines last year by John C. Watson, showing the unfairness of the present taxing system in Iowa toward property. The Iowa Farm Bureau has waged a vigorous fight for tax relief.

Congressman L. J. Dickinson defeated Gov. John Hammill for the Republican nomination for United States senator.

OFFICIAL STANDING OF TEAMS IN THE ILLINOIS FARM BUREAU BASEBALL LEAGUE FOR WEEK ENDING MAY 31, 1930

High School Boy Wins Cup as Best Speaker

Federal Farm Board and Duty of Farmers to Co-Operate Is Subject

VERNON THOMAS, Heyworth, Ill., high school boy and son of Floyd Thomas, McLean County Farm Bureau member and chairman of the county grain marketing committee, won the silver loving cup donated by the Bloomington Chamber of Commerce in the local Future Farmers' public speaking contest, announces the Bloomington Pantagraph.

Vernon talked about the federal farm board and its program emphasizing the fact that farmers themselves will determine how much benefit they will secure from co-operative marketing development.

Farmer Responsible

"The farmer is responsible for the success of the act, not the President or the Farm Board," Vernon asserted.

"The first thing a farmer can do is to join the local organization if there is one. If there is not one, start one and encourage your neighbors to join. Then if at all times it doesn't work the way you think it should, don't throw mud at it, but get into the organization and stop the trouble.

"It is often hard to get some farmers to join but that is the only way to get complete control."

Vernon quoted Secretary of Agriculture Arthur M. Hyde as saying that the trouble with the farmer is that he is waiting for someone to hand him farm relief in a neat little package with a blue ribbon tied around it, but that he will have to wait a long time before such an event comes to pass.

The farmer needs help which he will get only through the Federal Farm Board, the speaker contended. Congress passed the law, President Hoover signed it and named the board, the board provides assistance for farmers to get control of the marketing of their products, but the farmer himself must make the program work.

Seek Larger Returns

"We all know that it takes a large sum of money to market the farm products," Vernon explained. "Senator Smoot of Montana says that the wheat producers of the United States get ten billion dollars for the wheat crop and the consumer pays twenty billion for the same wheat. In that case the other men or companies get a large sum of money for handling the grain. We could not expect the farmer to get all of the other ten billion, but he should get 80 per cent of it."

The combination of co-operation and education will bring success to agriculture, the speaker concluded:

"When the farmer learns that four bushels of wheat at $1.50 a bushel is $6, and that five bushels at $1 is only $5, he will surely produce the four bushels because it is easier and better."

By Art Lynch

ORGANIZED selling pays. If it didn't pay so well there wouldn't be so much opposition to it.

Harrison Fahrnkopf, over in the grain marketing department, has a real job. Best part of it is, the Illinois Grain Corporation must be right because some grain traders are against it.

Don't worry, Harrison, every one of that kind of knocks is a boost. That was true on many of our milk markets. What the dealers did to head off organized selling in the end made the organization that much stronger and more effective.

Organized agriculture has not yet forgotten the dramatic stand taken by the Pure Milk Association in the Chicago area in January, 1929, to win recognition. The dealer opposition was overplayed. The public began to root for the producers.

Selfish folks will pick on the Illinois Grain Corporation. But these "pecks" will help to put pecks and pecks of Illinois raised grain through a central marketing system that will bring the last few pennies per bushel.

Those opposed to co-operative selling advise us to use prayer, almanac signs and "passive resistance" to solve our sales problems. Why? Because they can then buy our products under more favorable conditions.

The time's coming, folks, when a membership in a co-operative sales organization will be as necessary as the farm itself. This membership will be your seat on your own marketing exchange entitling you to sell what you produce with a better chance for a profit.

So, let's not get excited by the words of wisdom from those who trade in our products—unless those words of wisdom are—Join your co-operative, stabilize your market—we will do business with you.

Many buyers in Illinois and elsewhere are talking like that—saying the co-operative can do things to improve conditions that they, as private business men, could never accomplish. That's real co-operation. And it means a happy, prosperous community—where everyone is a good enough sport to recognize the best interests of the other fellow.

There's a lot of good old-fashioned Golden Rule and quite a bit of honest religion in building co-operatives to hit the ball and return the "equality" to agriculture to which it is entitled.

Less T. B. In Hogs

A DECLINE of tuberculosis in market swine at the large meat-packing centers is shown by Federal meat-inspection records. In the past fiscal year the number of hog carcasses condemned as unsuitable for food because of tuberculosis was 9,170 less than in the previous year, and the number of parts of carcasses condemned for the same cause was 115,995 less. These figures represent declines of about 20 per cent. The eradication of tuberculosis among cattle on farms where the hogs are raised is the chief reason for the improved condition of the hogs.

Traded Your Car?

BE sure to notify your auto insurance company when you trade or sell your car and want your insurance policy transferred to the new car. You are protected only against an accident with the car mentioned in the policy. The policy does not protect the new car even though your assessments are all paid up on the policy covering the old one.

Notification of transfer is a requirement of all automobile insurance companies. It is wise to send a telegram or letter to your auto insurance company giving notification of transfer before you drive the new car out of the garage.

In one case a policyholder was driving his new car to town for the purpose of transferring his insurance. While in town he had an accident. The new car suffered $200 damage. The owner was compelled to stand the loss himself because the new automobile was uninsured.

Auto insurance companies are compelled to abide by this hard and fast rule for their own protection. Otherwise in many instances they would be carrying insurance on two cars, both the old and the new, for the price of one. Furthermore, if this rule were not strictly adhered to many policyholders would be lax in transferring their insurance. In many cases, too, it would be difficult to prove when the title to the old car passed from seller to buyer.

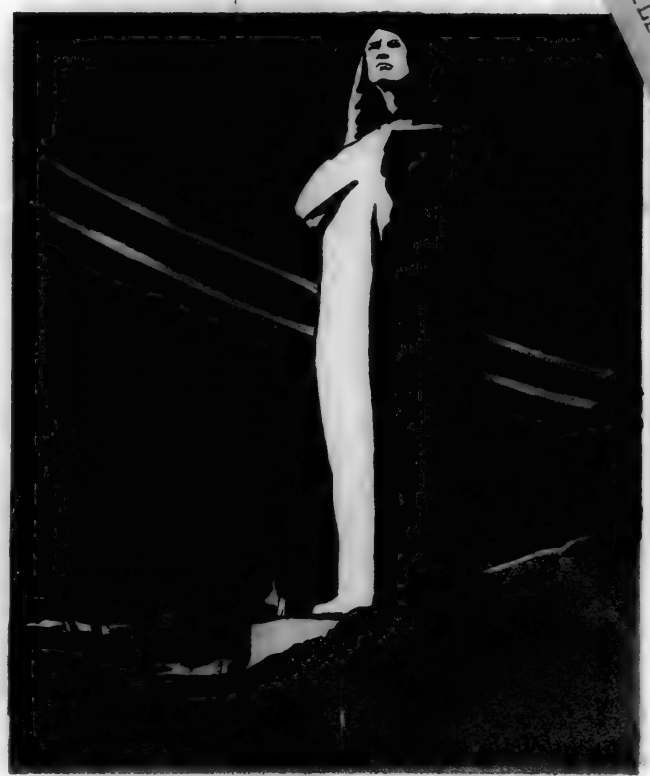
VITAMINS

UP to a few years ago food substances were thought to consist only of carbohydrate, fat, protein and certain inorganic salts. Investigators have discovered other substances, which occur in minute quantities in natural foods, that are necessary for normal nutrition and responsible for the prevention of various diseases of early life. These substances are known as vitamins. At present there are six known vitamins.

Vitamin A is essential for growth and successful reproduction. Milk and dairy products, eggs, liver, cod liver oil and leafy green vegetables are among the richest sources of vitamin A.

Vitamin B contains two independent vitamins—vitamins F and G. Vitamin F prevents neuritis and vitamin G prevents pellagra. The vitamin B complex is necessary for the maintenance of appetite, growth, proper functioning of digestive tract, reproduction, lactation and resistance to disease. It is found in both plant and animal life. The proper balance of cereals, cow's milk and leafy green vegetables will assure the necessary amount of vitamin B complex.

Vitamin C is the anti-scorbutic vitamin. Its absence from the diet leads to scurvy and it is thought to be an important factor in the prevention of tooth decay and the so-called rheumatism in children. The sources of this vitamin are oranges, lemons, grapefruit, tomatoes (raw, cooked or canned) and cereal grains.



Vitamin D, or the anti-rachitic vitamin, is known thusly because in its absence there is developed a disease known as rickets. This is a disease of infancy in which the bones become soft and flexible, due to the fact that the body has not furnished them with the proper amount of calcium and phosphorus. Other evidences of this disease are the bending of the long bones under muscular exertion, the formation of nodular enlargement on the ends and sides of bones, delayed closing of the soft spots on the baby's head, lack of development and occasional fever and chills. Cod liver oil and sunlight are the chief sources of vitamin D.

Vitamin E is known as the anti-sterility vitamin. It resembles vitamins A and D in certain respects, but differs in its source. It is not found in cod liver oil, but is present in vegetable oils and the oil of the wheat germ.

DAIRY Marketing

By Art Lynch

ORGANIZED selling pays. If it didn't pay so well there wouldn't be so much opposition to it.

Harrison Fahrnkopf, over in the grain marketing department, has a real job. Best part of it is, the Illinois Grain Corporation must be right because some grain traders are against it.

Don't worry, Harrison, every one of that kind of knocks is a boost. That was true on many of our milk markets. What the dealers did to head off organized selling in the end made the organization that much stronger and more effective.

Organized agriculture has not yet forgotten the dramatic stand taken by the Pure Milk Association in the Chicago area in January, 1929, to win recognition. The dealer opposition was overplayed. The public began to root for the producers.

Selfish folks will pick on the Illinois Grain Corporation. But these "pecks" will help to put pecks and pecks of Illinois raised grain through a central marketing system that will bring the last few pennies per bushel.

Watson Reviews History Of Revenue Amendment

Calls Most of Amendments to Measure Tacked on in House a Mistake

By John C. Watson

IN the general election to be held on November 4, 1930, the voters of Illinois will be called upon either to approve or to reject an amendment to the revenue article of the State Constitution recently submitted by a special session of the General Assembly.

Under authority of an act of the regular session of the General Assembly, approved June 21, 1929, a revenue investigation commission was appointed consisting of one senator appointed by the president of the Senate, two members of the House of Representatives appointed by the Speaker of the House, and three citizens appointed by the Governor. The act authorizing the creation of the commission directed it to report at the next regular or special session of the General Assembly with such recommendations for the revision of the revenue laws of the state as would, in the opinion of the commission, bring about a fairer method of assessing property, raising revenue and equalizing the tax burdens within the state, including such recommendations as to legislation and constitutional revision as the commission might deem advisable.

Began Last December

The commission began its deliberations in December, 1929. After numerous conferences with an advisory committee consisting of representatives of twenty-one state-wide organizations, one of which was the Illinois Agricultural Association, with tax officials and

Farmers Can Succeed In Terminal Markets

Elevator Manager Believes Present System Creates Buyers' Market

"FARMERS have proved their ability to handle their grain efficiently until it reaches the terminals, and are today demanding the right to handle their business still further, even to the ultimate consumer," said C. W. Wellman, manager of the Ransom, Illinois Farmers' Elevator, in a talk from station WENR, Chicago, the night of June 30.

"The action of farmers in setting up a co-operative terminal sales agency is a forward step in the industry whereby the farmer will have control of his business from start to finish," said Wellman. "Farmers insist on having something to say in determining the price they receive for their grain.

Buyers of Grain

"Years ago farmers rebelled against the system then in force in the marketing of their grain at the country point," continued Mr. Wellman. "As a result farmers' elevators sprang up all over the middle west until today from 60 to 70 per cent of the grain going to market is handled by farmers' elevators. These elevators have saved the farmer many thousands of dollars, but they are still to a large degree buyers of grain and not cogs in an effective grain marketing program. The commission men exceed by far the number of millers, processors and exporters. The result is that we have a buyers' market, not a sellers' market.

"Manufacturers of automobiles and farm machinery have developed a sales organization whereby their products are sold direct to the consumer over the

Veterinarians Hold Meeting, Bloomington

Illinois Live Stock Sanitary Committee Forms Permanent Organization

A CO-OPERATIVE plan of live stock sanitary service by which farmers can secure the counsel and services of veterinarians at a lower cost per unit, was suggested by W. S. Corsa, prominent live stock and horse breeder from Greene county, before the annual meeting of the Illinois Veterinary Medical Association at Bloomington on July 8.

"The services of the veterinarian costs too much per unit," said Mr. Corsa. "A plan should be worked out as in big business, to lower the cost for each call. The farmer ought to have better protection for his live stock than he now has. And the veterinarians ought to have a better income for the year than most of them now secure. I believe veterinarians can do much to make their services more attractive and more economical. I don't know just exactly what's wrong, but I believe that a plan can be worked out that will be satisfactory to both the veterinarians and the live stock growers."

Mr. Corsa's suggestion made in a brief 10-minute talk aroused much favorable comment from both farmers and veterinarians.

Discusses Farm Bureau

Dean H. W. Mumford of the Illinois College of Agriculture opened the morning conference with a discussion of extension service. He explained that the county advisers in Illinois secured their salaries jointly from money provided by Farm Bureau members, and the state and federal governments. He said that it must be kept in mind that the County Farm Bureau, supported by membership dues, pays all the expenses of the county adviser, pays for office rent and clerical help, and pays

(*Continued on page 7*)

Watson Reviews History

(*Continued from page 1*)

officers of local governments, with representatives of business and civic organizations, taxpayers and others, the commission submitted a preliminary report on May 10, 1930, just before the special session of the General Assembly convened.

The preliminary report of the commission dealt chiefly with the necessity of a revenue amendment, and offered a draft of an amendment with the following recommendation:

The Recommendation

"The commission believes that no one can now forecast what particular methods of taxation will be best suited to conditions in Illinois in the future and that, therefore, the General Assembly and the voters of Illinois, can best demonstrate their wisdom by leaving the determination of these specific details to the taxpayers who will pay the taxes in future years and to the legislators whom they will then elect. In view thereof and of the guaranties in both the Federal and the State Constitution, it is the judgment of this commission that the resolution herewith submitted be enacted, and that Illinois place in the hands of its General Assembly powers as broad as have been given to the legislators of New York, Massachusetts, Pennsylvania, and many other states of the Union."

Purpose of Amendment

The report was signed by all of the members of the commission. The chairman, a senator from Cook County, added a statement indicating his concurrence in the findings of fact in the report, but urging that the vesting of unlimited power in the General Assembly required a reapportionment of the state.

The amendment proposed by the commission was designed to remove the restrictions upon the power of the General Assembly under the present revenue article without imposing any other restrictions. It was unfortunate in using some language of uncertain meaning, which, if approved, almost certainly would have caused much litigation, and also in disturbing the present section of the revenue article dealing with exemptions of property. However, the amendment proposed by the commission was admirable for its recognition of the necessity of vesting the General Assembly with broad powers in dealing with questions of taxation.

Passed in Senate

The resolution submitting the amendment was promptly passed without change by the Senate and with little objection, except from a few Cook County senators. In the House it encountered stiffer opposition. Many amendments were offered mostly by members representing Chicago districts. Two changes had been urged by many persons and organizations, the insertion of a clause requiring that all real estate except mineral lands and lands devoted to reforestation be in one class, and the elimination of the substitute proposed for the present exemption section. These changes were made almost without opposition. Most of the other amendments to the Senate resolution urged by Chicago representatives proposed restrictions rendering an income tax inoperative until a reapportionment was made in legislative districts or limiting the state to not more than 10 per cent of the net proceeds of a tax on incomes except by the affirmative votes of two-thirds of the members elected to each House of the General Assembly.

Separate Conferences

Separate conferences were called both by the Cook County representatives and by the downstate representatives. The downstate conference unanimously agreed to resist any amendment limiting the state to less than 25 per cent of the net proceeds of a tax on incomes. However, when the amendment proposing a limitation of 10 per cent was under discussion, a downstate member offered an amendment thereto fixing the percentage at 15. Other downstate members urged limitation of the state to a lower percentage than 25. With only a few downstate votes against it, the limitation was fixed at 15 per cent of a tax on incomes. There was no objection to the clause giving a majority of the members elected to each House the power by general law to distribute part or all of any other taxes collected by the state among the counties and other taxing districts. The Chicago amendment as modified was approved.

A Significant Change

The present section giving the corporate authorities of cities, towns and villages the power to make local improvements by special assessment, or by special taxation of contiguous property or otherwise, was broadened to include "sanitary districts, park districts, and other municipalities."

When the resolution as amended was called for final action by the House, it narrowly escaped defeat. On the first vote it failed by one vote to receive the two-thirds majority required by the Constitution. Many Chicago members voted against it. The two members who had most actively urged limitation voted against it on the ground that further limitations should have been adopted. The resolution was saved from defeat only by a motion to postpone further consideration. After vain attempts had been made to take up the Chicago relief bills, the amendment resolution was called up again and was approved by a vote barely exceeding the constitutional two-thirds majority. Many senators were opposed to the House substitute for Section 2, but finally accepted it on the ground that no other draft could pass the House. But in doing so they reserved the right to oppose the resolution before the people should a careful analysis of it seem not to justify their support.

Amendments a Mistake

Representatives of the Illinois Agricultural Association, though urging minor changes chiefly for the purpose of clarifying the amendment proposed by the investigation commission, supported the position of the commission and opposed the restrictions urged by many Chicago and Cook County legislators. Representatives of the association still believe that most of the changes made in the House in compliance with the demand of Chicago were a mistake. All authorities on taxation heard by the General Assembly had opposed such restrictions. However, careful analysis is being made of the amendment as submitted, both of its good features and of its bad features. After full consideration of this report and action thereon by the board of directors, the position of the association on the amendment and the reasons therefor will be announced.

Farmers Can Succeed

(*Continued from page 1*)

shortest possible route. This is exactly what the farmer is trying to do. He desires to get into the terminal markets, own his own handling facilities, and organize his bargaining power. Farmers must turn a deaf ear to self-styled friends of agriculture and support the Federal Farm Board which is trying to help them solve their problems."

Mr. Wellman has been in the grain business for the past 10 years, serving during most of this time as manager of elevator companies. For the past seven years he has managed the farmers' elevator at Ransom which handles an average of nearly 500,000 bu. of grain annually. The Ransom elevator is a members of the Illinois Grain Corp.

"Congratulations upon the June issue of the I. A. A. RECORD. It is most attractive."

ILLINOIS MILK PRODUCERS' ASSOCIATION,
Wilfred Shaw, Resident Manager.

"We Want Effective Grain Marketing"

Have Opportunity to Build Real Co-Operative Sales System, Says Sailor.

"WHAT kind of a grain marketing organization do you want to serve you in Illinois to take advantage of the Agricultural Marketing Act and the aid offered by the Federal Farm Board?" J. C. Sailor, a director in the Illinois Grain Corporation and one of the founders of the farmers' elevator at Cissna Park in Iroquois county asked in a recent address over radio station WLS.

J. C. Sailor

"As a farmer and speaking to farmers, I am going to take the liberty to say that we want an organization that is strictly producer-owned and producer-controlled, one whose set-up is fundamentally sound, and one which has the support and backing of the leading farmers and farm organizations in our state. I believe that the Illinois Grain Corporation is such a grain marketing co-operative.

Agreement Necessary

"The Illinois Grain Corporation is an advocate of contract marketing," explained the speaker. "In other words, it believes that the members should agree to market their grain through the organization once they have invested their money to provide the necessary capital. Producers who believe in this system of marketing do not feel that they can build a strong agency without determination on the part of the members to support it. They doubt that the voluntary marketing idea will really be effective.

"Past experience has proved that when member elevators ship to the hundreds of old-line commission firms the co-operative selling agency becomes merely just another commission company. And anyone who has studied terminal marketing knows that there are too many such firms already. As a farmer I feel, and I know that many others share that feeling with me, that the few advocates of the voluntary hit-or-miss plan should be supporting a more effective program of grain marketing.

Local Control Continues

"There has been much said regarding the usurpation of the local elevators by the Illinois Grain Corporation and the Illinois Agricultural Association, and that our local co-operatives will lose their identity. This I wish to denounce as untrue. Our elevators will be operated as formerly as far as management and control are concerned. The elevator board of directors and manager will have a job just as big as ever. We do expect to be able to furnish market and sales service by working in close co-operation with the national agency. In this manner our elevators will have as good and we hope eventually better service than they are now receiving. We expect to market the grain of the farmer through his own machine, and do it efficiently so that the profits will accrue to him on a patronage basis.

Loyalty and Intelligence

"All we need at this critical time is the combined intelligence and courage of sincere and honest grain farmers working loyally for the benefit of all people. I believe we are going to succeed because our plan is sound and the time is ripe to put it in operation. To you elevator directors who are sincere and loyal to your producer patrons I ask that you call for a representative of the Illinois Grain Corporation to meet your board of directors and explain fully the plan and what is necessary to qualify as a member. This is our opportunity to place in operation and use a farmer-owned and farmer-controlled marketing machine capable of giving us bargaining power in the markets where prices are made."

STONE TELLS 4-H CLUB MEMBERS NEED OF EFFICIENT MARKETING

"THE 4-H clubs teach you boys and and girls how to become better farmers and home makers, encourage you to take part in neighborhood affairs and to be of service to others, develop a spirit of teamwork among you and train you in leadership, one of the great needs of agriculture today. All of this is most excellent and serves to make life on the farm more attractive.

ILLINOIS DELEGATION AT 4-H CLUB CAMP

Left to right: Dorothy E. Lynch, Extension specialist; George A. Doole, Adams County; Joy M. Hardy, Hancock County; Lewis Butzow, Iroquois County; Mildred Mies, Livingston County; E. L. Pilchard, State Club leader. This picture was taken during the National 4-H Club Camp, last month, in the shadow of the Washington monument. The I. A. A. Board of Directors authorized a contribution of $100 to the expenses of the 4-H Club members to the national capital.

"But while you have been learning to produce well and efficiently, you have given little thought to efficient marketing. Fancy premiums received for prize animals or products exhibited at county or state fairs, you will quickly learn as practical farmers, are not the prices paid in the markets for similar commodities. If you wish to get a fair return for your effort you will find that just as much or more attention must be given to marketing your crop as to producing it." So spoke James C. Stone, vice-chairman of the Federal Farm Board to club members assembled at the national 4-H club camp held last month at Washington.

"For the most part farmers in the past have been content to produce to the limit and let someone else do the marketing," said Mr. Stones. "They have continued to grow and sell blindly, without regard to what their neighbors are doing, with the result that agriculture has not kept pace financially with other industries, which have become highly organized.

"The Farm Board was created to help correct this disparity. Congress said the way for agriculture to gain economic equality is through co-operation on the part of farmers. Our Board is trying to help the farmers get organized so that they, acting together, may control the production and marketing of their crops and thereby get a fair price for them. It is our opinion that co-operation is the only thing that offers real hope for agricultural prosperity.

"Co-operation among farmers that is being promoted by the Farm Board is nothing more than a broadening of the teamwork you young people are doing in your 4-H clubs. We feel that substantial progress is being made. The job is not one to be done overnight. In the long run success depends on the willingness of farmers to co-operate."

Watson Reviews History

(Continued from page 1)

officers of local governments, with representatives of business and civic organizations, taxpayers and others, the commission submitted a preliminary report on May 10, 1930, just before the special session of the General Assembly convened.

The preliminary report of the commission dealt chiefly with the necessity of a revenue amendment, and offered a draft of an amendment with the following recommendation:

The Recommendation

"The commission believes that no one can now forecast what particular methods of taxation will be best suited to conditions in Illinois in the future and that, therefore, the General Assembly and the voters of Illinois, can best demonstrate their wisdom by leaving the determination of these specific details to the taxpayers who will pay the taxes in future years and to the legislators whom they will then elect. In view thereof and of the guaranties in both the Federal and the State Constitution, it is the judgment of this commission that the resolution herewith submitted be enacted, and that Illinois place in the hands of its General Assembly powers as broad as have been given to the legislators of New York, Massachusetts, Pennsylvania, and many other states of the Union."

Purpose of Amendment

The report was signed by all of the members of the commission. The chairman, a senator from Cook County, added a statement indicating his concurrence in the findings of fact in the report, but urging that the vesting of unlimited power in the General Assembly required a reapportionment of the state.

The amendment proposed by the commission was designed to remove the restrictions upon the power of the General Assembly under the present revenue article without imposing any other restrictions. It was unfortunate in using some language of uncertain meaning, which, if approved, almost certainly would have caused much litigation, and also in disturbing the present section of the revenue article dealing with exemptions of property. However, the amendment proposed by the commission was admirable for its recognition of the necessity of vesting the General Assembly with broad powers in dealing with questions of taxation.

Passed in Senate

The resolution submitting the amendment was promptly passed without change by the Senate and with little objection, except from a few Cook County senators. In the House it encountered stiffer opposition. Many amendments were offered mostly by members representing Chicago districts. Two changes had been urged by many persons and organizations, the insertion of a clause requiring that all real estate except mineral lands and lands devoted to reforestation be in one class, and the elimination of the substitute proposed for the present exemption section. These changes were made almost without opposition. Most of the other amendments to the Senate resolution urged by Chicago representatives proposed restrictions rendering an income tax inoperative until a reapportionment was made in legislative districts or limiting the state to not more than 10 per cent of the net proceeds of a tax on incomes except by the affirmative votes of two-thirds of the members elected to each House of the General Assembly.

Separate Conferences

Separate conferences were called both by the Cook County representatives and by the downstate representatives. The downstate conference unanimously agreed to resist any amendment limiting the state to less than 25 per cent of the net proceeds of a tax on incomes. However, when the amendment proposing a limitation of 10 per cent was under discussion, a downstate member offered an amendment thereto fixing the percentage at 15. Other downstate members urged limitation of the state to a lower percentage than 25. With only a few downstate votes against it, the limitation was fixed at 15 per cent of a tax on incomes. There was no objection to the clause giving a majority of the members elected to each House the power by general law to distribute part or all of any other taxes collected by the state among the counties and other taxing districts. The Chicago amendment as modified was approved.

A Significant Change

The present section giving the corporate authorities of cities, towns and villages the power to make local improvements by special assessment, or by special taxation of contiguous property or otherwise, was broadened to include "sanitary districts, park districts, and other municipalities."

When the resolution as amended was called for final action by the House, it narrowly escaped defeat. On the first vote it failed by one vote to receive the two-thirds majority required by the Constitution. Many Chicago members voted against it. The two members who had most actively urged limitation voted against it on the ground that further limitations should have been adopted. The resolution was saved from defeat only by a motion to postpone further consideration. After vain attempts had been made to take up the Chicago relief bills, the amendment resolution was called up again and was approved by a vote barely exceeding the constitutional two-thirds majority. Many senators were opposed to the House substitute for Section 2, but finally accepted it on the ground that no other draft could pass the House. But in doing so they reserved the right to oppose the resolution before the people should a careful analysis of it seem not to justify their support.

Amendments a Mistake

Representatives of the Illinois Agricultural Association, though urging minor changes chiefly for the purpose of clarifying the amendment proposed by the investigation commission, supported the position of the commission and opposed the restrictions urged by many Chicago and Cook County legislators. Representatives of the association still believe that most of the changes made in the House in compliance with the demand of Chicago were a mistake. All authorities on taxation heard by the General Assembly had opposed such restrictions. However, careful analysis is being made of the amendment as submitted, both of its good features and of its bad features. After full consideration of this report and action thereon by the board of directors, the position of the association on the amendment and the reasons therefor will be announced.

Farmers Can Succeed

Continued from page 1

shortest possible route. This is exactly what the farmer is trying to do. He desires to get into the terminal markets, own his own handling facilities, and organize his bargaining power. Farmers must turn a deaf ear to self-styled friends of agriculture and support the Federal Farm Board which is trying to help them solve their problems."

Mr. Wellman has been in the grain business for the past 10 years, serving during most of this time as manager of elevator companies. For the past seven years he has managed the farmers' elevator at Ransom which handles an average of nearly 500,000 bu. of grain annually. The Ransom elevator is a members of the Illinois Grain Corp.

"Congratulations upon the June issue of the I. A. A. RECORD. It is most attractive."

ILLINOIS MILK PRODUCERS' ASSOCIATION.
Wilfred Shaw, Resident Manager.

"We Want Effective Grain Marketing"

Have Opportunity to Build Real Co-Operative Sales System, Says Sailor.

"WHAT kind of a grain marketing organization do you want to serve you in Illinois to take advantage of the Agricultural Marketing Act and the aid offered by the Federal Farm Board?" J. C. Sailor, a director in the Illinois Grain Corporation and one of the founders of the farmers' elevator at Cissna Park in Iroquois county asked in a recent address over radio station WLS.

J. C. Sailor

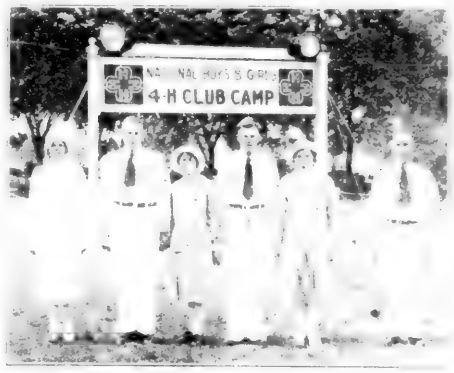
"As a farmer and speaking to farmers, I am going to take the liberty to say that we want an organization that is strictly producer-owned and producer-controlled, one whose set-up is fundamentally sound, and one which has the support and backing of the leading farmers and farm organizations in our state. I believe that the Illinois Grain Corporation is such a grain marketing co-operative.

Agreement Necessary

"The Illinois Grain Corporation is an advocate of contract marketing," explained the speaker. "In other words, it believes that the members should agree to market their grain through the organization once they have invested their money to provide the necessary capital. Producers who believe in this system of marketing do not feel that they can build a strong agency without determination on the part of the members to support it. They doubt that the voluntary marketing idea will really be effective.

"Past experience has proved that when member elevators ship to the hundreds of old-line commission firms the co-operative selling agency becomes merely just another commission company. And anyone who has studied terminal marketing knows that there are too many such firms already. As a farmer I feel, and I know that many others share that feeling with me, that the few advocates of the voluntary hit-or-miss plan should be supporting a more effective program of grain marketing.

Local Control Continues



"There has been much said regarding the usurpation of the local elevators by the Illinois Grain Corporation and the Illinois Agricultural Association, and that our local co-operatives will lose their identity. This I wish to denounce as untrue. Our elevators will be operated as formerly as far as management and control are concerned. The elevator board of directors and manager will have a job just as big as ever. We do expect to be able to furnish market and sales service by working in close co-operation with the national agency. In this manner our elevators will have as good and we hope eventually better service than they are now receiving. We expect to market the grain of the farmer through his own machine, and do it efficiently so that the profits will accrue to him on a patronage basis.

Loyalty and Intelligence

"All we need at this critical time is the combined intelligence and courage of sincere and honest grain farmers working loyally for the benefit of all people. I believe we are going to succeed because our plan is sound and the time is ripe to put it in operation. To you elevator directors who are sincere and loyal to your producer patrons I ask that you call for a representative of the Illinois Grain Corporation to meet your board of directors and explain fully the plan and what is necessary to qualify as a member. This is our opportunity to place in operation and use a farmer-owned and farmer-controlled marketing machine capable of giving us bargaining power in the markets where prices are made."

STONE TELLS 4-H CLUB MEMBERS NEED OF EFFICIENT MARKETING

"THE 4-H clubs teach you boys and girls how to become better farmers and home makers, encourage you to take part in neighborhood affairs and to be of service to others, develop a spirit of teamwork among you and train you in leadership, one of the great needs of agriculture today. All of this is most excellent and serves to make life on the farm more attractive.

ILLINOIS DELEGATION AT 4-H CLUB CAMP

We feel that substantial progress is being made. The job is not one to be done overnight. In the long run success depends on the willingness of farmers to co-operate."

Country Life Brings Out Wholesale Policy

Manager L. A. Williams Describes New Term Insurance

THE intent and purpose of Country Life Insurance Company is to supply to every Farm Bureau family life insurance at the lowest possible cost. It has long been well understood that the basic policy in life insurance is ordinary life. There is no better policy than the ordinary life policy, inasmuch as this policy calls for the lowest premium, with standard cash values, of any sold.

However, we have been aware all along of the depression in agriculture which has kept many of our people from protecting their estates with adequate life insurance. Realizing that a temporary protection at a lower premium than even the ordinary life policy would be advantageous to many in tiding them over a tight place, Country Life decided to make wholesale term insurance available to members in good standing.

Need 100 Per County

The wholesale term policy is made available providing a class of at least 100 can be signed up in a county. The rate at the average age of 35 years is $9.58 a thousand, and this rate is permanent for 12 years. It is contemplated that dividends will still further reduce this cost. And at any time in that 12 year period the insured may convert the policy to an ordinary or a 20 payment, or a 20 year endowment policy, getting full credit for the premium money which he has paid in, if he so desires. The member is fully protected at this rate, and should he die, the full death claim is paid.

He may take $2,000 of life insurance if he is a Farm Bureau member and also carries a regular policy in Country Life. Otherwise the limit is $1,000, unless he is willing to pay a $2 short form medical fee, which will entitle him to $2,000 of this life insurance if he passes.

Limit $1,000

We have had numerous calls for policies as small as $500, and have constantly maintained a limit of $1,000. We now feel that this low rate will enable every Farm Bureau member to carry an additional thousand if he seees fit, and at least a $1,000 policy if he carries no insurance, to tide him over to the time when he can convert this policy to a regular form policy with cash surrender values, loan values, etc.

It is well understood that the 12 year term policy carries with it no cash values, but really is an option on life insurance, giving full credit to the insured for the option money to apply on a regular policy. *At the time the insured converts, he goes in at the original age when the wholesale policy was first taken out.* He converts without medical examination, just as he is insured without medical examination, unless he desires to carry $2,000, and does not already carry a Country Life policy, when he is requested to take a short form medical.

Must Have Class of 100

The master contract has been mailed out to every county. The county desiring this low form of protection signs the master contract and agrees to get 100 people to apply. They also agree to collect the premiums, cutting down the cost of handling and operating to the very minimum. Each individual must, of course, be a Farm Bureau member, but it is very simple for a county with as low as 200 members to find one-third of them willing to take out at least a $1,000 policy.

The 12 year renewable and convertible term policy sold in wholesale quantities gives the benefit of a lower rate for 12 years' insurance on the participating basis than the better old line insurance companies have charged for a seven year convertible policy. In order to put over any great price reducing plan in life insurance, co-operation and patronage are necessary. It is highly important that every county work with the I. A. A. and Country Life Insurance Company in making this great plan effective and successful.

The wholesale policy will be available from July 10 to August 10. This concentration of effort makes possible an economy in the handling of the business which is reflected in the low premium, and will still further be reflected in dividends. One premium notice will be sent out to each county, it in turn will notify the policyholders. The group of 100 does not have to be maintained, it is only necessary to have 100 to put the policy in effect. After that, the insured may cancel or may be cancelled because he dropped his Farm Bureau membership, or may convert and still not affect the protection on the remaining members.

Once each year from July 10 to August 10 new applications may be offered to the company in classes, providing a sufficient number is offered each year to bring the total up to 100. Otherwise, just the old applicants are taken care of. Applicants from ages 18 to 60 inclusive may apply without medical examination, for a minimum of $1,000 of life insurance. An additional $1,000 is issued under the conditions described above.

$17,000,000 Possible

If 80 counties will furnish a minimum of 100 lives, and co-operate toward the success of this wholesale insurance project, we anticipate not less than seventeen millions of business will be sold on this plan by August 10.

New general insurance agents recently appointed are as follows: Vermilion county, Edward L. Dillon; Lee county, F. W. Peckham; Scott county, W. E. Overton.

ADAMS COUNTY SERVICE CO. BOARD

Seated from left to right: Fred Schnellbecker, Jr., president; C. H. Chilson, auditor from the I. A. C. A.; Miss Lillian Keil, bookkeeper; Wilmer Cornwell, manager. Standing from left to right: Walter Frey, director; John M. Longlet, director; S. F. Russell, farm adviser; J. J. Wellman, treasurer, and D. H. Myers, director. J. E. Meatheringham, secretary, and Milton Dean, director, were absent. The Adams Service Company was organized early this year and began operations about April 1. Bulk stations were erected at Fall Creek, Golden, and Paloma. Wilmer Cornwell is manager. The headquarters of the company is at the Adams County Farm Bureau office in Quincy. Seven truck salesmen are employed at the present time. The company has handled 35 carloads of petroleum products within the past three months and the number of customers is steadily increasing.

DAIRY Marketing

By Art Lynch

IT WON'T be long now.

* * *

Requests are coming in from southern Illinois asking for help in getting milk bargaining organizations established around the consuming centers in that part of the state.

* * *

These leaders believe that one good strong organization would be advisable to cover about sixteen cities, including Centralia, Mt. Carmel, Mt. Vernon, Christopher, Benton, West Frankfort, Eldorado, Harrisburg, Herrin, Johnston City, Marion, Murphysboro, Carbondale, DuQuoin, Metropolis and Cairo.

* * *

Such a large organization could render the best of service to the 130,000 city cousins living in these cities. It could be operated in the most economical manner through one central board of directors and one management.

* * *

In many of these cities the buyers of milk have merged into one and the same concern. They have, therefore, *united buying* power. Through co-operation the dairymen can have *united selling* power.

* * *

When the southern Illinois boys get their association under way it will practically complete the fluid milk bargaining organizations in Illinois. The only spots left will be Danville and Galesburg.

* * *

All the other fluid markets are either actually selling or have their sign-up about over and will soon be ready to have something to say about prices, quality, tests and advertising.

* * *

Then the next step is to complete the state regional or federation of all the organized areas which will insure a business-like and continuous p.ogram for selling our milk intelligently.

* * *

So, it won't be long now.

CHEMICAL USED IN WAR ON THISTLES

Calcium chlorate is being used on this Knox county farm to destroy a large field of Canada thistles.

SMALL patches of thistles are more or less common in Knox county and considerable progress is being made in checking these noxious weeds through the use of calcium chlorate or Atlacide.

Thistles were introduced in the field shown in the photograph furnished by Mr. Keeler with Canadian seed oats which were not recleaned before sowing. The tenants on the farm made no attempt to control these weeds in the beginning and finally gave up all attempts to raise a crop on the land as the returns were unprofitable.

This field is located on the Galesburg-Knox township line, northeast of the city of Galesburg, and has the reputation of being the worst thistle patch in the county. The field was a solid mass of thistles prior to the eradication program started by Supervisor Norton and the results obtained through the use of chemicals will be watched with intense interest by farmers and citizens of Galesburg.

Over 250,000 pounds of this weed killer has been distributed by the Illinois Farm Supply Company and associated companies prior to July 1.

TRY CONDEMNATION SUITS

THE first cases covering condemnation suits brought against land owners by the Illinois Northern Utility Co. in the Freeport-Dixon power line case came up for trial in Dixon on July 10. The action of the company followed a proposal submitted by a Farm Bureau committee of land owners covering a basis for compensation for land damaged in whole or in part by the power line being erected between Freeport and Dixon.

Negotiations between the joint Farm Bureau committee representing land owners in Lee, Ogle and Stephenson counties, and utility representatives have been underway for several months.

Farmers are insisting that their constitutional rights as land owners be fully respected and that the principle of equal rights under the laws be given full sway.

The land owners have engaged local counsel with whom the Transportation Department of the Illinois Agricultural Association is co-operating. Any attempt on the part of the company to obtain a settlement for less than a fair compensation will be resisted by the land owners. They contend that the power line will be a permanent encumbrance upon the land; that the sale value of the farms affected will be lowered.

Veterinarians Meet

(Continued from page 3)

the salaries of assistant county advisers.

"The Farm Bureau in Illinois is considered in other states," said Dean Mumford, "the best example of what a state farm organization should be. It is conceivable," he said, "that an organization cannot always be right. It may make mistakes, but the Farm Bureau is doing the best it knows how.

"Keep in mind that the Farm Bureau is not subject to the dictation of the University," said Dean Mumford. "If the Farm Bureau wants to start a barber shop it can do it. We can advise but we cannot dominate or control."

Contagious Abortion Discussed

H. W. Allyn, manager of Rock River Farms, Byron, Illinois, and president of the State Holstein-Friesian Association, expressed the opinion that the average farmer has no definite viewpoint on live stock sanitation. "Oftentimes contagious abortion," he said, "is excused by the live stock owner as an act of God, or is due to a bump or some other external cause." He cited a case in which a neighbor consulted a veterinarian for one of his cows that lost a calf. The veterinarian in this case recommended vaccination, although he had made no blood tests and so had no knowledge of the cause of the trouble. "This is a sad commentary on the profession," said Mr. Allyn.

Remove from Politics

Harry Wood of Delavan, a prominent Holstein breeder and the first in the state to have an accredited herd, advocated the removal of the state division of animal industry from politics. This recommendation was also endorsed by Mr. Allyn.

D. W. Robinson, state superintendent of animal industry, stated that there was too much conflicting opinion among the veterinarians about disease control and treatment. He gave this as the cause of farmers' hesitancy in following the veterinarians' recommendations.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Editor, George Thiem

Agriculture and the Business Depression

"THE difficulty is that as business speeds up and develops into a boom inequalities creep in and upset the balance. Production concentrates too much, prices of some commodities rise more than others, and retail prices and wages, salaries and other forms of income lag in varying degree behind wholesale prices. Gradually the intricate machinery of production and distribution becomes clogged and has to slow down until the obstructive factors are corrected."

George Roberts, economist, of the National City Bank comments thus in explaining the business depression now running its course throughout the United States, and, in fact, throughout the world.

Since 1920 when deflation hit agriculture, crippling the income and buying power of nearly one-third the country's population, farm spokesmen warned repeatedly that this condition unless righted would undermine industrial prosperity. The farm depression alone perhaps was not responsible for the current hard times and unemployment, but certainly it has had its influence.

A general leveling of commodity prices is underway in this as well as in foreign countries. There is still too much spread, however, between retail and wholesale prices and the reluctance of the processors and retailers to come down to a price level comparable to that affecting wholesale goods is holding up buying and aggravating the accumulation of surpluses.

There has been too much interference with the laws of supply and demand, too much living on artificial levels to the disadvantage of the unorganized farmer selling at world prices. Even now organized labor and industry are offering stubborn resistance to declining wages and prices all of which is reflected in the unemployment situation and the wide disparity between what the farmer gets for cattle, wheat and lambs, for example, and what the consumer pays for beef, bread and mutton. This condition will never be righted until economic forces are given freer play all along the line, or until the farmer acquires control of the merchandising end of his business and influences prices thereby as others are doing.

The Rise of Fruits and Vegatables

TO what extent corn belt agriculture producing the heavy staples for the human diet has suffered from the competition of vegetable and fruit producers is revealed in figures recently reported by the U. S. Department of Agriculture. Since the World War shipments of vegetables have increased about 140 per cent whereas population has increased only 15 per cent. This does not include local marketing from roadside stands or by trucks, which has grown to tremendous proportions with the coming of hard roads.

Fresh fruits and vegetables in the late fall and winter were once considered a luxury even by those with very comfortable incomes, but today thousands of stores handling perishables exclusively do a thriving year-round business. Where only 4,700 cars of lettuce were moved on the railways in 1916, no less than 51,504 cars were reported in 1928.

Fruit and vegetable growing lands like those in southern Texas, Arizona, California and Florida have been reclaimed from swamp and desert into valuable and high-priced tracts, and it is conceivable that they have taken their toll in income from the staple-producing lands of Illinois and Iowa. Consumption of potatoes, wheat and meats has remained relatively stationary because millions of people are eating more spinach, peas, beans, carrots, beets, sweet corn, oranges, grape fruit, melons, tomatoes, etc. The hope of greater corn belt prosperity perhaps lies in the development of new commercial uses for farm products to make us more independent of the dwindling demand for heavy foods.

An Editor's Observation

DURING the past six months the Hancock County Farm Bureau has invited editors, ministers, superintendents of schools and other honorary members in the county to attend at least one of the monthly board meetings of the Farm Bureau directors.

"This project fostered by the Farm Bureau Public Relations Committee has been instrumental in informing these leaders about the Farm Bureau program," writes J. H. Lloyd, farm adviser.

Following his attendance at one of the board meetings, the editor of the Hamilton (Ill.) Press wrote as follows:

THE HANCOCK COUNTY FARM BUREAU

"On Friday evening of last week the editor had the pleasure and privilege, through the courtesy of R. M. Cochran, to attend the monthly meeting of the Hancock County Farm Bureau Board at Carthage.

"It was one of the most interesting meetings attended in a long time, and one which proved both edifying and highly revealing. The volume of business and varied phases of farm topics touched upon was nothing short of amazing, and the dispatch and sureness with which every business detail was coped with and disposed of bespoke of high efficiency.

"The meeting was conducted by President C. P. Griffiths in a prompt, courteous and businesslike manner. Every committee chairman made his report in a clear and concise manner which bespoke not only of his thorough understanding of the workings of his committee but also his whole hearted interest in the work and progress of the farm bureau.

"We town businessmen, through our own ignorance, have come more or less to the belief that the farmer is inefficient and awkward in his business dealing. Those who entertain such a belief should have the privilege of attending a board meeting of the Hancock County Farm Bureau.

"Another thing prevalent throughout the meeting last Friday night was the way the members of the farm bureau board backed up each other and the principles of their organization. It left us with the impression that these farmers have come to the realization of the importance of co-operation and of organization. In their attempt to set a higher standard of efficiency in farming they have adopted the best principles of good business methods, and they are succeeding.

"We do not know how farm bureaus of other counties are conducted, but of this we are certain: The Hancock County Farm Bureau is an efficient organization meriting the co-operation of every farmer in Hancock county, large and small, rich and poor, good, bad and indifferent. The men on the board of this organization are giving their time and energy to do something for agriculture in the section in which they are living and for the betterment of conditions of the farmer. Does not the farmer owe some loyalty to such a group of men? Does it not become the duty of every businessman and citizen in this county to give these men their co-operation?"

Live stock growers have demonstrated their ability to immunize their pigs against hog cholera with safety. Real friends of the farmer glory in his ability to help himself, in his growing knowledge and use of disease control methods to reduce losses and costs of production.

IN EUROPE ON FREE TRIP

Mary Jeanette Irwin, left, and Nancy Grossboll, 4-H club girls from Menard county, left in June for a free trip to Europe awarded as a prize by the Chicago Mail Order House. These two girls were Illinois champions last year.

"Hank" Lloyd Hired

J. H. "Hank" Lloyd, farm adviser for the past 14 years in Hancock county, has been employed as the active manager of the Soybean Marketing Association. Mr. Lloyd expects to assume his new duties around August 1. The Soybean Marketing Association will probably establish headquarters at 608 So. Dearborn St., Chicago.

J. H. Lloyd

Mr. Lloyd brings to a close his long and successful career as farm adviser in Hancock county, the second oldest adviser in point of service in the state. Lloyd went to Hancock in 1916 from Purdue University, where he had served for two years as instructor in crops after graduating from the University of Illinois. At that time the Hancock county organization was called a soil improvement association. In 1919 it was reorganized as the Hancock County Farm Bureau.

Sponsored New Projects

During Mr. Lloyd's 14 years of service in Hancock county, the Farm Bureau pioneered in many projects which have been adopted by county organizations throughout the state. These include the organization of the first Farm Bureau oil company in Illinois, the creation of honorary Farm Bureau memberships for ministers and editors, hog cholera control work, and others. In 1925 he was honored by being elected as president of the Illinois State Association of Farm Advisers. More recently he has represented the farm advisers on the board of directors of the Illinois Farm Bureau Serum Association, and lately was chosen to represent the Farm Advisers' Association on the State Live Stock Sanitary Committee.

Farm Bureau Growing

More than a year ago Mr. Lloyd was re-elected farm adviser for a period of three years beginning May 1, 1929, and has nearly two years to serve under that contract. The Hancock county Farm Bureau has the largest financial reserve and membership since the peak period in 1923. The membership of 850 is steadily increasing.

The Soybean Marketing Association is one of the latest co-operatives to be formed in Illinois. It has more than 2,200 members who will grow this year, it is estimated, in excess of 1,700,000 bu. of beans.

Country Life Announces New Policy

A NEW wholesale term life insurance policy for Farm Bureau members will be sold during the 30-day period between July 10 and August 10, 1930. The new policy is known as term insurance and carries a low level rate for 12 years, when it runs out unless converted in the meantime into one of the regular forms of insurance. At the end of 12 years, however, a new term policy may be taken out, the rate to be based on the age of the applicant at that time.

The term policy is to be made available to Farm Bureau members only in groups of 100 in each county. In other words, there must be at least 100 Farm Bureau members in a county subscribe for this policy before it can be made available to any Farm Bureau member.

Rate at Age 35—$9.58 With Dividend Rights

THE low cost of the new wholesale policy is illustrated by the annual rate of $9.58 at age 35, which can be further reduced by dividends. The policy is non-medical in that anyone can buy $1,000 of insurance without a medical examination. If already a Country Life policyholder the applicant may secure $2,000 of insurance. A non-policyholder in Country Life may take $2,000 of the new term insurance providing he pays for a short form medical examination.

Policy Convertible Within 12 Years

AN important feature of the new term insurance is that it can be changed or converted into standard life insurance at any time within 12 years of the date when taken out. Moreover, when you convert short term insurance you will get the benefit of all premiums paid, and also the benefit of the rate for your age when the short term policy was taken out. The new policy, therefore, is an option on standard life insurance good for 12 years with full protection during this period.

Why the New Policy?

THE new term policy is offered to Farm Bureau members who may need more protection but do not have the available funds at present to pay the higher premiums on the regular kinds of insurance. The rate on the term policy is so low as to make it easily within the reach of every member. Then later when the policyholder feels that he is in a better position to take out one of the regular policies he can convert and get the full benefit of all payments made on a short term policy.

Wholesale Insurance July 10-Aug. 10

ONE hundred or more Farm Bureau members in good standing in any county can take advantage of this new term policy by buying in a group. The board of directors of your County Farm Bureau may apply for the new term insurance only when 100 members have asked for it and the County Farm Bureau insurance department agrees to handle the work. Following are annual rates which cost, it is contemplated, will be reduced from year to year after the third, by dividends:

Rates on Wholesale 12 Year Term Policy

Age	Annual Prem. Per $1,000	Age	Annual Prem. Per $1,000	Age	Annual Prem. Per $1,000	Age	Annual Prem. Per $1,000
18	$7.71	29	$8.59	40	$11.06	51	$20.51
19	7.76	30	8.72	41	11.48	52	22.08
20	7.82	31	8.86	42	11.99	53	23.82
21	7.88	32	9.01	43	12.56	54	25.73
22	7.95	33	9.18	44	13.22	55	27.85
23	8.02	34	9.37	45	13.94	56	30.10
24	8.10	35	9.58	46	14.76	57	32.76
25	8.18	36	9.81	47	15.68	58	35.59
26	8.27	37	10.07	48	16.69	59	38.70
27	8.37	38	10.36	49	17.83	60	42.10
28	8.47	39	10.69	50	19.10		

IF YOU already carry a Country Life policy you may apply for $2,000 of term insurance at the rate above designated for your age. If you do not carry Country Life insurance at the time of application your limit of wholesale term insurance will be $1,000 unless you consent to pay for a short form medical examination which, if approved, entitles you to a maximum of $2,000 of insurance.

Points to Remember About the New Term Policy

1. For Farm Bureau members only whose dues are paid.
2. Non-medical for $1,000; $2,000 if Country Life policyholder.
3. Convertible within 12 years into standard insurance at age rate when this policy is taken out—every cent paid in to be applied on the standard policy.
4. Must be at least 100 member subscribers from your county.
5. Offered only between July 10 and August 10 this year.

If you are interested in the new wholesale term policy get in touch with your County Farm Bureau office at once or fill out and mail the coupon below.

Illinois Cheese Survey

E. T. HOBART of the Federal Farm Board called at the office of the Illinois Agricultural Association recently preparatory to starting a survey in the cheese-making district of northwestern Illinois.

Mr. Hobart will assist producers in developing a better selling arrangement for more than 5,000,000 pounds of Illinois cheese produced annually. It is possible that some tie-up with the Wisconsin Cheese Federation may be worked out for the benefit of co-operative cheese factories lacking sales facilities which a larger centralized selling agency can give them. A. D. Lynch, dairy marketing director, is co-operating with Mr. Hobart in the new work.

Low Prices Are World Wide

MARKETS for American farm products are reflecting the general world decline in commodity prices, according to the Bureau of Agricultural Economics.

"The low price of wheat," says the bureau, "reflects a world-wide condition of declining commodity prices, large stocks, business recession, unemployment, and reduced purchasing power, all of which has operated to the disadvantage of many producers of commodities entering into international trade, including American wheat, cotton and pork.

"Moreover, there seems to be a somewhat curtailed consumption within this country, and apparently this is affecting markets for cattle, butter, eggs, lambs, wool, and certain vegetables."

The bureau finds "the continued weak market for wheat, as harvest time approaches, is naturally depressing to the West. Growers are hopeful but not cheerful. The hopes are largely grounded in the possibility that small supplies in Argentina and shrinking stocks in Europe and the Orient may lead to increased exports from this country during the summer."

In the face of these reduced market prospects for farm commodities, the bureau reports that the mid-season crops are coming along now with prospects of abundant supplies of potatoes, cantaloupes, watermelons and tomatoes, but probably with limited shipments of peaches, onions and cabbage. Cotton, corn, potatoes, and other principal crops have been planted under generally favorable growing conditions and the grass crop has made rapid growth following the late May rains. Some effects of the hard winter, however, are reported to be evident in spotted wheat fields and reduced drops of peaches.

Ask for "Administration" On I. A. A. Program

A RESOLUTION requesting the board of directors of the I. A. A. to include a discussion of Farm Bureau business administration in the program at the next annual meeting of the state organization was passed at the 15th district I. A. A. meeting held on June 17 at Canton in Fulton county.

A. N. Skinner of Yates City opened the meeting outlining the topics for discussion which included organization, Farm Bureau administration, and grain marketing.

A. N. Skinner

Every county Farm Bureau should have a finance committee of three or four members including the treasurer, an organization committee, a legislative committee, and any others deemed advisable suggested Secretary Geo. E. Metzger in his talk on Farm Bureau administration.

"When the board meets have each committee meet individually and make a report and recommendations to the whole board," he said. "The board votes the recommendation up or down." He emphasized the fact that in some co-operatives minority instead of majority control is practiced when definite action is avoided on controversial questions because members of the board disagree. Our government and all democratically-controlled business enterprises are organized on the theory of majority control and farmers must abide by this rule if they are to make any progress. Metzger recommended that each county should have a budget.

B. L. Baird, a director of the Illinois Grain Corporation, discussed this organization and the history of the grain marketing program in Illinois. Harry Gehring of Knox county followed Mr. Baird and told of grain marketing progress in Knox county. Other speakers were R. J. Hamilton and John C. Moore, district organization managers.

Hermann Raster of Fulton county served as secretary of the meeting.

District Picnics

Dates for the sectional picnics in the 14th and 20th districts have been definitely fixed. The 14th district picnic will be held on August 29 at Monmouth, and the one in the 20th district at Jacksonville on August 30.

Sectional picnics are to be held in the 19th and 25th districts, but the dates and places have not yet been arranged.

Winnebago Service Co.

"Farm Bureau members in our county raised $20,000 to finance the Winnebago Service Company without solicitation," says Geo. F. Tullock of Rockford.

A site has been purchased, a switch track put in, and storage tanks already bought are to be installed at once. The stock was purchased by several hundred Farm Bureau members.

The Winnebago Service Company is affiliated with the Illinois Farm Supply Company and will handle SERVICE petroleum products.

"Organize for Service," Dean Advises Farmers

ORGANIZATION of farmers to enable them to give better service to customers was stressed by W. C. Coffey, dean of the College of Agriculture, University of Minnesota, in an address at the annual picnic of the Eastern Polk County Farm Bureau at Maple Bay, Minn. Dean Coffey is well known in Illinois, where he formerly headed the sheep division and animal husbandry department at the College of Agriculture, Urbana.

"At one time," Dean Coffey asserted, "we looked upon organization among farmers as a need for protection against the forces that are unfriendly to the farmers' interests. But there is another reason why farmers should be organized, and that is for the purpose of giving better service to their customers, whether these customers be middlemen, chain stores, ultimate consumers or forces engaged in foreign and domestic trade.

Serve the Customer

"Like the successful merchant and manufacturer, the modern successful farmer must give his customers what they want when they want it. It is not possible for the farmer either to protect himself against the forces that are unfriendly to his interests or to render better service to his customers without effective organization.

"The Farm Bureau exists for these primary purposes and the need of organization will not grow less but rather more urgent in the future. Proof of this lies in the fact that all other lines of endeavor are gravitating toward combinations and mergers. They would not so gravitate were it not to their advantage. In the face of such situations the farmers cannot stand aloof and alone. He must join hands with his fellows in effective and constructive organization."

24th District Meets

REPRESENTATIVES from Wabash, Edwards, White, Wayne, Gallatin, Saline, Johnson, Pope and Massac counties attended the I. A. A. meeting in the 24th district at Harrisburg on June 18. Charles L. Scott, I. A. A. director of Grayville, presided. Harold Bradshaw acted as secretary.

Mr. Scott outlined the purpose of the meeting and emphasized the necessity for organization. "We must present a united front on legislative matters by working through the I. A. A.," said Charles Marshall of Belknap, former I. A. A. director, who followed Mr. Scott.

Chas. L. Scott

District Organization Manager L. F. Brissenden explained the new county plan of organization by townships, after which the group voted unanimously to hold a get-together picnic of farm advisers, Farm Bureau presidents and organization men in the 24th and 25th districts at Big Lake in Gallatin county.

Farm Adviser Murphy of Edwards county related the progress that was being made in organizing the Wabash Valley Service Company, which will provide SERVICE petroluem products for farmers in Wabash, Edwards and White counties.

Secretary Geo. Metzger opened the afternoon session with a discussion on business administration of Farm Bureaus and co-operatives. He suggested that Farm Bureau projects be varied so as to reach and serve the largest number of people.

Following adjournment representatives from Gallatin, Saline, Massac, Pope and Johnson counties held a conference to discuss the possibilities of an oil service company for this group of counties.

ONE of the "pet" arguments of those who oppose co-operative marketing is that it represents an effort to nullify the law of supply and demand. Whatever parts of the law of supply and demand remain after the tariff gets through with it are not in danger from co-operative marketing, which contemplates no further repeal of the ancient and much abused doctrine. What co-operative marketing does contemplate is the regulation of supply to demand at the points of both production and consumption, thus avoiding the depression of market values that inevitably follows supply in excess of normal consumptive requirements.—Farmers' National Grain Corp.

Like Country Life's Correspondence Course

Mr. L. A. Williams,
Country Life Insurance Co.,
Chicago, Illinois.

I am glad of this opportunity to express my appreciation for the fine correspondence course. I am sure that to me these lessons have been both educational and inspirational. They have been instrumental in increasing my ability as an insurance salesman.

After a careful study of these lessons, we lose the idea of just going out to sell a $10,000 policy. We learn to explain what this policy will do for the insured and his family. We sell the needs and the benefits of the policy instead of the policy itself.

G. O. CHENOWETH,
General Agent, McDonough County.

In regards to the correspondence course, I can sincerely say that it is indispensable to any person going out to sell insurance.

Also, I believe that any agent going out to sell Country Life Insurance should be compelled to take the course.

In soliciting farm people I believe they are the smallest insured, poorest informed people on Life Insurance in the world. In some cases they have a policy—but do not know what kind.

Therefore, the agent, through your correspondence course, has a knowledge of different types of policies and insurance and is able to explain to his prospect the advantages and disadvantages of different types of insurance.

With best regards and hoping for the 50,000,000 at an early date, I am

JOHN W. KOHL,
Christian County.

I consider the correspondence course, which you have given each agent the opportunity to take, very valuable. Most of us selling Country Life Insurance are new in the life insurance game, and for that reason I consider your plan of making this course a combination of sales hints and general information of life insurance, with emphasis placed on Country Life Insurance, just what the agent needs to prepare him to talk Country Life intelligently.

After completing the course I feel more capable of talking and selling Country Life Insurance, and I believe that I can work much more effectively as a result of the information furnished by this course.

D. C. MIEHER,
Macoupin County.

I certainly appreciated this correspondence course because I think it is the best way in teaching the agents to sell insurance. It teaches them confidence, helps bring out the fine points of this insurance, and it showed me the better way in making arrangements for settlement.

WALTER FRICKE,
Montgomery County.

Your correspondence course was very valuable. My knowledge approaching a prospect is much wider and have learned much valuable information regarding life insurance and its value. Anyone that has taken this course and studied it carefully, I feel, could consider themselves competent to sell life insurance.

Yours truly,

AUGUST KUNKEL,
Marshall-Putnam County.

The correspondence course has given me a much more thorough understanding of the Country Life Insurance business. I am able to meet my prospects and answer more intelligently questions concerning life insurance.

I thank you for the course.

CHARLOTTE CUNNINGHAM,
Lawrence County.

E. J. Oelze

E. J. Oelze of Decatur began his duties as manager of the Egyptian Seed Growers' Exchange at Flora on July 1.

E. J. Oelze

Mr. Oelze was born on a Richland county, Illinois farm. He has had wide experience in farming, served four years as a live stock shipping association manager, and prior to his appointment was employed for several years by Funk Bros. Seed Company of Bloomington. He has been active in Farm Bureau work and assisted in the organization of several county farm supply companies in Illinois.

Mr. Oelze is well qualified for his new position with the Red Top Growers.

19th District at Decatur

GRAIN marketing was the principal topic for discussion at an I. A. A. meeting in the 19th congressional district held at Decatur on June 27.

C. J. Gross

C. J. Gross, director for the district on the I. A. A. board, presided. Between 45 and 50 delegates from Moultrie, Coles, Douglas, Champaign, Piatt, DeWitt, Macon and Shelby counties attended.

Harrison Fahrnkopf, director of grain marketing, explained the plan of the Illinois Grain Corporation and efforts being made to develop an effective co-operative grain marketing service for the state. Mr. Fahrnkopf stated that 30 farmers' elevators already have made application for membership in the Illinois Grain Corporation. These elevators control between 6,000,000 and 7,000,000 bu. of grain annually.

Live stock marketing and a discussion of I. A. A. policies occupied most of the afternoon program.

The correspondence course was very interesting and instructive. It brought out some real facts in regard to salesmanship, gave us more information about Country Life, what a life insurance policy really is and its value to both policyholder and beneficiary.

E. D. TIMKE,
Dupage County.

Life Insurance

WITH the largest year's quota of life insurance of any county in the state, McLean county had twenty-four agents actively in the field on Insurance Day, and brought in a most satisfactory total for the day. McLean county will easily make the year's quota now by August 1. General Agent Hedgcock proved himself a real general in the co-operative spirit he was able to generate, and the county as well as the general agent and sub-agents are to be congratulated on their success.

Country Life was received with enthusiasm on June 26 when 16 Macon county solicitors wrote nearly half a year's quota on Insurance Day. The pageant at night showed outstanding talent, and was the result of remarkable effort on the part of Mrs. Glenn Ash, wife of the general agent. The pageant told the story of agriculture's progress in the United States, and impressed the audience with the power of organized action by modern farmers. The manager of Country Life talked to a most responsive audience, and a fine spirit was shown toward all Farm Bureau enterprises by the members present.

Glenn Ash, general agent of Macon county for Country Life, is a real success and a fine leader in the county. Four hundred people attended the night meeting.

Country Life News

CO-OPERATIVE action, particularly in marketing farm products, was strongly urged as a way to improve the farm income by L. A. Williams, manager of Country Life Insurance Company before 300 Farm Bureau members at a banquet in Decatur on June 26.

Mr. Williams discussed the co-operative grain marketing program in Illinois and urged his listeners to get control of the merchandising end of their business as other successful industries have done. He pointed out the ineffectiveness of a voluntary plan of grain marketing which left the way open for scattering farmers' products among a host of commission firms so as to defeat the goal of organized centralized selling.

George T. Swaim of Watseka, former farm adviser in Ford county, has been engaged to take charge of seed corn storage and testing work in Marshall and Putnam counties by the Marshall-Putnam Farm Bureau.

KEEPING WELL

By Dr. John A. Boland

COD LIVER OIL AND VIOSTEROL

VIOSTEROL, a trade name for irradiated ergosterol, is a substance very rich in Vitamin D. It has come into prominence during the past year as a substitute for Cod Liver Oil. However, you will note it contains only Vitamin D and is useful only as a preventative and as a treatment for rickets.

Viosterol is biologically tested so as to have curative or preventive potency in rickets one hundred times that of Cod Liver Oil. The only danger in using the product is in over-dosage.

Viosterol is marketed as a single product and also marketed combined with Cod Liver Oil. All infants from time of birth should receive, preferably, Cod Liver Oil combined with Viosterol. Occasionally mothers have difficulty in administering Cod Liver Oil. It is then advisable to give Viosterol as it has none of the disagreeable qualities attendant on taking Cod Liver Oil.

My intention in writing this article is to advise mothers not to discontinue the use of Cod Liver Oil as many mothers have done due to the wide publicity this new product has attained, but to use Cod Liver Oil and Viosterol combined, thereby deriving the benefits of other vitamins in Cod Liver Oil and the high Vitamin D content of Viosterol.

When Viosterol is used not in conjunction with Cod Liver Oil, it is well to observe the following dosages:

New-born infants, 12 to 18 drops daily.

Twins and premature infants, 20 to 30 drops daily.

Active rickets, 20 to 30 drops daily.

Farms Earn 3.7%

LEAN as it was, 1929 was the second best year for farm earnings in 1929 since the depression began in 1920, according to summaries of accounts of 1,950 farmers in 90 counties of Illinois made by the State College of Agriculture.

It was calculated that the average farmer of the state made 3.7 per cent on his capital during 1929. Even the progressive and business-like farmers who kept accounts in the college's farm accounting service earned only enough in 1929 to pay themselves a wage of $75 a month for their labor and management, after they had been allowed 5 per cent on their capital. It has been shown repeatedly that the earnings of the rank and file are lower than those of the account keepers.

FORD COUNTY SERVICE CO. TRUCKS READY FOR ACTION

The Ford County Service Company, one of the first co-operative oil companies to organize in the state, has rapidly expanded its business the past two years under new management. Manager Russell G. Stewart is a hustler who leaves no stone unturned to develop new business. He spends three to four days each week assisting his nine truck salesmen in the territory, and as a result there has been a steady expansion of the business.

Sales of gasoline and kerosene during May were the largest in the history of the company in any one calendar month.

A comparison of gasoline and kerosene sales for the spring months shows an average gallonage increase of 38 per cent over the corresponding period a year ago and 51 per cent over the sales in the same months in 1928. The sales of lubricating oil show even greater increases with a 53 per cent average gain for the period compared to 1929 and 84 per cent over the sales for the same months in 1928. An advertising program carried on through local newspapers has helped increase sales.

The officers and directors of the company are: A. B. Schofield, president; W. C. Read, vice-president; W. E. McKeever, secretary-treasurer.

Directors: Albert Adell, Alfred Arends, R. P. Cothern, Geo. V. Dowse, Chas. E. Harper, P. S. Jensen, Edw. Karr, Louis Ruenberg, Louis Ruse, Harry Scott, Fred Sturm, W. C. Walgenbach.

Gather at The River In Week-End Conference

Farm Bureau Officials Enjoy Outing and Profitable Get-Together

FARM Bureau presidents, secretaries, farm advisers, organization leaders and their families of Henderson, Warren, Knox, Peoria, Tazewell, Rock Island, Stark, Henry, Mercer and Bureau counties gathered for an annual summer conference at Oquawka Beach in Henderson county June 27-28-29. Business sessions were held Friday afternoon, Saturday morning and Saturday afternoon, with entertainment programs each evening. A religious service held Sunday morning was followed by a picnic dinner.

Farm Bureau administration, co-operative marketing, and organization problems featured the business discussion. The women of the party were active in arranging the entertainment. R. J. Hamilton, district organization manager of the I. A. A., provided moving pictures as part of the entertainment Saturday night showing the various presidents, secretaries, and Farm Bureau families as they appeared at their homes.

Church on Sunday

Ira Moats, secretary of the Knox County Farm Bureau, delivered the sermon Sunday morning following the song service. A fish fry was enjoyed during the noon hour.

"Much good has come from these conferences," stated Harry Gehring, president of the District III Association. "The close acquaintance of the Farm Bureau officers within these neighboring counties has resulted in an open, frank, and helpful discussion of problems confronting each county organization."

Among the delegates were seven from Peoria county, four from Tazewell, two from Bureau, eight from Rock Island, seven from Henderson, 14 from Mercer, seven from Warren, 15 from Knox, 10 from Henry, and 16 from Stark, a total of 90. The camp paper, the "Oquawker Squawker," was read during the evening entertainment.

Sell Apples Co-Operatively

THE growers associated in the Western Illinois Apple Growers' Association representing some 1,400 acres of orchards expect to sell co-operatively between 150 and 200 carloads of apples this year.

As we go to press a survey is being made by A. B. Leeper of the I. A. A. to get more accurate information about the 1930 production of popular varieties including Willow Twig, Jonathan and Grimes Golden. The Willow Twig apple is produced almost exclusively in western Illinois. It is an old variety and keeps longer perhaps than any other when properly packed. The Willow Twig is especially desirable for both eating and cooking, and is in much demand.

Like Country Life's Correspondence Course

Mr. L. A. Williams,
Country Life Insurance Co.,
Chicago, Illinois.

I am glad of this opportunity to express my appreciation for the fine correspondence course. I am sure that to me these lessons have been very educational and inspirational. They have been instrumental in increasing my ability as an insurance salesman.

After a careful study of these lessons, we see the idea of not going out to sell a stock company policy. We learn to explain what this policy will do for the insured and "sell" it. We sell needs and the benefits of the policy instead of the policy itself.

C. O. CHENOWETH,
Gen. Agent, McDonough County.

I am sure that [illegible] independent
coming out to sell insurance.
Yes, I believe that any agent [illegible] Country Life Insurance should be successful.

In soliciting farm people I believe they are the smallest insured, poorest informed people on Life Insurance in the world. In some cases they have a policy—but do not know what kind.

Therefore, the agent, through your correspondence course, has a knowledge of different types of policies and insurance and is able to explain to his prospect the advantages and disadvantages of different types of insurance.

With best regards and hoping for the 50,000,000 in early date, I am

JOHN W. KOHL,
Christian County.

I consider the correspondence course, which I [illegible] very valuable. Most of us selling Country Life Insurance are new in the life insurance [illegible] and for that reason I consider your plan of [illegible] correspondence course of sales talks and general information of the insurance [illegible] placed on Country Life Insurance, [illegible] agent needs to promote [illegible] to Country Life intelligently.

After completing the course I feel more confident talking and selling Country Life Insurance and I believe that I can work much more effectively as a result of the information received by this course.

D. C. MILLER,
Macoupin County.

I certainly appreciated this correspondence course because I think it is the best way in teaching the agents to sell insurance. It teaches them confidence, helps bring out the fine points of this insurance, and it showed me the better way in making arrangements for settlement.

WALTER ERICKL,
Montgomery County.

Your correspondence course was very valuable. My knowledge approaching a prospect is much wider and have learned much valuable information regarding life insurance and its value. Anyone that has taken this course and studied it carefully, I feel, could consider themselves competent to sell life insurance.

Yours truly,

AUGUST KUNKEL,
Marshall-Putnam County.

The correspondence course has given me a much more thorough understanding of the Country Life Insurance business. I am able to meet my prospects and answer more intelligently questions concerning life insurance.

I thank you for the course.

CHARLOTTE CUNNINGHAM,
Lawrence County.

E. J. Oelze

E. J. Oelze of Decatur began his duties as manager of the Egyptian Seed Growers' Exchange at Flora on July 1.

E. J. Oelze

Mr. Oelze was born on a Richland county, Illinois farm. He has had wide experience in farming, served four years as [illegible] shipping association manager and prior to his appointment was employed by several seed companies by Funk Bros. Seed Company of Bloomington. He has been active in Farm Bureau work and has assisted in the organization of several local farm supply companies in Illinois.

Mr. Oelze is well qualified for his new position with the Red Top Growers.

19th District at Decatur

GRAIN marketing was the principal topic for discussion at an I. A. A. meeting in the 19th congressional district held at Decatur on June 27. [illegible]

C. J. Gross

[illegible] I. A. A. board [illegible] and [illegible] from Coultrap's Hardware, Champaign, Piatt, DeWitt, Macon and Shelby counties [illegible].

Harrison Fahrnkopf, director of grain marketing, explained the plan of the Illinois Grain Corporation and efforts being made to develop an effective co-operative grain marketing service for the state. Mr. Fahrnkopf stated that 30 farmers' elevators already have made application for membership in the Illinois Grain Corporation. These elevators control between 6,000,000 and 7,000,000 bu. of grain annually.

Live stock marketing and a discussion of I. A. A. policies occupied most of the afternoon program.

The correspondence course was very interesting and instructive. It brought out some real facts in regard to salesmanship, gave us more information about Country Life, what a life insurance policy really is and its value to both policyholder and beneficiary.

E. D. TIMKE,
Dupage County.

Life Insurance

WITH the largest year's quota of life insurance of any county in the state, McLean county had twenty-four agents actively in the field on Insurance Day, and brought in a most satisfactory total for the day. McLean county will easily make the year's quota now by August 1. General Agent Hitchcock proved himself a real general in the co-operative spirit he was able to generate, and the county as well as the general agent and sub-agents are to be congratulated on their success.

Country Life was received with enthusiasm on June 26 when 16 Macon county solicitors wrote nearly half a year's quota on Insurance Day. The pageant at night showed outstanding talent, and was the result of remarkable effort on the part of Mrs. Glenn Ash, wife of the general agent. The pageant told the story of agriculture's progress in the United States, and impressed the audience with the power of organized action by modern farmers. The manager of Country Life talked to a most responsive audience, and a fine spirit was shown toward all Farm Bureau enterprises by the members present.

Glenn Ash, general agent of Macon county for Country Life, is a real success and a fine leader in the county. Four hundred people attended the night meeting.

Country Life News

CO-OPERATIVE action, particularly in marketing farm products, was strongly urged as a way to improve the farm income by L. A. Williams, manager of Country Life Insurance Company before 300 Farm Bureau members at a banquet in Decatur on June 26.

Mr. Williams discussed the co-operative grain marketing program in Illinois and urged his listeners to get control of the merchandising end of their business as other successful industries have done. He pointed out the ineffectiveness of a voluntary plan of grain marketing which left the way open for scattering farmers' products among a host of commission firms so as to defeat the goal of organized centralized selling.

George T. Swaim of Watseka, former farm adviser in Ford county, has been engaged to take charge of seed corn storage and testing work in Marshall and Putnam counties by the Marshall-Putnam Farm Bureau.

KEEPING WELL

By Dr. John A. Boland

COD LIVER OIL AND VIOSTEROL

VIOSTEROL, a trade name for irradiated ergosterol, is a substance very rich in Vitamin D. It has come into prominence during the past year as a substitute for Cod Liver Oil. However, you will note it contains only Vitamin D and is useful only as a preventative and as a treatment for rickets.

Viosterol is biologically tested so as to have curative or preventive potency in rickets one hundred times that of Cod Liver Oil. The only danger in using the product is in over-dosage.

Viosterol is marketed as a single product and also marketed combined with Cod Liver Oil. All infants from time of birth should receive, preferably, Cod Liver Oil combined with Viosterol. Occasionally mothers have difficulty in administering Cod Liver Oil. It is then advisable to give Viosterol as it has none of the disagreeable qualities attendant on taking Cod Liver Oil.

My intention in writing this article is to advise mothers not to discontinue the use of Cod Liver Oil as many mothers have done due to the wide publicity this new product has attained, but to use Cod Liver Oil and Viosterol combined, thereby deriving the benefits of other vitamins in Cod Liver Oil and the high Vitamin D content of Viosterol.

When Viosterol is used not in conjunction with Cod Liver Oil, it is well to observe the following dosages:

New-born infants, 12 to 18 drops daily.

Twins and premature infants, 20 to 30 drops daily.

Active rickets, 20 to 30 drops daily.

Farms Earn 3.7%

LEAN as it was, 1929 was the second best year for farm earnings in 1929 since the depression began in 1920, according to summaries of accounts of 1,950 farmers in 90 counties of Illinois made by the State College of Agriculture.

It was calculated that the average farmer of the state made 3.7 per cent on his capital during 1929. Even the progressive and business-like farmers who kept accounts in the college's farm accounting service earned only enough in 1929 to pay themselves a wage of $75 a month for their labor and management, after they had been allowed 5 per cent on their capital. It has been shown repeatedly that the earnings of the rank and file are lower than those of the account keepers.

FORD COUNTY SERVICE CO. TRUCKS READY FOR ACTION

The Ford County Service Company, one of the [illegible] in the state, has rapidly expanded its business the past year. Manager Russell G. Stewart is a hustler who leaves no stone unturned. He spends three to four days each week assisting his nine truck salesmen in the territory, and as a result there has been a steady expansion of the business.

Sales of gasoline and kerosene during May were the largest in the history of the company in any one calendar month.

A comparison of gasoline and kerosene sales for the spring months shows an average gallonage increase of 38 per cent over the corresponding period a year ago and 51 per cent over the sales in the same months in 1928. The sales of lubricating oil show even greater increases with a 53 per cent average gain for the period compared to 1929 and 84 per cent over the sales for the same months in 1928. An advertising program carried on through local newspapers has helped increase sales.

The officers and directors of the company are: A. B. Schofield, president, W. C. Read, vice-president; W. E. McKeever, secretary-treasurer.

Directors: Albert Adell, Alfred Arends, R. P. Cothern, Geo. V. Dowse, Chas. F. Harper, P. S. Jensen, Edw. Karr, Louis Ruenberg, Louis Ruse, Harry Scott, Fred Sturm, W. C. Walgenbach.

Gather at The River In Week-End Conference

Farm Bureau Officials Enjoy Outing and Profitable Get-Together

FARM Bureau presidents, secretaries, farm advisers, organization leaders and their families of Henderson, Warren, Knox, Peoria, Tazewell, Rock Island, Stark, Henry, Mercer and Bureau counties gathered for an annual summer conference at Oquawka Beach in Henderson county June 27-28-29. Business sessions were held Friday afternoon, Saturday morning and Saturday afternoon, with entertainment programs each evening. A religious service held Sunday morning was followed by a picnic dinner.

Farm Bureau administration, cooperative marketing, and organization problems featured the business discussion. The women of the party were active in arranging the entertainment. R. J. Hamilton, district organization manager of the I. A. A., provided moving pictures as part of the entertainment Saturday night showing the various presidents, secretaries, and Farm Bureau families as they appeared at their homes.

Church on Sunday

Ira Moats, secretary of the Knox County Farm Bureau, delivered the sermon Sunday morning following the song service. A fish fry was enjoyed during the noon hour.

"Much good has come from these conferences," stated Harry Gehring, president of the District III Association. "The close acquaintance of the Farm Bureau officers within these neighboring counties has resulted in an open, frank, and helpful discussion of problems confronting each county organization."

Among the delegates were seven from Peoria county, four from Tazewell, two from Bureau, eight from Rock Island, seven from Henderson, 14 from Mercer, seven from Warren, 15 from Knox, 10 from Henry, and 16 from Stark, a total of 90. The camp paper, the "Oquawker Squawker," was read during the evening entertainment.

Sell Apples Co-Operatively

THE growers associated in the Western Illinois Apple Growers' Association representing some 1,400 acres of orchards expect to sell co-operatively between 150 and 200 carloads of apples this year.

As we go to press a survey is being made by A. B. Leeper of the I. A. The Willow Twig apple is produced almost exclusively in western Illinois. It is an old variety and keeps longer perhaps than any other when properly packed. The Willow Twig is especially desirable for both eating and cooking, and is in much demand.

Canadian Wheat Pool Answers Opponents' Attacks with Facts

Growing Majority of Wheat Farmers in Provinces Now Benefit by Volume Control and Centralized Selling

THE continuing success of the Canadian Wheat Pool in serving an ever-growing majority of wheat growers in Western Canada is a thorn in the flesh of the opposing "die-hards" who resent and oppose progress in grain marketing through the co-operation of producers.

"Under separate cover, I am today forwarding a supply of statistical data and literature of the Canadian Wheat Pool which may help spike the guns of such gentlemen as M. R. Myers," writes W. B. Herbert of the Canadian co-operative.

Can't Retaliate

"I would call your attention particularly to the leaflet, "WHEAT PRICES—1927-1928," wherein we discuss the matter of price comparisons. Every year we have issued similar statements and never once has the grain trade attempted to retaliate to these arguments. They can't.

"Unfortunately it has not yet been practicable for us to make the final adjustment on the 1928 deliveries, so we have not been able to publish a statement covering the 1928 crop. Incidentally our three payments on that crop total $1.18 per bushel and we still have the final payment to make. The unweighted open-market price was only $1.21.

"I can assure you that our organization is in first class shape, and has never been in difficulties at any time despite the many annoyances we have had to put up with as a result of adverse propaganda. The morale of our membership is wonderful and the harder the times the closer they stick to their Pool."

While the organization of the Illinois Grain Corporation is different than that of the wheat pool in that it is based on the farmers' elevators as a foundation, the elevator in each case retaining its identity, directors, officers, and employees, and carrying on business as usual, the I. G. C. has for its purpose the same goal as the the Canadian co-operative, that is, centralized selling in the terminal markets and bargaining power for the producer.

That the Canadian co-operative has succeeded in its goal may be seen by the following price comparisons which have not been successfully challenged:

Pool and Grain Trade Street Wheat Prices

TABLE I—CROP YEAR 1927-28.

ALBERTA—Basis 26c Ft. William, or 22c Vancouver, freight point.

Grade—	Column I Weighted Average Grain Trade Price	Column II Pool Price (Including 4c Pool Elevator Div.)	Column III Pool Margin Above Grain Trade
No. 1 Northern	$1.18 3/4	$1.28 3/10	9 1/2c
No. 2 Northern	1.13 1/2	1.21 4/5	8 3/10c

Feed	.65 3/5	.71 3/4	6 1/10c

The figures in Column I are true averages of prices paid by the Grain Trade for street wheat. The prices are arrived at in identically the same manner as explained heretofore in connection with the Western and North-West Grain Dealers' average prices for No. 3 Northern.

(*Continued on page 17*)

NOTICE

ELECTION OF DELEGATES
ILLINOIS AGRICULTURAL
ASSOCIATION

NOTICE is hereby given that in connection with the annual meetings of all County Farm Bureaus to be held during the months of August and September, 1930, at the hour and place to be determined by the Board of Directors of each respective County Farm Bureau, the members in good standing of such County Farm Bureaus and who are also qualified voting members of Illinois Agricultural Association shall elect a delegate or delegates to represent such members of Illinois Agricultural Association and vote on all matters before the next annual meeting or any special meeting of Association, including the election of officers and directors as provided for in the by-laws of the Association.

There will be no County Farm Bureau annual meetings held during the months of July and August.

During September annual meetings will be held in **Christian**, **Jefferson**, and **Wayne** counties.

Signed:

G. E. METZGER, Secretary.

July 15, 1930.

The Farmer's Income Tax

AN editorial in The Southern Planter for June 15 says: "In the May 15th issue of The Southern Planter, Dr. Carl C. Taylor, one of our associate editors, had an article under the title of 'North Carolina Tax Upheaval.' He shows that taxes on land are unbearably high and the farmers can no longer stand under the burden. What is true in North Carolina holds for most of the other states. A recent study of the United States Department of Agriculture shows that farmers are paying approximately $900,000,000 a year in direct taxes, 84% of which is taxes on land. *Farmers are paying from* 18 *to* 31% *of their total income each year in direct taxes and even* 30% *of the rental value of farms is being absorbed in taxes.* It is too much to expect for such conditions to continue to exist. Farmers must see that they are changed. Doctor Taylor suggests that farmers be allowed to pay taxes according to what they earn, such as is done in the case of doctors and lawyers. In this way the taxes will not be a burden in years of low incomes as they are so often under the present system of taxation. The income tax is a logical one and it is just and fair. The direct property tax should be removed. Incomes should be taxed. It would be real farm relief and would materially help to increase the net income of farmers, which is now, on the average, about $700 per year—a paltry sum for his labor and managerial ability and the labor of his family."

Lynch Gives Reasons For Low Butter Price

Dairyman's Meeting at Ottawa Applauds Storekeepers for Co-Operation in Selling LaSalle County Butter

A RESOLUTION urging the LaSalle County Farm Bureau to continue its program of assisting local dairymen in merchandising their products to better advantage and in encouraging the home consumption of LaSalle county butter, was passed at a meeting of 40 dairymen held in Ottawa on June 25.

The resolution expressed the appreciation of the dairymen present for the co-operation of the many store owners of the county in increasing the sale of LaSalle county butter. A. D. Lynch, director of dairy marketing for the Illinois Agricultural Association, who addressed the meeting, asserted that butter consumption for the past five years has decreased 2 per cent, whereas the consumption of butter substitutes has increased nearly 66 per cent. Mr. Lynch gave this fact as one of the causes for the low cost of butter.

The speaker advised the dairymen to keep careful records on each cow in the herd and to sell all cows producing less than 250 pounds of butterfat in a year. He stated that more than 50 per cent of the milk produced is sold as a fluid product, 33 per cent is used for butter, 5 per cent goes into cheese, 3 per cent is condensed, 3 per cent is made into ice cream, and the remaining 3 per cent is wasted. Mr. Lynch pointed out that there were nearly 50 million pounds of butter in storage on the first of June, almost twice as much as the average amount in storage on that date for the past five years.

Farm Board News

A STATEMENT advocating that wheat farmers do not market the 1930 crop direct from the combine or thresher, but that they hold it on the farm wherever possible, was issued on July 1 by the Federal Farm Board.

"The rushing of such a large percentage of the crop to market frequently results in congestion of storage at the terminals to the extent that owners of private elevator space are enabled to fill their bins at prices substantially below the current market value at the time the wheat is shipped," said the statement.

"This process also has the further disadvantage of putting much of the available supply of grain in the show windows where the buyers, realizing that somebody is paying money to carry this wheat every day it is there, have the advantage of knowing they can get it quickly and too frequently buy at their own price. Therefore, we feel that the present tendency on the part of farmers to keep more of the wheat at home is a movement in the right direction."

(Continued from page 16)

The figures in Column II are the actual values received by Pool members for street wheat delivered to Pool elevators, and are made up in identically the same manner as explained heretofore.

The Western Grain Dealers' average discounts under straight No. 1 Northern for tough, rejected and smutty No. 1 Northern wheat were 8 3/5c, 15½c and 17 3/5c per bushel respectively. The corresponding Pool discounts were: 3½c on tough and 8½c on rejected. The Pool average discounts for "tough," "rejected" and "smutty" under straight grade, for grades No. 1 Northern to feed were 4.5c, 6.8c and 8c respectively.

The North-West Grain Dealers' discount for No. 1 Amber Durum under No. 1 Northern was 11¼c, while the corresponding Pool discount was 7c. The North-West Grain Dealers' average discount for tough No. 1, 2 and 3 Northern under straight grade was 7c, while the corresponding Pool discount was 5 1/6c. The North-West Grain Dealers' average discount for tough on grades lower than No. 3 Northern was 6 1/5c, while the corresponding Pool discount was 4 1/10c.

The high margins in the Pool's favor shown here are typical of the margins between Pool and Grain Trade street prices for many other grades. On tough wheat alone, non-Pool farmers lost a sum running into millions of dollars, as approximately 180,000,000 bushels of the 1927-28 wheat crop was classified "No Grade," due to excessive moisture; and as shown above the Pool's discount for all tough wheat was from two to four cents per bushel less than the Grain Trade's discount for tough street wheat.

TABLE II—CROP YEARS 1923-24 TO 1927-28.

	1923-24	1924-25	1925-26	1926-27	1927-28	
	No. 1 Nor.		No. 1 Nor.	No. 3 Nor.	No. 1 Nor.	No. 3 Nor.
Alberta Pool price	$0.79 3/5	$1.46	$1.25 1/8	$1.23 1/8	$1.12 1/8	$1.28 3/10	$1.11 3/10
Grain Trade price	.74 1/2	1.43 3/4	1.19 3/4	1.17 3/4	1.07 4/5	1.18 3/4	1.03 1/2

The figures in Table II, showing comparative Pool and Grain Trade street wheat prices over a period of five years, were arrived at in the manner already described. They account for the remarkable increase in membership of the Canadian Wheat Pools during the past year, and indicate the ever-increasing cash toll paid to the private grain trade by the non-Pool farmers of Western Canada.

Pool and Non-Pool Consigned Wheat Prices

The only way to find out exactly how much non-Pool farmers received for consigned, or carload wheat would be for the grain dealers to publish the actual prices they paid for it. To date the Trade has not seen fit to publish this information, although farmers would like these figures to compare them with the prices paid by the Pool. The Trade has this information, of course, and while we cannot be sure of their reasons for withholding it, we can form our own conclusions. We respectfully suggest to the Grain Trade that such information would be more enlightening than anonymous misleading advertisements.

Until the Trade publishes the prices paid for non-Pool consigned wheat, we have to be satisfied with a close estimate. We do not know when all consigned wheat is sold, as some of it is sold at the country elevator, some on track and on its way to the terminal, and some after it reaches the terminal. It is generally agreed, however, that most farmers have sold their consigned grain by the time it reaches the terminal. Consequently, the fairest estimate of the average price paid for non-Pool consigned wheat is obtained by weighting the Winnipeg weekly average cash prices by weekly receipts at the Head of the Lakes. By use of this method, the following estimated Grain Trade average prices were obtained. The Pool prices, basis Fort William, are given as a comparison.

	1923-24	1924-25	1925-26	1926-27	1927-28	
	No. 1 Nor.		No. 1 Nor.		No. 1 Nor.	No. 3 Nor.
Non-Pool consigned wheat av. price	$1.00	$1.65 4/5	$1.43	$1.43 1/2	$1.43 3/5	$1.22 1/5
Gross Pool price	1.02	1.68 3/4	1.47 3/4	1.44 3/4	1.45	1.28

Grain producers who want more information about the success of real co-operative grain marketing in Canada may secure it by addressing the Canadian Wheat Pool, Winnipeg, Canada.

DURING the month of May 12,825 herds of cattle containing 130,167 animals were tested in Illinois. Only 3,038 reacted to the tuberculin test.

Forty-seven Illinois counties are now recognized as modified, accredited areas. More than a million and a half cattle are under state and federal supervision in Illinois.

Farm Real Estate Values Average Slightly Lower Than Last Year

FARM real estate values as of March 1, 1930, show a decline of about 1 per cent below the preceding year, as a nation-wide average, the Bureau of Agricultural Economics announced recently.

Maine, Connecticut, Wyoming, Colorado, New Mexico and Oregon each showed a small increase in values for the year. Declines are reported for all other states, notably in the Middle Atlantic, East North Central, West North Central and South Atlantic groups.

The bureau's index of real estate values is based upon the average of the pre-war years, 1912-14. It shows that values reached 170 per cent of the pre-war average in 1920, but that by the year 1925 values were only 27 per cent above pre-war, and that since then the downward trend has continued, but values have not declined so rapidly.

The index for March 1, 1930, is placed at 115 per cent of the pre-war averaged, compared with 116 per cent of pre-war in 1929, 117 per cent in 1928, 119 per cent in 1927, and 124 per cent in 1926. The estimates for 1930 are based upon preliminary summaries of reports made by the bureau's correspondents in an annual survey of conditions in the farm lands market. The following figures include all farm lands with improvements:

Farm Real Estate: Estimated Value per Acre, in Terms of Pre-war Average Value, by States, March 1, 1930, with Comparisons (State Average Value in 1912-1914—100%

Geographic Division and State	1920	1925	1926	1927	1928	1929	1930
Ohio	159	110	105	99	96	94	90
Indiana	161	102	95	87	84	83	80
Illinois	160	115	109	99	96	95	91

Main Street Holds Its Own, Says Galpin

Farmer Demands Better Living Today Than Formerly

AMERICAN hamlets and small villages may be destined for the discard, but towns of from 1,000 to 10,000 population are doing more business than ever, in the opinion of Dr. C. J. Galpin, agricultural sociologist of the U. S. Bureau of Agricultural Economics.

"Although the general trend," he said, "has been for farmers to shift their buying from stores at country crossroads, in hamlets, and in small villages, to larger retail trading centers, the shift in farmer buying to towns ranging from 1,000 to 10,000 in population is increasing the trade area of these towns, increasing the trade, and increasing their purchasing fulcrum."

Why the Decline

Doctor Galpin gave it as his opinion that the decline of the hamlet and small village is the result both of a decreasing farm population and of the higher standard of farm living in recent years. He said that although the farm population has decreased by 4,000,000 persons since 1920, the gross cash income from agriculture of the 27,000,000 of farm population today is the same—$10,000,000,000 a year—as that of the 31,000,000 of farm people ten years ago.

"The American farmer," Doctor Galpin said, "is no longer satisfied with family consumption in the nature of a minimum of subsistence goods. He demands for himself and children parity in standard of living. His shift to a larger trade center means that he is seeking a higher grade, and a wider variety and a better choice of all kinds of goods.

Where Farmer Spends

"This does not mean that farmers are spending the bulk of their money in cities over 10,000 in population. The bulk of farmers' income is now spent, and will be for a generation, in farmers' towns with a population range from 1,000 to 10,000. The well-to-do farmer, like the well-to-do townsman, has always made certain purchases in large cities, and this practice will continue; but the bulk of the buying by both the farmer and the townsman will be at home, where they have personal relations and many social and economic ties."

Dr. Galpin labeled as unwarranted the assumption "that the 1930 census will show decreased enumerations in incorporated villages and towns smaller than 10,000 population. It is expected, however," he added, "that the 1930 census will show a decline in many hamlets and unincorporated villages, and in very small incorporated villages.

Forecasts Future

"There will be individual cases of decrease, as usual, in incorporated towns up to 10,000," he said, "and some whole counties will undoubtedly reflect in an unusual degree the unusual agrarian disturbance of the last 10 years, but the unusual movement of farm population, during the last ten years, to these same towns and villages will compensate for movements from farmers' towns to larger centers.

"The farm population will turn out to be thinner; the hamlet and small village population will also be thinner; but the large village and town population will hold its own, and probably will increase enough to make up the loss in the other two elements."

Cheap Money for Farmers?

"WE don't object," say industrial leaders, "so much to farmer organization as to financing of such organizations by the government at lower interest rates than we can obtain for industry." Let's look at that a minute. On June 19, the New York Federal Reserve Bank reduced its rediscount rate, which is the charge at which its member banks may borrow, from 3 per cent to 2½ per cent. News writers interpreted the reduction as "another move in the policy of reserve authorities to stimulate trade and industrial recovery by easy money rates." Easy money for industry, it seems, is perfectly satisfactory in industrial circles. Easy money rates for farmers, however, is "unfair and discriminatory"—in the same circles. The answer is, of course, that even if farmer-owned and farmer-controlled co-operatives are receiving money at low rates of interest, they are the beneficiaries of no policy that is not being applied, at the same time, for the restoration of industry.—Farmers' National Grain Corp.

Logan Banker Lauds Farm Bureau's Service

Entitled to Community's Support on Basis of Accomplishments, He Says

"THE spread of the Farm Bureau movement reflects a trend in agriculture which parallels that in industry and trade," J. A. Tabke, chairman of the American National Bank of Lincoln, Illinois, said in a recent statement congratulating the Logan County Farm Bureau on its 12 years' accomplishments.

"Logan county's Farm Bureau, established a dozen years ago with perhaps 300 charter members, now has almost a thousand in good standing and ranks as one of the strongest in the state. Through its affiliation with the Illinois Agricultural Association and the American Farm Bureau Federation, it brings Logan county farmers into alliance with more than 1,125,000 farm families throughout the country.

"These local, state and national organizations are giving their members expert technical assistance in all branches of the business. They are working for better farms and farmers, better homes and citizens, to make agriculture truly profitable and to keep farming a satisfactory manner of living rather than just an occupation.

"The character of the service rendered, the contribution made to the prosperity of the whole section has given the Logan County Farm Bureau rank as one of the most important and valuable business agencies in this part of Illinois. It has deserved well of the community, and it is entitled to the community's support on the basis of proved efficiency. Its most enthusiastic supporters are those who have used most regularly the various facilities which it provides."

The Logan County Farm Bureau recently moved into new headquarters in the Arcade building in Lincoln, and Mr. Tabke's statement was in the nature of congratulations on the success of the local organization.

Oil Companies Organize

AMONG the county oil companies to incorporate recently are McDonough Service Company, Richland Service Company for Richland and Lawrence counties; Wabash Valley Service Company for Wabash, Edward and White counties; and Schuyler Service Company. Champaign and Iroquois counties will probably be ready to operate oil companies by fall. Stephenson and Macoupin counties are engaged in selling stock for local supply companies.

Chas. Imig of Minier examines what's left of his corn field.

HAIL STORM SWEEPS MACKINAW VALLEY

CORN, WHEAT LOSSES HEAVY

Lincoln Is Hardest Hit By Worst Midsummer Phenomenon in Years.

BY STAFF CORRESPONDENT

One of the most destructive midsummer hailstorms in the history of Central Illinois swept a course several miles wide from Mackinaw through Lincoln to Illiopolis riddling standing wheat and oats and cutting corn stalks to shreds shortly before sundown Sunday afternoon. Hail only fell from 10 to 20 minutes as the storm passed along its southward route, but the storm took more than an hour to run its way through four counties.

It started about 4:05 p. m. north of Mackinaw and followed the Mackinaw river southwest a few miles and turned south. The main portion of it went between Hopedale and Minier gathering force as it traveled. It went through parts of Tazewell, McLean, Logan and Sangamon counties.

By the time it got to Lincoln the wind had reached tornadic proportions. The greatest damage was felt there where it tore up trees, telephone poles, blew off roofs and broke windows. After the storm passed Lincoln it seemed to dwindle and nothing but a high wind accompanied by light hail and rain was felt at Illiopolis. . . .

—Bloomington Pantagraph.

Few Farmers Protected

Frank Bill, the Pantagraph's agricultural reporter who wrote the story above, advises us that a later checkup reveals that very few farmers whose crops were hailed out on July 5th were protected against loss by hail insurance. One man estimates that his 160 acres of corn will be nearly a total loss. Not only were the leaves stripped from the plants, but the stalks were cut and shredded down to the pulp.

You May Be Next

Why put off insuring your growing crops against hail? It will hail again. Your farm may be next. Records show that destructive hail storms are likely to occur in Illinois at any time during the summer months.

Costs Little for Protection

The initial cost of taking out a hail insurance policy in your own company, the Farmers Mutual Reinsurance Company, is only $4 per $1,000. The balance of $16 per $1,000 is payable October 1 after the crop is matured. Can you afford to take this risk when for only $20 per $1,000 you can get protection?

Farm Real Estate Values Average Slightly Lower Than Last Year

FARM real estate values as of March 1, 1930, show a decline of about 1 per cent below the preceding year, as a nation-wide average, the Bureau of Agricultural Economics announced recently.

Maine, Connecticut, Wyoming, Colorado, New Mexico and Oregon each showed a small increase in values for the year. Declines are reported for all other states, notably in the Middle Atlantic, East North Central, West North Central and South Atlantic groups.

The bureau's index of real estate values is based upon the average of the pre-war years, 1912-14. It shows that values reached 170 per cent of the pre-war average in 1920, but that by the year 1925 values were only 27 per cent above pre-war, and that since then the downward trend has continued, but values have not declined so rapidly.

The index for March 1, 1930 placed at 115 per cent of the pre-war averaged, compared with 116 per cent of pre-war in 1929, 117 per cent in 1928, 119 per cent in 1927, and 124 per cent in 1926. The estimates for 1930 are based upon preliminary summaries of reports made by the bureau's correspondents in an annual survey of conditions in the farm lands market. The following figures include all farm lands with improvements:

Farm Real Estate: Estimated Value per Acre, in Terms of Pre-war Average Value, by States, March 1, 1930, with Comparisons (State Average Value in 1912-1914=100%)

Geographic Division and State	1920	1925	1926	1927	1928	1929	1930
Ohio	159	110	105	99	96	94	90
Indiana	161	102	95	87	84	83	80
Illinois	160	115	109	99	96	95	91

The driver of this car was about to strike a woman pedestrian, so he swerved down this embankment. The picture shows the car afterward. The driver and a woman companion escaped serious injury.

Nine Reasons For Auto Insurance

1: To protect your estate against liability in case your car kills or injures someone.

2: To safeguard your investment in your car or truck in case of collision.

3: To spare yourself the worry of financial responsibility for injuries inflicted by your car.

4: To secure necessary legal defense without cost if a suit for damages is brought against you.

5: To secure financial aid in case you are far from home and have an accident.

6: To pay court costs, hospital, doctor's, and medical bills resulting from an accident in which you are liable.

7: To protect you against loss from fire or theft.

8: To protect you against liability for accidents when someone else drives your car.

9: To insure your car against damages inflicted by windstorms, hail, and tornadoes.

You can pay more for similar protection elsewhere, but you will never buy it in a safer, more secure, and stronger company. Automobile insurance in YOUR OWN COMPANY at cost.

Farm Bureau Day at State Fair Aug. 22nd

Prize Offered to County Registering Most Visitors at Farm Bureau Headquarters

BY the time this issue arrives State Fair Week at Springfield will be underway with its countless attractions, excitements and diversions from the routine work of the farm.

Many a farm family takes in the big show nearly every year, but for those who haven't attended a state fair, we urge you to pack up and go this year. The dates are Aug. 16-23 inclusive. And make one of your early stops at the big Farm Bureau Headquarters Tent to be established near the former site on the walk leading from the Exposition Building to the race track.

Big Top Tent

A larger tent than that used last year has been engaged. It will be equipped with plenty of chairs, ice water, free facilities for checking your wraps and packages, and other conveniences. Mothers and their children will be especially welcome.

The story of the Illinois Agricultural Association and the many services offered members through the various departments and associated companies will be told on a series of 16 or 17 posters to be erected under the supervision of A. E. Richardson, manager of the I. A. A. auto insurance company.

While Friday, August 22, has been designated as FARM BUREAU DAY by the management of the State Fair, every day of Fair Week will be open house in the Farm Bureau tent. Someone from the I. A. A. office will be in charge daily. Drop around for a visit and rest, and register at the desk.

Help Win Cup

A silver cup trophy will be awarded to the Farm Bureau in the county showing the largest number of people who register their names and addresses at the Farm Bureau tent during the week from that county. Farm Bureau members, their families and friends are all eligible to register. Help bring the cup back to your county by registering.

The exhibits in the tent will not only be interesting but they will be educational as well. They will answer questions that arise daily about this or that department and its work.

Help Win the Cup

THE silver loving cup shown above will be awarded the Farm Bureau in that county from which the largest number of members, their families and friends register at Farm Bureau headquarters during the Illinois State Fair, Springfield, August 16-23.

Visitors may register any time during the week up until 4:30 Friday, August 22. At that time the attendant in charge will count the number of people registered and will announce the winner.

This beautiful trophy will be inscribed with the words "I. A. A. Trophy, Farm Bureau Day, Illinois State Fair, 1930." It will make an attractive adornment for any Farm Bureau office.

Mid-West Grain Corp. New Co-Op. Sales Agency

Service Now Offered Member Elevators from Peoria Office

THE organization of the Mid-West Grain Corporation, subsidiary grain sales agency for the Illinois Grain Corporation, marked an important step in the building of producer-owned and producer-controlled grain marketing in Illinois.

The formation of the Mid-West Grain Corporation followed close on the heels of the employment of John Benson, who for several years has been engaged in the grain business on the Peoria market, to represent the Illinois Grain Corporation and send out Farmers' National Grain Corporation bids from Peoria for the Chicago, Peoria and St. Louis markets.

Began July 21

Mr. Benson began work on July 21 rendering service to the member elevators, and elevators which have applied for membership but have not as yet fully qualified, in the Illinois Grain Corporation. Since then grain has been moving steadily to the Farmers' National from members and prospective members of the new Illinois co-operative.

The Mid-West Grain Corporation is formed under the provisions of the Co-Operative Act of Illinois with an authorized capital stock of $525,000 consisting of 5,000 shares of preferred stock of $100 par value and 5,000 shares of common stock of $5 par value per share.

Sales Subsidiary

The Mid-West Grain Corporation for the present is a complete subsidiary of the Illinois Grain Corporation in that all of the stock both preferred and common will be issued to the Illinois Grain Corporation.

It is contemplated that the newly-formed co-operative will have representation at Chicago, Peoria, St. Louis

(*Continued on next page, col. 2*)

Grain Producers Move Forward in Marketing

Propagandist Discredited by Farmers' Grain Dealers' Association

THE work of completing the personnel and sales service of the Illinois Grain Corporation and its subsidiary, the Mid-West Grain Corporation, is proceeding simultaneously with the job of explaining the new co-operative grain marketing program to farmers' elevator directors desirous of having a part in the new producer self-help movement.

Pending the completion of arrangements necessary to bring the advantages of the Farm Board program to Illinois grain producers there has been some delay in answering requests of scores of elevators and boards of directors to have the Illinois Grain Corporation's plans and agreement explained.

Time Will Tell

Misleading and even malicious propaganda spread in several communities in central Illinois has resulted in temporary misunderstandings and delay which it is expected will be cleared up when all the producers become fully informed regarding the source of the opposition and the direction in which their true interests lie.

One worker who has been particularly active in spreading falsehoods in McLean county while posing as an official of the Illinois Farmers' Grain Dealers' Association has been repudiated by that organization in an official letter from one of its officers who declares that the individual is not working with the consent or under the direction of its board of directors.

Who Pays Bill?

Officials of the Illinois Grain Corporation have learned to their own satisfaction where the money is coming from to pay expenses of this person whose chief interest seems to be to thwart the development of an effective co-operative grain marketing system in Illinois. The report that he has now been transferred to carry on similar activities against the interests of organized grain producers in Wisconsin lends further credence to the belief that he is being paid to work against co-operative marketing by those selfishly opposed to farmers getting control of their own products.

The spreading of false information and malicious propaganda is slowing up the participation of several elevators in the federal grain marketing plan, but in no wise has it delayed the work of the Illinois Grain Corporation in arranging to serve the producers of Illinois. It is confidently expected that when the elevator stockholders learn the true situation, and that interests opposed to real co-operative marketing have been misleading them, the adoption of the Illinois Grain Corp. plan of co-operative selling by these elevators will become a reality.

Not Unexpected

Opposition to the effort of Illinois grain farmers to help themselves was not unexpected. Invariably when farmers try to work together for their mutual interests, particularly in the co-operative marketing field, they are met with resistance from selfish and unfriendly people who apparently think they have a divine right to collect toll from him in one form or another. The same kind of opposition is being felt toward co-operative grain marketing in Minnesota, Wisconsin, North Dakota, South Dakota, Nebraska, and in fact throughout the grain producing states.

In the meantime the Illinois Agricultural Association and the Illinois Grain Corporation are pursuing their policy of confining their activities to constructive effort. The attacks of discredited propagandists representing private and selfish interests will not be dignified by public answer. The Illinois Grain Corporation believes that the producers eventually will learn that its plan is sound and rest content with the thought that right eventually will prevail.

Mid-West Grain Corp. Hires

(*Continued from page* 1)

and Indianapolis. If found necessary later it may also be represented at other points.

It is proposed that the paid-in capital of the company be sufficient not only to show adequate financial responsibility, but have adequate operating capital to handle the grain of members. If coarse grain territory other than Illinois shall desire to use the facilities of Mid-West Corporation opportunity will be afforded such other organizations.

Seven on Board

The new company has a board of directors of seven members chosen from the board of directors of the Illinois Grain Corporation. These directors are as follows: Lyle Johnstone, Bloomington; J. C. Sailor, Cissna Park; John P. Stout, Chatham; E. E. Stevenson, Ransom; Geo. J. Stoll, Chestnut; Charles Schmidt, Beason; B. L. Baird, Williamsfield.

"Developments in the Soybean Marketing Association" will be the subject of a radio address by Manager J. H. Lloyd from station WENR, Chicago, at 7:30 P. M. on Sept. 2.

Mid-West Grain Corp. Hires General Manager

Has More Than 20 Years' Successful Experience in Grain Business

CHARLES P. CUMMINGS of Pittsfield, Illinois, chief grain buyer for the M. D. King Milling Company, soft wheat millers at that city, was employed recently as general manager of the Mid-West Grain Corporation, subsidiary sales agency of the Illinois Grain Corporation. Action toward the employment of Mr. Cummings, who has had more than 20 years of successful experience in the grain business, was taken at the meeting of the board of directors in Bloomington on August 6.

Knows Elevator Problems

Mr. Cummings has had country mill and elevator experience, brokerage experience, as well as terminal market experience both at Kansas City and St. Louis. Letters received from responsible parties both in his home town and at the St. Louis and Chicago markets, highly recommend Cummings and testify to his reputation for good judgment and business integrity.

One prominent St. Louis grain firm states: "Mr. Cummings is a very close student of all conditions entering the grain business, and I consider him one of the outstanding grain men in this section of the country. He is very capable, trustworthy and efficient."

Chief Grain Buyer

During recent years Cummings has held the responsible position of chief grain buyer for the King Co., which owns and controls a substantial number of country elevators in southwestern Illinois. Cummings has had the supervision of the latter so he knows the problems of the country elevator.

He has had experience in buying grain on the floor of the St. Louis Exchange. For more than a year he served the U. S. Government after passing the Civil Service examination, as federal grain supervisor, and during the war he was associated in government service with J. M. Chilton, now employed by the Farmers' National Grain Corporation.

Mr. Cummings has a wife and three children. Headquarters of the Mid-West Grain Corporation will be established in Chicago. Mr. Cummings will assume his new duties as soon as he can make the necessary arrangements to leave his work and interests at Pittsfield. Service to member elevators and those applying for membership will be developed rapidly following his coming.

Farm Board News

RETURNING to Washington recently from a trip through the grain states, Chairman Alexander Legge of the Farm Board summoned newspaper men as reported by the Time magazine, and declared that "The farm board was created to assist the farmer and not for politics. From now until November politicians will be so busy saving the farmer, it might be just as well to take a vacation. . . .

"I notice the Democratic National Committee has adopted as a slogan 'the failure of the Farm Board.' This seems to be copied almost word for word from the grain dealers and the Chamber of Commerce of the United States. . . .

"Certain interests [he meant the grain brokers] which seem to feel they have a God-given right to handle the products of the farmers, and who have accumulated immense fortunes in doing so . . . doubtless will be easy picking for any politician of any party who is willing to play their game.

"However, farmers as a class . . . seem to be aware that their present unhappy condition is a result of long years of unregulated production, while they listened to gigantic schemes that high-powered statesmen have had to offer.

"Present and future orations . . . to broadcast the alleged failures of the Farm Board are only more of the same kind of political bunk. . . ."

"Pulmotor"

Asked if the Farm Board would buy more wheat now as senators from Kansas, Nebraska, South Dakota and Oklahoma were asking, Chairman Legge replied "No, stabilization will work admirably on seasonal surpluses but it can't be made to work on permanent cumulative surpluses. To buy 100,000,000 bu. of wheat would only encourage Kansas farmers to plant more and make a bad situation worse. We can apply a pulmotor and give temporary aid, but we're looking for a more permanent remedy."

No Skirts for Legge

Someone suggested that he ought to report his findings to President Hoover. Mr. Legge's eyes narrowed sharply as he replied: "The Farm Board isn't going to hide behind the President's skirts. If he wants to see me he knows where to find me. Business is going on as usual."

Italy has a tall new tariff to keep out wheat. Likewise France, where wheat last week was selling at $1.71 per bu. Advanced by idealists has been the idea that the Farm Board donate its heavy wheat holdings to famine-stricken China, but practical-minded

C. P. Cummings

Mr. Legge declares: "We've no authority to *give* anything away, to China or any other country. . . . I've discussed these proposals with President Hoover, but no solution has been found."

Whether Chairman Legge thought it was "bunk" or not, the wheat surplus last week continued to brew strong politics. Republican senators criticized the board for its "do-nothing" policy. There was talk that Senator Borah of Idaho who last week was ordered to northern Maine for a month's rest by his physician would take the stump this autumn in the northwest against the Farm Board and the administration's farm relief program.

The Board's Year

In its first year (ended June 30) the Farm Board advanced $195,000,000 of the $250,000,000 appropriated by Congress to co-operatives and stabilization corporations. Of this sum $40,000,000 had been repaid up to last week.

Six national co-operative selling agencies, borrowing from the board, have been established:

1) Farmers National Grain Corp., of Chicago; Clarence Elmer Huff, president. F. N. G. C. sells wheat for members or loans them 85% of the spot price. Last week it said it was handling one-third of all wheat through Kansas City, predicted it would handle half the U. S. crop next year, claimed that in the foreign field it was already the world's biggest factor.

2) American Cotton Co-Operative Association of New Orleans; Allen Northington, president. Estimated membership, 200,000 planters.

3) National Wool Marketing Corp. of Boston. This agency handled about 10% of the clipped wool last year, plans to handle 30% this year.

4) National Bean Marketing Association of Oxnard, Calif.; Ralph Logan Churchill, president.

5) National Live Stock Marketing Association of Chicago; C. A. Ewing, president.

6) National Pecan Marketing Association of Brownwood, Tex.; Henry Gaillard Lucas, president.

Next week a seventh national co-operative is expected to be formed when beet sugar producers from 17 states meet at Greeley, Col.

Two stabilization corporations to buy and sell commodities in the open market now exist:

1) Grain Stabilization Corp.; George S. Milnor, general manager. This agency bought and now holds for the Farm Board 69,000,000 bu. of wheat.

2) Cotton Stabilization Corp.; E. Fitzgerald Creekmore, general manager. This agency at a heavy loss took over 1,000,000 bales of 1929 cotton from the national co-operative.

The live stock co-operative does its own buying and selling. The wool association trades through Draper & Co. of Boston. The bean and pecan organizations are still developing their marketing system.

Though no national co-operatives have yet been formed, for handling dairy products, tobacco, potatoes, apples, rice, fruits and vegetables, honey, poultry and eggs, grapes and raisins, sour cherries, the Farm Board has done business with local marketing associations.

Authorize Investment

The purchase by the I. A. A. of $10,000 worth of class A preferred stock in the Illinois Grain Corporation was authorized at the last meeting of the board of directors on July 22 in Chicago. Further action was taken authorizing the officers to loan $15,000 of the organization's funds when secured by collateral now held by or to be acquired by the Illinois Grain Corporation. Money so obtained will be used by the new grain co-operative for capital purposes.

Marketing Tomatoes

The surplus tomato crop about Sterling in Whiteside county produced by members of the Sterling Vegetable Growers' Association, will be handled by the Illinois Fruit Growers' Exchange during the current season, according to a recent announcement by Manager A. B. Leeper.

This association recently affiliated with the Fruit Growers' Exchange in handling carlot shipments.

Grain Producers Move Forward in Marketing

Propagandist Discredited by Farmers' Grain Dealers' Association

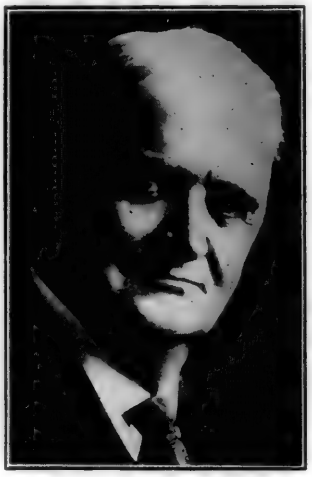
This association recently affiliated with the Fruit Growers' Exchange in handling carlot shipments.

Roadside Marketing Needs Organization

Tom Delohery Urges Farmer to Consumer Direct Selling

"THE time has come when organization is necessary not only to future growth but to the future protection of the business of roadside marketing by real farmers," according to Tom Delohery, editor and publisher of "The Farmer-Salesman," a new periodical published at the Exchange Bldg., U. S. Yards, Chicago, in the interest of farmer-to-consumer-direct marketing. "Roadside marketing is a farmer's project," he says, "so is selling farm eggs, but there are, I believe, more non-farmers than farmers selling at roadside markets, and the hucksters, being good salesmen, are harvesting many dollars, but at the same time are wrecking the chances of the honest individual farmer.

"In Cook county, for instance, I believe there are as many hucksters as there are farmer-owned roadside stands. They are here today and gone tomorrow. The customer gets stung and leaves off buying in the country. He knows his corner storeman is honest even though his stuff may not be of as good quality and prices higher.



More Competition

"Moreover, the surplus producing areas of fruits and vegetables, for instance, are shipping to all big and small cities. Knowing it doesn't pay to ship poor quality, they grade and ship the best. The nearby farmer hauls in everything and takes what he can get. At the same time the good roads he asked for years ago, and got recently, have been stretched out into the country so that other districts which didn't produce these crops now can do so and shoot them in by fast trucks. More and more competition; but as one man expressed it, 'while the trucks are going in to provide competition, private families are riding out in the country where they will buy if the farmer had enough sense to sell them.'

Need High Standards

"The co-operation I can see is in buying supplies. Small item, but a big one in the end. Most of all, however, is the association sign, which with proper publicity, will tell the customer that members of the organization put up only the best, and that they stand back of the guarantee as to quality as implied by the insignia.

"This thing has been done in other sections with good results. County agents, for the most part, have been sponsors of the idea, although business men, recognizing the plight of the farmer, have taken a hand.

W. S. O'Hair

"Other county agents believe their job marketing, but when figures show that roadside markets, for instance, add from 25 to 200 and 300 per cent above wholesale to the growers' income, it seems to me that the job of production ought to be shared with the job of teaching and boosting marketing. Every town of 5,000 and over has room for such markets; every town which buys any of its farm products outside afford local farmers the opportunity of a sideline that will pay him well with no extra labor. This has been proven; it is not my personal contention.

"The idea of the Farmer-Salesman is to pass along to other farmers the ideas and practices which have worked successfully for others. Like many other things, it takes a life-time to learn this or that; whereas, one man may have found it out years before.

"The big income is from local trade driving out to the stands or farms. They do it around Chicago; will do it other places and there seems no limit to the variety of things people will buy."

Minutes More Promptly

As a result of action taken by the I. A. A. board of directors in its July meeting, County Farm Bureaus will be supplied hereafter with a preliminary report of the proceedings of each board meeting at the same time members of the board are furnished this information.

Heretofore the sending out of the minutes of board meetings has been delayed until after their approval at the following meeting of the board. It is understood that such preliminary reports will be subject to later approval.

State Dairymen Hope to Ban Oleo

State Institutions Urged to Use Butter and Help Farmer Taxpayers

W. S. O'HAIR, president of the Illinois State Dairymen's Association, reports progress in that organization's efforts to influence the state institutions of Illinois to use butter rather than oleomargarine in their dining rooms. According to a recent statement by Rodney Brandon, director of the Department of Public Welfare, state institutions are using approximately 1,000,000 lbs. of oleomargarine annually. The Soldiers' Home at Danville, Illinois, which until recently used about 25,000 lbs. of margarine a year, is now using butter instead.

"We are putting on an educational campaign in several counties with the farmers, grocers and business men," writes Mr. O'Hair. "And in several towns the grocers are putting butter up as a leader, leaving off oleomargarine. This is being tried out for a period of four months.

Oleo Worst Enemy

"Oleomargarine is the worst enemy American agriculture has today," continued Mr. O'Hair. "It is being sold from 9 to 22 cents a pound to customers over our entire country. Chain stores are selling it and forcing the home merchants to sell it from 1 to 3 cents profit, while in many places, the most popular chain stores are not selling butter at all.

"Investigations we have made since January 1 reveal that farmers are using better than 50 per cent of the oleomargarine sold in Illinois. Our whole milk producers are the chief users of oleo. In one whole milk district alone I was told that 90 per cent of the families are using oleomargarine and cooking oils, in spite of the fact that their milk had gone down over $1 a hundred.

"The Soldiers' Home in Danville is using 60,000 lbs. of oleomargarine, and the state of Illinois is buying a million pounds of the cheap 9 cents a pound margarine to feed the unfortunates in the state institutions.

Dairy Cattle Slaughtered

"Oleomargarine, forcing down the price of butterfat, has caused millions of dollars worth of dairy cattle to be slaughtered, and this meat, providing cheap beef, coming in competition with the cattle feeders, has assisted in undermining their business. The foreign vegetable oils manufactured into cooking oils have damaged the hog market

(Continued on page 10, col. 3)

Farmers National Grain Corporation

Now Doing Business on All Domestic Markets

FARMERS' National Grain Corporation's nation-wide merchandising organization practically was completed with the purchase of the Quinn-Shepherdson grain firm at Minneapolis and the establishment of regional headquarters for the spring wheat territory at St. Paul, Minn., declares a recent statement from the national organization. Branch offices also will be maintained at Minneapolis and Duluth, Minn., and Great Falls, Mont. The district manager is H. F. Shepherdson, formerly president of the Quinn-Shepherdson Company, which henceforth will be operated under the name of Farmers' National Grain Corporation.

Closing of the Quinn-Shepherdson transaction was anounced on July 26. Thus one year to a day from its birth Farmers' National Grain Corporation not only was established and doing business on all domestic markets but was in contact with buyers of grain in a score of foreign countries—or more. For the first time in history the American grain producer was in actual control, through his own organization of a world-wide co-operative grain marketing system.

Co-Operative Benefits

Under the date of July 21, the Union Equity Co-Op. Exchange, of Enid, Okla., a Farmers' National stockholder, writes:

"We have today checked our records and find that one year ago today we sold wheat at 8½ cents per bushel under Chicago September options, basis No. 1 hard Galveston. Today we are selling wheat at 4 cents over Chicago September basis No. 1 hard Galveston, making a total difference of 12½ cents per bushel. *We are getting more today compared to Chicago September options than we were a year ago.*

"We say the farmer's attitude toward holding his wheat back on the farm has had a lot to do with this. He has helped himself in another way, by and through his organization. The state sales agencies and pools have done their part, and Farmers' National Grain Corporation has done its part, and last but not least, the Federal Farm Board has done its part, by assisting the co-operatives in a financial way as well as by taking sixty to seventy million bushels of last year's crop out of the way."

"We believe if it were not for the co-operative effort the farmers would be selling their wheat today at 50 cents a bushel. The farmers are co-operating better than ever before and we don't think the time is very far in the future when all farmers will co-operate, not only in marketing but in production."

Soybean Marketing Assn.

AT the last meeting of the executive committee of the Soybean Marketing Association, the Illinois Agricultural Association was requested to provide management service for the soybean co-operative. The provisions of the agreement provide for compensation of $480 for the first year, payable in 12 equal instalments of $40 each. The contract embodies also the following principles:

"(A) That the management, at all times, act only within the policies adopted by the board of directors of Soybean Marketing Association;

"(B) That the personnel provided for actively administering the affairs of the association, be subject to the approval of the board of directors of Soybean Marketing Association; and

"(C) That all expenditures made or authorized by the management be within a budget authorized and approved by the board of directors of the Soybean Marketing Association."

Inasmuch as the Soybean Marketing Association will have no income to defray expenses and pay its new manager, J. H. Lloyd, until the crop is sold, the directors authorized that $2,500 be advanced to the Soybean Marketing Association pending such time as the organization has funds.

Wool Marketing

Approximately 221,000 lbs. of wool have been consigned from Illinois to the National Wool Marketing Corporation, according to figures compiled by Ray Miller, director of live stock marketing, the latter part of July. This represents 13 carloads from 18 counties. Checks representing advance payment of 18 cents per lb. were mailed from Boston on July 18.

A plan to set up an Illinois Wool Marketing Corporation next year is now under consideration by the marketing committee. It is contemplated that such an organization will serve as a regional for Illinois. Five hundred thousand pounds of wool must be contracted for in order to qualify as a regional.

Action was taken at the July meeting of the I. A. A. Board to refer to the committee on program the proposal made by delegates to the recent 15th congressional district Farm Bureau meeting that a discussion of "Business Administration" be included on the program of the next annual I. A. A. convention.

Kewanee Business Men Repudiate U. S. Chamber

Express Confidence in Farm Board and Hoover

A RESOLUTION passed by the Kewanee Chamber of Commerce at Kewanee, Illinois, relative to the action of the U. S. Chamber of Commerce in its last annual convention at Washington declares that:

"WHEREAS, at the last annual meeting of the Chamber of Commerce of the United States, its action with respect to the policies of the Federal Farm Board and marketing act created a situation of disagreement that we believe was both undesirable and unnecessary; and

"WHEREAS, we feel that we can place confidence in the Federal Farm Board and may rely upon it and upon President Hoover's sincerity and open-mindedness to the end that they will not continue any policy that proves itself inadequate for agriculture or injurious to the best interests of the people of our country as a whole;

"THEREFORE, we feel that the Federal Farm Board should receive through the Chamber of Commerce of the United States the co-operation of finance, business and industry as well as agriculture to the end that its policies may be given a fair trial.

"BE IT RESOLVED, THEREFORE, that we dissociate ourselves from the action taken by the Chamber of Commerce of the United States and that we express to the Federal Farm Board our desire to be helpful to them and to agriculture, state-wide and locally;

"BE IT RESOLVED FURTHER, that the copy of these resolutions be mailed to the Chamber of Commerce of the United States, to the Federal Farm Board and to state and local agricultural agencies."

Following the reading of the resolution at its meeting on July 22 the I. A. A. Board passed a motion that the resolution be received and spread upon the minutes of this meeting and that the secretary be authorized to address a communication to the Kewanee Chamber of Commerce, expressing appreciation for the action taken.

As a result of a recent act passed by congress, patents will be granted breeders who develop a new plant, agricultural or otherwise.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Editor, George Thiem

Published once a month by the Illinois Agricultural Association, at 124 So. Fifth St., Marshall, Ill. Adress all communications for publication to Editorial Office, 608 So. Dearborn St., Chicago, Ill. Entered as second-class matter June 16, 1930, at the post office at Marshall, Ill., under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for missent copy please indicate key number on address as is required by law.

The Milk Commission Report

A MORE intelligent, fair, and enlightening report of the milk situation at the St. Louis market, than that of the Consumers' Milk Commission, could scarcely have been written.

Three prominent, public-spirited St. Louis club women representing the consumers of that city carried on a careful investigation of market conditions lasting for several months. They heard testimony of both producers and distributors, drove out into the country to examine dairies, saw how women and children frequently contributed their labor in milking and tending the cows, learned how unfairly the 13c per quart they paid was distributed between the farmers and the dealers, reported what they saw and heard.

A few large distributors handling 85 per cent of the milk consumed in St. Louis on which they set the price both to the producer and consumer. Nearly twelve thousand farmers supplying this milk, each disposing of it separately with little or no voice in its sale, and accepting the weights and tests handed down by the buyers. These are some of the interesting disclosures in the report.

What they saw so impressed these women, imbued with a sense of fair play and justice, that they wrote: "It is hardly to be wondered at that a feeling of dissatisfaction has pervaded the producers, and that in spite of the difficulties in the way of co-operation, efforts have been made to unite and improve their conditions, with the result that the Sanitary Milk Producers Association, Inc., includes as members more than half the milk producers in the district."

The St. Louis milk situation finally culminated in the recognition by the dealers of the producers organization. The influence of the consumer representatives in bringing about an amicable settlement is not underestimated. Producers can usually count on fair play from the consuming public once it knows the facts.

Wealth and Cities

THE old Fine Arts Building of Chicago World's Fair fame situated near Lake Michigan in Jackson Park is being restored as an industrial museum. We have watched with interest for several months the dismantling of the temporary parts of the structure, and more recently its beautification as the smooth white limestone blocks rise one by one to cover the old but still substantial brick walls.

Two million dollars, we are told, has been donated by a Chicago millionaire to remodel the building. The donor is a well known philanthropist who made his money selling goods to farmers through mail-order catalogues.

Whether or not that money could be spent more wisely in relieving human suffering, reducing poverty and ignorance is not for us to say. We point to this worthy gift as an illustration of how money is being drained out of the farming communities and concentrated in the centers of population.

In this case the mail order patrons undoubtedly received full value for their money. The company and its builders prospered not by profiteering but through large sales volume, quick turnover, and small margins of profit. Nevertheless, much of the wealth created in the country by the farmer's toil is going to build fortunes, monuments, skyscrapers in cities which many seldom or perhaps never see.

We would not use this fact as an argument against the chain store retailers for in many in-

stances they are enabling the farmer to buy more necessities for less cash and so leave something for comforts or perhaps luxuries on the farm. We do call attention, however, to the justice of giving the country its rightful share of philanthropies in the form of schools, libraries, hospitals, roads, monuments, museums and the like.

There is no reason why we as farmers should not request that a portion of such distributions be invested in projects for our edification and welfare. Very little has been done in this direction. The fault may be largely our own for not going after the money.

"Muster Day" Program

OBSERVANCE of a Muster Day program by the Farm Bureaus in every rural community in America is advocated by the American Farm Bureau Federation in a special "Muster Day Proclamation" issued recently by President Sam H. Thompson.

The proclamation signed by Mr. Thompson and Secretary Winder sets forth that:

WHEREAS, the farm people of the United States have formed a mighty organization—the Farm Bureau—designed to improve the economic position of agriculture and to advance the social conditions of rural America, and

WHEREAS, agriculture is the basic industry of this country upon which, to a large extent, rests national prosperity, and

WHEREAS, the far-flung units of this mighty army of organized agriculture are today engaged in dealing with the specific phases of the farm problems that are locally emphasized. However, the strength and power of the organization lies in its breadth and scope, in the fact that dairymen in New England, cattle feeders in Iowa, cotton planters in Alabama, join with orange growers in California in the common cause of defending the welfare of agriculture,

IT IS, THEREFORE, proper that there be opportunity to take stock of the strength of the entire organization; it is well that occasion be found for mustering the entire force of the Farm Bureau—for each member to the man "to toe the mark" so that from coast to coast organized agriculture may present its unbroken phalanx of men and women pledged to secure and to maintain through orderly organized effort the well being of the farm and the farm home.

THEREFORE, it is urgently recommended that State Farm Bureau Federations and County Farm Bureaus join in organizing and holding during the month of September a Muster Day program in each rural community within each county.

FURTHER, it is urgently recommended that the community Muster Day program, as outlined by the American Farm Bureau Federation, he followed as closely as local conditions will permit.

In conducting a Muster Day program the organized farmers of 1930 will be following a practice common to Colonial days in America. In those early times, each year one day was set aside for Muster Day. On that day all men—farmers—of military age gathered at an assembly point to discuss problems of common defense and to receive military instructions that would enable them to defend from Indians and enemy their farms and their farm homes.

One phase of Colonial Muster Day was the enrolling of the young men who had reached the military age during the twelve months just passed.

Following this same idea it is proposed that the farm men and women of the Farm Bureau shall set aside one day in September of this year and on that day they shall assemble in community groups to carry out the Muster Day program, to take stock of the organization's strength, and to reaffirm faith and loyalty in Farm Bureau, and

IT IS FURTHER purposed, that each Muster Day exercise shall present opportunity to permit non-members to enroll in this great effort and promote the well-being of the farm people.

All officers, state and county, community leaders and members are urged to support and sponsor to the limit of their ability the Muster Day program to the end that this September Farm Bureau demonstration may build membership, increase loyalty and impress the nation.

The Cover

Our artist, Fred Good, presents on the front cover a sketch of the Indian Head which nature has carved in the limestone bluffs about three miles north of Savanna along the Mississippi in Carroll county, Illinois.

The Indian Head trail up the Mississippi to St. Paul and Minneapolis got its name from this natural curiosity. The trail is being paved and before long tourists may travel the entire length of the state on smooth roads bordering the father of waters. The editor will welcome pictures or letters telling about other unusual points of interest in Illinois, historical or otherwise, that might be suitable for similar sketches.

Public Relations Committee Reports

John Watson Studies Proposed Revenue Amendment

THE official report of the public relations committee of the I. A. A. Board, which met on July 22, was presented to the directors on the following day by Chairman Black. The report is as follows:

"Your committee met on July 21, 1930. Those present included all members of the committee, the officers of the association, the director of the Department of Taxation, and by invitation, Mrs. Homer Johnson, chairman of the legislative committee of the Illinois Home Bureau Federation.

"Mr. Watson reported the results to date of his study and analysis of the proposed revenue amendment to the state constitution recently submitted to the electors of the state by the special session of the General Assembly. His report shows that the proposed amendment embodies some provisions which have been advocated for years by the association, but also contains other provisions that might easily prevent farm and tangible property from obtaining any substantial relief from the present grossly unfair burden of taxation, and that seem to offer the possibility of seriously jeopardizing some of the protection property taxpayers have under the present constitution.

"Your committee has requested the officers of the association and the director of the Department of Taxation to give intensive study to these provisions and report to the committee their analysis and findings as a result of this study, supported by legal opinion. Until your committee can receive and carefully consider this further report, it recommends that the association withhold any declaration of its attitude toward the proposed amendment.

"By the Committee,
"CHARLES BLACK, Chairman,
"C. J. GROSS,
"GEO. B. MULLER,
"G. H. IFTNER, Farm Adviser."

John C. Watson, director of taxation, appeared before the board and reported, orally, the results to date of his study and analysis of the proposed amendment to the state constitution. The president and treasurer supplemented his report by advising the board relative to the developments in Springfield, leading up to the submission of the proposed amendment to the electors of the state by the special session of the General Assembly.

After considerable discussion it was moved by Chairman Black, seconded and unanimously carried:

"That the board of directors concur in the report of the public relations committee, in that, pending further study and consideration of the analysis of the proposed amendment to the state constitution, the association withhold any declaration of its attitude toward the proposed amendment."

"Station Agents Must Stay on Job"—I. C. C.

FARMERS and townspeople in and about Richardson, Virgil and Egan in northern Illinois will not be deprived of station agent service as a result of action taken by the Illinois Commerce Commission, July 9, denying petitions of the Chicago Great Western Railway Company.

The company had petitioned to discontinue station agents at these points. The Kane County Farm Bureau secured the co-operation of the I. A. A. transportation department in presenting testimony through local witnesses showing why the agents should not be removed. These stations are of considerable importance to the community.

It was revealed that the railroad's revenues at these points far exceed their expenditures in maintaining local agents. Shipments are made throughout the year, and great inconvenience and financial loss to local residents and shippers would result if they were made non-agent stations.

The Big Four Railroad will be compelled to maintain its agency at Vermilion Grove, according to a decision of the Illinois Commerce Commission on July 17.

The I. A. A. helped the Vermilion County Farm Bureau oppose the proposal of the Big Four Railroad to discontinue the agency at the Vermilion Grove station. Farm Bureau members testified before the commission tending to show that the removal of the agency would work a hardship on local shippers.

Home Bureau

Mrs. Homer Johnson, chairman of the legislative committee of the Illinois Home Bureau Federation, met with the I. A. A. board of directors at its regular meeting on July 22 in Chicago.

Near the close of the meeting Mrs. Johnson briefly explained the organization of the Home Bureau and its program of work, expressing the hope that some arrangement might be effected whereby the Illinois Agricultural Association can more actively assist the women of Illinois in their work.

Further Progress in National Grain Corp.

Co-Operative Helps Relieve Wheat Congestion in Southwest

GRAIN purchases by the Farmers' National Grain Corporation during July, the first month of the new crop year, totaled 17,121,718 bushels. Activities have not been confined to wheat, the corporation handling corn, oats and barley. Figures on the total grain purchases do not include large quantities of wheat stored by members to be sold through Farmers' National at such times as the member-owners of the grain wish to place it on the market.

Thirty-two per cent, or nearly one-third, of the total wheat receipts at Kansas City during July, was handled by members of the Farmers' National. Branch offices at Omaha, Neb., Enid, Okla., and Wichita, Kan., also did a

(*Continued on page 15*)

Dairymen Ban Oleo

(*Continued from page 6*)

more than any other single factor.

"A one-cent drop in butterfat means a $100 loss to the producers in an average county in Illinois. The drop in butterfat prices, the first of this year, resulted in a loss of $1,000 to $1,500 a day, or $30,000 to $45,000 a month to the average county in Illinois.

"The average county in Illinois is spending $15,000 a month or more for oleo. This would run from $50,000 to $75,000 loss that should be in the bank deposits each month, in the average Illinois county.

"After my investigations, we called together 15 farm advisers from counties in eastern Illinois and organized the Illinois State Dairy Boosters' Association with Melvin Thomas of Coles county, president; Herschel VanMatre of Edgar county, secretary, and R. E. Apple of Clark county, treasurer.

"Throughout this area we are working to promote the use of butter instead of oleo both on the farm and in town and city. We are asking the people to buy home products, patronize home industry, and quit eating the vegetable oils imported from foreign countries, in most cases free of duty, to undermine the farmer's business. We hope to extend our campaign to 15 to 20 other counties this fall."

The Illinois Agricultural Association has been using its influence since the first of the year over the radio and through other publicity channels, first to get farmers to ban oleo from their tables, and secondly to promote greater consumption of butter in towns and cities.

ILLINOIS farmers who have not traveled westward over the extensive prairies and plains between here and the Rockies have no conception of the tremendous competition they are receiving in the production of staple crops from their western neighbors.

The writer recently completed a 4,200-mile drive through the states of Iowa, Nebraska, South Dakota, Wyoming, Montana, North Dakota and Minnesota. One of the most impressive revelations to us was the apparent monumental error of our federal government during past decades in undermining corn belt agriculture first by its extensive reclamation projects like that of the great Shoshone Dam near Cody, Wyoming, which waters more than a quarter of a million acres of arid lands to the east; secondly, by its free-land and homesteading policy as a result of which literally millions of acres of splendid semi-arid grazing lands where buffalo, cattle and sheep once ranged, have been brought under the plow by settlers who barely eke out an existence producing wheat, barley, flax, oats and corn.

Many of these western dry-landers live in one-room shacks, log cabins or sod houses. Their land cost them little or nothing, frequently it produces little or nothing, but enough grain, flax and other produce are sold one year with another to finance a low standard of living and continue the precarious existence common to the area.

It is true that hundreds of these homesteaders in western South Dakota, Wyoming and Montana have abandoned their dry, rocky, poor-yielding quarter sections, but thousands of others endowed with greater tenacity and resourcefulness, or perhaps able to take more punishment, have held on. Most of these dry landers we learned from careful inquiry accumulate little to pay them for their unremitting toil, but they do produce enough to create a surplus and spoil the business of farming for Illinois, Iowa and other cornbelt farmers.

The opening of the Assiniboine Indian Reservation in north central Montana to homesteaders back in 1909 is a typical example of the western development sponsored by our government, which now is attempting to solve the problem it was instrumental in creating. Settlers from the east and middle west flocked in, built shacks on nearly every quarter section, plowed up the native grasses, and started "farming." Many learned that they couldn't succeed in making a living with only 10 to 12 inches of rainfall annually, let alone accumulate a competence for the future. And so the plains are dotted with abandoned huts, although others more fortunately situated, or hardier, continue to carry on waiting for the unusual year, which seldom comes, when nature will yield abundantly.

This description of agriculture on the great western plains does not reflect conditions in all sections. There are localities like the Judith Basin around Lewistown, and the sweeping areas south and east of Great Falls, Montana, where excellent low cost wheat is produced in great quantities on dry land farms. Here one crop every two years is the rule. Yields run as high as 50 to 60 bushels of wheat per acre in favorable years and even this year, a dry one throughout the west, 20 to 30 bushel yields are being reported.

Crop acreage reduction for Middle West wheat growers advocated by the government might strike a more sympathetic chord if accompanied by a statement from Washington that all land reclamation, irrigation and new development projects had been discontinued indefinitely, and that some constructive effort was being made to remove part of our great areas of marginal lands from production.

—E. G. T.

Earl C. Smith at Home

EARL C. SMITH, president of the Illinois Agricultural Association, who had a serious operation for the removal of his tonsils and other sources of infection the latter part of July in Chicago, is recuperating and gaining strength at his home in Pike county.

During the operation an unexpected source of infection was discovered deep down in the throat close to a large blood vessel. The operation was followed by severe hemorrhages which necessitated a prompt blood transfusion to mitigate the danger from heavy losses of blood. For several weeks he remained at the Beaumont Nursing Home on North Michigan Blvd., Chicago, in care of a trained nurse. Mrs. Smith was with him before the operation and during the period of convalescence.

A. R. Wright of Varna, vice-president of the association, in the meantime kept an eye on the many developments in the various projects of the organization at the I. A. A. offices.

Scores of letters, telegrams, telephone inquiries and callers soliciting information about Mr. Smith's welfare from distant points were received.

"I can't adequately express my grateful appreciation for the many kindnesses, flowers and good wishes I have received from so many during the past two weeks," he said before departing for home.

KEEPING WELL

By Dr. John A. Boland

AS children we recall, with rather painful memories, the ever recurring toothache. No home was complete without the "toothache drops." With the first indication of toothache, we were dosed with the ever-present drops. Finally, after several toothaches and the toothache medicine failed to relieve the symptoms, we were taken to the dentist and as a rule extraction of the offending member was necessary.

Contrast the foregoing procedure with the ideal program. The child should visit the dentist as soon as his baby teeth are erupted. That is a short time after his second birthday. Only in exceptional cases will he require actual dental work.

The first visit is to allow the child to become acquainted with the dentist and dental surroundings. Do not wait until the child has a toothache to take him to the dentist. His first visit should never be associated with pain. Our early impressions are usually lifelong. An analysis of fears of adults shows in many cases that fears have their origin in painful experiences in early life. Thus in later life teeth have been neglected and lost through fear of the dentist, acquired in early childhood.

The first visit gives the dentist an opportunity to gain the confidence and educate the parent regarding tooth problems. He can point out certain things that are happening in the child's mouth and suggest their correction. The child should visit the office at regular intervals as suggested by the dentist. At these visits the dentist may polish the teeth and detect and fill early cavities.

Cavities, when detected early, can be filled with little or no pain. Thus the child's mouth is kept in a healthy and comfortable condition during the years when more than at any other time good teeth are essential to growth and proper development.

Prevention of serious dental and constitutional disease, as well as prevention of dental fears, is entirely dependent on early and regular visits to the dentist.

THE race for the championship of the Illinois Farm Bureau Baseball League is rapidly narrowing down to a few teams as the end of the preliminary schedules approaches.

Cass and Sangamon counties, champions in their respective divisions, played the first intersectional game of the season at Beardstown on July 30 when Sangamon won a hard-fought game 10 to 6. These two teams are evenly matched as seen by the fact that the winner made 12 hits while Cass made 11. Seven errors turned in by the Cass county players were largely responsible for the difference in the score.

As we go to press, Sangamon county reports that it defeated Cass in a close game at Illiopolis on Aug. 6. Score 11 to 10. Cass made 6 errors, Sangamon 3. Sangamon now goes on in the semi-finals, Cass is eliminated.

Carroll county won the championship in Division I, Knox in Division II, Woodford in Division III, and Logan in Division V. McDonough county had several games yet to play before the closing date for preliminary schedules on August 16, but it has a fast hold on the division championship. LaSalle and Kankakee are fighting for the honors in Division VI.

Woodford and Logan counties are expected to hook up in their first semi-final series. Knox and Logan counties will go to bat for the western Illinois championship, and Carroll will play either LaSalle or Kankakee county when these two teams decide which shall represent the division in the semi-final play-off.

Knox county upset the dope in its division when it came from behind and defeated Henry county twice in succession in the last two games of the schedule. Henry county looked like a winner but Knox was gaining strength steadily following the first few games and developed a punch that changed the situation and placed the team at the top.

Henderson county whitewashed Warren in the game at Monmouth on August 2 by the one-sided score of 20 to 0. The Henderson county pitchers allowed only two hits, while the boys from the county bordering the Mississippi hit the Warren county hurlers freely throughout the game.

Live Stock Marketing

CHARLES A. EWING, Decatur, Illinois, is the new president and P. O. Wilson, formerly manager of the Cincinnati Producers' Commission Association, is the new manager of the reorganized National Live Stock Marketing Association.

Mr. Ewing, a member of the Macon County Farm Bureau, is well known in that county where for many years he has operated several thousand acres of land devoted to grain production and the feeding of cattle and hogs.

His past affiliation with agriculture dates back to the appointment to the Committee of '15 which brought forth the Producer co-operative program in 1920. Mr. Ewing served as a member of that committee. Although trained as a lawyer, he has devoted his life to farming interests, and he is firmly convinced that farm relief, so called, will be obtained through the farmer's own effort to organize and handle his own business.

As secretary-manager, Mr. Wilson comes to his new position with a record of nearly six years of successful operation of a Cincinnati Producers' commission association. He was born and reared on a Vigo county, Indiana, farm, graduated from Purdue University, and served in his home state as a county adviser.

By L. A. Williams

Right Time to Die, When?
When Is Ready Money Most Needed?

WHEN is the best time for a man to die? The answer is of course difficult. I would say no time is best. There are, however, times that are worse than others for a final walkout.

Today is the wrong time for a farmer to drop out of the picture. The estate he leaves is only worth about 35 cents on the dollar. Indeed, he would leave such a mixup in estate matters that the heirs would be lucky, after forced sales and probate, if anything was left to count on.

A farmer needs life insurance at this low ebb of valuation worse than he may ever need it again. A cash estate guaranteed to his family means ready money to live on, to pay bills with and to enable them to hold on till property values are better. It means leaving something for the children in many cases where without life insurance nothing would be left.

It most certainly is the wrong time to die in the agricultural world, but it is also the wrong time to go unprotected. Life insurance is needed now like fire insurance in a dry time with your buildings next to a powder factory.

The whole picture is this: Your chief interest in life is to create an estate for yourself and family. Your business with which you hope to create that estate is bad. Therefore, underwriting that estate by taking life insurance makes certain that estate on a systematic basis of premium deposits which though not easy to make are far easier than leaving undone one of the important jobs of life, namely, creating an estate.

The fruits of your effort come to you if you live, for at the age of retirement you may have an old age income from your insurance should you live. You will not have to die to get the money. Country Life rates make protection easily within the range of your pocketbook. WRITE FOR RATES.

A DEFENSE OF FARM ACREAGE REDUCTION

Address by Secretary of Agriculture Arthur M. Hyde Before the Midwest Retail Merchants' Council, Kansas City, Mo., August 5, 1930

MR. HYDE presents here an able and logical defense of the Farm Board's recommendation to wheat growers that they decrease their acreage planted to this crop and thereby relieve the surplus situation responsible for present low prices.

Some will not agree with his criticisms of the equalization fee and the debenture plan, the former advocated by the Farm Bureau, the latter by the Grange. Yet because the entire speech is addressed directly to the problem we are all interested in, it is presented herewith in full with the hope that it will provoke thought and so lead to a better understanding of everything involved in the solution of the farm problem.

—Editor.

JUST now the price of wheat is disastrously low. Few farmers can produce wheat to sell at present prices without losing money. The cause of present low prices is plain. Year after year farmers have gone on expanding their acreage, with consequent cumulative increases both of domestic and world stocks of wheat. There are other elements in the farm problems. Taxation, orderly marketing, diversification, and land use are some of them. I shall not discuss them here. When production is so clearly out of balance with the market, and a surplus is continually piling up, there is no need to hunt for or to discuss other factors of the price depression.

The world wheat acreage is today 42,000,000 acres larger than it was before the war. The American share of that increase is 14,000,000 acres or one-third of the total. These figures do not include Russia, which, before the war, was the world's largest exporter of wheat.

43,000,000 Bu. Too Much

Production has for the last seven years outrun demand by an average of 43,000,000 bushels annually.

The American carry-over of wheat on July first of each of the years specified below was as follows:

1926	99,000,000	bushels
1927	123,000,000	"
1928	128,000,000	"
1929	245,000,000	"
1930	265,000,000	"

The world carry-over has likewise been accumulating in volume as shown by the following tabulation:

1926	272,000,000	bushels
1927	332,000,000	"
1928	418,000,000	"
1929	589,000,000	"
1930	489,000,000	"

The world carry-over for July first of this year indicates a decrease of 100,000,000 bushels. On its face, this fact seems encouraging. But world production in 1929-30 was 514,000,000 bushels less than in the previous year. If world consumption had held its previous high level, the carry-over should have been materially reduced. The past year has proven, however, that consuming countries not only can, but have, reduced their consumption of wheat. By high tariffs against out wheat, by forcing the consumption of substitute cereals and starches, and by encouraging the expansion of their own acreage they reduced their importations by 237,000,000 bushels below the level of 1928-29. The smaller 1929-30 world production was due to short crops in Canada and Argentina. This shortage cannot be expected to continue. Both countries have large acreages and are expanding their acreage. The persistence of this large world carry-over in the face of a lower world production is a stubborn fact, the importance of which must not be ignored.

The Inevitable Result

Thus we have increased acreage, increased production and made cumulative additions to both the American and the world carry-over. As a natural and inevitable result, prices have fallen to ruinous levels.

Many of us do not like the law of supply and demand. To some it appears to be a monstrous fiction ruthlessly created by buyers and dealers to beat down the prices of farm commodities. But, like it or not, there it is. Nobody invented it. It is merely a statement of the way in which buyers and sellers the world over, and ever since the world began have acted and will act under given conditions. It is bedded deep in human nature. It applies to every product of human toil, from wheat to automobiles. If the seller has too much of a given commodity, he gets panic stricken and throws some or all of it on the market for what it will bring. If the buyers know that the supply is too large, they hold off until they think the bottom has been reached. The normal interplay of these human, selfish motives and reactions of buyers and sellers is called the law of supply and demand.

It is claimed that, since all farm products are ultimately consumed, there is never any surplus of farm products.

It is true that all foods and fibers produced on the farm are consumed—somewhere, sometime and at some price. Under the weight of a burdensome surplus, the price falls. At each successive lower price level, new outlets and uses for the product can be found. Thus ultimately the price drops until the surplus disappears. But the farmer cannot live unless the price equals his cost of production plus a profit.

Cost Doesn't Govern

When an unwieldy surplus burdens the market the crop must sell for whatever the cheapest user will pay. Under such conditions the cost of production has nothing to do with the price.

In a nutshell, then, the situation is this. There are 40 million more acres in wheat than there were before the war. For seven years the world has produced an annual average of 43 million bushels of wheat more than it consumed. Our American carry-over has piled up to the record height of 265 million bushels. The world carry-over has accumulated to nearly 500 million bushels. The new crop threatens to be larger than the last. The world price burdened by that huge surplus will be governed by the amount the cheaper users will pay. Our American price, so long as we produce for export, will be governed by the world price. Prices are disastrously low.

The case is plain enough. The vital question is, what shall be done about it?

Several programs are, or have been, proposed. Some of them are based upon

the theory that all that part of the crop which is consumed at home should be sold at the world price, plus the tariff, and that the domestic surplus should be dumped on the foreign market for what it will bring. One means proposed for doing this is the so-called equalization fee, by which the loss on the dumped surplus would be borne by the farmers. Another is the debenture plan by which the loss would be borne by the United States Treasury. Other plans for doing the same thing are proposed. They seek the same objective of tariff benefit, and involve the same program of dumping the surplus.

Another suggestion is that the Federal Farm Board should purchase on the market a large volume of wheat, say 100,000,000 bushels, and thus increase the price.

Not Temporary

If it were a situation, suddenly created, and temporary in character, the powers of the board in recognizing a stabilization corporation, to deal with a surplus might legitimately be brought to bear. But it is not a sudden emergency. It has resulted from continuous overproduction and consequent cumulative increases in the supply of wheat.

The cure for this condition is not to be found in the purchase of large amounts of wheat by the stabilization corporation. Such a course would not reduce the visible supply of wheat by a single bushel. It would not reduce world or domestic stocks of this wheat by a single pound. It would, on the other hand, gather into one mass, a vast amount of wheat, which, always present, and all the more threatening because massed under one control, would hang as a dead weight over the market and prevent the free rise in prices which we fully expect will normally occur.

To test the effect of such a purchase, let it merely be asked—what would the stabilization corporation do with it? That question is present with us now as to wheat already owned by the corporation—but unanswered. The corporation cannot dump it upon the domestic market without entirely dislocating the existing marketing and distributing machinery of the country, and it will not do so. Destroying it is unthinkable.

How Dump It?

Nor can it be dumped on the foreign market. Even if the prohibitive tariffs (such as Germany's 97c per bushel, France's 85c, Italy's 86c) could be met and overcome, it would destroy for present purposes the foreign outlet for the crop now coming to market. It would inevitably reduce the world price. But more final and forceful than either of these considerations is the fact that every foreign nation has a farm problem of its own. Every wheat importing nation is trying to stimulate its own production and to increase its own independence of imports. Consequently many of them already have an anti-dumping law.

By these laws, whenever any nation attempts to sell, in the market of another, any commodity at a price less than it is sold for at home, a tariff equal to the difference in selling prices becomes immediately effective. Thus would a debenture or equalization fee be immediately checkmated. In some cases the penalty is even more drastic. This is the final and insuperable obstacle to any scheme of subsidy which contemplates dumping the surplus at a price lower than the crop sells for in the home market.

We Protect Ours

We in the United States properly protect our own markets and our own producers from the demoralization of foreign dumping by just such a law. What would our American wheat farmers say if Argentina or Canada attempted to dump on our markets at prices lower than they accepted at home? Even if there were no anti-dumping laws, all schemes which are based on dumping the surplus at a loss, and making the loss back on domestic sales are fatally defective. The equalization fee plan and the debenture plan are, at bottom, subsidies. The only legitimate object of a subsidy is to increase production, and greater production is the inevitable result. But we are already overproducing. That is the cause of our distress. To stimulate more production by subsidies of any kind, or under any name means a larger surplus, a further depression of the price and increased distress at home.

Cure Not Overproduction

I can understand how a man might be such a glutton as to be happy in "digging his own grave with his teeth." I can see how an occasional honey bee might become so intrigued by the sweetness or the stickiness of its own product as to fall bodily into the mass and be "embalmed in its own honey." The spectacle of farmers working from daylight till dark and increasing their expenses in order to create a vast surplus in which to inter themselves and their families would be easy to understand if it occurred only occasionally. But it is a matter of annual recurrence. Each year the mountainous surplus is piled higher. Each year the depression goes lower. It is time we understand that the cure for overproduction is not more production.

Proponents of the equalization fee and of the debenture argue that these are devices for equalizing tariff benefits. The underlying objective of the tariff is to protect the home market for home producers, to keep our own people employed and to avoid measuring American standards of living against those of other nations.

Agriculture has the opportunity to obtain tariff benefits. The government cannot and does not attempt to force tariff benefits upon any industry. All it can do is to provide the rate of duty. It is then the province of each industry to accept or to decline the protection. If its production is less than the domestic market, it can get the benefit of the tariff. If it elects to produce for and to sell on the world market, it loses the protection of the tariff. Witness the automobile industry. The tariff merely offers the protection—take it or leave it.

Agriculture No Exception

In all this agriculture is no exception. For wheat, we have a large measure of tariff protection offered us—42c per bushel. We are already over-expanded. We have over-produced, and we are over-producing. If we want the benefit of that 42c per bushel, all we have to do is to bring our production down to domestic needs. It is there for us—take it or leave it.

The answer to farm distress caused by over-production is not more production. More production means merely more problems, lower prices and greater disaster. Anything which stimulates production, call it equalization fee, debenture or what not means larger and larger surpluses coming more and more into competition with foreign surpluses, produced on cheap land by cheap labor. This is not tariff equalization. This is a cheap chimera of political promise which defeats its own ends. The only answer to over-production is less production, balancing our crops against market demands, producing only such an amount as we can sell at a price which covers cost of production plus a profit.

Another Objection

I hold another objection to both the equalization fee and the debenture. They are attempts to write political answers to economic questions. The problems of American agriculture are not political problems. The problems of the farm are economic, and if solved, will be solved in the realm of economics. After ten years of blind following political will-o-the-wisps, only to find ourselves bogged down at the end, it is high time that we forget political schemes and political remedies and meet plain economic problems on an economic basis.

True, the Federal Farm Board was created by political means—but it is designed to take farm problems out of the realm of politics and find solutions in the realm of practical economics. The board is designed to help American agriculture to help itself. True also, the tariff was enacted by political agencies, and it is the best tariff agriculture ever had. But agriculture does not have the full benefit of the tariff, and never will have unless agriculture brings itself within the protection which the tariff wall sets up. To get that protection agriculture must bring its production within the domestic requirement.

The Lord giveth and the Lord taketh away. So runs THE BOOK. The same power which can grant subsidies can take them away and leave the industry stranded. In controlling production agriculture has an economic remedy which is not only effective and certain, but one which cannot be repealed by any act of the legislature.

How? By regulating production of farm products to the limits of market demands. By balancing production and, therefore, supply against and within probable demand. By limiting acreage planted to such as will under normal conditions produce all the foods and fibers as are needed, plus a reasonable carry-over.

Averages Tell Story

But, someone objects, you cannot control production by controlling the acreage. The seasons, weather conditions, storms, insect pests, plant diseases, not the acreage, they say, control farm production. It is perfectly true that the production of any piece of land varies with the season. A forty acres of wheat may produce 1,000 bushels of wheat one year and 100 bushels the next. But that is local. Take down the statistics on crop production for the whole country and average the production per acre over 25 years. You will find the yield per acre for the whole country to be surprisingly uniform.

On wheat, for example, during the last 25 years, the average yield per acre has been 14.5 bushels. The highest yield was in 1915 at 17 bushels; the lowest in 1916 was 12.2 bushels—a variation above average of only 17 per cent and below average of only 13 per cent.

Have Accurate Knowledge

We now have a fairly accurate knowledge of market demands. We have also an average yield per acre which is substantially accurate. If the acreage be limited to such an area, as under normal conditions will bring production within the market demand, we shall be on a sound actuarial basis. A surplus due to favorable seasons would not be of ungovernable proportions. It could be carried over. In such a case the Federal Farm Board could render a real service.

Acreage is therefore the basis of any program for bringing agricultural production within the operation of the law of supply and demand.

Not only would the reduction of wheat acreage have a favorable effect upon next year's prices, but it would materially increase the price of this year's crop. When the country understands that the farmer is going through with a definite program of reduction, the market will be relieved of the continuing threat and there will come an immediate increase in the price of the present crop. Vigorous, co-operative action among farmers to decrease acreage for the coming year should increase the gross value of the present wheat crop by a sum much larger than the loss on the reduced acreage.

But you say, shall we abandon scientific methods, scrap our machinery and let our lands lie idle while interest and taxes eat them up? Certainly not. Let us not forget that scientific principles and mechanical farming should apply to the method and the per acre cost of production. By limiting acreage it is possible to use the best methods and also to regulate the size of the crop. Let us produce what is necessary as cheaply as possible, but let us limit the amount of that production to the market needs. Profit, not surplus products, will determine prosperity. Interest and expenses are met out of surplus profit, not out of surplus production. Profit, not quantity of crop, determines the standard of living, and supports civic enterprises.

If One Man Owned

If all the wheat land in America were owned by one man, the problem would be absurdly easy. That man would plan his production. He would limit his crop to the amount which the market needs. He would reduce his acreage. He would by no means abandon scientific methods or the use of machinery. He would produce wheat as cheaply as possible but he would hold the volume of production down until the market catches up; until his wheat could be sold at a price which would pay him a profit.

Of course, the American wheat acreage will never be owned by any one man. But the problem is the same as if it were. And the solution is the same. The millions of American farmers who do own the wheat lands have the same reason for applying that solution. That is, they have the same reason as the one man would have, except that their reason is multiplied by the needs of the millions of farm families.

Those millions of families are now engaged in destructive competition with each other. Each is engaged, by his surplus production, in beating down the price of the commodity for all. Each family strikes something off of the living standards, the educational opportunities and the welfare of every other. Yet they are not enemies. They are neighbors and friends, having the same interests, the same ambitions, the same rights to an American opportunity and an American standard of living.

National Grain Corp.

(*Continued from page 10*)

very large business. Large quantities of soft red winter wheat were handled by the St. Louis and Indianapolis branch offices.

"On the early crop movement in the Pacific Northwest and in the Intermountain territory we are handling a very fair share of the wheat marketed," says a late report from the National Co-Operative. "Movement in the spring wheat territory, just starting, finds the corporation's St. Paul office, with branches at Minneapolis and Duluth, and Great Falls, Mont., well organized to handle all grain members offer for sale in those markets.

Exports Good

"Export business continues good, the corporation handling wheat direct from member co-operatives to millers and other buyers in foreign countries.

"Memberships are maintained in boards of trade and exchanges on the principal markets, and unsold stocks are being fully protected by hedges. Our main hedging office in Chicago, in charge of William C. Engel, is glad to co-operate with members at all times.

"The Grain Stabilization Corporation is co-operating with the Farmers' National Grain Corporation in every way. The large stocks of wheat owned by the Stabilization Corporation, withheld from the market under the corporation's previously announced policy, have been so handled and stored as to keep them out of the way of the new crop movement. The result has been than in the southwest, where the wheat movement now has passed its peak, there has been less congestion than usual and members have experienced no serious difficulty in having their grain promptly handled, whether they wished it stored or sold.

"There has been practically no congestion at seaboard or gulf ports, quite in contrast to conditions prevailing a year ago, when neither of the corporations was in operation.

St. Louis Consumers' Commission Reports

Presents Interesting Analysis of Milk Situation at That Market

A STRIKING picture of the St. Louis milk market, and conditions surrounding the production and marketing of milk, is presented in the report of the Consumers' Milk Commission of St. Louis released on August 6. The report signed by Mrs. George Gellhorn, Mrs. W. W. Burke and Mrs. Virgil Loeb, chairman, all prominent in local club circles, is an intelligent analysis arrived at after careful investigation.

A few large firms distributing 85 per cent of the milk consumed in St. Louis, with nearly 40 smaller dairies distributing the other 15 per cent; and out in the country some 12,000 farmers, each with a few cows, each disposing separately of his milk at the price offered him, is the picture drawn by the commission. "These farmers," states the report, "usually operate farms on which dairying is a side line. They are scattered through nearly 20 counties of Missouri and Illinois, some of them nearly 150 miles from the city.

Unregulated Production

"Time-honored methods still in use by many farmers result in an oversupply of milk at certain periods which in turn has a tendency to reduce the price paid for the product. The amount of time and labor necessary to produce this milk is enormous and the laborers include the farmer, his wife and his children. Cleanliness, according to modern standards for milk, takes time and also demands improvements which many of the farmers have not had the money to obtain.

"The individual farmer feels himself at a disadvantage, not only in the matter of price, but also in lack of knowledge of market information, of credit ratings of distributors, and in checking the weights and testing of the farmer's product which heretofore have been entirely in the hands of the dealers.

Dealers Satisfied

"The distributors, on the other hand, have appeared generally satisfied with conditions as they are, with only an occasional doubt in regard to the situation. Prices paid to the producer have been the same throughout the market, set apparently by common consent of the large dealers and accepted by the smaller. Though their past experience of dealing with producers in groups has not been satisfactory they seem to have no qualms as to the wisdom of extending the milk shed when it was to their advantage to obtain milk from more distant sources.

"The commission felt not only that the consumer was entitled to good milk of high quality at a fair price but also that consumers desired this situation under conditions that brought no hardship to any one concerned. It felt that the interest of the public in an article so important to the health of the consumer is most essential, therefore, the public should be represented in conferences dealing with milk."

Can Increase Use

The commission draws attention to the fact that the per capita consumption of milk in St. Louis is lower than in other cities and that with quality improvement and judicious advertising people would consume more healthful dairy products. The commission gives its unqualified endorsement to the plan of collective bargaining as a fair method of establishing a price acceptable to producer, dealer and consumer. It recommends a plan to secure more even production of milk throughout the year and suggests that responsibility for this goal rests with the farmer.

The commission's report cites testimony of individual farmers revealing that many are receiving no profit from their milk while others are losing money. **"The commission is convinced that the producer should receive more money for his product,"** states the report, **"but is not convinced that the increase should be made through higher prices to the consumer."**

Four Conferences

During the course of the investigation, four conferences lasting from six to eight hours each were held. Producers, dealers and consumers were represented. The plan as outlined elsewhere in this issue was finally adopted.

Commenting on the agreement between the producers and distributors which is similar to the base and surplus plan followed at Chicago, Pittsburgh and other large markets, the Consumers' Commission said the agreement has been accepted by the larger dealers with the sole exception of the Pevely Dairy Company, and its acceptance by the smaller dairies is confidently expected. "If the Pevely Dairy Company does not co-operate with the other dealers, producers and consumers in establishing the National Dairy Council, its non-participation in this quality dairy program will put it in a rather indefensible position. It has been the experience in other cities that sometimes one larger dealer has taken longer than the others to see the value of such a plan as is here imposed, but this fact has not impaired the plan in other cities nor will it delay its successful working out in St. Louis.

A New Era

"The commission believes that the agreement means the beginning of a new era of good will between the distributors and producers in the St. Louis milk shed and that it will be a benefit to all parties concerned. To the producers it represents an opportunity to realize their aims; to the distributor it represents an opportunity for a stabilized market and reduction of surplus; and the consumer, who pays the 13c for a quart of milk is given a voice in its just distribution. To the community as a whole it means an improved milk supply with St. Louis taking its place among other cities of the country in the establishment of an equitable and orderly marketing plan. The Consumers' Mlik Commission has a continuing responsibility in seeing that this plan is carried out which it accepts as a duty and privilege."

Jas. C. Stone

S. H. Thompson

JAMES C. STONE, vice-chairman of the Federal Farm Board and formerly manager of the Burley Tobacco Growers' Association of Kentucky, has been engaged for two speaking dates at Farm Bureau district picnics to be held at Monmouth on August 29 and at Jacksonville on August 30.

Sam Thompson, president of the American Farm Bureau Federation, will be the speaker at the 19th district picnic to be held in Crystal Lake Park, Urbana, Champaign county, August 27. Secretary M. S. Winder of the A. F. B. F. spoke at the 25th district picnic, Sparta, on August 14.

President Earl C. Smith, who is convalescing in a private hospital in Chicago following an operation, has been forced to cancel all his picnic speaking dates. These have been assigned to Secretary Metzger and other members of the I. A. A. staff.

Thos. H. Roberts, for more than seven years adviser in DeKalb county, resigned some time ago to manage a canning factory at Sycamore.

St. Louis Milk Plan Is Finally Adopted

Agreement Between Dealers and Producers Calls for Base and Surplus Rating, Get Fairer Price

RECOGNITION by the dealers on the St. Louis milk market of the producers' right to bargain for a fair price and better market conditions was obtained following a recent conference in which producers, distributors and consumers were represented in St. Louis.

The victory culminated successful efforts by the producers during the last eleven and one-half months to organize the bargaining association, Sanitary Milk Producers, and so gain representation on the market.

As a result of the recent conference the dealers agreed to a gradual increase in price, endorsed the base rating plan by which each farmer carries his own burden of surplus, and agreed to check testing by representatives of the dairymen.

Milk $2.43 Per Cwt.

Under the new arrangement all milk delivered during August will be paid for at the rate of $1.90 per cwt. But beginning September 1 the price will be $2.10 per cwt., then for the next three months, namely, October, November, December, the base price to be paid for all fluid sales will be $2.43 gross from which a slight deduction will be made to pay the 3 cent check-off to the co-operative association and for the quality improvement fund.

Each producer's base amount for 1931 will be the average production of his herd in the six months ending December 31, 1930. The Sanitary Milk Producers will receive a 3 cent per cwt. check-off on all members' milk. Under the terms of the agreement a non-member may not get more for his milk net than the member receives after the latter has paid his check-off. It was agreed to promote a joint quality improvement campaign throughout the area in co-operation with the National Dairy Council. A unit of the council will be formed at St. Louis in the near future.

1c for Quality Improvement

The important work designed to give the city of St. Louis the highest quality milk of any city in the country will be financed by a contribution of 1 cent per cwt. by the producers which is to be matched by a similar contribution from the dealers. Non-members will have deducted 2 cents per cwt. for the quality improvement campaign.

"This money will be spent by the dairy industry at St. Louis," said A. D. Lynch, I. A. A. Dairy Marketing director, in explaining the project. "St. Louis has a good milk supply at the present time, but it can be greatly improved. We want to give the consumer as good or better milk than any received on any market in America. After we have raised the standard of our product to the highest possible level we intend to carry on a joint campaign to increase sales. The people of St. Louis are not consuming enough dairy products per capita. An increase of 10 per cent in consumption within two years is probable and a 20 per cent increase in the next few years is not impossible. The first job is to see that our product is the purest and the best that can be produced, our next job is to merchandise it and advertise its superiority as a food."

Advisory Committee

A joint advisory committee composed of three producers, three dealers and three consumers has been appointed to hear grievances brought by any representative in the name of the three groups.

The Sanitary Milk Producers with a present membership of 6,600 obtained during the past eleven and one-half months set a new pace in co-operative milk marketing development. Never before has an organization been so well developed and recognition obtained in so short a time. While the Pevely Dairy Company, one of the largest dealers on the market, has not yet approved all the provisions of the marketing plan, it is confidently believed that it will co-operate for the welfare of all when it fully understands everything involved.

Open New Offices

The Sanitary Milk Producers will occupy offices in the Railway Exchange Building in St. Louis. President E. W. Tiedemann who, in co-operation with the Farm Bureau directors, has been directing organization work during the past year, has been named organization manager. Other officers of the collective bargaining association are Martin Ehmler, Orchard Farm, Missouri, vice-president; E. H. Isenberg, Edwardsville, Illinois, secretary, and G. R. Pearce, Jerseyville, treasurer.

At Insurance Convention

"Are Multiple Lines Desirable in Mutual Insurance Companies" is the subject of an address delivered before the National Association of Mutual Insurance Companies in the annual meeting at Los Angeles, Cal., on Aug. 19 by J. H. Kelker, active manager of the Farmers' Mutual Reinsurance Co.

V. Vaniman, director of service for the I. A. A., is attending the meeting, while on vacation, in an unofficial capacity.

Lynch Takes Job with Sanitary Producers

To Manage Milk Co-Operative Representing St. Louis Dairymen

A. D. LYNCH, director of dairy marketing for the Illinois Agricultural Association since 1922, resigned last week to become general manager of the Sanitary Milk Producers, co-operative producers' organization at St. Louis. Mr. Lynch contemplates assuming his new duties with the dairymen's organization around Oct. 1.

Mr. Lynch, a graduate of the South Dakota State Agricultural College, left the management of a successful creamery in the State of Vermont to become assistant to Prof. Chris Larsen, dairy marketing director for the I. A. A. from 1920-1922. When Prof. Larsen accepted the post as dean of the Agricultural College in South Dakota, Lynch was promoted to his place.

A. D. Lynch

Helped Producers

During the past seven years Mr. Lynch has made a notable record co-operating with the Farm Bureaus in organizing the milk and butterfat producers of Illinois into co-operative associations to give them a measure of bargaining power and a voice in the sale of their products.

In addition to the early produce marketing associations, Director Lynch laid the ground work and assisted throughout the development in most cases of milk and dairy co-operatives at Quincy, Peoria, Chicago, St. Louis, Bloomington, Decatur, DeKalb, Rock Island, Freeport, Springfield, and other points. Several successful co-operative creameries in northwestern Illinois were assisted in their early stages of development and during recent years Mr. Lynch has given considerable time in an advisory capacity to the producers' organization at Peoria, Bloomington, Champaign and Decatur.

Action regarding Mr. Lynch's resignation awaits the next meeting of the I. A. A. board of directors.

I. A. A. Board to Elect Director for 24th Dist.

Method of Filling Vacancies Explained in Statement by Kirkpatrick

THE vacancy in the board of directors of the I. A. A. caused by the death of Chas. L. Scott of Grayville has aroused much interest over the state in the method provided by the constitution and by-laws filling such a vacancy.

An opinion submitted to the directors by Donald Kirkpatrick, legal counsel, at their last meeting advises as follows:

"Section 6 of Article II of the by-laws of Illinois Agricultural Association provides that the board of directors shall elect a successor qualified to hold office for the unexpired term of office of the director. This section further provides that in the selection of a director by the board to fill a vacancy, the selection shall be made from members residing in the district, and that the board of directors in making such selection shall give preference to the informal nominations solicited from the delegates representing the members in the congressional district.

"I am of the opinion that the board of directors should take action at its next meeting authorizing and directing the secretary of the association to solicit nominations of persons qualified from the several delegates in the district. After selection has been made from the delegates within the district for informal nominations, and after reasonable opportunity has been given to such delegates to respond to such informal nominations, the board of directors should proceed to the election of a member to fill the vacancy.

"The board can select a member from the informal nominations made by the delegates or elect from among other persons qualified to act as a member of your board. The selection of a member from the informal nominations is not mandatory but should, in my opinion, be carefully considered and selection made therefrom as a matter of good administrative policy."

On motion duly made by Mr. Wright, seconded by Mr. Black, it was unanimously moved at the July 22 meeting of the board "That the secretary of the Association be authorized and directed to carry out the provisions of Section 6 of Article II of the By-Laws of the Association in filling the vacancy in the board of directors, created by the death of Mr. Charles L. Scott."

In the meantime representatives of the counties in the 24th congressional district had held a meeting at Carmi and selected W. A. Grant of Harrisburg to represent the district at I. A. A. board meetings in an informal capacity until a successor to the late Mr. Scott is legally elected. Mr. Grant attended the board meeting on July 22, and was invited to be present at the August meeting pending the election of a successor.

IN MEMORIAM

NEWS of the untimely death of Charles L. Scott, director on the I. A. A. board from the 24th district, who passed away at his home in Edwards county the morning of July 15, was received with great sorrow at the I. A. A. offices in Chicago, and by Farm Bureau members throughout sections where Mr. Scott was well known.

For years Charles L. Scott has been identified prominently with the Farm Bureau movement in southeastern Illinois. He was an outstanding leader in his community, a former member of the state legislature, was a charter member of the Edwards County Farm Bureau, and for years was on its executive committee.

Chas. L. Scott

Mr. Scott was a grain farmer and for the past five years represented Illinois wheat growers on the board of directors of the Central States Soft Wheat Growers' Association with headquarters at Indianapolis. He served as president of the association for one year, and more recently was vice-president the Central States Grain Elevator Corporation.

The heat accompanied by overexertion during the harvest season and a chronic, internal disorder are thought to have been the cause of Mr. Scott's sudden passing on.

W. L. Cope of Salem and Fred Dietz of De Soto represented the I. A. A. at the funeral on July 17.

At its regular meeting in Chicago on July 22, the Board of Directors passed the following resolution:

"WHEREAS, In the death of Charles L. Scott, a member of the board of directors of the Illinois Agricultural Association, there has been lost to the state and to his community one of its foremost citizens, a man of keen intellect, of genial personality, a builder of constructive force, and a counsellor of wisdom, now, therefore, be it

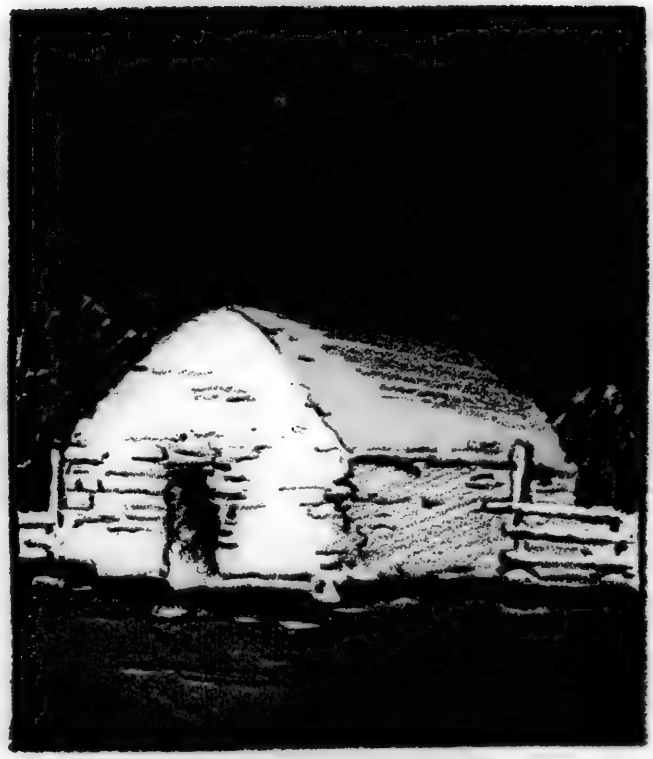
"RESOLVED, That the board of directors of the Illinois Agricultural Association, being deeply sensible of the loss thus sustained, shall and it hereby does note in its records its tribute to the life and worth of Mr. Charles L. Scott, and its appreciation of his noble character and the eminent services he has rendered to his country and to humanity; and be it further

"RESOLVED, That a copy of this resolution be tendered to his bereaved family and that a copy be spread on the minutes of this meeting of the board of directors."

Advisers Move

MALCOLM H. WATSON, county adviser in Kendall county, recently resigned to go into the oil business in the state of Colorado. His successor is W. P. Miller, formerly farm adviser in Brown county. Miller began work in Kendall county August 1.

E. A. Carncross, farm adviser for the past eight years in DuPage county, where he made an excellent record of accomplishment, recently resigned to become general agent to handle the various Farm Bureau insurance services in Cook county.



O. L. Welch of Sciota, McDonough County Farm Bureau, has been employed to succeed J. H. Lloyd as farm adviser in Hancock county.

Mr. Welch graduated from the University of Illinois in 1922, and since that time has operated a 320-acre grain and live stock farm about a mile north of Sciota. He has been a leader in many community enterprises. He will begin work about Sept. 1.

"I am of the opinion that the board of directors should take action at its next meeting authorizing and directing the secretary of the association to solicit nominations of persons qualified from the several delegates in the district. After selection has been made from the delegates within the district for informal nominations, and after reasonable opportunity has been given to such delegates to respond to such informal nominations, the board of directors should proceed to the election of a member to fill the vacancy.

"The board can select a member from the informal nominations made by the delegates or elect from among other persons qualified to act as a member of your board. The selection of a member from the informal nominations is not mandatory but should, in my opinion, be carefully considered and selection made therefrom as a matter of good administrative policy."

On motion duly made by Mr. Wright, seconded by Mr. Black, it was unanimously moved at the July 22 meeting of the board "That the secretary of the Association be authorized and directed to carry out the provisions of Section 6 of Article II of the By-Laws of the Association in filling the vacancy in the board of directors, created by the death of Mr. Charles L. Scott."

In the meantime representatives of the counties in the 24th congressional district had held a meeting at Carmi and selected W. A. Grant of Harrisburg to represent the district at I. A. A. board meetings in an informal capacity until a successor to the late Mr. Scott is legally elected. Mr. Grant attended the board meeting on July 22, and was invited to be present at the August meeting pending the election of a successor.

IN MEMORIAM

NEWS of the untimely death of Charles L. Scott, director on the I. A. A. board from the 24th district, who passed away at his home in Edwards county the morning of July 15, was received with great sorrow at the I. A. A. offices in Chicago, and by Farm Bureau members throughout sections where Mr. Scott was well known.

For years Charles L. Scott has been identified prominently with the Farm Bureau movement in southeastern Illinois. He was an outstanding leader in his community, a former member of the state legislature, was a charter member of the Edwards County Farm Bureau, and for years was on its executive committee.

Chas. L. Scott

Mr. Scott was a grain farmer and for the past five years represented Illinois wheat growers on the board of directors of the Central States Soft Wheat Growers' Association with headquarters at Indianapolis. He served as president of the association for one year, and more recently was vice-president the Central States Grain Elevator Corporation.

The heat accompanied by overexertion during the harvest season and a chronic, internal disorder are thought to have been the cause of Mr. Scott's sudden passing on.

W. L. Cope of Salem and Fred Dietz of De Soto represented the I. A. A. at the funeral on July 17.

At its regular meeting in Chicago on July 22, the Board of Directors passed the following resolution:

"WHEREAS, In the death of Charles L. Scott, a member of the board of directors of the Illinois Agricultural Association, there has been lost to the state and to his community one of its foremost citizens, a man of keen intellect, of genial personality, a builder of constructive force, and a counsellor of wisdom, now, therefore, be it

"RESOLVED, That the board of directors of the Illinois Agricultural Association, being deeply sensible of the loss thus sustained, shall and it hereby does note in its records its tribute to the life and worth of Mr. Charles L. Scott, and its appreciation of his noble character and the eminent services he has rendered to his country and to humanity; and be it further

"RESOLVED, That a copy of this resolution be tendered to his bereaved family and that a copy be spread on the minutes of this meeting of the board of directors."

Advisers Move

MALCOLM H. WATSON, county adviser in Kendall county, recently resigned to go into the oil business in the state of Colorado. His successor is W. P. Miller, formerly farm adviser in Brown county. Miller began work in Kendall county August 1.

E. A. Carncross, farm adviser for the past eight years in DuPage county, where he made an excellent record of accomplishment, recently resigned to become general agent to handle the various Farm Bureau insurance services in Cook county.

O. L. Welch of Sciota, McDonough County Farm Bureau, has been employed to succeed J. H. Lloyd as farm adviser in Hancock county.

Mr. Welch graduated from the University of Illinois in 1922, and since that time has operated a 320-acre grain and live stock farm about a mile north of Sciota. He has been a leader in many community enterprises. He will begin work about Sept. 1.

I. A. A. States Stand on Revenue Amendment

A Statement of Position Relative to the Proposed Amendment to the Revenue Article of the State Constitution, Adopted by the Board of Directors, Illinois Agricultural Association Sept. 12, 1930.

AFTER carefully considering all available information about the revenue amendment and its probable effect, if adopted, the board of directors of the Illinois Agricultural Association herewith presents a statement setting forth its position and recommendation to the membership.

The amendment is greatly changed from the carefully considered provisions recommended by the Revenue Investigation Commission which were endorsed, in spirit and purpose, by several state-wide organizations, including the I. A. A. Most of the changes were brought about by amendments introduced and urged by Chicago legislators. With no time adequately to consider the probable effect of such changes, they were accepted by most of the legislators from down-state districts in the belief that otherwise no amendment could secure the two-thirds vote necessary for submission.

The proposed amendment would not, of itself, set up any new system of revenue. It would remove certain restrictions now imposed on the General Assembly, and would impose some new restrictions. The most important proposed changes are analyzed below to show not only what they would permit or would not permit, but also their probable effect on the revenue system of the state.

Classification of Property

Adoption of the amendment would give the General Assembly full power to classify property except that all real estate other than mineral lands and land devoted to reforestation would be kept in one class. Such power to classify property could be used in either or both of two ways. First, any class or all classes of property could be exempted from taxation on the basis of value in order to impose taxes on some other basis such as income. The Illinois Agricultural Association has long been in favor of using classification in this way. Or, second, property could be divided into different classes, with different standards of value or different tax rates, or both.

READ carefully the analysis of the Proposed Revenue Amendment in the column to the left. It will help you to vote intelligently in the coming November election.

If the amendment is adopted, there can be no doubt that the General Assembly will be strongly urged to classify intangible property separately in order to tax it on its value at low rates. In other states, the taxation of intangibles, such as stocks, bonds, notes, mortgages and money, at low rates, usually between one-fourth and one-tenth of the rate applied to real estate, has never prevented extensive evasion or produced more than a very small percentage of the total revenues. There is no reason to believe that it would be administered with any greater success in this state, where at least one-half of the households, most of them in Cook County, completely evade taxation not only of intangible but even of tangible personal property. The Illinois Agricultural Association has long opposed this use of classification. Low-rate taxation of intangibles would not save real estate from increasingly confiscatory taxes.

Distribution of State Taxes

Adoption of the amendment would remove the present restriction which prevents the General Assembly from imposing any taxes upon municipal corporations (by which is meant any taxing districts except the state), or the inhabitants or property thereof, for the

Needs of Agriculture Cited by Sam Thompson

Speaks at 19th District Picnic, Urbana, Aug. 27

BARGAINING power in the sale of farm commodities, credit at lower rates, tax equalization, and lower cost production were cited as outstanding needs of the American farmer by Sam H. Thompson, president of the American Farm Bureau Federation, in addressing the 19th district Farm Bureau picnic at Urbana on August 27. A large audience estimated at 3,000 to 5,000 gathered in Crystal Lake Park to hear the speaker.

"Other groups have succeeded much better than the farmer in passing on their increased expenses of doing business to the consumer," said Mr. Thompson. "The cost of doing business has increased tremendously in the last 25 years, and all this has been reflected in the prices farmers must pay for the things they need. The farmer's costs of production also have increased during this period. But we have not been successful in adding that increased cost to the price of our products. Our only hope for doing so, in obtaining a reasonable profit on our production lies in organization."

Home Ownership Costly

Mr. Thompson referred to the president's recent conference on home ownership. "Home ownership," he said, "is constantly decreasing. We are becoming a nation of renters both on the farm and in the city. Obviously this is a bad thing for our civilization, and the cause is largely due to our antiquated taxing system. One of our great national needs is a better plan for distributing the tax burden among all the people." It was revealed at the president's conference on home ownership that people who buy homes today are paying an average of more than 8 per cent for the money borrowed to acquire them.

This automobile was parked on a busy city street when it caught fire. The local fire department came on the run tying up traffic for more than an hour.

I. A. A. States Stand on Revenue Amendment

A Statement of Position Relative to the Proposed Amendment to the Revenue Article of the State Constitution, Adopted by the Board of Directors, Illinois Agricultural Association Sept. 12, 1930.

AFTER carefully considering all available information about the revenue amendment and its probable effect, if adopted, the board of directors of the Illinois Agricultural Association herewith presents a statement setting forth its position and recommendation to the membership.

The amendment is greatly changed from the carefully considered provisions recommended by the Revenue Investigation Commission which were endorsed, in spirit and purpose, by several state-wide organizations, including the I. A. A. Most of the changes were brought about by amendments introduced and urged by Chicago legislators. With no time adequately to consider the probable effect of such changes, they were accepted by most of the legislators from down-state districts in the belief that otherwise no amendment could secure the two-thirds vote necessary for submission.

The proposed amendment would not, of itself, set up any new system of revenue. It would remove certain restrictions now imposed on the General Assembly, and would impose some new restrictions. The most important proposed changes are analyzed below to show not only what they would permit or would not permit, but also their probable effect on the revenue system of the state.

Classification of Property

Adoption of the amendment would give the General Assembly full power to classify property except that all real estate other than mineral lands and land devoted to reforestation would be kept in one class. Such power to classify property could be used in either or both of two ways. First, any class or all classes of property could be exempted from taxation on the basis of value in order to impose taxes on some other basis such as income. The Illinois Agricultural Association has long been in favor of using classification in this way. Or, second, property could be divided into different classes, with different standards of value or different tax rates, or both.

READ carefully the analysis of the Proposed Revenue Amendment in the column to the left. It will help you to vote intelligently in the coming November election.

If the amendment is adopted, there can be no doubt that the General Assembly will be strongly urged to classify intangible property separately in order to tax it or its value at low rates. In other states, the taxation of intangibles, such as stocks, bonds, notes, mortgages and money, at low rates, usually between one-fourth and one-tenth of the rate applied to real estate, has never prevented extensive evasion or produced more than a very small percentage of the total revenues. There is no reason to believe that it would be administered with any greater success in this state, where at least one-half of the households, most of them in Cook County, completely evade taxation not only of intangible but even of tangible personal property. The Illinois Agricultural Association has long opposed this use of classification. Low-rate taxation of intangibles would not save real estate from increasingly confiscatory taxes.

Distribution of State Taxes

Adoption of the amendment would remove the present restriction which prevents the General Assembly from imposing any taxes upon municipal corporations (by which is meant any taxing districts except the state), or the inhabitants or property thereof, for the

Needs of Agriculture Cited by Sam Thompson

Speaks at 19th District Picnic, Urbana, Aug. 27

BARGAINING power in the sale of farm commodities, credit at lower rates, tax equalization, and lower cost production were cited as outstanding needs of the American farmer by Sam H. Thompson, president of the American Farm Bureau Federation, in addressing the 19th district Farm Bureau picnic at Urbana on August 27. A large audience estimated at 3,000 to 5,000 gathered in Crystal Lake Park to hear the speaker.

"Other groups have succeeded much better than the farmer in passing on their increased expenses of doing business to the consumer," said Mr. Thompson. "The cost of doing business has increased tremendously in the last 25 years, and all this has been reflected in the prices farmers must pay for the things they need. The farmer's costs of production also have increased during this period. But we have not been successful in adding that increased cost to the price of our products. Our only hope for doing so, in obtaining a reasonable profit on our production lies in organization."

Home Ownership Costly

Mr. Thompson referred to the president's recent conference on home ownership. "Home ownership," he said, "is constantly decreasing. We are becoming a nation of renters both on the farm and in the city. Obviously this is a bad thing for our civilization, and the cause is largely due to our antiquated taxing system. One of our great national needs is a better plan for distributing the tax burden among all the people." It was revealed at the president's conference on home ownership that people who buy homes today are paying an average of more than 8 per cent for the money borrowed to acquire them.

POSTER EXHIBIT IN FARM BUREAU TENT, SPRINGFIELD

THE I. A. A. poster exhibit in the Farm Bureau headquarters tent at the Illinois State Fair, Springfield, was commented upon favorably by thousands who saw it during the week.

The posters shown above were prepared by an artist in four and five colors. They explain briefly the work of each department in the I. A. A. and of the associated companies. Accomplishments were set forth briefly so that the visitors could grasp quickly the various activities carried on by the organization.

The speaker pointed out that the State of New York has gone farther to help farmers with their road and school problems than any other. "Our rural educational system is not adequate," said Mr. Thompson. "The country is constantly giving up a large number of young men and women to the cities. These boys and girls are educated at the expense of the farmer, although after leaving the rural communities they do nothing to contribute toward the maintenance of the schools that educated them. Millions of farm boys and girls are being trained in rural communities where values and taxable income are constantly decreasing. It is not possible to levy a high enough tax in many rural communities to give farm boys and girls an adequate education. Public education is not a local problem, it is a national one." He declared that there is a growing need for a national fund to help struggling rural schools.

Too Much "Service"

How we have been building up a complicated system of costly service between the consumer and producer was another subject discussed. "When I was a boy," said Thompson, "we went to the local shoemaker and paid him $3.50 to make a pair of shoes. The cobbler was paid oftentimes in chickens and eggs. Now the system has been entirely changed. Shoes are made in factories, handled first by the wholesaler or jobber, and then by the retailer, each of whom adds his cost to every pair handled." Mr. Thompson then asserted that he had paid close to $25 in tips during the last 10 months for checking a hat which cost originally about $3.

To illustrate the declining taxable values in rural communities, the cases of two rural counties in Kentucky were cited. In 1920 the assessed valuation of one Kentucky county was $6,101,980. In 1930, ten years later, tax valuations in the same county had declined to $3,671,503. In another rural county in the same state, valuations for tax purposes declined from $5,338,280 in 1920 to $4,384,281 in 1930. Mr. Thompson expressed the belief that farmers have kept up their standard of living largely by eating into capital investments during the last 10 years.

4-H Club Calves Sell Well at Chicago

RECENT sales of 4-H club calves sponsored by the International Live Stock Exposition reached a top of $13.25 on September 3.

The top price was paid by Armour & Company for two steers from Bureau county, Illinois— a 1,010 pound Hereford fed by Lovilla Herlean of Princeton, and a 950 pound Shorthorn fed by Clarence Betting of Buda.

A consignment of 12 calves from DeKalb county brought the highest average price of any lot at $12.55 per cwt. Thirty-nine calves from Knox county averaged 923 pounds in weight and $12.39 per cwt. in price. Bureau county had 51 calves averaging 883 pounds and $12.30 per cwt., while Iroquois county had 52 averaging 854 pounds at $12.15 per cwt.

Bring $13

The top price of $13 at the August 27 auction was paid by Swift & Company and Wilson & Company on two calves from Sangamon county, Ill. Fred Paffenberger of Rochester sold a 1,031 pound Angus to Swift & Company, and Glen Cofer of Williamsville sold a 910 pound Shorthorn to Wilson & Company at that figure.

The 43 calves from Sangamon averaged 914 pounds in weight; and $12.18 per cwt. in price. Macon county, Ill., had four head averaging 1,000 pounds at $12.51 per cwt., while McLean county sold four head averaging 793 pounds in weight and $12.55 per cwt.

Col. Carey M. Jones auctioned off the calves on each occasion. These auctions offer an unusual opportunity to study the relative values of different grades of cattle, and the International invites visitors to be present any Tuesday afternoon at 2 o'clock at the U. S. Yards, Chicago, until the middle of October.

Reduced Rates Apply In So. Illinois Area

EMERGENCY freight rates on live stock and feed, hay and straw when used for feeding purposes, have been published for the southern Illinois drouth area.

The new freight tariffs are effective in the following Illinois counties: Alexander, Clay, Crawford, Edwards, Fayette, Franklin, Gallatin, Hamilton, Hardin, Jackson, Jefferson, Jersey, Johnson, Lawrence, Madison, Marion, Massac, Monroe, Perry, Pope, Pulaski, Randolph, Richland, St. Clair, Saline, Union, Wabash, Washington, Wayne, White and Williamson.

The rates apply on live stock, feed, hay, straw and water from various points when shipped to the drouth areas and are on the basis of one-half of the regular tariff rates. The half rate will also apply on live stock shipped from the drouth areas to feeding points but not to markets or to public feed lots. See your county adviser to get the advantage of the lower rates.

Uncle Ab says that to keep from crying over spilled ink, don't spill it from the point of a pen.

The Proposed Revenue Amendment

The proposed revenue amendment adopted by the last General Assembly includes revisions of Sections 1, 2, 9 and 10 of Article IX of the State Constitution. The present sections and the amended sections are published side by side below. The proposed amendments will be submitted to the voters at the general election November 4, 1930.—Editor.

Present Section 1

Sec. 1. The General Assembly shall provide such revenue as may be needful by levying a tax, by valuation, so that every person and corporation shall pay a tax in proportion to the value of his, her or its property—such value to be ascertained by some person or persons to be elected or appointed in such manner as the General Assembly shall direct, and not otherwise: but the General Assembly shall have power to tax peddlers, auctioneers, brokers, hawkers, merchants, commission merchants, showmen, jugglers, innkeepers, grocery-keepers, liquor dealers, toll-bridges, ferries, insurance, telegraph and express interests or business, venders of patents and persons or corporations owning or using franchises and privileges, in such manner as it shall from time to time direct by general law, uniform as to the class upon which it operates.

Amended Section 1

Sec. 1. The General Assembly shall have power to enact laws to provide revenue. All real estate for the purpose of imposition of taxes shall be in one class, except that mineral lands and land devoted to reforestation may be in different classes.

Present Section 2

Sec. 2. The specification of the objects and subjects of taxation shall not deprive the General Assembly of the power to require other subjects or objects to be taxed, in such manner as may be consistent with the principles of taxation fixed in this constitution.

Amended Section 2

Sec. 2. If a tax is imposed on incomes the state shall not receive more than 15 per centum of the proceeds thereof after deducting the cost of collection except by the affirmative votes of two-thirds of the members elected to each house of the General Assembly. And unless otherwise provided by a similar two-thirds vote the remainder shall be distributed among the several counties in the ratio which the total collected from taxpayers of each county bears to the total collected from taxpayers of the whole state, and the amount allocated to each county may be further divided among the county and other municipal corporations within or partly within such county as the General Assembly may from time to time by general law direct. Other taxes collected by the state may be distributed in whole or in part among the counties and other municipal corporations in such manner as the General Assembly shall direct by general law.

Present Section 9

Sec. 9. The General Assembly may vest the corporate authorities of cities, towns, and villages with power to make local improvements by special assessment or by special taxation of contiguous property or otherwise. For all other corporate purposes, all municipal corporations may be vested with authority to assess and collect taxes, but such taxes shall be uniform in respect to persons and property within the jurisdiction of the body imposing the same.

Amended Section 9

Sec. 9. The General Assembly may vest the corporate authorities of cities, towns, villages, sanitary districts, park districts and other municipalities with power to make local improvements by special assessments or by special taxation of contiguous property, or otherwise. For all other corporate purposes, all municipal corporations may be vested with authority to assess and collect taxes.

Present Section 10

Sec. 10. The General Assembly shall not impose taxes upon municipal corporations, or the inhabitants or property thereof, for corporate purposes, but shall require that all the taxable property within the limits of municipal corporations shall be taxed for the payment of debts contracted under authority of law, such taxes to be uniform in respect to persons and property within the jurisdiction of the body imposing the same. Private property shall not be liable to be taken or sold for the payment of the corporate debts of a municipal corporation.

Amended Section 10

Sec. 10. Except as permitted in Section 2 the General Assembly shall not impose taxes upon municipal corporations or the inhabitants or property thereof for corporate purposes, but shall require that taxes be levied by municipal corporations for the payment of debts contracted under authority of law. Private property shall not be liable to be taken or sold for the payment of the corporate debts of a municipal corporation.

POSTER EXHIBIT IN FARM BUREAU TENT, SPRINGFIELD

THE I. A. A. poster exhibit in the Farm Bureau headquarters tent at the Illinois State Fair, Springfield, was commented upon favorably by thousands who saw it during the week.

The posters shown above were prepared by an artist in four and five colors. They explain briefly the work of each department in the I. A. A. and of the associated companies. Accomplishments were set forth briefly so that the visitors could grasp quickly the various activities carried on by the organization.

The speaker pointed out that the State of New York has gone farther to help farmers with their road and school problems than any other. "Our rural educational system is not adequate," said Mr. Thompson. "The country is constantly giving up a large number of young men and women to the cities. These boys and girls are educated at the expense of the farmer, although after leaving the rural communities they do nothing to contribute toward the maintenance of the schools that educated them. Millions of farm boys and girls are being trained in rural communities where values and taxable income are constantly decreasing. It is not possible to levy a high enough tax in many rural communities to give farm boys and girls an adequate education. Public education is not a local problem, it is a national one." He declared that there is a growing need for a national fund to help struggling rural schools.

Too Much "Service"

How we have been building up a complicated system of costly service between the consumer and producer was another subject discussed. "When I was a boy," said Thompson, "we went to the local shoemaker and paid him $3.50 to make a pair of shoes. The cobbler was paid oftentimes in chickens and eggs. Now the system has been entirely changed. Shoes are made in factories, handled first by the wholesaler or jobber, and then by the retailer, each of whom adds his cost to every pair handled." Mr. Thompson then asserted that he had paid close to $25 in tips during the last 10 months for checking a hat which cost originally about $3.

To illustrate the declining taxable values in rural communities, the cases of two rural counties in Kentucky were cited. In 1920 the assessed valuation of one Kentucky county was $6,101,980. In 1930, ten years later, tax valuations in the same county had declined to $3,671,503. In another rural county in the same state, valuations for tax purposes declined from $5,338,280 in 1920 to $4,384,281 in 1930. Mr. Thompson expressed the belief that farmers have kept up their standard of living largely by eating into capital investments during the last 10 years.

4-H Club Calves Sell Well at Chicago

RECENT sales of 4-H club calves sponsored by the International Live Stock Exposition reached a top of $13.25 on September 3.

The top price was paid by Armour & Company for two steers from Bureau county, Illinois— a 1,010 pound Hereford fed by Lovilla Herlean of Princeton, and a 950 pound Shorthorn fed by Clarence Betting of Buda.

A consignment of 12 calves from DeKalb county brought the highest average price of any lot at $12.55 per cwt. Thirty-nine calves from Knox county averaged 923 pounds in weight and $12.39 per cwt. in price. Bureau county had 51 calves averaging 883 pounds and $12.30 per cwt., while Iroquois county had 52 averaging 854 pounds at $12.15 per cwt.

Bring $13

The top price of $13 at the August 27 auction was paid by Swift & Company and Wilson & Company on two calves from Sangamon county, Ill. Fred Paffenberger of Rochester sold a 1,031 pound Angus to Swift & Company, and Glen Cofer of Williamsville sold a 910 pound Shorthorn to Wilson & Company at that figure.

The 43 calves from Sangamon averaged 914 pounds in weight, and $12.18 per cwt. in price. Macon county, Ill., had four head averaging 1,000 pounds at $12.51 per cwt., while McLean county sold four head averaging 793 pounds in weight and $12.55 per cwt.

Col. Carey M. Jones auctioned off the calves on each occasion. These auctions offer an unusual opportunity to study the relative values of different grades of cattle, and the International invites visitors to be present any Tuesday afternoon at 2 o'clock at the U. S. Yards, Chicago, until the middle of October.

Reduced Rates Apply In So. Illinois Area

EMERGENCY freight rates on live stock and feed, hay and straw when used for feeding purposes, have been published for the southern Illinois drouth area.

The new freight tariffs are effective in the following Illinois counties: Alexander, Clay, Crawford, Edwards, Fayette, Franklin, Gallatin, Hamilton, Hardin, Jackson, Jefferson, Jersey, Johnson, Lawrence, Madison, Marion, Massac, Monroe, Perry, Pope, Pulaski, Randolph, Richland, St. Clair, Saline, Union, Wabash, Washington, Wayne, White and Williamson.

The rates apply on live stock, feed, hay, straw and water from various points when shipped to the drouth areas and are on the basis of one-half of the regular tariff rates. The half rate will also apply on live stock shipped from the drouth areas to feeding points but not to markets or to public feed lots. See your county adviser to get the advantage of the lower rates.

Uncle Ab says that to keep from crying over spilled ink, don't spill it from the point of a pen.

The Proposed Revenue Amendment

The proposed revenue amendment adopted by the last General Assembly includes revisions of Sections 1, 2, 9 and 10 of Article IX of the State Constitution. The present sections and the amended sections are published side by side below. The proposed amendments will be submitted to the voters at the general election November 4, 1930.—Editor.

Present Section 1

Sec. 1. The General Assembly shall provide such revenue as may be needful by levying a tax, by valuation, so that every person and corporation shall pay a tax in proportion to the value of his, her or its property—such value to be ascertained by some person or persons to be elected or appointed in such manner as the General Assembly shall direct, and not otherwise; but the General Assembly shall have power to tax peddlers, auctioneers, brokers, hawkers, merchants, commission merchants, showmen, jugglers, innkeepers, grocery-keepers, liquor dealers, toll-bridges, ferries, insurance, telegraph and express interests or business, venders of patents and persons or corporations owning or using franchises and privileges, in such manner as it shall from time to time direct by general law, uniform as to the class upon which it operates.

Amended Section 1

Sec. 1. The General Assembly shall have power to enact laws to provide revenue. All real estate for the purpose of imposition of taxes shall be in one class, except that mineral lands and land devoted to reforestation may be in different classes.

Present Section 2

Sec. 2. The specification of the objects and subjects of taxation shall not deprive the General Assembly of the power to require other subjects or objects to be taxed, in such manner as may be consistent with the principles of taxation fixed in this constitution.

Amended Section 2

Sec. 2. If a tax is imposed on incomes the state shall not receive more than 15 per centum of the proceeds thereof after deducting the cost of collection except by the affirmative votes of two-thirds of the members elected to each house of the General Assembly. And unless otherwise provided by a similar two-thirds vote the remainder shall be distributed among the several counties in the ratio which the total collected from taxpayers of each county bears to the total collected from taxpayers of the whole state, and the amount allocated to each county may be further divided among the county and other municipal corporations within or partly within such county as the General Assembly may from time to time by general law direct. Other taxes collected by the state may be distributed in whole or in part among the counties and other municipal corporations in such manner as the General Assembly shall direct by general law.

Present Section 9

Sec. 9. The General Assembly may vest the corporate authorities of cities, towns, and villages with power to make local improvements by special assessment or by special taxation of contiguous property or otherwise. For all other corporate purposes, all municipal corporations may be vested with authority to assess and collect taxes, but such taxes shall be uniform in respect to persons and property within the jurisdiction of the body imposing the same.

Amended Section 9

Sec. 9. The General Assembly may vest the corporate authorities of cities, towns, villages, sanitary districts, park districts and other municipalities with power to make local improvements by special assessments or by special taxation of contiguous property, or otherwise. For all other corporate purposes, all municipal corporations may be vested with authority to assess and collect taxes.

Present Section 10

Sec. 10. The General Assembly shall not impose taxes upon municipal corporations, or the inhabitants or property thereof, for corporate purposes, but shall require that all the taxable property within the limits of municipal corporations shall be taxed for the payment of debts contracted under authority of law, such taxes to be uniform in respect to persons and property within the jurisdiction of the body imposing the same. Private property shall not be liable to be taken or sold for the payment of the corporate debts of a municipal corporation.

Amended Section 10

Sec. 10. Except as permitted in Section 2 the General Assembly shall not impose taxes upon municipal corporations or the inhabitants or property thereof for corporate purposes, but shall require that taxes be levied by municipal corporations for the payment of debts contracted under authority of law. Private property shall not be liable to be taken or sold for the payment of the corporate debts of a municipal corporation.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Editor, George Thiem

Published once a month by the Illinois Agricultural Association, at 124 So. Fifth St., Marshall, Ill. Adress all communications for publication to Editorial Office, 608 So. Dearborn St., Chicago, Ill. Entered as second-class matter June 16, 1930, at the post office at Marshall, Ill., under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for missent copy please indicate key number on address as is required by law.

The Revenue Amendment

THE position of the Illinois Agricultural Association on the proposed revenue amendment is set forth at length in the article beginning on page 3. We commend it for your careful study and consideration. The attitude expressed in this statement was adopted only after careful and deliberate thought of all the possibilities for tax reform should the proposed amendment be enacted into law. For the benefit of those who wish to study and compare the exact wording of the present revenue article, and the wording in the proposed amendment, both are published side by side on page 5.

I. A. A. States Stand on Revenue Amendment

(*Continued from page* 3)

corporate purposes of such taxing districts. Under this provision, no taxes collected by the sttae can now be distributed to any taxing district for unrestricted use. Neither the State School Fund nor the Gasoline Tax Fund are exceptions to this rule, because the state directs the manner of using both.

The amendment, if adopted, would modify the above restrictions, first, not only by permitting but by directing that 85 per cent of the net proceeds of any tax imposed upon income be returned to the counties in proportion to the amount collected in each, unless the percentage named were decreased by the affirmative votes of two-thirds of the members elected to each House of the General Assembly; second, by permitting the General Assembly, by general law, to provide for the further distribution of the amount allocated to each county among the county and other taxing districts wholly or partly therein; third, by permitting the General Assembly, in such manner as it may direct by general law, to provide for the distribution of any part of other taxes collected by the state among the counties and other taxing districts.

Limitation Bad Feature

The state should not be limited to 15 per cent of the net proceeds of any tax upon income. The legislative experience of the association shows the extreme improbability of the two-thirds vote necessary to increase the percentage to more than 15. Much more probable would be a decrease in the percentage to be retained by the state, a change requiring only a majority vote of the members elected to each House. So severe a limitation upon the state would surely prevent it from receiving the revenue from income taxes necessary to enable it to assume certain indispensable functions, the most important of which is the assuring of equal educational opportunities to every child in the state.

It should not be made possible for the General Assembly, by majority vote, to provide for the distribution of any part of other taxes collected by the state. There being no provision to the contrary, the granting of such power would include not only all new forms of taxation adopted hereafter, except only a tax on incomes, but also all taxes now collected and wholly retained by the state. Except in the general property tax and in the simplest forms of personal income taxes, it is difficult if not impossible to determine the place of origin of income out of which taxes are paid.

How Determine Sources of Income?

For example, it is impossible to locate the various geographical sources of income out of which the state now rightfully collects and retains an average total of $17,000,000 in taxes per year on inheritances, corporations and insurance privileges. It is impossible also to distinguish between local communities and others in the benefits conferred by some kinds of improvements, especially good roads. It is right, therefore, that the state should retain control of the motor license fees, now over $17,000,000 per year, and the gasoline taxes, now about $25,000,000 per year, for the improvement and maintenance of the public highways.

The legislative experience of the association indicates that the adoption of the amendment would be followed by the most insistent demand by various taxing districts that inheritance taxes, corporation taxes, insurance privilege taxes, and even gasoline taxes be distributed for unrestricted uses. The state would probably soon be stripped of most of the revenues now collected from sources other than the property tax, causing a heavy increase in taxes on property even to maintain present state functions, doing irreparable injury to the improvement and maintenance of the state and county highway systems, and making it impossible for the state to assume highly desirable or even necessary additional functions without further heavy increase in property taxes.

Making Local Improvements by Special Taxation of Contiguous Property

Adoption of the amendement would enable the General Assembly to vest the corporate authorities not only of cities, towns and villages, which alone are named in the present revenue article, but also of sanitary districts, park

districts, and other municipalities, with power to make local improvements by special assessment or by special taxation of contiguous property, or otherwise. The words "other municipalities" include all taxing districts not specifically named.

Without any mention of taxing districts other than cities, towns and villages, it is usually believed that the General Assembly cannot now vest the authorities of such other taxing districts with power to make local improvements by special taxation of contiguous property. This implied present restriction has doubtless prevented many attempts to secure the enactment of laws granting such power. Experience in other states, notably Iowa and Ohio, demonstrates the danger of confiscatory special taxes on contiguous property for road purposes. The proposed amendment would open wide the door for confiscatory special taxes, especially on contiguous property, for many purposes.

Summary and Conclusions

The Illinois Agricultural Association has long been and is now heartily in favor of properly amending the revenue article of the state constitution. The pending amendment contains some good features which the association would approve, if they could be voted on separately. Along with the good features of the amendment, however, are several provisions which would be wholly improper in our constitution, since they would make our taxing system still more burdensome to most property, especially real estate.

Such improper provisions are:

1. **A grant to the General Assembly of such broad power to classify property as to permit the use of different standards of value and different tax rates, as in the low-rate taxation of intangibles.**
2. **The restriction of the state to a portion of any tax on incomes which would be wholly inadequate to its needs.**
3. **A provision permitting the state to be stripped of the greater portion or all of its present revenue from inheritance, corporation and insurance privilege taxes and even gasoline taxes, which would further hamper the state and make it more dependent on property taxes.**
4. **A provision permitting these various taxes, after being taken away from the state (where alone they would be large enough to be replacement taxes and decrease the levies on property) to be distributed among so many taxing districts and usually in such small amounts that they could no longer be lieu taxes, but would be additional taxes.**
5. **A provision permitted ANY taxing district to levy confiscatory taxes by special assessment on contiguous rural property for local improvements.**

The Illinois Agricultural Association is convinced that the improper provisions proposed in the pending amendment, if adopted, not only could but would have very bad results on tangible property, and most of all on real estate. The good provisions of the amendment are far outweighed by its bad provisions. The Illinois Agricultural Association, therefore, has no choice but to refuse any support for the amendment. It regrets the delay of four years before a proper amendment can be submitted, but believes that delay is far safer than the incorporation of dangerous and improper provisions in a constitution so notoriously difficult to amend. In the meantime, much can be done not only in better enforcing the present revenue laws, but also in using the great power given the General Assembly by the present constitution, under which an income tax free from the restrictions proposed in the amendment can be enacted. Thus would be made possible the use of revenue derived from such a tax to reduce or replace property taxes.

Clay County Enforces the Law

ONE of the iniquities of the general property tax is that it is not enforced impartially. The state constitution provides that all property shall pay a tax according to its value. Following the lines of least resistance, the assessor invariably lists real estate first because it is eaily accessible. You can't hide land, buildings, live stock, and farm machinery. Nor can you easily obscure their value. But with personal property, including household goods, clothing, jewels, motor cars, etc., it is different, particularly in our towns and cities. These either escape taxation altogether or else they are assessed notoriously low. Thus the burden of taxation falls unfairly on real estate.

In Clay county, Illinois, the local board of review, we are informed, is attempting to improve its enforcement of the property tax. Overassessment of farm lands and improvements disclosed by the Farm Bureau is being met with a flat 20 per cent reduction. The loss in revenue will be made up by assessing personal property on the same basis as real estate is taxed. "In my town," said a Clay county citizen, "fifty dollars is the highest value placed on any taxpayer's personal property." Not even the price of a good radio. In Chicago, 85 per cent of the people pay no personal property taxes. The Clay County Board of Review is to be commended for its effort at law enforcement.

Dr. Warren Forecasts

THE overwhelmingly important cause of the agricultural depression is falling prices and consequently maladjustment between farm and retail prices, all of which is due to an increasing value of gold, Dr. G. F. Warren explained to the international conference of agricultural economists' meeting at Cornell University recently.

The depression will last as long as material deflation continues, and for a number of years after. If deflation should discontinue now, the increased efficiency in farming, increasing efficiency in handling products, and the infinite number of adjustments in other prices might be expected to end the agricultural depression in ten years or less, he predicted. "I believe, however," said Dr. Warren, "that prices will continue to decline to the pre-war level and probably they will go below that level. When the decline stops, several years will be necessary to overcome the agricultural depression."

The individual farmer should anticipate still lower prices, and be careful about long-time debts, except for things that are below pre-war prices. He must reduce his costs of production. He should not buy land nor work land that does not produce a high output for each hour of labor. He should make labor-saving plans of operation. His business should be large enough to fully employ all of his time and that of his labor. He should obtain high crop yields by using fertilizers which are cheap, and by discontinuing to work land that does not give high yields, Dr. Warren advised.

CHICAGO CENTURY OF PROGRESS BUILDINGS INSULATE ROOFS WITH CORNSTALK BOARD

Above is a view of the east facade of the Administration building at Chicago's coming Century of Progress Exposition, with its terraces stepping down to the edg of the water in the north lagoon.

The roof of the Travel and Transport building, sister to the Administration building alone covers approximately five acres in area. The roofs of both buildings will be insulated with Maizewood manufactured from cornstalks by the company with which George N. Peek, ex-Gov. Frank O. Lowden, Chester C. Davis and others are associated.

Cornstalk Finds Place In New Chicago World's Fair Buildings

THE lowly cornstalk, long considered a nuisance on many farms, will come into its own at the 1933 Century of Progress Exposition, otherwise known as the Chicago World's Fair. Insulation board manufactured from cornstalks has been selected to insulate the roofs of the Administration building and the Travel and Transport building, both of which are now being erected on the Chicago lake shore, southeast of the Field Museum.

A trainload of cornstalks purchased from Iowa and northwestern Illinois farms was used in manufacturing the roof insulation which has ben ordered for these two buildings. The roof of the Travel and Transport building alone has a spread of about five acres, which will be covered with an inch-thick blanket of Maizewood, the cornstalk insulation board.

The total roofing order calls for 460,000 square feet of one-half inch insulation, which is being shipped to Chicago from the cornstalk insulation board factory at Dubuque, Iowa.

Factory at Dubuque

The pioneer work in the development of insulation from cornstalks was done at the Iowa State College, by Dr. O. R. Sweeney, chief of the chemical engineering department. The Maizewood Products Corporation established its factory at Dubuque, Iowa, for the practical application of Dr. Sweeney's discoveries. Last year a controlling interest in the Maizewood Products Corporation was acquired by a strong group of middle west business men, primarily for the purpose of assisting to bring about the widespread use of cornstalks for building and industrial purposes, and to develop this as a source of new income for cornbelt farmers.

The group includes former Governor Frank O. Lowden of Illinois, George N. Peek, William V. Kelley, Joseph E. Otis, E. V. R. Thayer, Frank H. Woods, Chester C. Davis, and many others, including executives of International Harvester Company, Deere & Company, and business and agricultural leaders of Iowa. This company was incorporated as National Cornstalk Processes, Inc., with the intention of developing the manufacture, not only of insulation material, but other products and by-products.

Stalks Are Baled

The cornstalks which go into Maizewood are purchased widely over Iowa and Northern Illinois, baled and transported to Dubuque for manufacture. About 20,000 tons of cornstalks a year are required for the capacity of the Dubuque plant. A careful preliminary study in advance of the formation of National Cornstalk Processes, Inc., resulted in the conclusion that the field for insulating material, synthetic lumber, and related products, would prove broad enough to lead to the establishment of a number of such factories throughout the cornbelt, whose aggregate expenditure for raw material would constitute an important addition to agriculture's income.

Prepare to Handle 1930 Soybean Crop

Contemplate Substantial Advance to Grower on Delivery of Beans

PLANS for handling the 1930 soybean crop are rapidly being formulated by officers and directors of the Soybean Marketing Association.

Arrangements are being made to secure storage for the soybeans owned by the 2,200 members, pending their sale. The association also has taken steps to secure finances to advance the growers when their beans are delivered to the elevators.

It is contemplated that beans will be delivered to the local elevator in each community where there are members of the association. The elevator will receive, weigh and grade beans, and pay the advance to the grower. It is expected that not more than four or five cents per bushel will be paid the elevator for the service. The soybean producers in each community will make all arrangements with their own elevators for the service and establish a charge fair to both.

Processors Not Ready

Processors are not yet in a position to handle beans and the association will be ready to take over the crop and handle it when the members deliver. The scarcity of feed and the fact that both the soybean and flax crops have been injured by the drouth has placed the new co-operative in a favorable position for marketing its first crop.

The amount of the first payment has been discussed informally with Vice-Chairman James C. Stone of the Federal Farm Board, but has not been definitely decided. Mr. Stone spent several hours in the I. A. A. office in Chicago before leaving for Monmouth and Jacksonville where he addressed district Farm Bureau picnics.

The soybean advisory counsels in the various counties are being asked to furnish information regarding the number of acres each county will have to market as commercial beans, the probable yield per acre, and the elevator to which the beans will be delivered.

"The August number of the I. A. A. RECORD struck me as being one of the best numbers you have ever published. It is good from front cover to the back cover. It presents a large amount of information about a wide variety of subjects, and in an effective way.

"I wish to congratulate you."

C. C. BURNS, Adviser,
Champaign County Farm Bureau.

SANGAMON WINS CUP AT STATE FAIR

Manager A. E. Richardson of the Illinois Agricultural Mutual presents Farm Adviser Edwin Bay with a silver trophy awarded the Farm Bureau in the county having the largest number of members and visitors registered at the Farm Bureau tent, Springfield, during the State Fair. The 348 visitors from Sangamon had a total of 10,440 points, McLean was 2nd with 4,620, and Christian 3rd with 3,840.

Rain Breaks Up 14th Dist. Picnic, Monmouth

Good Crowd Hears Vice-Chairman Stone at Jacksonville

RAIN broke up the first of the many Farm Bureau district picnics to be held during the last three years when a steady downpour sent thousands scurrying for their cars at the 14th district picnic, Monmouth, on August 29. This fact is particularly striking because of the prolonged drouth this summer.

While the morning was cloudy, long before noon thousands of Farm Bureau members and visitors from Rock Island, Mercer, Warren, Henderson, Hancock and McDonough counties had gathered at Monmouth Park for the occasion. The crowd promised to equal the record one estimated at more than 10,000 the year before. The light rain persisted through the noon hour, and by 1:15 p. m., the time for beginning the program, it was coming down steadily with no sign of letting up.

After a hasty consultation, Chairman M. G. Lambert and the local committee announced that the picnic would adjourn to the Armory uptown for the speeches and presentation of prizes.

Mrs. Sewell Speaks

Close to a thousand of the picnic crowd, estimated before the rain at more than 5,000, went to the Armory and heard Vice-Chairman James C. Stone of the Federal Farm Board, and Mrs. Chas. W. Sewell, home and community director of the American Farm Bureau.

Mrs. Sewell spoke on the subject, "The Woman in the Case." She quoted a statement by Alexander Legge, chairman of the Farm Board, to the effect that the old idea was that farmers' cooperatives should be of, by and for men only. Now we are discovering that they must be a family affair, and must be human. The mothers and children must make a definite contribution and get a real value in turn. Co-operatives are as strong and no stronger than farm women help them to be. We need them and call upon them to enlist.

Among the feature events of the picnic was a horseshoe pitching tournament in which Fred Burrus of Henderson county won the singles contest, while M. Roberts and G. Mabry of Hancock county won the doubles event. Hancock, Henderson, Rock Island, McDonough, Warren and Mercer counties competed in the tournament.

The baseball game between the Warren and Henderson county teams was called off on account of rain.

Good Crowd at Jacksonville

A crowd estimated at 4,000 to 5,000 assembled at Nichols Park, Jacksonville, on August 30 for the 20th district Farm Bureau picnic. The day was sunshiny but sultry.

The afternoon speaking program was held in a large Chatauqua tent seating approximately 2,500 to 3,000 people.

Charles S. Black presided. Congressman Henry T. Rainey and Sam Sorrells from the 21st district sat on the speakers' platform with James C. Stone, vice-chairman of the Farm Board, and President Earl C. Smith.

At the close of Mr. Stone's address, reported elsewhere in this issue, Chairman Black called the members of the Cass and Greene county Farm Bureau baseball teams to the platform and spoke briefly of the progress that had been made in recent years in developing Farm Bureau baseball in Illinois. He stated that the league had grown from 22 county teams in 1929 to 31 competing teams in 1930.

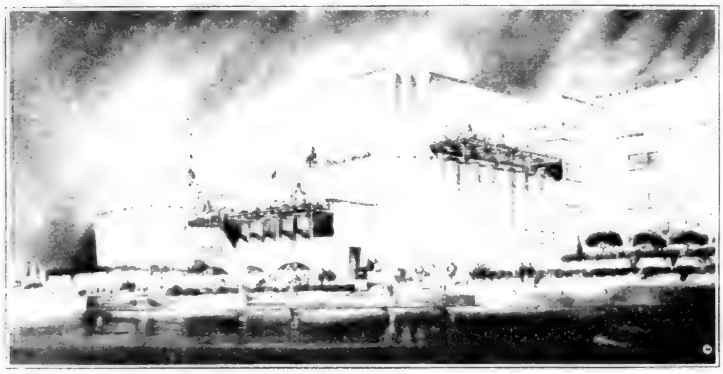
Fire Prevention Week Coming Oct. 5-11th

By V. Vaniman, Director Insurance Service

GOV. LOUIS L. EMMERSON has issued a proclamation setting aside October 5-11 as Fire Prevention Week. In announcing the week set aside for this purpose the Governor said: "To prevent fire is the personal responsibility of everyone. It should be taken seriously. I appeal for the co-operation of all citizens in the interest of avoiding fires, not only during this week, but at all times. I urge that mayors, fire chiefs, chambers of commerce, civic organizations and schools lend their efforts to a practical program of education in their respective communities in the interest of reducing the causes of fire."

A Few Facts

There were 417 deaths by fire in Illinois in 1929; property losses reached the huge total of an average of $2,000,000 a month. In his seventh annual report, the state fire marshall says, "study of the cause of fire for many years has shown clearly that 75 to 90 per cent of all fires are preventable."



Following are some of the causes of farm fires: Lightning, defective chimneys and flues, sparks on roof, matches and smoking, spontaneous combustion, gasoline and kerosene, electricity, stoves and furnaces, hot ashes and coals, open fires, rubbish and litter, and incineration.

Defective flues and sparks on the roof are responsible for 19 per cent of the farm fire losses. Due to the financial situation many flues have not been repaired and also many roofs should have been replaced five or ten years ago.

Fall Fires

There will be a heavy toll of roof fires when the stoves and furnaces are started this fall unless chimneys are cleaned or burned out while the shingles are damp.

Thoughtful consideration of fatalities and the great financial loss caused by fires should cause every thinking person, owning property, to make a careful inspection looking forward to preventing fires.

Among the feature events of the picnic was a horseshoe pitching tournament in which Fred Burrus of Henderson county won the singles contest, while M. Roberts and G. Mabry of Hancock county won the doubles event. Hancock, Henderson, Rock Island, McDonough, Warren and Mercer counties competed in the tournament.

The baseball game between the Warren and Henderson county teams was called off on account of rain.

Good Crowd at Jacksonville

A crowd estimated at 4,000 to 5,000 assembled at Nichols Park, Jacksonville, on August 30 for the 20th district Farm Bureau picnic. The day was sunshiny but sultry.

The afternoon speaking program was held in a large Chatauqua tent seating approximately 2,500 to 3,000 people.

Charles S. Black presided. Congressman Henry T. Rainey and Sam Sorrells from the 21st district sat on the speakers' platform with James C. Stone, vice-chairman of the Farm Board, and President Earl C. Smith.

At the close of Mr. Stone's address, reported elsewhere in this issue, Chairman Black called the members of the Cass and Greene county Farm Bureau baseball teams to the platform and spoke briefly of the progress that had been made in recent years in developing Farm Bureau baseball in Illinois. He stated that the league had grown from 22 county teams in 1929 to 31 competing teams in 1930.

Fire Prevention Week Coming Oct. 5-11th

By V. Vaniman, Director Insurance Service

GOV. LOUIS L. EMMERSON has issued a proclamation setting aside October 5-11 as Fire Prevention Week. In announcing the week set aside for this purpose the Governor said: "To prevent fire is the personal responsibility of everyone. It should be taken seriously. I appeal for the co-operation of all citizens in the interest of avoiding fires, not only during this week, but at all times. I urge that mayors, fire chiefs, chambers of commerce, civic organizations and schools lend their efforts to a practical program of education in their respective communities in the interest of reducing the causes of fire."

A Few Facts

There were 417 deaths by fire in Illinois in 1929; property losses reached the huge total of an average of $2,000,000 a month. In his seventh annual report, the state fire marshall says, "study of the cause of fire for many years has shown clearly that 75 to 90 per cent of all fires are preventable."

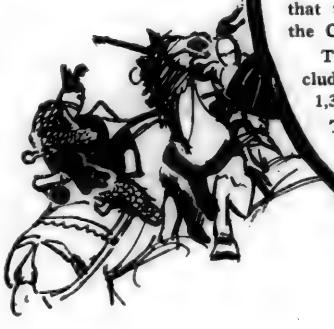
Following are some of the causes of farm fires: Lightning, defective chimneys and flues, sparks on roof, matches and smoking, spontaneous combustion, gasoline and kerosene, electricity, stoves and furnaces, hot ashes and coals, open fires, rubbish and litter, and incineration.

Defective flues and sparks on the roof are responsible for 19 per cent of the farm fire losses. Due to the financial situation many flues have not been repaired and also many roofs should have been replaced five or ten years ago.

Fall Fires

There will be a heavy toll of roof fires when the stoves and furnaces are started this fall unless chimneys are cleaned or burned out while the shingles are damp.

Thoughtful consideration of fatalities and the great financial loss caused by fires should cause every thinking person, owning property, to make a careful inspection looking forward to preventing fires.



ACHIEV

COUNTRY LIFE INSURANCE COMPANY was licensed to begin business on Dec. 30, 1928. The Company began issuing policies on Feb. 1, 1929.

The first month of activity brought in $12,580,000 of accepted ordinary life business, with the annual premium paid in advance. On the 19th day of August, 1930, the Company had $36,000,000 of written business, all Ordinary, 20-Pay, and 20-Year Endowment policies. Since then the results of our offering of wholesale term insurance indicate that the total of written business since the beginning of the Company is now approximately $45,000,000.

The Company has an agency force of 1,300 agents including 92 general agents. Many of the aforementioned 1,300 are part time solicitors.

The Farm Bureau members of Illinois have reason to be proud of this great accomplishment in group action. There is no greater nor more outstanding success in all the annals of life insurance history.

Observations

IN a previous issue of the RECORD we attempted to give our impressions gained on an automobile trip to Yellowstone and Glacier National Parks, of the federal government's western land policy, and its effect on corn belt agriculture.

During the journey over the great plains and through the mountains we saw several of the more important land reclamation projects including North Platte and Shoshone in Nebraska and Wyoming, Sun River, Milk River, and Lower Yellowstone in Montana. In addition, we observed that millions of acres of grazing lands had been brought under cultivation by dry land farmers, largely as a result of governmental influence. Ambitious western railroads, anxious to build up their income hauling farm products, strongly supported and helped initiate the acreage-extension, surplus-producing program.

On further investigation of federal reclamation work we find that the Reclamation Act was approved June 17, 1902. "Congress passed this act," declares the Bureau of Reclamation, "in order that *large areas of lands suitable for irrigation farming in arid states might provide homes for citizens, increase the agricultural area of the country, and make beneficial use of two of its national assets, land and water.*" There you have the government's policy during the last 30 years set forth in bold relief. Agriculture has been regarded as a way of living, not as a business or an industry subject to the same economic laws as any other business or industry.

It was inevitable that sooner or later agriculture would develop an acute pain in the stomach from too much food. "Farming in the United States was not on a satisfactory basis before the war," said President Hoover in one of his campaign speeches. How could it be with farm production being stepped up blindly without regard to what the market would take at a profitable price?

There are 25 gigantic federal irrigation projects located in whole or in part in 15 of our arid western states. On June 30, 1924, 22 years after the passage of the Reclamation Act, a volume of water had been impounded in reservoirs or diverted from regular stream channels sufficiently large to irrigate 1,718,400 acres of project lands and to furnish supplemental irrigation under the Warren Act of 1911, to 1,213,700 acres of land having an insufficient water right for full crop production. Since that time there has been considerable additional development.

All this competition to the cornbelt farmer was financed by the government without interest. The Act of 1902 provided that funds obtained from the sale of public lands in 16 of the arid western states should be used for the examination and construction of federal reclamation projects. Soon after the act was passed construction work began. Within a few years all the funds made available were gone and an additional sum of $20,000,000 was appropriated. Further appropriations were made from time to time to water more acres, grow more crops and produce more cheap food.

The Reclamation Act and amendments thereto provide that those who settle upon reclaimed lands need not pay any interest on the money invested in construction work necessary to make water available to the farmer. The original practice was to divide each farmer's assessment into ten yearly installments. More recently the payments have been divided into 20 yearly instalments without interest, and the government has had difficulty in collecting because of low prices for wheat, barley, sugar beats, oats, corn, alfalfa and beans grown on these irrigated lands.

In effect, the federal government has been in the farming business, assisting in creating farm crop surpluses, since the dawn of the 20th century. It apparently felt that population would grow faster than the food supply; that agricultural expansion was a good thing for the country. The middlemen, speculators and the railroads never uttered a word of protest at the government's efforts in stimulating agricultural production. It was alright with them to see the business of established farmers in Illinois, Iowa, Indiana, Missouri and other mid-west states undermined by government subsidy to a new group of competitors on land that had better remained idle. But it's all wrong now for the government to help solve the problem it assisted in creating; to aid the farmer in regulating and controlling the production and marketing of his products. It is, to hear them tell it. E .G. T.

SANGAMON AND MONTGOMERY F. B. TEAMS PLAY NIGHT BASEBALL
Farm Bureau teams from Sangamon and Montgomery counties initiated night baseball in the State Farm Bureau Lague several weeks ago when they played an "after dark" game on the Three-I League diamond at Springfield. Earl C. Smith, I. A. A. president, threw the first ball to start the game. The diamond was made light as day by powerful electric lamps.

Elect Directors

Directors elected at the annual meeting of the stockholders of the Illinois Grain Corporation on September 2 in Chicago were as follows: J. C. Sailor, John Stout, Claude Thorpe, E. E. Stevenson, G. C. Johnstone, Warren Watson, O. G. Anderson, Chas. Schmidt, B. L. Baird, Bert Loudenbach, Carl P. Griffiths, Ralph Mills, J. Fred Romine, and Geo. J. Stoll.

Routine business and recent developments toward becoming established as a regional grain marketing agency for the State of Illinois were discussed.

Representatives from a majority of the stockholder members attended the meeting.

Opens St. Louis Office

THE Mid-West Grain Corporation, sales agency for the Illinois Grain Corporation, representing the Federal Farm Board plan of grain marketing in Illinois, opened a branch office in room 514, Merchants Exchange building, St. Louis, Mo., on September 4.

Geo. C. Martin, an experienced grain man and formerly president of the St. Louis Merchants' Exchange, has been employed to manage the St. Louis office.

Mr. Martin will handle all grain shipped to the Illinois co-operative at St. Louis serving all members and farmers' elevators in that territory, and furnishing St. Louis cash market bids.

Concentration of Selling Power Farmers Need

"Jim" Stone Tells How Agriculture Can Meet Organization of Industry, at Monmouth and Jacksonville Picnics

HOW farmers can meet industrial organization by which stockholders of a corporation concentrate their money and buying power under the control of a few intelligent managers, was told by James C. Stone, vice-chairman of the Federal Farm Board, who spoke at Farm Bureau district picnics in Monmouth and Jacksonville, August 29 and 30 respectively.

"Farmers, likewise, can concentrate their products and their individual selling power under the control of co-operative marketing associations," said Mr. Stone. "The methods of operation of these two organizations, the corporation and the co-operative marketing association, are similar and the objects to be accomplished are the same in both.

A Modern Plant

"The successful manufacturer has a well-constructed, conveniently arranged plant with modern machinery and employs capable and efficient management. If he did not do this he could not meet the competition of the plant which is competently and efficiently managed. In fact, the main object of any successful industrial plant is to manufacture the best possible produce at the lowest possible cost, and industry has been able to accomplish this by employing the best expert ability.

Talk Down Own Business

"Another fundamental in connection with industrial success," said Mr. Stone, "is that production is regulated in large measure to potential consumer demand and is sold to the public through a highly organized and efficient sales department."

Here the speaker paused to reveal one apparent difference between stockholders of a corporation and members of a co-operative association. "Too many farmers talk down their own business," he said. "Moreover, they listen to attacks against their own organization without defending it. Most stockholders of a corporation boost it and defend it against attacks. But not so with many farmers. They not only listen passively to malicious propaganda spread by their enemies, but they even go so far as to attack their own business, their own organization, when it should have their full support and co-operation. Farmers too often listen gullibly to falsehoods about their leaders and their co-operatives, expressed by those who have a selfish interest in retaining control of the selling end of the farmer's business, without a word of protest. You don't hear stockholders of a corporation talk it down like some farmers do their co-operative."

Continuing the analogy between industry and agriculture, Mr. Stone pointed out that there are some six and one-half million farmers operating that number of individual farm factories, largely without regard to what their neighbors are doing or what the market will take at a profitable price.

Each a Manufacturer

"Each individual farmer is a manufacturer," he said. "His farm is his plant. If his soil is fertile and his farm machinery modern, his plant is then well equipped to produce a good quality product at a reasonable cost. If his land is poor and his machinery inadequate, he has a hard time to compete with the farmer whose land is fertile and who uses up-to-date machinery to cultivate it."

The speaker cautioned farmers to keep in touch with the latest developments in research carried on by the state experiment station and advocated by the county advisers. He suggested that farmers get all the available information regarding probable market requirements and then adjust their production in line with this information.

Heed U. S. Reports

"For several years the Department of Agriculture at planting and breeding time has been supplying farmers valuable information about the prospective supply and demand of agricultural commodities. Where the situation seemed

"YOU can't legislate the farmer rich. It is possible to give equal opportunity to agriculture, and the Marketing Act opens the way. It is our job to use the law in helping the farmer. If it hurts someone else it is just too bad."

The speaker suggested that it might be necessary sooner or later to adopt a plan of grading land according to its fertility, in the interest of adjusting production to demand. "We can't possibly grow wheat on $200 land in Kentucky," he said, "and compete with the Kansas farmer who grows wheat as successfully on land valued at $12 to $15 an acre. We must learn to produce the best product possible at the lease cost."

Jns. C. Stone

Referring to the production of tobacco in his home state, he pointed out that the four or five buyers of that product who purchase nearly 90 per cent of the Burley tobacco grown there have all the advantage in buying from 150,000 unorganized producers, where the weakest grower, financially, sets the price of the crop.

Mr. Stone was introduced by President Earl C. Smith, who made his first public appearance since his recent illness.

In a short preliminary talk Mr. Smith outlined the setup of the Illinois Grain Corporation, stating that the opposition to co-operative grain marketing program apparently was being financed by enemies of farmer co-operation. He stated that an announcement regarding the I. A. A.'s policy on the proposed revenue amendment would be made following the next meeting of the board of directors.

to warrant, the Department has sounded warnings against increased production that would result in larger crops than the potential market could absorb. Not enough attention has been paid by farmers in the past to these outlook reports. I am not going to suggest the reason, but merely call that fact to your attention. The time has come when farmers must not only do some thinking on this subject but some acting as well if they wish to improve their financial position.

Sheep Industry Cited

"An instance of how producers have ignored warnings against overproduction and are now suffering from that lack of action is furnished in the sheep industry. As early as 1927 sheep producers were warned against an impending surplus unless greater caution was used in increasing their herds. There was no response and the warning was repeated in 1928. The same thing happened that year and another warning was issued in 1929. A short crop last year helped to defer the adverse effect of the surplus until last fall when lamb prices in Chicago, which had been from $13 to $16, were carried down to prices of $10 and lower. The lamb crop this year was two million head greater than that of 1929 and this increased production still remains to be disposed of before improvement to a more profitable level can be hoped for.

Big Crops Vs. Small

"I am going to give you a few figures now on some other commodities that show how big crops returned to the farmer less than he got for small crops. In 1928 farmers produced 49 million head of hogs, which was 9 million head more than the crop of 1926, and the farm value was 140 million dollars less than it was for the smaller crop of 1926. The biggest hog crop of the past six years was that of 1929 when 11,353 million pounds were slaughtered under Federal inspection. The smallest in that period was in 1926 when the slaughter was 9,633 million pounds. For the crop of 1,720 million pounds more in 1929 the producer received 68 million dollars less.

"Beef cattle production in 1929 was the smallest in the past six years and brought the grower the most money. Slaughter under Federal inspection was 7,940 million pounds, for which the producer received 968 million dollars. In 1926 it was 9,814 million pounds and the producer got only 943 million dollars, or 25 million dollars less for a 25 per cent greater production.

"The corn crop of 2,300 million bushels in 1924 had a farm value of 300 million dollars more than one of 600 million bushels larger in 1925.

Potatoes and Cotton

"The record of returns for potato crops over a period of years shows that the growers get more for a crop under 400 million bushels than they do for a crop in excess of 400 million bushels. The smallest potato crop in the past six years was 321 million bushels and the bumper crop of that period was 463 million bushels in 1928. The 1928 crop of 142 million bushels more showed a return to the farmer of 242 million dollars less.

"The smallest cotton crop of the past ten years was that of 1923, being only 10,140,000 bales. The biggest was in 1926, amounting to 17,977,000 bales. The cotton farmers got 589 million dollars more for their crop in 1923 than they did in 1926, when they had 7,837,000 more bales of cotton.

Duties of Board

"Among the duties imposed upon the Farm Board by the Agricutural Marketing Act are these:

1. To keep advised from any available sources and make report as to crop prices, experiences, prospects, supply and demand at home and abroad;

2. To investigate conditions of overproduction of agricultural commodities and to advise as to the prevention of such overproduction.

"Thus it will be seen that in urging farmers to adjust their production as nearly as possible to the potential consumer demand we are simply doing a part of the job entrusted to us by Congress. In addition to helping supply farmers with all available information on supply and demand conditions at planting time together with suggestions in regard to adjustments that may appear desirable, the Board will do what it can to assist cooperatives in expanding and extending the markets for foreign products at home and abroad.

Reduce Wheat Acreage

"We have recommended to farmers that wheat acreage be reduced gradually until production is on a domestic basis, the purpose being to give the grower the benefit of the tariff protection voted him by Congress. We have done this because the facts before us indicate that there will be no substantial improvement in the world wheat market the next few years compared to the past few years. In our opinion the prospective world price does not offer a profitable return to the American grower, but so long as he produces more than the domestic market will consume he must be content to accept for his entire crop the price his surplus commands in foreign markets.

"There are some who think a way should be found to dispose of the surplus abroad so that that surplus will not affect the price on that part of the crop sold at home. Among the suggestions put forward are the equalization fee and debenture plan, both of which contemplate subsidizing the exportation of the surplus; that is, dumping it on the world market. Anything that savors of dumping, as we see it, will not be effective for the very good reason that most of the importing countries have very strict defensive measures against such a procedure. Like the United States, these countries have their own farm problems, and are determined to protect their growers against dumping of farm products. That is in harmony with our attitude since Congress has given the farmers of this country special protection against subsidized imports. Various other proposals have been made for dealing with the wheat surplus problem, but after giving them all careful study and serious consideration we have come to the infinite conclusion that adjustment of production offers the only real hope for the wheat grower to get his business on a profitable basis.

Must Be Willing

"If the farmer is willing to help himself, the Agricultural Marketing Act will go a long way towards solving the farm problem. It provides government assistance that will enable farmers through their co-operative organizations to control the production and marketing of their crops. The Farm Board was created to administer the law and is ready to extend every assistance that is authorized. The Board, however, can proceed no faster than farmers are willing to go collectively for it must deal with them through their associations and not as individuals.

"Believing when it undertook its task, a year ago in July, that organization was a first essential, the Farm Board has concentrated its efforts largely on helping existing co-operatives to centralize and expand their activities. Co-operatives handling a particular commodity were assisted in setting up central co-operative marketing agencies for that commodity. To date, the co-operatives with the assistance of the Board have established seven national commodity co-operative sales agencies. These include grain, live stock, wool and mohair, cotton, pecans, beans and sugar beets.

Not Price Fixing

"The function of these agencies is to merchandise the products handled by their member associations and not to fix

or raise prices artificially. They are owned and controlled by the farmer associations that set them up. They are in no sense agencies of the Government or agencies of the Farm Board. They are simply a machinery of the people who produce a crop to market that crop. Great care has been taken in their organization to see that they are set up on a sound financial basis so that they will be in position, with experience and growth, to operate without governmental advice or assistance. So long as these agencies borrow Federal funds, the requirement is made that their management shall be satisfactory to the Farm Board.

Farm Board Helps

"In addition to helping co-operatives establish the seven national co-operatives sales agencies, the Farm Board is assisting other co-operative groups in the development of regional or central marketing programs for the commodities they handle, such as dairy products, rice, potatoes, apples, sour cherries and various other fruits and vegetables. Special mention perhaps should be made of the co-operative program that has been worked out by the California raisin-grape industry with the assistance of the Board. More than 85 per cent of the growers have joined in the program which provides for voluntary contributions by them to remove the surplus and convert as much as possible of that surplus into by-products for which there is a market and thereby prevent the surplus from unduly depressing fresh grape and raisin prices.

Time Not Arrived

"From our experience of the past few months the Farm Board confidently believes that the principles of the Agricultural Marketing Act not only are sound but offer the best approach to dealing with the farm problem. Various suggestions have been made of changing the law. Such action, in our opinion, would be a serious mistake. It may be that greater experience will demonstrate the need for amendment, but that time has not arrived. It is our judgment that substantial progress is being made in developing co-operative marketing and that much more can be expected in the next year.

"Tinkering with the law at this time very likely would check the progress that is being made by growers in organizing for collective action with the result that those who are opposing co-operative marketing, and not the farmer, would be benefited. Agriculture cannot be made prosperous by legislation. That will come only when the producers operate their industry on a sound financial basis. The Agricultural Marketing Act offers them a means of organizing to do this collectively. Success of the program that is being developed under that law will depend largely on the willingness of farmers to take advantage of the opportunity before them.

"In conclusion, I wish to emphasize the fact that we do not want farmers to think that the Farm Board believes that co-operative marketing alone will solve the agricultural problem. The method of distribution and marketing is vital, but, as we have shown, there is a great deal more to be done by the individual farmer himself than simply joining a co-operative marketing organization, and in improving the distribution and marketing of his products."

County Oil Company Managers Meet

TWO district meetings of county supply company managers were held at Chicago and Springfield on August 26 and August 29 respectively.

A large number of managers, officers and directors of the oil companies affiliated with the Illinois Farm Supply Company attended the conference. The discussion was devoted largely to business routine including the establishment of uniform prices on lubricating oils and greases sold throughout the state. Attention was called to the need for more co-operation rather than competition between the county companies.

The following managers attended one or the other of the two conferences:

Wilmer Cornwell, Adams Service Company; Lester A. Rahn, Carroll Service Company; J. M. Winkleblack, Coles County Supply Company; W. E. Jones, Christian County Farmers' Supply Company; Walker Thorp, DeWitt County Service Company; H. W. Cotterman, Edgar County Farm Bureau Supply Company; Russell G. Stewart, Ford County Service Company; Ray A. Garber, Fulton Service Company; Roy T. Ferguson, Henry County Supply Company; W. O. Wilson, Jersey County Farm Supply Company; G. C. Warne, Kane County Service ompany; F. A. Leach, Kendall Farmers' Oil Company; R. H. Keeler, Knox County Oil Company; M. H. Comisky, LaSalle County Farm Supply; Fred R. Bybee, Lee County Service Company; T. M. Livingston, Livingston Service Company; F. J. Lanterman, Logan Farm Supply Company; C. E. Jones, Macon County Supply Company; D. R. Smith, Marshall-Putnam Oil Company; J. R. Taylor, McDonough Service Company; George Curtiss, McLean County Service Company; M. H. Colson, Menard County Farmers' Supply Company; George Henry, Montgomery County Farmers' Oil; Lloyd Woolsey, Peoria County Service Company; Leslie Miles, Rich-Law Serviee Company; L. B. Jones, Schuyler Service Company; Clyde Woolsey, Tazewell Service Company; J. L. Stormont, Tri-County Oil Company; J. D. Bunting, Wabash Valley Service Company; Alfred Sutton, Will County Farm Supply Company; D. G. Bonar, Winnebago Service Company; G. G. Ludwig, Woodford County Service Company; and C. L. Jewsbury, Morgan Farmers' Oil Company.

Farmers' National Grain Corporation

Owned by 26 Co-Operative Grain Marketing Organizations, Handles One-Third Wheat at Kansas City

FARMERS' National Grain Corporation is owned by twenty-six large-scale co-operative grain marketing associations, their location in all grain areas of the country making the services and benefits of the national sales agency available to every grain producer. District and local offices for the expeditious handling of the corporation's business are maintained in St. Paul, Minneapolis and Duluth, Minn.; Great Falls, Mont.; Kansas City, Mo.; Omaha, Neb.; Wichita, Kan.; Enid, Okla.; St. Louis, Mo.; Indianapolis, Ind.; Denver, Colo.; Ogden, Utah; Pendleton and Portland, Ore., and Spokane and Seattle, Wash. These offices give Farmers' National representation in practically every important grain growing area.

July Business

During July, the first month of the new crop season, Farmers' National bought a total of 17,121,718 bushels of grain, including wheat, corn, oats and barley. Of the total receipts of wheat at Kansas City during the month 32 per cent, or nearly one-third, was handled by stockholders of the Farmers' National. Branch offices at Omaha, Neb.; Enid, Okla., and Wichita, Kan., also handled a very large volume of business, as did branch offices at St. Louis and Indianapolis, in the soft wheat territory. Purchases did not include large volumes of wheat stored by members to be sold through the Farmers' National at such times as they desire to place it on the market. On the early crop movement in the Pacific Northwest and the Intermountain territory the corporation has handled a very fair share of the wheat marketed, while in the spring wheat area the district office at St. Paul, with branches at Minneapolis and Duluth, Minn., and Great Falls, Mont., is taking care of all the wheat members have for sale in those markets. Export business has been good, the corporation handling wheat direct from member co-operatives to millers and other buyers in foreign countries.

Booklets Available

A booklet entitled "A Message and a Challenge to the American Grain Producer," describes the organization plan of Farmers' National Grain Cor-

poration and the relationship of co-operative marketing organizations and individual farmers to the corporation. Copies of these booklets are available to all. Another booklet deals with the loan program of the corporation. These are available for limited distribution to co-operative organizations, officials, farm organization leaders and field men. Copies of either booklet may be obtained by writing direct to Farmers' National Grain Corporation, division of organization and publicity, Fisher Building, Chicago, Ill. When writing for loan booklets please state farm organization connections.

Marketing Machinery

More farmers will market their grain co-operatively in the United States during the 1930-1931 crop season than ever before, and the co-operatives' equipment for handling the grain is not only in better shape than ever before but is steadily improving. Farmers' National now has under its control, which means farmer control, approximately 20,000,000 bushels of storage space on important grain terminals, with additional marketing machinery at sub-terminals. Co-operative stockholders are steadily increasing their own holdings of country, sub-terminal and terminal storage space and adding new elevator units to their organizations. All this means that the grain co-operatives are advancing toward the point where they will be able to hold their grain near the point of production until demand requires its movement to the buyer. The grain thus will be kept out of the world's "show windows," where its presence, in quantities greater than are called for by immediate consumptive demand, becomes a depressing influence on market values.

Export Department

Export business of Farmers' National Grain Corporation has developed in a highly satisfactory manner. Through this department the corporation has established contacts with millers and other buyers in all the principal grain importing countries of the world. In one day during July wheat was shipped to eight different ports, in bottoms chartered by the corporation. Thus the American grain producer was able for the first time to ship grain all the way from the farm to the last buyer through farmer-owned and farmer-controlled channels, without the intervention of a single outside agency.

Farm taxes, on the average, take 30 per cent of the farmers' net income, according to Dr. Hibbard, economist at the University of Wisconsin.

Mrs. Belle Holmes of Mercer county receives drum of Penn Bond motor oil won in drawing at the Illinois State Fair, Friday, August 22. The drum was delivered to her home by one of Tri-County Oil Co. salesmen. Paul M. Lauer of Lee county won the drum of oil at the Central States Exposition at Aurora. The prize was delivered by Lee County Service Co. of Amboy.

KEEPING WELL

By Dr. John A. Boland

Prevention of Diptheria

BEFORE the discovery of antitoxin the mortality rate in diphtheria was about 40 per cent. Since its use this figure has dropped to about 10 per cent. If antitoxin is used in the first twenty-four hours, nearly every case can be saved. Rarely is a diagnosis made before the third or fourth day. This delay causes irreparable damage to vital organs that cannot be neutralized by the subsequent administration of antitoxin. With the positive fact staring us in the face that one out of every ten dies that contracts diphtheria, not counting the large number that are invalided as the result of complications, we cannot laud too highly any treatment that will actually prevent diphtheria in 85 per cent to 95 per cent of all persons properly treated.

Diphtheria annually kills more children than any other disease of childhood. The time is not far off when every death from diphtheria will be looked upon as one of criminal negligence upon the part of someone. This must fall either on the family physician or the parents.

Over 80 per cent of all cases of diphtheria occur in children under the age of 10.

Over 64 per cent of all cases and over 80 per cent of all deaths from diphtheria occur in children under the age of 5.

From 85 per cent to 95 per cent of all persons receiving proper preventative treatment with toxin-antitoxin become immune. There is no need for any child to suffer from diphtheria. Medical science has made this one of the most easily preventable of all diseases. The procedure is simple, produces no ill effects and is in no way dangerous to the child. Immunization or protection against diphtheria consists of three small injections of toxin-antitoxin at intervals of five to seven days.

The duty lies with the parents to have their children, between the ages of 6 month and 6 years, immunized against diphtheria by having them receive the toxin-antitoxin at once. This is advisable insomuch as about 95 per cent of children between these ages are susceptible to diphtheria.

A test known as the "Schick Test" is advised in children past 6 years of age. This is a simple skin test to determine if a child is susceptible to the disease. If the child has a negative Schick Test it will not be necessary that he receive the toxin-antitoxin.

The susceptibility to diphtheria decreases with age. However, this is not altogether true in rural districts as Schick Tests have shown that between 20 per cent and 30 per cent of adults in those districts are susceptible to diphtheria.

With a 10 per cent mortality rate in diphtheria at the present time, it seems to me the duty of parents is plain. Consult your family physician today and make arrangements to have your children receive the toxin-antitoxin at once and wipe out this dreaded disease.

Supplies of fed cattle during the first half of 1931 are expected to be smaller than in 1930, reports the Bureau of Agricultural Economics. Demand for stocks and feeders this fall will not equal that of last year, and for that reason slaughter is likely to be somewhat greater.

The Bureau believes that prospects favor a material advance in cattle prices in the next 12 months.

Up to Farmer, Legge Tells New York Folks

Ought to Heed Advice About Production from Washington, He Says

"PERHAPS the soundest advice we can give to agriculture is contained in the one word, 'Organize'," declared Alexander Legge, chairman of the Federal Farm Board, before the New York State Farm Bureau Federation meeting at the New York State Fair, Syracuse, on September 2.

"Properly organized, I cannot see any reason why agriculture might not go even farther than industry," said Mr. Legge, "inasmuch as most of your products are consumed every day and several times a day and the consumption must be fairly continuous if we are to live.

Alexander Legge

"The greatest difficulty we have to contend with," he continued, "is that in some mysterious way, through legislative action or otherwise, the handicap under which agriculture is suffering, will be removed, and the position of the farmer made secure without any action on his part. My friends, this is not even a good dream. It is currently believed that dreams sometimes come true, but this one never will."

Farmer Doesn't Get It

He called attention to the information being collected continuously by the government regarding agricultural production and markets. "One trouble has been in the past," he said, "that the information apparently has not gotten through to the man interested and that is the farmer producing the commodity. Earnest efforts are being made to revise and condense this vast fund of information and put it in such shape that the producer can readily understand just how it applies to his particular problem."

Mr. Legge stated that the Federal Farm Board has extended aid to 17 different classes of agricultural products already. He pointed out that the more strongly organized groups naturally secure the first benefits. "We cannot loan to an individual farmer, or to a merchant or a banker," he said. "Loans are restricted to co-operative organizations, producer-owned and producer-controlled." He asked New York farmers if they were not neglecting to organize and advertise their apple crop. "As a boy back on the farm in a far western state," he said, "when we were able to get a barrel of New York apples for Christmas it was a real occasion. Everybody regarded them as the finest quality produced anywhere. Aren't you people in the Empire State rather neglecting this commodity, and if so, why?

Need Better Organization

"Your land values are not high as compared to other sections of the country where this crop is raised extensively. Large consuming markets are close at hand and certainly no one can produce a better quality of product. With a good strong marketing organization to insure the producer getting his full percentage of the consumer's dollar, it is my notion that this industry might be safely developed to considerably larger proportions than at present."

He called attention to the fact that during the past 30 years the medium-sized, or smaller than average crop invariably made the greatest financial return.

Principles Sound

"From our experience of the past few months the Farm Board confidently believes that the principles of the Agricultural Marketing Act not only are sound but offer the best approach to dealing with the farm problem," Legge continued. "Various suggestions have been made of changing the law. Such action, in our opinion, would be a serious mistake. It may be that greater experience will demonstrate the need for amendment, but that time has not arrived.

"Agriculture cannot be made prosperous by legislation. That will come only when the producers operate their industry on a sound basis. Success of the program that is being developed under that law will depend largely on the willingness of farmers to take advantage of the opportunity before them."

Speaks to Grange

On the following day, September 3, Mr. Legge gave a similar talk before the New York State Grange meeting at the New York State Fair. He stated that the Farm Board had advised reduction in acreage only in wheat and cotton, calling to the attention of certain other growers the danger of expanding production in other crops.

Referring to the Agricultural Marketing Act, he said: "The success of the program is not going to depend so much on what the Board does, but on the willingness of farmers to act collectively."

FOUR County Farm Bureau teams are on the last lap of the race for the Illinois Farm Bureau baseball championship. As we go to press word comes that Sangamon county, one of the leading contenders for the state championship, was defeated in a 11-inning game at Springfield on September 6. Logan county was the victor. Details of the game are lacking. A brief report states that Sangamon slammed out 19 hits while Logan was getting 15, but the latter came out at the long end of the 10 to 9 score. Three-I league umpires officiated.

Carroll county turned the tables on LaSalle at the Carroll county picnic near Lanark the same day. The score was 9 to 5. LaSalle won the first game played at Ottawa the week before. The next game will decide which team shall go on in the race. McDonough county will play either LaSalle or Carroll in the semi-final play-off, and the winner of that series will play Logan in the final battle of the year.

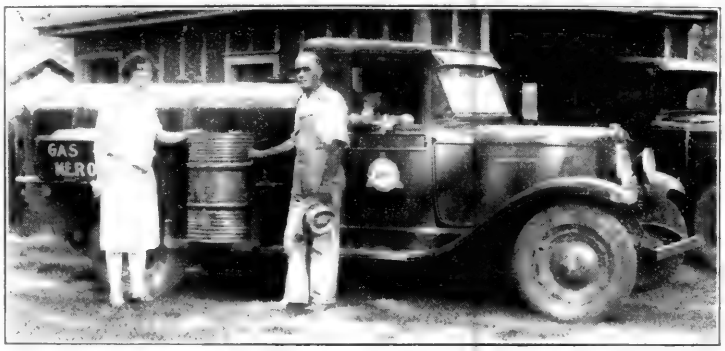
Hard Fought Series

The Sangamon-Logan series was one of the hardest-fought matches of the season. After being defeated for the first time this year by Logan, Sangamon came back in the second game at Chatham, August 26, and won 6 to 5. Logan county had the best of the argument in this game and led by two runs until the ninth when Sangamon bunched enough hits to drive three markers across the home plate. In the last game Langley, Sangamon county pitcher, struck out eight men and walked five. The Logan county hurlers, Quisenberry and Hanahan, struck out six men and walked two.

One of the surprises in the semi-final play-off was LaSalle county's victory over the strong Carroll county nine at Ottawa on August 28.

LaSalle county won 7 to 5, although Carroll got nine hits to LaSalle's eight. A feature of the game was the triple play in the ninth which ended Carroll county's threat to win. Carroll had men on first and third when E. Sturtevant hit to Kirkhus, the LaSalle county second baseman. Kirkhus threw the ball to first to retire the batter, the first baseman shot the ball to the catcher to get Ganger, who was stealing home, and the catcher hurled the ball to the third baseman to catch the base runner there to end the game.

poration and the relationship of co-operative marketing organizations and individual farmers to the corporation. Copies of these booklets are available to all. Another booklet deals with the loan program of the corporation. These are available for limited distribution to co-operative organizations, officials, farm organization leaders and field men. Copies of either booklet may be obtained by writing direct to Farmers' National Grain Corporation, division of organization and publicity, Fisher Building, Chicago, Ill. When writing for loan booklets please state farm organization connections.



Marketing Machinery

More farmers will market their grain co-operatively in the United States during the 1930-1931 crop season than ever before, and the co-operatives' equipment for handling the grain is not only in better shape than ever before but is steadily improving. Farmers' National now has under its control, which means farmer control, approximately 20,000,000 bushels of storage space on important grain terminals, with additional marketing machinery at sub-terminals. Co-operative stockholders are steadily increasing their own holdings of country, sub-terminal and terminal storage space and adding new elevator units to their organizations. All this means that the grain co-operatives are advancing toward the point where they will be able to hold their grain near the point of production until demand requires its movement to the buyer. The grain thus will be kept out of the world's "show windows," where its presence, in quantities greater than are called for by immediate consumptive demand, becomes a depressing influence on market values.

Export Department

Export business of Farmers' National Grain Corporation has developed in a highly satisfactory manner. Through this department the corporation has established contacts with millers and other buyers in all the principal grain importing countries of the world. In one day during July wheat was shipped to eight different ports, in bottoms chartered by the corporation. Thus the American grain producer was able for the first time to ship grain all the way from the farm to the last buyer through farmer-owned and farmer-controlled channels, without the intervention of a single outside agency.

Farm taxes, on the average, take 30 per cent of the farmers' net income, according to Dr. Hibbard, economist at the University of Wisconsin.

Mrs. Belle Holmes of Mercer county receives drum of Penn Bond motor oil won in drawing at the Illinois State Fair, Friday, August 22. The drum was delivered to her home by one of Tri-County Oil Co. salesmen. Paul M. Lauer of Lee county won the drum of oil at the Central States Exposition at Aurora. The prize was delivered by Lee County Service Co. of Amboy.

KEEPING WELL

By Dr. John A. Boland

Prevention of Diptheria

BEFORE the discovery of antitoxin the mortality rate in diphtheria was about 40 per cent. Since its use this figure has dropped to about 10 per cent. If antitoxin is used in the first twenty-four hours, nearly every case can be saved. Rarely is a diagnosis made before the third or fourth day. This delay causes irreparable damage to vital organs that cannot be neutralized by the subsequent administration of antitoxin. With the positive fact staring us in the face that one out of every ten dies that contracts diphtheria, not counting the large number that are invalided as the result of complications, we cannot laud too highly any treatment that will actually prevent diphtheria in 85 per cent to 95 per cent of all persons properly treated.

Diphtheria annually kills more children than any other disease of childhood. The time is not far off when every death from diphtheria will be looked upon as one of criminal negligence upon the part of someone. This must fall either on the family physician or the parents.

Over 80 per cent of all cases of diphtheria occur in children under the age of 10.

Over 64 per cent of all cases and over 80 per cent of all deaths from diphtheria occur in children under the age of 5.

From 85 per cent to 95 per cent of all persons receiving proper preventative treatment with toxin-antitoxin become immune. There is no need for any child to suffer from diphtheria. Medical science has made this one of the most easily preventable of all diseases. The procedure is simple, produces no ill effects and is in no way dangerous to the child. Immunization or protection against diphtheria consists of three small injections of toxin-antitoxin at intervals of five to seven days.

The duty lies with the parents to have their children, between the ages of 6 month and 6 years, immunized against diphtheria by having them receive the toxin-antitoxin at once. This is advisable insomuch as about 95 per cent of children between these ages are susceptible to diphtheria.

A test known as the "Schick Test" is advised in children past 6 years of age. This is a simple skin test to determine if a child is susceptible to the disease. If the child has a negative Schick Test it will not be necessary that he receive the toxin-antitoxin.

The susceptibility to diphtheria decreases with age. However, this is not altogether true in rural districts as Schick Tests have shown that between 20 per cent and 30 per cent of adults in those districts are susceptible to diphtheria.

With a 10 per cent mortality rate in diphtheria at the present time, it seems to me the duty of parents is plain. Consult your family physician today and make arrangements to have your children receive the toxin-antitoxin at once and wipe out this dreaded disease.

Supplies of fed cattle during the first half of 1931 are expected to be smaller than in 1930, reports the Bureau of Agricultural Economics. Demand for stocks and feeders this fall will not equal that of last year, and for that reason slaughter is likely to be somewhat greater.

The Bureau believes that prospects favor a material advance in cattle prices in the next 12 months.

Up to Farmer, Legge Tells New York Folks

Ought to Heed Advice About Production from Washington, He Says

"PERHAPS the soundest advice we can give to agriculture is contained in the one word, 'Organize'," declared Alexander Legge, chairman of the Federal Farm Board, before the New York State Farm Bureau Federation meeting at the New York State Fair, Syracuse, on September 2.

"Properly organized, I cannot see any reason why agriculture might not go even farther than industry," said Mr. Legge, "inasmuch as most of your products are consumed every day and several times a day and the consumption must be fairly continuous if we are to live.

Alexander Legge

"The greatest difficulty we have to contend with," he continued, "is that in some mysterious way, through legislative action or otherwise, the handicap under which agriculture is suffering, will be removed, and the position of the farmer made secure without any action on his part. My friends, this is not even a good dream. It is currently believed that dreams sometimes come true, but this one never will."

Farmer Doesn't Get It

He called attention to the information being collected continuously by the government regarding agricultural production and markets. "One trouble has been in the past," he said, "that the information apparently has not gotten through to the man interested and that is the farmer producing the commodity. Earnest efforts are being made to revise and condense this vast fund of information and put it in such shape that the producer can readily understand just how it applies to his particular problem."

Mr. Legge stated that the Federal Farm Board has extended aid to 17 different classes of agricultural products already. He pointed out that the more strongly organized groups naturally secure the first benefits. "We cannot loan to an individual farmer, or to a merchant or a banker," he said. "Loans are restricted to co-operative organizations, producer-owned and producer-controlled." He asked New York farmers if they were not neglecting to organize and advertise their apple crop. "As a boy back on the farm in a far western state," he said, "when we were able to get a barrel of New York apples for Christmas it was a real occasion. Everybody regarded them as the finest quality produced anywhere. Aren't you people in the Empire State rather neglecting this commodity, and if so, why?

Need Better Organization

"Your land values are not high as compared to other sections of the country where this crop is raised extensively. Large consuming markets are close at hand and certainly no one can produce a better quality of product. With a good strong marketing organization to insure the producer getting his full percentage of the consumer's dollar, it is my notion that this industry might be safely developed to considerably larger proportions than at present."

He called attention to the fact that during the past 30 years the medium-sized, or smaller than average crop invariably made the greatest financial return.

Principles Sound

"From our experience of the past few months the Farm Board confidently believes that the principles of the Agricultural Marketing Act not only are sound but offer the best approach to dealing with the farm problem," Legge continued. "Various suggestions have been made of changing the law. Such action, in our opinion, would be a serious mistake. It may be that greater experience will demonstrate the need for amendment, but that time has not arrived.

"Agriculture cannot be made prosperous by legislation. That will come only when the producers operate their industry on a sound basis. Success of the program that is being developed under that law will depend largely on the willingness of farmers to take advantage of the opportunity before them."

Speaks to Grange

On the following day, September 3, Mr. Legge gave a similar talk before the New York State Grange meeting at the New York State Fair. He stated that the Farm Board had advised reduction in acreage only in wheat and cotton, calling to the attention of certain other growers the danger of expanding production in other crops.

Referring to the Agricultural Marketing Act, he said: "The success of the program is not going to depend so much on what the Board does, but on the willingness of farmers to act collectively."

Baseball Dope

FOUR County Farm Bureau teams are on the last lap of the race for the Illinois Farm Bureau baseball championship. As we go to press word comes that Sangamon county, one of the leading contenders for the state championship, was defeated in a 11-inning game at Springfield on September 6. Logan county was the victor. Details of the game are lacking. A brief report states that Sangamon slammed out 19 hits while Logan was getting 15, but the latter came out at the long end of the 10 to 9 score. Three-I league umpires officiated.

Carroll county turned the tables on LaSalle at the Carroll county picnic near Lanark the same day. The score was 9 to 5. LaSalle won the first game played at Ottawa the week before. The next game will decide which team shall go on in the race. McDonough county will play either LaSalle or Carroll in the semi-final play-off, and the winner of that series will play Logan in the final battle of the year.

Hard Fought Series

The Sangamon-Logan series was one of the hardest-fought matches of the season. After being defeated for the first time this year by Logan, Sangamon came back in the second game at Chatham, August 26, and won 6 to 5. Logan county had the best of the argument in this game and led by two runs until the ninth when Sangamon bunched enough hits to drive three markers across the home plate. In the last game Langley, Sangamon county pitcher, struck out eight men and walked five. The Logan county hurlers, Quisenberry and Hanahan, struck out six men and walked two.

One of the surprises in the semi-final play-off was LaSalle county's victory over the strong Carroll county nine at Ottawa on August 28.

LaSalle county won 7 to 5, although Carroll got nine hits to LaSalle's eight. A feature of the game was the triple play in the ninth which ended Carroll county's threat to win. Carroll had men on first and third when E. Sturtevant hit to Kirkhus, the LaSalle county second baseman. Kirkhus threw the ball to first to retire the batter, the first baseman shot the ball to the catcher to get Ganger, who was stealing home, and the catcher hurled the ball to the third baseman to catch the base runner there to end the game.

33,000 Killed, Over 750,000 Injured, 1929

Auto Accidents Take Heavy Toll, Cause and Prevention Shown

By V. Vaniman

WITH 33,000 people killed and over 750,000 injured in auto accidents in the United States during the year 1929, every thinking person will agree that something should be done about it. Something is being done and more will be done.

A careful study of accidents by safety engineers indicates that at least 75 per cent of automobile mishaps, with reasonable care, are preventable.

Causes of Accidents

Following are some of the common causes of accidents:

1. Making left hand turns
2. Passing car on grade
3. Failing to stop when going on to main highway
4. Passing car on curve.
5. Driving blind (going ahead full speed when driver cannot see what is ahead on account of bright lights, dust or fog)
6. Poor mechanical equipment and lack of judgment on part of driver.

In a safety drive put on in Evanston recently by the Accident Prevention Bureau it was discovered that among 600 cars there were no less than 538 defective in brakes, lights or steering gears; in other words, drivers are notoriously careless about the driving mechanism of the car.

Drivers' License Law

Nine states since 1916 have adopted a drivers' license law—Masschusetts, Connecticut, New York, Pennsylvania, New Jersey, Maryland, California, Vermont, Arizona.

The National Safety Council is responsible for the statement that "Since the enactment of these laws requiring a drivers' license there has been 29 per cent fewer automobile fatalities than there would have been if they had experienced the same per cent increase which occurred in the non-licensed states reporting to the U. S. Bureau." This difference amounts to 22,000 lives up to December 31, 1929.

In the seven largest states—Connecticut, Massachusetts, New York, California, Pennsylvania, New Jersey and Maryland the accident curve shows a downward trend and in each one the average of the index figures, for the year following the adoption of the law, is below the similar average before the passage of the law—the deduction ranging from 10 to 36 per cent.

A total of $850,000,000 per year is the figure estimated by the Statistical Bureau of the National Safety Council as the cost of automobile accidents. In this estimate the mortuary value of a human life was estimated at $5,000. September, October and November are the high months in auto fatalities.

All drivers of automobiles would like to be classed as good drivers. A good driver always has his car under control; appreciates the problems of a fellow motorist; indicates his intention by signaling; stops on entering main highway; does not try to pass car on curve; always makes sure in passing a vehicle that he will not be struck by another vehicle, and actually uses more care and caution than is called for by law. He does not try to beat a train across a railway crossing, and also makes sure of the mechanical condition, and especially that the brakes are in good working order.

A careful study of the relation of the mental condition at the time of an accident indicates that anger, surprise, fatigue, fear, anxiety and fascination, have a direct bearing on increasing the number of accidents; while self-respect, happiness and good morals are positive factors in accident prevention.

Prof. Smith Passes After Brief Illness

THE sudden passing of Professor W. H. Smith, state leader of farm advisers and for the past 20 years connected with the University of Illinois extension staff, shocked his many friends throughout the state. Prof. Smith failed to rally following an intestinal operation. He had been active at the State Fair, Springfield, only the week before his death, looking after the 4-H club exhibits and demonstrations.

Prof. Smith for many years served as live stock extension specialist succeeding Dr. Geo. Coffey as state leader when he resigned more than seven years ago. Prof. Smith, a graduate of the University of Nebraska, was a keen student of farm production problems and extension work. His judgment was respected by all who knew him.

Smith befriended and took a great deal of interest in the younger farm advisers and extension men. He advocated the group method of carrying on farm advisory work rather than personal calls from farm to farm. His passing will be a distinct loss to the extension staff at the state university.

Farmers in the United States own more than 2,500,000 radio sets, or more than the number operating in any other foreign country, according to a late report.

Expect Large Volume Limestone to Be Used

Urge That Limestone, Rock Phosphate, Legume Plan of Soil Building Be Continued

A LARGE tonnage of agricultural limestone will be spread on Illinois farms to neutralize acid soils in 1930 in spite of the financial depression and drought conditions, according to quarry operators who met recently with representatives of the Illinois Agricultural Association.

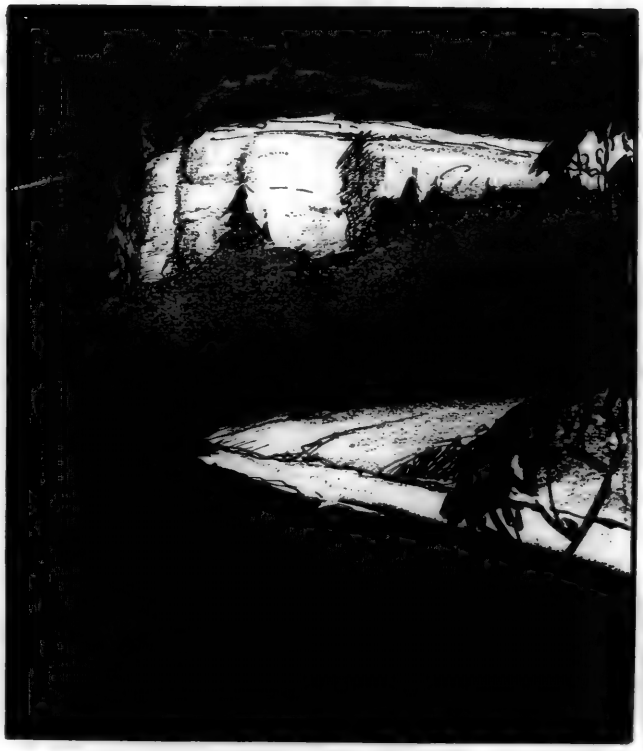
While there will be some recession from the record years of 1929 when approximately 925,000 tons of limestone were spread on Illinois farms, the producers state that the volume of sales this year has held up well. The quarry operators reported a heavy falling off in orders for concrete stone and sizes other than agricultural, however. As a result the supply of farm limestone which is a by-product in the manufacture of other stone, is lower than usual and the quarry men are not disposed to cut prices.

The extension of credit to farmers for purchasing limestone was considered at the recent meeting. It was generally agreed that this matter should be left largely to the local banker with the recommendation that he go as far and safely as he possible can in lending money to buy limestone.

Established crop rotation systems with the use of limestone, rock phosphate, and legumes should be continued even if it means extraordinary effort and sacrifice, states J. R. Bent, director of the I. A. A. limestone-phosphate department. With the stimulation of agricultural production throughout the world, the necessity for higher yields per acre with consequent lower cost production becomes more apparent each day. Recent advice from the Federal Farm Board is that wheat acreage be cut so as to supply only domestic needs since other countries are able to produce wheat cheaper than most wheat growers in the United States.

"I. A. A. Transpoprtation Dept.

"Just wanted to tell you that the yards at Paloma have been put in excellent condition. When the foreman came to start the job he found our local shipper, Mr. McNeal, and asked him just what he wanted, and he fixed them up as our man told him.



"This is the kind of service the I. A. A. is noted for, and we certainly appreciate it."

DRIVER LEAPS TO SAFETY AS CAR HANGS ON BRINK OF SEA WALL
The driver of the car, shown above, leaped to safety when the wheels of the car skidded in the snow and crashed into the rail of the sea wall in Winthrop Shore Drive, Boston, Mass.

ON THE RAGGED EDGE

Theft

Collision

THE automobile or truck owner who drives on the public highways without adequate insurance protection is running on the ragged edge. An accident resulting in personal injury places his estate in jeopardy. A judgment may relieve him of all his property. He never knows how soon he may be hailed into court, and compelled to hire a lawyer to defend himself. *Uncertainty* and *Chance* are his constant companions.

DRIVE WITH CONFIDENCE

In contrast is the Farm Bureau member motorist carrying adequate insurance in his own company. He drives with confidence the broad, smooth highway of protection. Come what may, his policy, backed by more than a half million in assets and an organization 60,000 strong, stands ready to defend him, guard his property, and protect his family and estate against the unforseen.

The Illinois Agricultural Mutual auto insurance policy offers protection against public liability and property damage, collision, fire, theft and windstorm damages. It has desirable features found in no other. Ask your local agent to explain, call at your County Farm Bureau office, or mail the coupon and let us tell how you can save money by insuring in YOUR OWN COMPANY at cost.

WLS to Become Real Co-Operative Station

Farm Organizations, Farm Press, and Farm Co-Operatives Incorporate Agricultural Radio Association

ORGANIZATION of the Agricultural Radio Association by representative general farm organizations, farm co-operatives, and farm publications in the cornbelt states to control and have the option of purchase of Station WLS, Chicago, was announced at a hearing before the Federal Radio Commission in Washington recently.

This move which has great significance and import in the field of radio broadcasting was taken to insure that Middle West agriculture will have at least one prominent wave length over which the viewpoint of American farmers can be presented without restriction.

Private Control

All the other prominent wave lengths at Chicago, and most other cities, in fact, have been turned over to private interests which include newspapers, public utility companies, and the like. In some instances farmers have been prevented from broadcasting their side of controversial issues, and Illinois farmers still recall that the I. A. A. was summarily dismissed from Station WGN presumably because it advocated a state income tax.

Plans to be announced later contemplate making Station WLS a real voice of agriculture, owned and controlled co-operatively by the people who make up the rural population of the Middle West.

Official Statement

The official statement announcing the new project prepared for the Radio Commission by officials of the A. R. A. and presented at Washington by W. C. McQueen, president of the Pure Milk Association, follows:

"Recognizing the many changing conditions in radio development and particularly the gradual, but very definite, control of wave lengths being acquired by other than agricultural interests; and further recognizing that the farmers of the central west are surely entitled to the ownership and control of one prominent wave length, certain agricultural leaders of the mid-west states held a conference early in February of this year to consider ways and means where the proper interests of agriculture might be served in this respect. Negotiations have continued throughout the past several months, resulting in the recent incorporation of the Agricultural Radio Association. The primary purpose of the Agricultural Radio Association will be directed toward preserving the rightful interests of agriculture, especially insuring the future privilege and opportunity for freedom of expression by farmers on all matters affecting the economic welfare of their industry.

"Incorporators and the original Board of Directors of the Agricultural Radio Association are as follows:

Earl C. Smith, President, Illinois Agricultural Association.
W. C. McQueen, President, Pure Milk Assn.
C. V. Gregory, Editor-in-Chief, Prairie Farmer.
M. S. Winder, Executive Secretary, American Farm Bureau Federation.
Chas. E. Hearst, President, Iowa Farm Bureau Federation.
Wm. H. Settle, President, Indiana Farm Bureau Federation.
M. L. Noon, President, Michigan Farm Bureau Federation.
H. C. Hemingway, President, Wisconsin Farm Bureau Federation.
Henry H. Parke, President, Chicago Producers' Commission Association.
J. R. Fulkerson, President, Producers' Live Stock Commission Assn., East St. Louis, Ill.
S. R. McKelvie, Publisher, Nebraska Farmer.

Entered Contract

"The Agricultural Radio Commission has entered into a contract with the Agricultural Broadcasting Company, owner of Radio Station WLS, wherein the policies of this station will in the future be determined, controlled and directed by the said Agricultural Radio Association. Along with this contract, the Agricultural Broadcasting Company has executed an option for purchase of Station WLS covering a period of several months, thereby offering the opportunity for the farmers of the mid-west

WHO PAYS THE BILL?

CONSTRUCTIVE action of farmers in organizing to market their own products is being met with bitter opposition by those who have a selfish interest in impeding co-operative success. Farmers are justified in asking "Who Pays the Bills"? for the flood of propaganda against the Farm Board and co-operative grain marketing now being sprend throughout Illinois.

C. H. Bonnell's Letter Repudiates Propaganda

Shows How Attitude of Farmers Grain Dealers Association Is Being Misrepresented

A REPUDIATION of an announcement widely circulated among Illinois elevators and newspapers to the effect that the Illinois Farmers Grain Dealers' Association had attacked the Federal Farm Board and the Farmers National Grain Corporation was contained in a letter received by an official of the Farmers National from C. H. Bonnell, president of the Farmers Grain Dealers Association of Illinois on Oct. 7.

"Our association (Farmers Grain Dealers Association of Illinois) has never authorized nor endorsed any letter or statement criticizing the members or the policies of the Federal Farm Board, and we earnestly desire that its aims may be realized," stated Mr. Bonnell's letter.

The propaganda referred to above was circulated by one R. B. Orndorff who without any authority to do so has acted as chief spokesman for the farmers' elevator association using his recently acquired connection as vice-president of the organization to give an air of authenticity to the misstatements.

Farm Board Fights

Orndorff has not only embarrassed the farmers' elevator association, but he has imposed upon newspapers by misrepresenting facts. Only one Chicago newspaper, the Journal of Commerce, which champions the anti-co-operative school of thought, published the statement. All the others after learning the true situation threw it in the waste basket.

The malicious propaganda being circulated in Illinois against the Federal Farm Board and co-operative marketing is apparently part of a nationwide program to hinder farmers from giving co-operative marketing of grain under their own control a fair trial in the terminal markets.

A news report from Washington as of October 7 states that "The Federal Farm Board has decided to fight back against its enemies which it charges have instituted an 'insidious' propaganda campaign through rural newspapers in the middle west to discredit it in the eyes of the farmers.

"Samuel R. McKelvie, wheat member of the board, today announced that the board has laid its charges before the federal trade commission for investigation with a view to forcing into the open the alleged instigators of the campaign who, he said, are allied with representatives of private grain dealers' organizations.

Tells of Campaign

" 'The campaign has been carried on most insidiously,' Mr. McKelvie said. 'Recently they have secured both the open and active support of organizations pretending to support the farmers' movement and many people are being misled by their statements as to co-operative associations.'

"The usual practice, Mr. McKelvie said, has been to run a full-page advertisement in a rural paper and supply reading matter of the same nature to be printed with the advertisement. He had specimen sheets of this nature from Minnesota and Nebraska farm papers.

Calls Statement False

"'They are telling elevator managers that the Farmers' National Grain Corporation will step in and run their elevators, that they will have no control over their property, and that farmers will lose control over their own produce if they sell through co-operatives,' said Mr. McKelvie. 'Such false statements are clipped from the small papers and distributed all over the country.'

"Mr. McKelvie's announcement was the first word about any direct action taken by the board to combat attacks against it, no announcement having been made by the trade commission."

Wrest Control Away

The Farmers National Grain Corp. states that efforts are being made by old line grain interests in all the states to wrest control of the farmers' elevator associations away from the real producers so that they can be used for propaganda against the Farm Board and the Agricultural Marketing Act. In one or two states operators, apparently subsidized by private interests, have been successful in their insidious work. Obviously all efforts at stirring up strife among producers of farm commodities that prove successful will retard the development of co-operative marketing. In Illinois the propaganda has caused some confusion among farmer elevator stockholders who have been falsely led to believe that under the new co-operative marketing program they would be forced to relinquish control of their local elevators.

A meeting of state delegates of the National Farmers Grain Dealers Association with a committee of the Farmers National Grain Corporation it is reported will be held in Chicago early in December.

Who Killed Cock Robin, Is Question

Clay County Farmers Grateful to Board of Review for Lowering Tax Valuations

THE Clay County, Ill., Board of Review recently took exception to a statement published in the Clay County Republican announcing that "Over-assessment of farm lands and improvements disclosed by the Farm Bureau are being met by a flat 20 per cent reduction by the Clay County Board of Review."

The letter received by the Editor of the RECORD from Ralph Hastings, chairman of the Board of Review, to which the names of the other two members were signed, states that the Farm Bureau should not have any credit for bringing the justice of a reduction in valuations to the attention of the Board. Mr. Hastings, demanding that his letter be given publicity, states that the Board of Review made a tour of investigation in adjacent counties and that this trip and nothing else disclosed the fact that the land in Clay county was assessed higher than that in other counties with similar soil types.

Hastings' letter was brought to the attention of the Clay County Farm Bureau to which Mr. C. S. Love, of that organization, replied as follows:

"I truly believe that the pressure brought to bear by the Farm Bureau tax committee was responsible for the tax reduction. You were correct in your belief that the Clay County Farm Bureau tax committee appeared before the Board of Review previous to this year.

"When the Board of Review first went into session I personally appeared before them and asked if something could not be done to lower the assessed value on farm lands. At that time I stated that the assessment on household goods, compared to their real worth was not in keeping with the assessment on farm lands. The highest assessed value on any household goods in the township in which I am living is $50. I told them for one that I was not paying enough tares. At this time I was told that there was nothing that could be done as a definite budget had to be met and that lowering of the tax rate would not supply the necessary funds to meet this budget.

"Later a tax committee composed of Farm Bureau members appeared before the Board of Review. They were not given much encouragement. Later this committee met with County Judge Reaugh, at which time he promised to use his influence and recommend to the Board of Review that the assessed valuation on farm land be reduced.

"The next step taken by our tax committee was to draw up a resolution requesting the Board of Review to lower values on farm lands. These petitions were circulated in the various townships and were signed by several hundred farm owners. Before these petitions were presented, the Board of Review made a tour of surrounding counties and finding that comparative lands in Clay county were being assessed higher than the same kind of land in joining counties, a 20 per cent reduction was allowed.

"The petitions were never presented to the Board of Review because they took action before this material was necessary."

C. S. Love,
Clay County Farm Bureau,
Louisville, Ill.

Regardless of what prompted the board of review to equalize land valuations in line with other property, Clay county farmers, particularly Farm Bureau members, are grateful to Mr. Hastings and his colleagues, A. H. Kellums and L. H. Smith, for their conscientious work in getting the facts and acting on the information secured.

Station WLS

(Continued from page 3)

sections of the United States to individually and collectively acquire the absolute ownership and control of this station.

"It is a well known and accepted fact that Station WLS has for some time been the outstanding station serving the interests of agriculture and recognized generally by farmers as outstanding in its service to their interests.

"Should the option of purchase above referred to be executed, Radio Station WLS will not only become the property of the farmers of the central west, but one of its underlying principles will be the vesting of control of its policies on a basis wherein the general farm organizations of the territory served will control one-third of the voting power; the co-operative organizations and associations one-third and the so-called standard farm press one-third.

"It is believed that the above interests taken together would constitute as near as it is possible a true voice of agriculture.

"In view of the facts as stated above and the developments that are fast taking shape, the Agricultural Radio Association respectfully urges your Honorable Body to leave undisturbed and intact all rights and privileges now belonging to and enjoyed by the owners of Radio Station WLS."

Carthage Shipping Ass'n a Co-Operator

We Co-Operate in Shipping; Why Not in Marketing? Say Live Stock Producers

AT a recent meeting of the board of directors the Carthage Live Stock Shipping Association of Hancock county unanimously adopted the following resolution and ordered a copy sent to all members of the organization:

"We, the Board of Directors of the Carthage Live Stock Shipping Association, desire insofar as possible to support the co-operative idea in assembling, shipping, marketing and consigning all live stock belonging to our members. We seek to encourage the patronage of our own Producer agencies located at our terminal markets. Furthermore, all our shipments shall go to such agencies unless parties having majority of weight in any single shipment designate otherwise."

10 Years Old

The Carthage Association has been in operation for the past 10 years. In a letter addressed to all the members the directors said:

"The only way by which the live stock farmer will ultimately gain a voice in the actual selling of his live stock and some influence in determining a price will be for shipping associations to co-operate together in the same way that you as members have co-operated in building a successful shipping association here. Recognizing the fact that the Producer Live Stock Commission agencies on the terminal markets are striving toward the same ends on these markets that we are striving toward here, we feel that the co-operative shipping associations throughout the country should co-operate with the co-operative selling agencies on the terminal markets.

"We do not seek to force you as a member to send your live stock to the Producers nor to any other particular selling agency. We do wish, however, to urge you to give these co-operative selling concerns your most careful consideration and support. We do not attempt to guarantee the service of the Producers. We know that there will be times when you will not be satisfied. We recognize further that no matter where you ship live stock there will be times when the returns are not up to your full expectations. We do feel, however, that these Producer agencies are giving service equal to any available on the terminal markets. By concentrating our live stock in the hands of our own selling agency we are helping ourselves in our efforts to exercise more influence on both the prices which we receive for our live stock and the conditions under which it is sold."

Eating Habits of People Change

A DISTINCT change in the type of food people eat, during the last 20 years, was reported recently by O. E. Baker of the Federal Division of Land Economics.

The sedentary habits of the population, apartment house life, the use of machinery instead of human labor, possibly even the feminine fad of slenderness, as well as the development of new varieties of vegetables and of new methods of transporting them, are among the factors which have affected diet, Mr. Baker said.

The modern diet contains more protein and less carbohydrates than was formerly the case. The outstanding change in diet is a decline of about 100 pounds per capita in consumption of cereals, shown in a comparison of consumption for the last five years with the average for the five years, 1909 to 1913.

Counterbalancing this in part are increases in consumption of sugar, pork, milk and vegetable oils. Pork consumption has increased about 10 pounds per capita per year in the last 20 years, sugar consumption has gained about 27 pounds, and milk consumption possibly 150 pounds, it was pointed out.

In the total amount of food, in calories, consumed per capita, there probably has been a small decline.

FREE RENT OFFERED

"Am writing to inquire, if in your work you come across a good, dependable family who would go up on a 78-acre place, right near Chicago, with hollow tile house, chicken houses, etc., rent free, and make their own living. I do not want to pay out any money, but would like to get hold of a good reliable family, and it does seem as though there must be someone who could make a living on a place like this. Might add that this is on a private lake, and one part has seven cottages on it. If you know of anyone, and will put me in touch with them, would surely appreciate it, as I know I could make it interesting."

H. C. Williamson,
319 No. Crawford Ave.,
Chicago, Illinois.

Boulder Now "Hoover" Dam, Being Built

BOULDER DAM, which has been rechristened the "Hoover Dam," with its promise of water for irrigation, cheap power, and flood control, was a step nearer actuality Sept. 17 when Ray Lyman Wilbur, Secretary of the Interior, officially started construction of the $165,000,000 project.

Dr. Wilbur drove the first spike into the first tie for a branch railway from a point on the Union Pacific near Las Vegas, Nevada, to the rim of Black Canyon at the dam site. This is the first unit of the development. The spike, of Nevada silver, was presented by Governor Fred B. Balzar of Nevada to the president of the Union Pacific, who in turn gave it to Secretary Wilbur.

"We feel at this time we have nothing to celebrate," declared John C. Phillips, governor of Arizona, in declining the invitation of Secretary Wilbur to participate in the ceremonies.

Arizona Kicks

Governor Phillips claims that the Boulder Dam program does not recognize the interests of Arizona. "It is a sad and unfortunate thing, as time will fully prove," he said, "that a problem of such importance was not met and disposed of by a higher statesmanship, but it has seemed expedient to our sister basin states and to the federal government to ignore the rights, interests and wishes of Arizona in this matter. They have attempted to force the Colorado river compact upon us without our consent while enacting the Boulder Dam legislation as the price of California's ratification thereof; to undertake the construction of this project within Arizona's borders over her protest and defiance of her laws, for the sole benefit of southern California—in other words, to take from Arizona her greatest natural resource upon which her future development and growth so largely depends."

"I want to compliment you on the June issue of the I. A. A. RECORD. I think it is one of the best you have ever put out. Majoring on a certain program of work as you have on grain marketing in this issue will no doubt bring results.

"Keep up the good work."

A. B. LEEPER, Manager
Illinois Fruit Growers Exchange

Uncle Ab says that some folks place new ideas and dynamite in the same class, and are afraid of both.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Is It Worth the Price?

CORPORATION farming as a solution to the economic problem of agriculture was advocated by Hickman Price, 30,000-acre wheat farmer from Amarillo, Texas, who spoke before the farm equipment manufacturers in Chicago recently. Mr. Price has become more or less renowned for his work in producing low-cost wheat.

Where the average Illinois farmer spends from $15 to $20 in labor, materials, and overhead to produce an acre of wheat, Price grows just as large or larger a crop for $6 to $7 an acre.

"If I awakened one morning on a typical 200-acre corn-belt farm, the first thing I would do," said the Texan, "would be to seek the co-operation of my neighbors in pooling our land, and working it in partnership until we had at least 2,000 acres in one farm.

By so doing we could cut our overhead expenses tremendously, buy for less, sell for more ,and produce larger crops per acre.

Price would have one large tractor to do the heavy work on each 2,000 acres. Fences would be taken down and fields of several hundred acres in size laid out to facilitate the use of combines and large power-driven machinery.

If the serious obstacles involved in such procedure could be overcome, the inevitable result would be a decline in farm population infinitely greater than we have seen to date. Farm organization and co-operative action in buying commodities and selling crops would be simplified. But the nation would see the destruction of its free, independent, home-owning, rural citizenry as we know it today.

Comparatively speaking, agriculture would gravitate into the hands of a few large operators employing an army of help having the same status as factory workers in our present industrial centers. Thus we would have something akin to the old feudal system of Europe with its lords and ladies, and laboring subjects—a system which progressive European countries have largely abolished.

Statesmen who are concerned about safeguarding one of the country's most valuable resources, its independent rural life and people, will not tolerate a system which ruthlessly sacrifices everything to the god of efficiency and economy.

Irish Philosopher Visits I.A.A. Office

IF the rural population of America continues to decline as it has in the last 10 years this country will be headed for trouble, according to George Russell, famous Irish poet, writer, organizer and leader of co-operative thought, who visited the I. A. A. offices during a brief stopover in Chicago on October 7.

Russell, famed under his pen name "AE," believes that the United States is making the same mistake that England made in developing an industrial civilization at the expense of its rural life.

"If America is wise," said Russell, "it will bend every effort toward keeping from 20 to 25 per cent of its population rural. It is my observation that after the fourth generation, the vitality of city-born people, particularly in the highly developed industrial sections, slackens off and dies."

The tremendous vigor and progress shown by the United States, according to Russell, is due to the fact that the cities have been constantly fed by a strong, stalwart rural population possessing the energy and vitality to carry on great enterprises and overcome all obstacles. "Germany and France," he said, "established policies of government friendly and favorable to agriculture so as to maintain a large and strong rural population for military reasons. Great Britain, to its own sorrow, has not done so."

The Irish philosopher's account of the widespread development of co-operative societies for marketing, purchasing and carrying on business among Irish farmers was noteworthy. Speaking before the Agricultural Committee of the Chicago Association of Commerce, he revealed how organization of Irish farmers had changed their social character from selfishness, clannishness and hopelessness to a progressive people with a more hopeful attitude toward life. The 1,100 farm co-operative societies organized in Ireland not only increased the net income of their members but also improved the standard of living and culture of the Irish farmer.

"Our farmers were so poor and uneducated in the beginning that it was difficult to teach them the advantages of organization," said Russell. "The education of 90 per cent of our men stopped at the age of 12. A few moneyed men interested in the welfare of Irish agriculture donated sums of money at first to get the organization started. Now, after 25 years of successful co-operation the funds for carrying on the work are supplied by farmers themselves.

"Some of our very successful co-operative societies donate as much as 500 pounds ($2,500) annually to help the un-

organized farmers to become organized. Some of our more public-spirited, wealthy farmers, likewise have helped the smaller farmers in financing their co-operative projects.

Refused Government Aid

"At one time the government offered financial aid to our farm people if they would promise not to do certain things. Our farmers refused the offer because in their co-operative efforts they did not wish to be bound or held down by any restrictions or agreements.

"American farmers will do well not to become allied to any political party," cautioned Russell. "We have successfully avoided doing so in Ireland. Our co-operative agricultural societies and federations do not take part in party politics. Fortunately all of our three major parties accept the co-operative plan among farmers as a national policy.

"Far greater than the economic advantage we have gained through co-operation is the fact that our 1,100 co-operative societies have created a new social order in Ireland. These organizations have taught democracy, have inspired our rural people to take an active interest in government and as a result Ireland today has the cleanest and most honest government in all Europe."

Chairman Malone on Taxation

"THE State Tax Commission stands ready and willing to see that the farmers' tax bill reflects the tremendous decline in the value of his land and property," William H. Malone, chairman of the State Tax Commission, declared in addressing the annual picnic of the Rock Island County Farm Bureau in Black Hawk Park, Rock Island, Sept. 26.

"I consider it the first duty of the State Tax Commission, also of every county board of review," he said, "to find the fair and cash value of every piece of property to be assessed and then, as is our custom, take a percentage of that amount, which in this state averages approximately 37 per cent, using that as the assessed valuation.

Real Estate Carries Burden

"No fair-minded person will deny," he continued, "that real estate in Illinois is carrying more than its just share of the tax burden. I make no defense of our present taxing system. It is antiquated and unfit for conditions obtaining today. Ownership of real estate and tangible property is no longer a measure of wealth or ability to pay taxes as it was when our revenue laws were written back in 1870. But until the legislature is given authority to revise our present system we must make the best of what we have. And as I see it, relief can be given, particularly to farmers, by lowering valuations on farm lands and property and other over-assessed real estate in line with its depreciated cash value.

Land Banks Hold Farms

"I know some of the problems you farmers are up against. I realize that your land has gone down in value since 1920, until today good farms in many instances are bringing less than half of what they brought 10 years ago. I am told that the federal land banks, which never loaned more than 50 per cent of the conservatively appraised value of any farm, today hold thousands of farms which they were forced to take over because of the inability of farmers to keep up the interest. I also know that in many instances the farmer pays one-third or more of his net income to the tax collector. I want to say here and now that the state tax commission stands ready and willing to see that the farmer's tax bill reflects the tremendous decline in the value of his land and property. And I pledge to do my utmost to bring about such tax relief as is obtainable from that source.

Equalization Obtained

"I have watched with sympathetic interest for many years the efforts of Illinois farmers toward securing first, equalization of assessments, and, secondly, revision of the state taxing system. The records of your state association show that farmers are paying approximately $4,800,000 less annually today than they would be paying had the valuations of 1922 not been lowered. I am happy to say that it was my privilege as chairman of the State Tax Commission throughout this period to do what I could toward equalizing valuations of farm lands and buildings with other real estate in the various counties.

Altogether, orders of reassessment were issued for more than a score of counties during the last four years. These orders were issued largely as a result of investigations carried on by local Farm Bureau tax committees and the Illinois Agricultural Association. It is a weakness in our taxing system that makes this procedure necessary. In my annual report for 1928 to the governor of the state, I made a number of recommendations which if carried out and enacted into law at the coming session of the general assembly will go a long way toward bringing equitable assessments in every county of the state.

Opposes New Taxes

"I am in sympathy with the efforts of organized farmers —the Farm Bureau—in opposing any new taxes that do not replace present taxes. As a taxpayer and an owner of large real estate holdings, I have a personal interest, as you farmers have, in reducing the tax burden, in keeping down the cost of government. As a taxpayer, I, too, am against any taxing system which imposes new taxes on top of those we already have. I think it essential that whatever new laws are passed, that the burden of government not be increased but that it be more evenly distributed among the citizens of the state."

The Cover

UPON the cliff, known as Starved Rock, LaSalle and Tonti, French explorers, erected a fort in 1682, which they named Fort St. Louis. For 20 years the fort was used as a military post, then as a trading post, until it was burned by the Indians in 1718. In 1769 a band of Illinois Indians who had sought refuge on the cliff from the attacks of hostile tribes were besieged for 12 days. Destitute of food and drink, they made a gallant but hopeless and unsuccessful sortie in which they were massacred. From the catastrophe the cliff takes its name, Starved Rock. The tract of land along the Illinois River in LaSalle county where Starved Rock is located was in 1911 purchased by the State of Illinois to be used as a state park.

The September cover page illustrated the old powder magazine at Fort Chartres, situated in the northwest corner of Randolph county, Illinois. This fort is a relic of the early settlement of the Mississippi Valley. It was built under a charter from the crown of France, in 1718. The early fort was built of wood. In 1765 it was rebuilt, and this time limestone was employed in its construction. The river encroached upon its early site, and the second fort was built further back into the interior. A sand bar formed in the river opposite the fortification, and slowly an island was formed, known as Fort Chartres Island. Much of the early history of Illinois centers about old Fort Chartres. The site of Fort Chartres is now a state park.

Unity of Action Is Needed, Says Legge

AS we enter the second year's operation of the Federal Farm Board we find one factor becoming more and more apparent, and that is that the fundamental step in the solution of the agricultural problem is organization, declared Alexander Legge, chairman of the Federal Farm Board, in a recent statement.

"With farmers organized, the adjustment of production and effective marketing of agricultural products would be comparatively easy. Unity of action is needed through every stage from planning and planting to marketing.

Alexander Legge

"The difficulty comes in getting producers to co-operate, chiefly because there is still a great difference of opinion as to just how to organize farmers so that they may properly deal with their problems in handling particular crops in this and that community. . . . .

In Our Hands

" There is really no reason why farmers should not go further than organizations of any privately operated industry. That privilege is in the farmers' own hands. Laws have been written within recent years to free farmers from the restrictions of anti-trust regulations. In fact, under existing laws the organization of farmers is permitted to an extent that probably never could be accorded to private agencies. There is no limit to the quantity of farm products that may be handled by groups of farmers who grow the crops and hold the full right to sell them.

Better Bargaining Power

"Great advantage comes to farmers who use their privilege to mass together large units of products because they have a better bargaining power than when they come to market by the thousands, each selling his own crop and competing with the other individuals. The privilege of selling in large quantities makes it possible for even an untrained group of farmers to market collectively to a better advantage than is possible under the old system where the private agency, with no control over the flow of the commodity, takes the product as it comes. . . .

"In connection with the work of aiding farmers under the provisions of the Agricultural Marketing Act, I wish it were possible to bring about the amalgamation, consolidation, or merger of all the great national farm organizations. As you know, there are several of the so-called general farm organizations in this country which might some day be brought under the same roof. Imagine what power these organizations could generate if their forces were all mobilized into one unit and put to work organizing farmers to improve conditions for agriculture. . . ."

Farmers Cut Oil Costs By Co-Operative Action

THIRTY-FIVE associated farm supply companies, with a paid up capital stock of $606,305, are now in operation, serving farm trade in some sixty different counties, states L. R. Marchant, manager of the Illinois Farm Supply Co.

The number of bulk storage stations from which Service petroleum products are distributed has been increased from 56 to 90 within the past six months, and the truck salesmen from 140 to 200 or more.

1250 Cars Gas

One thousand two hundred and fifty cars of gasoline and kerosene, 115 cars of lubricating oil, and 100 tons of grease (or 10,375,000 gallons of petroleum products) have been purchased for the member companies during the same period. This represents an increase of 41½% for gasoline, 57½% for kerosene, 53% for lubricating oil, and 122% for grease in comparison with purchases made in the corresponding months in 1929.

The supplies and equipment other than petroleum products purchased up to date for the current fiscal year total $118,186.48. This exceeds the amount of the total purchases for the fiscal year of the company ending August 31, 1929, by $56,735.94, or 92%.

All merchandise and equipment handled to date in this fiscal year, computed on the basis of cost to the member companies, totals $1,237,001.30. The amount for the entire fiscal year ending August 31, 1929, was only $1,172,935.69. The actual value of the products has not increased in the same proportion as the volume because of lower prices.

Too Much Coffee

The destruction of 4,500,000 bags of coffee out of supplies in the terminal warehouses in Brazil are being agitated in Sao Paulo to relieve the depression existing in the world coffee market.

The plan suggested involves the destruction of only the lower grades of coffee. No information is given as to whether or not the owners of the surplus stocks will be reimbursed for their stocks.

Review Income Tax Legislation Elsewhere

Iowa Farm Bureau Compiles Information for Members on New Forms of Taxation

ALTHOUGH the income tax has been for many years one of the chief sources of revenue in many European countries, it was used only to a limited extent in the United States prior to 1911, says a report on income tax legislation prepared by Senator Clark of Iowa for the Iowa Farm Bureau Federation.

In that year Wisconsin adopted a well-considered law imposing a tax on incomes of individuals and corporations. This law exempted from local taxation intangible property, farm machinery, and household goods, and centralized administrative authority in the state tax commission. The success of the Wisconsin law immediately caused other states to give serious consideration to the income tax.

In 1912 Massachusetts and Virginia amended their laws embodying some of the features of the Wisconsin law. Oklahoma and Mississippi enacted laws in 1913 and 1914; Delaware and Missouri in 1917.

19 States Have Tax

By January, 1929, 14 states had in operation income tax laws. During the last few months California, Oregon, Arkansas, Tennessee and Georgia have enacted income tax laws, raising the total number of states to 19.

In Connecticut, California and Montana the state income tax applies only to corporations.

The income tax in Delaware, New Hampshire and Oklahoma is collected only from individuals. The other 13 states impose income taxes on both individuals and corporations.

Delaware, Massachusetts and New Hampshire keep no income taxes for the state treasury. New York and Wisconsin divide theirs with the localities.

Arkansas Law

The income tax law that was enacted in 1929 by the Arkansas legislature follows very generally the form of the "model law" drafted and approved by the National Tax Association. Personal exemptions are $1,500 for a single individual and $2,500 for the head of a family plus $400 for each dependent. The exemption in case of a corporation is $1,500. The law provides graduated rates starting in with 1 per cent for the first $3,000 of net taxable incomes, and providing for 5 per

Farmers National Issues Statement

Asks "Who Pays Bills"? for Propaganda Attacking Co-Operative Marketing

"FARMERS' elevator companies of middle-western states are being flooded with reprints, paid advertising and letters containing vicious attacks on the Federal Farm Board and Farmers National Grain Corporation grain marketing program. Many of these letters are on letterheads of the "Illinois Farmers Grain Dealers Association" and are signed by Robert B. Orndorff, as vice-president. Advertisements appearing in journals opposing the Farm Board program also carry his signature, as do reprints from unfriendly papers that are being scattered everywhere among farmers' elevators.

"Mr. Orndorff is sailing under false colors and his use of the name of the Illinois elevator association is an evasion. The correct name of the Illinois elevator group is Farmers Grain Dealers Association of Illinois, and its president, Mr. C. H. Bonnell, of Owaneco, Ill., in a letter addressed to an official of Farmers National Grain Corporation, under date of October 6, 1930, makes clear the actual relationship between Mr. Orndorff and the Farmers Grain Dealers Association of Illinois. His statement is reproduced herewith:

FARMERS
GRAIN DEALERS ASSOCIATION
OF ILLINOIS

OFFICE OF PRESIDENT
October 6, 1930.

Mr. W. L. Stahl, Vice-Pres.,
Farmers National Grain Corp.,
Fisher Bldg., Chicago, Ill.
Dear Mr. Stahl:

Our association (the Farmers Grain Dealers Association of Illinois) has never authorized nor indorsed *any letter or statement* criticizing the members or the policies of the Federal Farm Board and we earnestly desire that its aims may be realized.

(Signed)
C. H. BONNELL, Pres.,
Farmers Grain Dealers Association of Illinois.

"Mr. Orndorff maintains an office in Bloomington, Ill., apart from the offices of the Farmers Grain Dealers Association of Illinois. His mailing and office expenses, obviously, are heavy. Paid advertising in journals of wide circulation costs money. Mr. Orndorff's activities being neither authorized nor indorsed, as Mr. Bonnell states, by the Farmers Grain Dealers Association of Illinois, the question of who is financing those activities becomes a pertinent one for grain producers, stockholders and directors of farmers' elevators everywhere."

Reviews Income Tax

(*Continued from page 8*)

cent on all net income in excess of $25,000. The tax on corporations is a flat tax of 2 per cent on the entire net taxable income.

Massachusetts raised its collections from income taxes from $15,000,000 in 1918 to $20,240,000 in 1927. The Massachusetts income tax has never been a general income tax. It is levied upon incomes from certain intangibles, upon incomes from annuities, professions, employments and trade and business, upon excess of gains over losses received from purchase or sales of intangible personal property, and upon domestic and foreign business corporations excepting such corporations as commercial banks, savings banks and insurance companies which are taxed separately. This leaves out incomes from real estate, bank deposits, and many corporations.

Collect $100,000,000 in N. Y.

The total income tax collections in New York now exceed $100,000,000. Of this $57,000,000 was kept for the state's own use, $43,000,000 distributed to the localities. In 1919 the rate for corporations was raised from 3 per cent to 4 per cent and a personal income tax law was enacted applying to the net income of residents and non-residents earned within the state ranging from 1 per cent on the first $10,000 to 3 per cent on all in excess of $50,000.

Stone Predicts More Direct Purchasing

ORGANIZATION of consumers for direct purchasing from farmers' co-operative marketing organizations was predicted by James C. Stone, vice-chairman of the Federal Farm Board in a recent address.

Mr. Stone declared that there is no reason why growers of farm commodities and the consuming public should not develop direct relationships. "The time is coming," he said, "when the consumer will organize and develop these relationships between buyers and producers as to quality and grade as well as discuss prices. There is some development along this line now."

He cited as an illustration the co-operative purchasing organization of eastern farmers known as the Grange-League-Federation Exchange with approximately 90,000 members in the states of New York, Pennsylvania and New Jersey.

The Federation will purchase between $30,000,000 and $35,000,000 worth of feed this year. During the past year it purchased a trainload of feed a day from soybean processors and feed mixers out of Peoria, Illinois. In addition to its feed purchases it maintains three fertilizer plants.

British Co-operators Buy Grain Corp. Wheat

The recent meeting of the board of directors of Farmers National Grain Corporation was marked by a visit of three directors of the Co-Operative Wholesale Society of England and Wales. Of even more interest was the fact that through these directors the largest co-operative concern in the world made direct contact with American grain producers through their own organization and made its first purchase of wheat from Farmers National Grain Corporation.

The Co-Operative Wholesale Society is the federal trading organization of the retail co-operative societies of England and Wales. It is said to be the largest purchaser of wheat in the United Kingdom and has been a big customer of the Canadian Wheat Pool. It has in its employ more than 40,000 persons, owns thousands of acres of agricultural lands in many parts of the world, operates factories, mills and banks, and is composed of more than 1,100 affiliated societies, with a total membership of consumers exceeding four and one-half million.

The visit of the directors of the C. W. S. was in line with the program of the organization to go as closely as possible for its supplies to the sources of production and to establish direct relations between the organized consumers of the United Kingdom and the co-operative grain producers of the United States.

Grain Marketing

The United States is not in a position to eliminate legitimate markets for the hedging of wheat, and present legislation is adequate to care for any situation which might be caused by the alleged selling of wheat on the Chicago Exchange by Russia to depress prices, Chairman Legge of the Federal Farm Board stated orally on September 22.

Russell G. Stewart, manager of the Ford County Service Company, has accepted a similar position with the newly organized Champaign County Service Company.

Baseball Dope

INABILITY of Logan County Farm Bureau batters to solve the slants and benders of Ralph Meade, McDonough County Farm Bureau pitcher, cost Logan county the first game of the championship series played at Lincoln on October 4. McDonough county won the game 2 to 0. The second game was scheduled for Saturday afternoon, October 11, at Macomb.

Pitchers' Battle

The game was a great pitchers' battle between Meade, and Weldon Quisenberry, who hurled for Logan county. Meade allowed only 3 hits and struck out 13 men, while Quisenberry allowed only four hits and whiffed nine batsmen. Meade won by a shade when Quisenberry's support crumbled in the fourth permitting two runs to score. For four innings Meade set down the Logan batters in succession. Quisenberry did his best work in the third inning when he struck out three successive hitters.

How It Happened

In the fourth inning R. Harmon, center fielder for McDonough, smashed a hot grounder to Israel at short. The ball got away from the shortstop and Harmon reached first. C. Harmon advanced his brother and was safe himself on a fielder's choice. Carnahan, Logan's second baseman, was charged with an error. Both runners advanced on a wild pitch and when Boots Runkle doubled to center field the two runners scored.

Prior to the fourth inning not a single McDonough county man had reached first base. It was a hard-fought game and revealed that the two teams are evenly matched. The fact that Meade did not allow a single pass while striking out 13 men game him the edge on the pitcher's duel.

Perfect Record

Runkle, McDonough shortstop, accepted seven chances without an error.

Do You Know That—

The year 1930 has been an exceptionally healthy one for the people in the United States according to the Public Health Service.

Federal income tax receipts to September 17 are considerably less than for the same period a year ago. Receipts this year were $279,410,511.20 compared with income tax payments amounting to $361,396,067.80 to September 17 last year.

Many medical fakers are "crying their spurious wares" through the smaller radio broadcasting stations, according to Commissioner of Health of the City of New York. Particular warning was given against purveyors of the so-called "shotgun pills," alleged to contain "an herb for each symptom."

There will be from 25,000 to 40,000 licenses to handlers of fruits and vegetables in effect by the time the Federal Perishable Agricultural Commodities Act of 1930 takes full effect December 10, 1930. If persons continue to operate without licenses after that time they will be subject to a fine.

The creation of a tobacco exchange has been proposed by Governor Gardner of North Carolina. This action would involve standardization of the tobacco leaf in accordance with the United States grades for tobacco before it leaves the farmer's ownership.

The excess supply of school teachers now constitutes a serious educational problem which the National Teacher Training Survey Committee is attempting to solve.

The expectation of life at birth has increased from about 48 to 58 years during the last 20 years.

The per capita consumption of milk in the United States in 1917 was 836 pounds and in 1927 it was 1,032 pounds.

Farmers who employ help and who have elected to come under the Workmen's Compensation Act of Illinois must file notice with the Industrial Commission, Springfield, Illinois, by November 1 if they wish to withdraw and terminate their liability under the Act, January 1, according to V. Vaniman, director of insurance service.

Scott Meiks Tells Success of Co-op's

Indianapolis Producers Writes Checks Exceeding $130,000,000 to Live Stock Shippers

"THE fact that the Indianapolis Producers' Commission Association has accumulated net profits of more than a half million dollars during the eight and one-third years of its existence is abundant proof that its sponsors, the Indiana Farm Bureau Federation and the Illinois Agricultural Association, were right in believing that live stock could be marketed more economically," Scott Meiks, manager of the Indianapolis Producers, declared in a recent radio address from station WLS. "The efficiency of the organization has been proven by its steadily increasing volume of business and influence in the Indianapolis market," he continued.

Checks Never Questioned

"In the little more than eight years since the organization started we have written checks exceeding $130,000,000 to our live stock shippers with never a check being questioned. The same can be said for all of the 12 Producer commission associations operating on the principal live stock markets of the middle west. I believe this is a record considering the volume of business, the 12 Producer agencies totaling $149,000,000 in sales in 1930. This record can be excelled by few, if any, business organizations.

"The Producers at Indianapolis at the very beginning adopted the policy of setting aside a part of its earnings each year and now has a very substantial sum in its treasury as a guarantee to its consigning members. In addition to its reserves our members are protected by a bond held by the United States Packer and Stock Yard Administration for the protection of its consignors.

50,000 Members

"The Indianapolis Producers is composed of nearly 50,000 live stock producer members mostly within the two states of Indiana and Illinois, with a few in Kentucky and Ohio. It was organized early in 1922 and began operating on the Indianapolis market May 15 of that year. As a marketing organization it immediately made a place for itself on that market becoming the largest selling organization there. It has grown steadily in volume, in prestige, and in influence in the live stock marketing field, and now ranks as one of the largest co-operative marketing organizations in the United States.

Operates at Low Cost

"It has been the ambition of the management and the board of directors to make the Indianapolis Producers' Commission Association the most economical, the most efficient, and the safest live stock selling organization in the state. During 1929 it operated at the lowest cost per car of any of the Producer units. The Association is now averaging a little more than one-third of the live stock consigned to the Indianapolis market for sale. Its salesmen are experienced, competent and are zealously active in their service to our member patrons. The entire personnel are picked employees."

Reasons for Low Prices

Mr. Meiks gave the following reasons for the drastic decline in live stock prices during recent months:

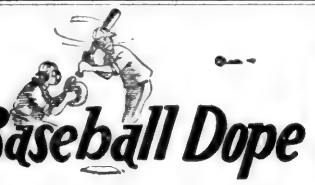
1. Underconsumption due to unemployment in industrial circles.
2. Underconsumption due to extreme hot weather.
3. Disorderly marketing with bunched delivery to market due to short pastures and shortage of feed.
4. A practically closed outlet to the farms and feedlots due to the widespread drouth which forced many cattle and lambs to go to the killers that ordinarily go to the country.
5. A normal supply of cattle was in the country to be sold on the market that demanded lower than ordinary receipts.
6. The largest supply of sheep and lambs that the United States ever produced was delivered to market when the demand was the lowest in years.
7. Only one factor favored the farmer and that was a short crop of hogs and the prospect of a lower than average fall pig crop.

The honor list of Illinois counties showing gains in carloads of live stock shipped to co-operative Producer Commission Agencies during the first six months of 1930 as compared with the first six months of 1929 is as follows:

Macoupin	55
Sangamon	55
Whiteside	47
Mercer	44
Ogle	40
Vermilion	39
Crawford-Jas.	27
Greene	26
Peoria	25
Scott	24
Henderson	24

Livestock Marketing News

On September 16, Ed Kinsinger of McLean county marketed 77 steers through the Chicago Producers. Fifty, averaging 958 pounds, topped the market that day at $13.10, while the other 27 averaging 1,090 pounds brought $12.85 per cwt. Mr. Kinsinger, pleased with his returns, wrote as follows:



"The sale of my cattle last Tuesday was highly satisfactory. This was not an accidental good service but the kind I have been getting every time I have shipped to you. Thanks for the good work."

The Research Department of the National Live Stock Marketing Association states that while feed supplies and prices appear discouraging to live stock feeders, under such conditions feeding commonly proves quite profitable. "In sizing up the outlook as a whole for the finishing of live stock," the Department reports, "it appears quite favorable for feeding all species, particularly for finishing good cattle for both this winter and next summer markets; hogs for next spring and summer; and lambs for this coming late winter or early spring. The slack feeding demand has resulted in relatively low prices for feeder stock. With the improvement of the consumer demand, and with reduced supplies of fed animals in prospect next year, selling prices are expected to be sufficiently high to give favorable margins.

A new top for the season—$14.75—was established at the eighth weekly auction of 4-H club calves at Chicago, September 23. Wilson & Company paid that price for a 1,090 pound Hereford fed by George Lund of Granville, Putnam county, Illinois. Carey M. Jones sold 251 during the day that averaged 936 pounds in weight and brought an average price of $12.75 per cwt.

Marshall-Putnam county had one of the largest consignments with 65 head that sold for an average price of $12.60. Forty head from Warren county averaged 937 pounds, average price $12.84; 18 from DuPage county averaged $12.80; Champaign county 44 head, average price $12.73; McDonough county 30 head, average price $12.53; and LaSalle county 17 head, average price $12.35.

During the week ending September 20 the National Feeder and Finance Corporation purchased 700 steer and heifer calves to be shipped direct from the Texas range to cornbelt feedlots. The steer calves cost $8.25 f. o. b. Texas, and the heifer calves $7.25.

Baseball Dope

INABILITY of Logan County Farm Bureau batters to solve the slants and benders of Ralph Meade, McDonough County Farm Bureau pitcher, cost Logan county the first game of the championship series played at Lincoln on October 4. McDonough county won the game 2 to 0. The second game was scheduled for Saturday afternoon, October 11, at Macomb.

Reasons for Low Prices

Mr. Meiks gave the following reasons for the drastic decline in live stock prices during recent months:

1. Underconsumption due to unemployment in industrial circles.
2. Underconsumption due to extreme hot weather.
3. Disorderly marketing with bunched delivery to market due to short pastures and shortage of feed.
4. A practically closed outlet to the farms and feedlots due to the widespread dreuth which forced many cattle and lambs to go to the killers that ordinarily go to the country.
5. A normal supply of cattle was in the country to be sold on the market that demanded lower than ordinary receipts.
6. The largest supply of sheep and lambs that the United States ever produced was delivered to market when the demand was the lowest in years.
7. Only one factor favored the farmer and that was a short crop of hogs and the prospect of a lower than average fall pig crop.

The honor list of Illinois counties showing gains in carloads of live stock shipped to co-operative Producer Commission Agencies during the first six months of 1930 as compared with the first six months of 1929 is as follows:

Macoupin	55
Sangamon	55
Whiteside	47
Mercer	44
Ogle	40
Vermilion	39
Crawford-Jas.	27
Greene	26
Peoria	25
Scott	24
Henderson	24

Livestock Marketing News

On September 16, Ed Kinsinger of McLean county marketed 77 steers through the Chicago Producers. Fifty, averaging 958 pounds, topped the market that day at $13.10, while the other 27 averaging 1,090 pounds brought $12.85 per cwt. Mr. Kinsinger, pleased with his returns, wrote as follows:

"The sale of my cattle last Tuesday was highly satisfactory. This was not an accidental good service but the kind I have been getting every time I have shipped to you. Thanks for the good work."

The Research Department of the National Live Stock Marketing Association states that while feed supplies and prices appear discouraging to live stock feeders, under such conditions feeding commonly proves quite profitable. "In sizing up the outlook as a whole for the finishing of live stock," the Department reports, "it appears quite favorable for feeding all species, particularly for finishing good cattle for both this winter and next summer markets; hogs for next spring and summer; and lambs for this coming late winter or early spring. The slack feeding demand has resulted in relatively low prices for feeder stock. With the improvement of the consumer demand, and with reduced supplies of fed animals in prospect next year, selling prices are expected to be sufficiently high to give favorable margins.

A new top for the season—$14.75—was established at the eighth weekly auction of 4-H club calves at Chicago, September 23. Wilson & Company paid that price for a 1,090 pound Hereford fed by George Lund of Granville, Putnam county, Illinois. Carey M. Jones sold 251 during the day that averaged 936 pounds in weight and brought an average price of $12.75 per cwt.

Marshall-Putnam county had one of the largest consignments with 65 head that sold for an average price of $12.60. Forty head from Warren county averaged 937 pounds, average price $12.84; 18 from DuPage county averaged $12.80; Champaign county 44 head, average price $12.73; McDonough county 30 head, average price $12.53; and LaSalle county 17 head, average price $12.35.

During the week ending September 20 the National Feeder and Finance Corporation purchased 700 steer and heifer calves to be shipped direct from the Texas range to cornbelt feedlots. The steer calves cost $8.25 f. o. b. Texas, and the heifer calves $7.25.

COUNTRY LIFE MEN ARE DEPENDABLE AND SINCERE

THE men who sell Country Life policies are not only enthusiastic over the Company's unrivaled progress, but they are also dependable and sincere. They reflect the ideals of a company created with a spirit of co-operation and self help, to provide reliable legal reserve life insurance to farmers at low cost.

Country Life agents are not high pressure sales wizards. Ninety per cent of them never had previous selling experience. They are the men you Farm Bureau members selected to represent your company in your communities.

They Live Among You

They live among you and know your problems. They are not fly-by-nighters who have no scruples about misrepresenting the company's policies or of loading you down with too much insurance.

Country Life men are under orders to give you the facts.

Country Life has the confidence of Illinois farmers and seeks to hold that confidence inviolate. It insists that every one of its agents and representatives conduct himself with honesty, fairness, dignity, and integrity.

Greater Volume Lowers Cost

By helping Country Life salesmen you help yourself for this is your company.

Greater volume means lower cost life insurance. Your confidence in the company will result in ever-increasing volume. Tell others about the advantages of a policy in Country Life.

Farm Supply Company Has a Successful Year

Declare Patronage Dividends to 36 Member Companies of $38,307.89

A PAID-IN capital stock totaling $254,000 in the 15 new county service companies organized during 1930 with an aggregate sum of $620,-500 to represent the farmers' investment in the 36 companies affiliated with the Illinois Farm Supply Company as of August 31, 1930, was reported by Manager L. R. Marchant at the annual meeting of the company in Bloomington on Oct. 14.

L. R. Marchant

A comparison of the gasoline sales for the first six months of the calendar year, made available through the state gas tax, discloses that the total gallonage of all member companies places the Illinois Farm Supply Company and its associates in the fifth or sixth rank among the distributors in Illinois. Only four or five of the 752 licensed distributors show a larger business.

20,000,000 Gallons

Petroleum products purchased during the fiscal year of the company approximate 20,000,000 gallons. This is equivalent to 1,623 tank cars of gasoline, 685 cars of kerosene, and 57 cars of distillate and fuel oil, 572,644 gallons of lubricating oils, and 405,351 pounds of grease. In comparison to the volume handled the preceding year this is a gain of 47 per cent in gasoline, 69 per cent in kerosene and distillate, 52 per cent in lubricating oils, and 123 per cent in grease.

Of the 16 companies in operation for a full 12 months' period prior to the close of the 1929 fiscal year, only five failed to make an increase in their business the past year, and the remaining 11 made gains ranging from 7 to 80 per cent.

Purchases Increase

In addition to distributing petroleum products, the company during the past fiscal year supplied member companies and farm bureaus with 344,900 pounds of Atlacide calcium chlorate, a weed-killer. Fly spray to the amount of 6,080 gallons also was purchased by the 31 companies featuring this product for the first season.

In spite of lower prices, the company's purchases totaled $1,570,469.16, which is an increase of $400,000 over last year's purchases.

The capital stock of the state company includes 620½ shares of preferred A 7 per cent cumulative stock having a par value of $100 per share and held by the 36 member companies. Common stock outstanding consists of 36 shares at $1 per share which is held by the member companies and entitles them to participate in patronage refunds.

Total operating income for the year was $79,387.08, an increase of 73.9 per cent over last year. The brokerage income of $58,916.95 was an advance of 49 per cent, and the trading income trebled with $20,470.13 resulting from profits on purchases and sales.

Operating expenses were $25,862.35, or 32.6 per cent, of the gross income compared to $15,834.58, or 34.69 per cent, for the year ending August 31, 1929.

Good Net Income

The net operating income of $53,-524.73 with the additional income from interest and discounts earned of $6,-401.76, less deductions of discounts allowed, trade mark expense, and federal income tax, resulted in a net income of $54,277.96, which is 68.37 per cent of the gross operating income as compared to $30,534.05, or 66.9 per cent, for the preceding year. On the basis of the paid-in capital stock of all companies which were in operation prior to August 31, the earnings represent a profit of 93.51 per cent in comparison to 85 per cent on the paid-in capital the year before.

A reserve in the amount of $3,200.77 has been established for the payment of capital stock dividends and also a reserve in the amount of $38,307.89 for the payment of patronage refunds. The latter amount represents 48.25 per cent of the gross income and the net addition of $15,970.07 to surplus, 20 per cent of gross income.

Net Worth $87,777.55

The net worth of the company is represented by a capital stock investment of $64,586 and a surplus of $23,-191.55.

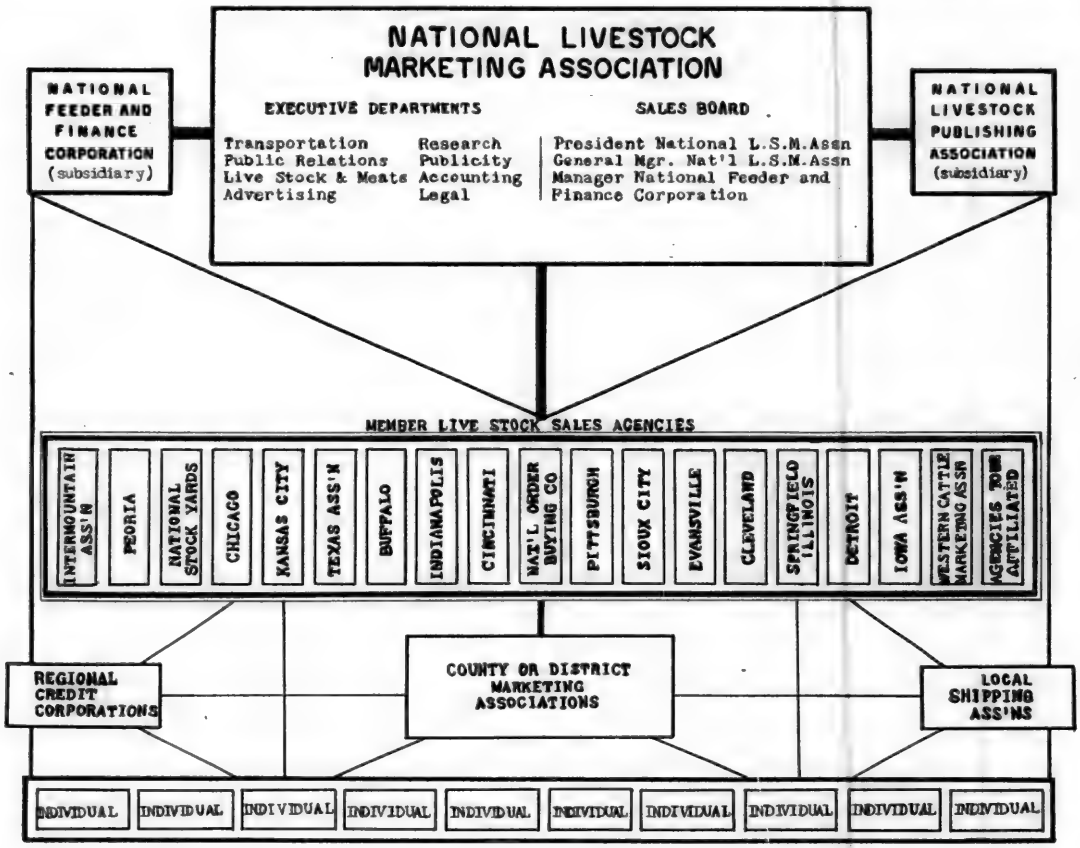
Records show close to 50,000 customers who are patronizing the 36 companies affiliated with the Illinois Farm Supply Company. In the territory served there are an estimated 35,350 Farm Bureau members.

Manager Marchant called attention in his report to an article published recently in one of the leading petroleum magazines under the heading "The Weakness of Co-Operative Oil Companies Is Their Lack of Selling Experience." "This is a challenge to our organization," he said. "We have the choice of standing innocently by and watching our competitors take a certain percentage of the business because of superior salesmanship, or that of constantly striving to build up the efficiency of our own organization which will do much to strengthen the movement throughout the state and place co-operatives in general on a higher plane."

Federal Farm Board

CONSOLIDATION of unprofitable wheat farms into larger units was advocated in a recent address by Chairman Legge of the Farm Board before the Mortgage Bankers' Association of America, meeting at Detroit.

"Studies made by the agricultural colleges indicate that the time has passed when wheat can be grown profitably on small acreages," said Mr. Legge. "This, in our estimation, means a readjustment in the side of the farm unit where wheat is depended upon as a cash crop.



"Each individual company represented here," said Mr. Legge, "probably has cases where they have an unsatisfactory loan on an 80 or 160 acre tract, where an analysis of the subject would indicate the loan on the present basis of operation is likely to continue unpaid, but by consolidating two or more of these tracts in one unit, which would in most cases probably involve refinancing of the larger unit, you could, in our judgment bring about a situation where the borrower was in position to operate successfully.

"In other words, make one borrower a good credit risk where you now have two or three bad ones." Legge states that a similar situation exists in the production of cotton.

The sale of plant and equipment and all the physical assets of Cornstalk Products Company at Danville, Illinois, was ordered recently by the U. S. District Court by Judge Walter C. Lindley. The sale of assets was asked for in a petition filed by attorneys for the Federal Court.

Plant and equipment inventories at around $750,000, according to the attorneys for receivers, and approximately $2,500,000 has been expended at the plant. The general indebtedness is around $700,000, not including the investment of stockholders.

The Cornstalk plant at Danville, erected several years ago, specialized in producing pulp from cornstalks for manufacturing paper.

Live Stock Marketing Set-Up Explained

By J. D. HARPER

EIGHTEEN stockholder member corporations now constitute the farmer owned and controlled National Live Stock Marketing Association sponsored by the Federal Farm Board. All but three of these corporations are going business institutions with from five to nine years of successful operation in their respective fields to their credit. The three new associations set up since the incorporation of the National Association, May 10, 1930, are largely in the hands of experienced marketing men who will have all the benefits and assistance to be obtained through the National Association so that assurance of the best possible selling and marketing service is available to live stock producer members from the start.

Builded on Individual

As illustrated in the accompanying chart, the entire organization structure is builded on the individual live stock producer who is legally an associate member of the National organization. The members of the National organization include the co-operative marketing associations as listed. These may be either terminal marketing associations or state or regional associations which qualify as marketing agencies. Each of these marketing associations has as members either county or district marketing associations and local shipping associations or individual producers.

Buys Feeders

Both subsidiary corporations function through the National association and direct to member live stock sales agencies and through them to the individual members who may be affiliated in county or district organizations or as individual members.

The Feeder and Finance Corporation reaches the individual through terminal or state associations, and then through regional credit corporations, or, in certain instances, emergency loans are negotiated direct with the individual. In addition to furnishing live stock producers with a dependable source of credit this corporation also renders a feeder service whereby range growers may sell cattle and lambs direct to cornbelt feeders.

Dependable Information

The Publishing Association, in carrying information to members, co-operates with all agencies, including terminal and state associations, as well as local or county organization units. Subscriptions are direct with the individual live stock producer who patronizes a co-operative agency member of the National association. Dependable production and marketing information is furnished the membership through this subsidiary so that intelligent co-operation will characterize the policies and marketing methods of the National.

Services rendered by terminal co-

operative selling agencies are generally well understood. These associations receive and sell live stock on a commission basis at terminal markets. They also assist live stock feeders in purchasing feeding stock frequently on the market, but now in co-operation with the Feeder and Finance Corporation, as noted.

The terminal associations are the keystone of the arch through which a strong centrally controlled volume of live stock—nation-wide—is moving in an orderly manner from the producers to the packers.

The state live stock marketing organization is new and has for its purpose the co-ordination of the marketing of live stock produced in the state. Iowa is one of the states now qualified under this plan with a state manager and with regional organizations cooperating. Such a large percentage of Iowa live stock moves direct to packers that at present the problem there has appeared somewhat differently from that presented in other mid-western states. Discussion in other states shows some sentiment for similar state marketing organizations elsewhere.

Texas Was First

Texas also has a state-wide organization which was the first to affiliate with the National Live Stock Marketing Association. Its sales are not direct to packers, but many are direct to feeders and, too, provision has been made for two terminal outlets under control of the Texas organization—one at Ft. Worth, Texas, and one at St. Joseph, Missouri.

The Western Cattle Marketing Association, which has been organized for six years, operates on a contract plan with its membership in which the cattle are sold direct to packers. Their territory includes several states, cattle only being marketed through the organization.

Sells Direct

Among the member agencies is found the National Order Buying Company which has for nearly seven years been marketing live stock direct to packers. This company fills orders from packers either on terminal markets where agents are operating, or direct from concentration points outside of the terminal markets. In states like Minnesota, South Dakota and Iowa, where from 40 to 60 per cent of the hogs move direct to packers, the possibilities of this co-operative service are apparent. The first large terminal market in the central west to be included among the points served by this company is the St. Louis market where 65 to 70 per cent of the hogs are shipped East on orders. A number of recently organized concentration points are using the services of this company which is endeavoring careful grading and direct movement to eliminate some of the handling costs on the road to market.

Most cornbelt live stock producers are acquainted with the set-up and operation of the local shipping association and also with the recent development toward a larger county or regional marketing association. This change has come about largely through the improved highway system which enables concentration of live stock from larger areas.

Loans to Feeders

The regional credit corporation is a corporation which co-operates with the Feeder and Finance Corporation in the handling of loans to live stock feeders. Similar corporations have been in existence in many places for several years, discounting their loans through the Intermediate Credit Banks just as they do at present.

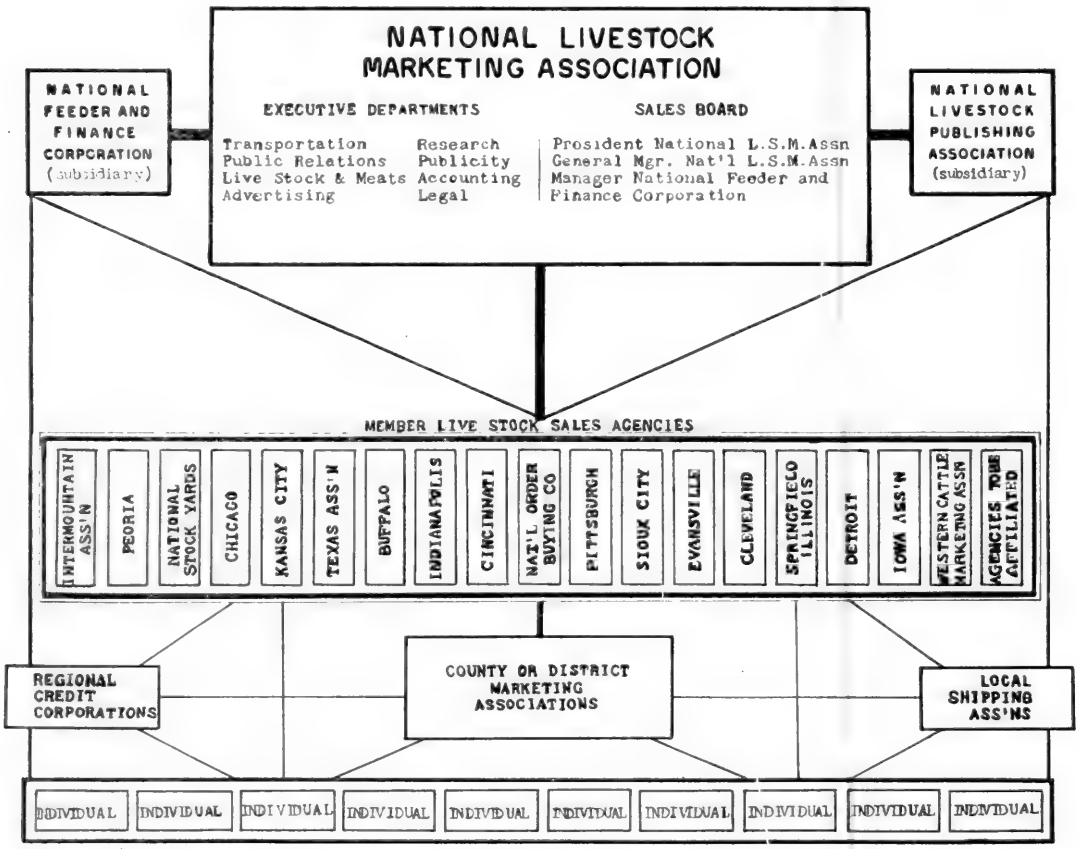
This marketing plan has been designed to handle all of the co-operative live stock business of the country. The success of the program depends upon the endorsement of the idea of collective bargaining by a sufficient number of live stock producers in this country to stabilize prices through volume control and thereby improve marketing conditions and give the live stock producer a greater net profit.

All of the live stock handled co-operatively in 1929 represents about 18 per cent of the total volume produced in the country. This volume, when handled through one selling agency, will greatly enhance the value of volume control and collective bargaining beyond that which has been successfully demonstrated by individual sales agencies on terminal markets where the volume has approached 50 per cent control.

BULK PLANT, TAZEWELL SERVICE CO., PEKIN, ILL.
Similar Bulk Stations are located at Delavan and Richmond in Tazewell county

Tazewell Service Co.

THE Tazewell Service Company organized a short time ago reports excellent support from the 1,274 Farm Bureau members in that county.



The company began operating late in March with seven trucks serving the farm trade from bulk storage stations at Pekin and Delavan. Early in August the third bulk station was opened at Richmond Crossing, and another truck added to the fleet.

In addition to the 1,250 individual customer accounts in the county, the company supplies regularly six privately owned and operated filling stations with Aladdin gasoline and Penn Bond motor oils and greases.

With the assistance of a very competent board of directors Manager Clyde Woolsey, a former truck salesman for the Knox County Oil Company, has succeeded in placing the Tazewell Service Company at the top of the list among the new companies in the state, on the basis of sales. In the course of a few months the Tazewell Service Company has handled 75 cars of motor fuel, approximately 22,386 gallons of lubricating oil, and about 17,960 pounds of grease. With the continued expansion of business this company gives great promise to be one of the leading organizations in the state.

Tazewell county farmers make a practice of clipping coupons from their Farm Bureau memberships and they will have no reason to be disappointed with their service company in view of the fine showing made up to date.

Forty Knox county Farm Bureau members, including President Harry Gehring, and County Advisers Kemp and Campbell, visited the I. A. A. offices on Oct. 3 following an educational tour through Chicago's Union Stock Yards. Henry county live stock growers were in on Wednesday, Oct. 1.

Life Insurance

By L. A. Williams

"The Farmer Applies for Insurance"

Agent: "Have you ever carried any life insurance?"

Farmer: "No."

Agent: "Have you ever been examined thoroughly?"

Farmer: "No."

Agent: "Are you in good health?"

Farmer: "Oh! I'm able to be about and work a bit. Of course, I can't say I'm perfect—I get heart pains once in a while, and I had a little rheumatism last fall, but I'm well enough, I guess."

Agent: "Well, Country Life does a non-medical business up to $3,000 at certain ages, but you better have a medical examination, because if there is anything wrong, you will want to know it, and so will the Company."

Farmer: "Don't you think I can pass?"

Agent: "Well, as to that I couldn't say, but heart pains and rheumatism are not things to be taken lightly, particularly by an Insurance Company. Why haven't you been to a doctor to see how you line up physically?"

Farmer: "Well, doctors' bills are costly, and I wasn't ever so sick but what I got around again in a few days, so I didn't ever bother with it, and if I have to be examined, I don't think I'll bother with the life insurance."

Agent: "Bother, is it, brother? I wonder if you will ever be bothered enough to have a funeral for yourself? Bother? It isn't you that will be bothered; it's your family. It will cost them $5,000 if you don't go through with this examination. It will bother your wife $5,000. Why, what if you were not just exactly standard, the Company might issue you a sub-standard policy, and the examination permits the Company to place you in the correct class. Listen just a minute—today you are increasing the value of your farm by $5,000 simply because its owner insures his estate $5,000 more if he should die. Can't you be bothered with that?"

Farmer: "Yes, I guess it is worth taking a try at, but why didn't I know enough to start when I was younger and in better health, then I wouldn't need to worry about sub-standard ratings, or whether I could pass or not. I guess I'll insure the boy now while he can get it, and get it cheaper."

ALL POLICYHOLDERS IN COUNTRY LIFE

Mr. and Mrs. Chas. A. Martin and family of Montgomery county, Illinois. The children are Glenn, Kenneth, LeRoy and Martha Marie. Each is a policyholder in the Country Life Insurance Company.

Agent: "All right, sign here and here, and give me the boy's place and date of birth. It's a great thing to start young folks out on a life policy, because it teaches them early the value of that kind of an estate, and the chances are that your boy will have $25,000 or $30,000 of life insurance when he is your age, simply following the trend of the times which is to create estates the easiest and most certain way, and enjoy life to the full without worry about what will happen if you fail or die."

Farmer: "Do you know what I pay out in taxes every year would carry a $10,000 policy, even at my age? You may have a better prospect than you think. Let me know what my sub-standard rate is going to be."

Agent: "Well, you take the examination, it may be those heart pains were only gas pains. So long, see you again soon."

Why?

Why should there be any criticism of the farmers when they decide to carry their own products at least as far as the miller? In such a process there is only one class of people that can be injured—the merchants and brokers. From their individual standpoint the process is regrettable. Viewing it in the light of modern business development it is unavoidable. Why should a miller care whether he buys his supplies of wheat direct from the producer or from a broker or merchant? It really makes little or no difference to him. He is mainly concerned with buying his requirements on a price basis that will enable him to compete with other millers.

—A. J. McPhail.

Illinois Woman Second

Because an Illinois woman used butter in her Thanksgiving Day Dinner Menu, she was awarded second prize in a nation-wide contest sponsored by Bureau Farmer, official publication of the American Farm Bureau Federation. The competition which ended September 20 drew more than 500 entries. Bernice Rinker of Grand Ridge, LaSalle county, Illinois, the second prize winner, proved her ability as farm woman cook, when she suggested butter instead of a butter substitute as recommended by her nearest rival.

"Culinary Champion of All Farm Women Cooks" is the title conferred upon Mrs. M. L. Freise, Redwood Falls, Minnesota, by Sam H. Thompson, president of the American Farm Bureau Federation when he learned that she had won the contest and will receive a cash prize of $50. The second prize winner receives $25. Twenty-five other prizes of $1 each were awarded to 25 other women including the following from Illinois: Miss Bernice Harris, R. 1, Petersburg; Mrs. Peter Sullivan, Eureka; Mrs. Joseph Helm, R. 1, Spring Valley, and Mrs. Clarence Peters, Galesburg.

"I am glad to get Rev. Flori's copy of the I. A. A. RECORD in my mail, since taking his place September 15. Keep sending it. First thing out I saw Sam Thompson's name in your September number. He's the man whose every word in writing of reported speech I have been swallowing eagerly for years—since they recognized Thompson's value to the cause, consisting mainly of his practical knowledge and his uncommon common horse sense.

"I am coming here from five and one-half years in our capitol city and I can appreciate Thompson's joke or rather the joke on Thompson and his three dollar hat."

REV. ANTON M. TASCHKE,
Adams County, Ill.

New "Vacuum Cleaner" Removes Cattle Pest

A "VACUUM CLEANER" to extract ox warbles from the cow's back has been devised by Doctors Imes, Boyd, and other associates of the United States Department of Agriculture, who are stationed at Galesburg, Illinois, to study the problem of ox-warble infestation of cattle.

The "vacuum cleaner" has been mounted on an automobile trailer with four to six lines of suction hose and nozzles.

When in operation, a nozzle is placed over an ox-warble grub on the animal's back and the grub is drawn out through the opening in the skin.

The machine will remove all ox-warbles, but because of the tenacity of the older grubs two or three attempts are frequently necessary to dislodge them. Doctor Imes and his coworkers hope to perfect the nozzles sufficient to get a grub with every suction.

It is hoped that this machine will be practical for county-wide campaigns against the ox-warble in regions where it is easy to corral all cattle in large herds and send them through chutes to be "degrubbed."

Heretofore the most satisfactory method of removing the grubs was to extract them through the openings in the animal's back one at a time with forceps, preferably of the alligator type. This is a slow and expensive method. Experimenters in Europe found that about all of the grubs could be destroyed by inserting a small medicated stick in the grub opening.

The department's ox-warble studies revealed that young cattle are more heavily infested by this parasite than are older animals, and also that females are more often parasitized than bulls. The heifer is most attractive to this pest, while the old bull is the least attractive subject.

Argentine Corn

The price of corn in Argentina, plus the shipping cost and the United States tariff is five cents less than the price of corn at Chicago. If the price differential continues an increase in imports of corn may be expected, according to the Department of Commerce.

Corn in Argentina is now worth about 52 cents, while the price at Chicago, September 16, was about 92 cents a bushel. There have been small imports of corn from Argentina already, but they have not been in large quantities. The lower priced Argentina grain is supplying various markets now.

Capper Award

The 1930 Capper Award for Distinguished Service to American Agriculture, which consists of a gold medal and $5,000 in cash will be conferred on Dr. S. M. Babcock of the University of Wisconsin for his invention of the Babcock Milk Tester. The prize is an annual one offered by Senator Capper of Kansas.

F. B. Nichols, secretary of the Committee of Awards, in the Capper building, Topeka, Kansas, is now receiving suggestions for the 1931 award. Living Americans who have made a contribution of national importance to agriculture are eligible.

Increase Farm Income

Pay more attention to increasing the farm income rather than to decreasing expenses, advised M. L. Mosher, director of the Farm Bureau farm management service in Henry, Stark, Peoria and Knox counties in addressing farmers during the first annual tour and picnic of the co-operators in that territory.

Mr. Mosher quoted Henry Ford in a recent magazine article in which he stated that systems of management were essential for profitable business, but what is needed more at present is good managers to carry out these systems.

Africans Grow Corn

While traveling through South and East Africa last year Dr. A. S. Hitchcock, botanist of the United States Department of Agriculture, was impressed with the vast fields of corn grown in Africa.

This Indian corn, called "mealies" by the Africans, was introduced from the United States and is now grown on a large scale by white planters. Doctor Hitchcock said he felt as if he were traveling through the cornbelt while in South Africa.

Can't Burn Cotton

The burning of cotton or other personal property in Arkansas for the purpose of improving the market price of a commodity is a violation of the law, and persons who engage in such practices will be vigorously prosecuted, according to a statement issued by the Assistant State Fire Marshall.

A citizen of Beebe, White county, Arkansas, burned a bale of cotton on Main street in that town on September 20 in an effort to stimulate others toward doing likewise.

Old Nick, Aged Horse, Retired on Pension

Uncle Sam does not provide a "retirement fund" for his four-footed employees, as a rule, but he has made an exception in the case of Old Nick, 34-year-old horse, recently retired on a pension of two measures of bran, oats and alfalfa meal daily.

Nick went to work for the United States Department of Agriculture in 1899, when a gelding four years of age, and has been in Government harness ever since. For more than 30 years he has plodded faithfully for "his uncle." Now at the stage of life comparable to about 90 years of age for man, with faltering gait and teeth worn but otherwise well preserved, he is being given a rest.

First he went to work at the Federal quarantine station, Athenia, N. J. Since 1906 he has worked at the Government Experiment Station at Bethesda, Md., where, until 1915, he pulled a wagon daily from the station to the Department of Agriculture headquarters in Washington and back, a round trip of about 20 miles.

Born in the days when the horse was the master of the inland transportation problem, Nick has lived to see his kind gradually disappear from the highways. Although he shied at the first "gas buggies" and later learned to pass hundreds of them on the road without notice, he, too, finally fell victim to the relentless competition. Now a motor truck does his job while he grazes leisurely in his pasture.

Another Irrigation Project Considered

With abundant water near the extensive desert lands of the Columbia River Basin, the Bureau of Reclamation has begun work to determine the most feasible way of getting the water on to the land, it was stated recently by the Department of the Interior.

H. W. Bashore of the Bureau of Reclamation, regarded as being especially skillful as a location engineer, has been assigned to a study of a means for reclaiming a sagebrush plain in the State of Washington as big as the nation's two smallest states combined and converting it into an irrigated garden spot.

The Columbia, Snake and the Spokane rivers flow past these parched desert lands, but they have cut deep into the silt and their beds are now hundreds of feet lower than the level of the plain.

All setbacks are merely temporary to the man who is going somewhere.

Life Insurance

By L. A. Williams

"The Farmer Applies for Insurance"

Agent: "Have you ever carried any life insurance?"

Farmer: "No."

Agent: "Have you ever been examined thoroughly?"

Farmer: "No."

Agent: "Are you in good health?"

Farmer: "Oh! I'm able to be about and work a bit. Of course, I can't say I'm perfect—I get heart pains once in a while, and I had a little rheumatism last fall, but I'm well enough, I guess."

Agent: "Well, Country Life does a non-medical business up to $3,000 at certain ages, but you better have a medical examination, because if there is anything wrong, you will want to know it, and so will the Company."

Farmer: "Don't you think I can pass?"

Agent: "Well, as to that I couldn't say, but heart pains and rheumatism are not things to be taken lightly, particularly by an Insurance Company. Why haven't you been to a doctor to see how you line up physically?"

Farmer: "Well, doctors' bills are costly, and I wasn't ever so sick but what I got around again in a few days, so I didn't ever bother with it, and if I have to be examined, I don't think I'll bother with the life insurance."

Agent: "Bother, is it, brother? I wonder if you will ever be bothered enough to have a funeral for yourself? Bother? It isn't you that will be bothered; it's your family. It will cost them $5,000 if you don't go through with this examination. It will bother your wife $5,000. Why, what if you were not just exactly standard, the Company might issue you a sub-standard policy, and the examination permits the Company to place you in the correct class. Listen just a minute—today you are increasing the value of your farm by $5,000 simply because its owner insures his estate $5,000 more if he should die. Can't you be bothered with that?"

Farmer: "Yes, I guess it is worth taking a try at, but why didn't I know enough to start when I was younger and in better health, then I wouldn't need to worry about sub-standard ratings, or whether I could pass or not. I guess I'll insure the boy now while he can get it, and get it cheaper."

ALL POLICYHOLDERS IN COUNTRY LIFE

Mr. and Mrs. Chas. A. Martin and family of Montgomery county, Illinois. The children are Glenn, Kenneth, LeRoy and Martha Marie. Each is a policyholder in the Country Life Insurance Company.

Agent: "All right, sign here and here, and give me the boy's place and date of birth. It's a great thing to start young folks out on a life policy, because it teaches them early the value of that kind of an estate, and the chances are that your boy will have $25,000 or $30,000 of life insurance when he is your age, simply following the trend of the times which is to create estates the easiest and most certain way, and enjoy life to the full without worry about what will happen if you fail or die."

Farmer: "Do you know what I pay out in taxes every year would carry a $10,000 policy, even at my age? You may have a better prospect than you think. Let me know what my sub standard rate is going to be."

Agent: "Well, you take the examination, it may be those heart pains were only gas pains. So long, see you again soon."

Why?

Why should there be any criticism of the farmers when they decide to carry their own products at least as far as the miller? In such a process there is only one class of people that can be injured—the merchants and brokers. From their individual standpoint the process is regrettable. Viewing it in the light of modern business development it is unavoidable. Why should a miller care whether he buys his supplies of wheat direct from the producer or from a broker or merchant? It really makes little or no difference to him. He is mainly concerned with buying his requirements on a price basis that will enable him to compete with other millers.

—A. J. McPhail.

Illinois Woman Second

Because an Illinois woman used butter in her Thanksgiving Day Dinner Menu, she was awarded second prize in a nation-wide contest sponsored by Bureau Farmer, official publication of the American Farm Bureau Federation. The competition which ended September 20 drew more than 500 entries. Bernice Rinker, of Grand Ridge, LaSalle county, Illinois, the second prize winner, proved her ability as farm woman cook, when she suggested butter instead of a butter substitute as recommended by her nearest rival.

"Culinary Champion of All Farm Women Cooks" is the title conferred upon Mrs. M. J. Freise, Redwood Falls, Minnesota, by Sam H. Thompson, president of the American Farm Bureau Federation when he learned that she had won the contest and will receive a cash prize of $50. The second prize winner receives $25. Twenty-five other prizes of $1 each were awarded to 25 other women including the following from Illinois: Miss Bernice Harris, R. 1, Petersburg; Mrs. Peter Sullivan, Eureka; Mrs. Joseph Helm, R. 1, Spring Valley, and Mrs. Clarence Peters, Galesburg.

"I am glad to get Rev. Hon's copy of the I. A. A. RECORD in my mail, since taking his place September 15. Keep sending it. First thing out I saw Sam Thompson's name in your September number. He's the man whose every word in writing or reported speech I have been swallowing eagerly for years since they recognized Thompson's value to the cause, consisting mainly of his practical knowledge and his uncommon common horse sense.

"I am coming here from five and one-half years in our capitol city and I can appreciate Thompson's joke or rather the joke on Thompson and his three dollar hat."

REV. ANTON M. TASCHEL.
Adams County, Ill.

New "Vacuum Cleaner" Removes Cattle Pest

A "VACUUM CLEANER" to extract ox warbles from the cow's back has been devised by Doctors Imes, Boyd, and other associates of the United States Department of Agriculture, who are stationed at Galesburg, Illinois, to study the problem of ox-warble infestation of cattle.

The "vacuum cleaner" has been mounted on an automobile trailer with four to six lines of suction hose and nozzles.

When in operation, a nozzle is placed over an ox-warble grub on the animal's back and the grub is drawn out through the opening in the skin.

The machine will remove all ox-warbles, but because of the tenacity of the older grubs two or three attempts are frequently necessary to dislodge them. Doctor Imes and his coworkers hope to perfect the nozzles sufficient to get a grub with every suction.

It is hoped that this machine will be practical for county-wide campaigns against the ox-warble in regions where it is easy to corral all cattle in large herds and send them through chutes to be "degrubbed."

Heretofore the most satisfactory method of removing the grubs was to extract them through the openings in the animal's back one at a time with forceps, preferably of the alligator type. This is a slow and expensive method. Experimenters in Europe found that about all of the grubs could be destroyed by inserting a small medicated stick in the grub opening.

The department's ox-warble studies revealed that young cattle are more heavily infested by this parasite than are older animals, and also that females are more often parasitized than bulls. The heifer is most attractive to this pest, while the old bull is the least attractive subject.

Argentine Corn

The price of corn in Argentina, plus the shipping cost and the United States tariff is five cents less than the price of corn at Chicago. If the price differential continues an increase in imports of corn may be expected, according to the Department of Commerce.

Corn in Argentina is now worth about 52 cents, while the price at Chicago, September 16, was about 92 cents a bushel. There have been small imports of corn from Argentina already, but they have not been in large quantities. The lower priced Argentina grain is supplying various markets now.

Capper Award

The 1930 Capper Award for Distinguished Service to American Agriculture, which consists of a gold medal and $5,000 in cash will be conferred on Dr. S. M. Babcock of the University of Wisconsin for his invention of the Babcock Milk Tester. The prize is an annual one offered by Senator Capper of Kansas.

The Columbia, Snake and the Spokane rivers flow past these parched desert lands, but they have cut deep into the silt and their beds are now hundreds of feet lower than the level of the plain.

All setbacks are merely temporary to the man who is going somewhere.

INSURANCE NEWS

E. A. CARNCROSS, general agent in Cook county, won first prize consisting of a $70 watch in the agents' Farm Bureau auto insurance contest for September. Roy Mitchell of Champaign county won second prize, a $40 watch. C. E. Hopkins of Livingston county, L. R. Welk of Logan county, and K. W. Cleland of Boone county won third, fourth and fifth prizes respectively. Each got a $15 fountain pen and pencil set.

Champaign county was high for the month with 100 applications, Cook county was second with 81. During the month Carncross signed 73 applications, Mitchell 55, and Hopkins 53.

The Illinois Agricultural Mutual on October 1 had 24,504 auto insurance applications and policies in force. The total for September was 876.

The National Safety Council reports that automobile accidents have been reduced 29 per cent in the nine states which have passed drivers' license laws.

The Illinois Agricultural Mutual Insurance Company operating only three and one-half years has assets of $580,000, and has saved its members $300,000 on automobile insurance alone compared with the initial cost in any other state-wide company.

Country Life agents, divided into two teams known as the Army and Navy, began a "football" contest on October 15 to see which side could write the most life insurance by December 15.

Most of the northern and western Illinois counties are on the Navy team, while central and southern Illinois counties comprise the Army. Only paid for business will count.

One thousand dollars of life insurance moves the ball a yard in the enemy's territory. If Army sends in $15,000 of insurance on October 15 the ball will be carried into Navy's territory 15 yards. If Navy sends in $10,000 the same day the ball will be carried back 10 yards and be placed on the Navy's 45-yard line. The player (county) making the greatest yardage each day (sending in the largest amount of business) will have the honor of carrying the ball for yardage gain.

Sam Crabtree, Marshall - Putnam county, is captain of the Navy; William Hedgcock, McLean county, of the Army.

At the annual Country Life meeting in January the winners will be served a steak dinner by the losers. The losers will have wieners and sauerkraut, and assess themselves 50 cents each to pay for the winners' dinner.

"Four reasons why I believe in life insurance," says Larry Williams, manager Country Life Insurance Co. Left to right: Bonnie Jean, age 8; Bernice 14, Lorine 18, Lawrence Williams Jr. 17.

Counties playing in the game (sending in policies) every day from October 15 to December 15 will be on the All-American team. Time out will be allowed for rainy days, bad roads, and nobody home.

Country Life Records

Manager L. A. Williams reports that:—

1. Country Life holds the world's record for the largest amount of life insurance paid for in a company's first year.

2. For the largest second year's business of any company.

3. For the lowest lapse rate in any second-year period.

4. For the largest percentage of increase of any company in the United States in 1930. All but 5 per cent of companies show a loss for 1930 and that 5 per cent barely hold their own. Country Life easily has a 100 per cent gain.

5. Country Life has built an agency made up of nearly all "green" material. Ninety-one general agents never sold life insurance before.

6. Country Life is the only company on record to add to its surplus in the first year of operation.

7. Country Life has the lowest annual participating premiums of any company selling to the general public. Government insurance to ex-soldiers is lower.

The five leading counties in term life insurance written during September were:

1. LaSalle Co.	125 applications—	$172,000
2. Marshall-Put.	123 applications—	165,000
3. Christian Co.	116 applications—	153,000
4. Winnebago Co.	116 applications—	148,000
5. McLean Co.	114 applications—	146,000

Opposes Compulsory Auto Insurance

A PLAN of compulsory compensation insurance to idemnify victims of automobile accidents advocated by the chairman of the Wisconsin Industrial Commission, was declared to be impracticable by the general counsel of the Maryland Casualty Company in a debate at the recent meeting of the American Bar Association.

The attorney gave the following reasons for opposing such a law:

1. Such a law will materially increase legal controversy.
2. There cannot be prompt relief where there is controversy.
3. The compulsory plan is in many of its aspects most inequitable. No proposal can be equitable under which one of the parties receives compensation at his own fault, at the expense of the innocent party, unless there is, as in workmen's compensation, an offsetting advantage accruing to the innocent.
4. The cost of accident insurance will increase tremendously because payments will be made upon claims not now reported. The number of claims will inevitably and legitimately increase. The cost of insurance under workmen's compensation laws has constantly increased over the cost of liability insurance in all states.

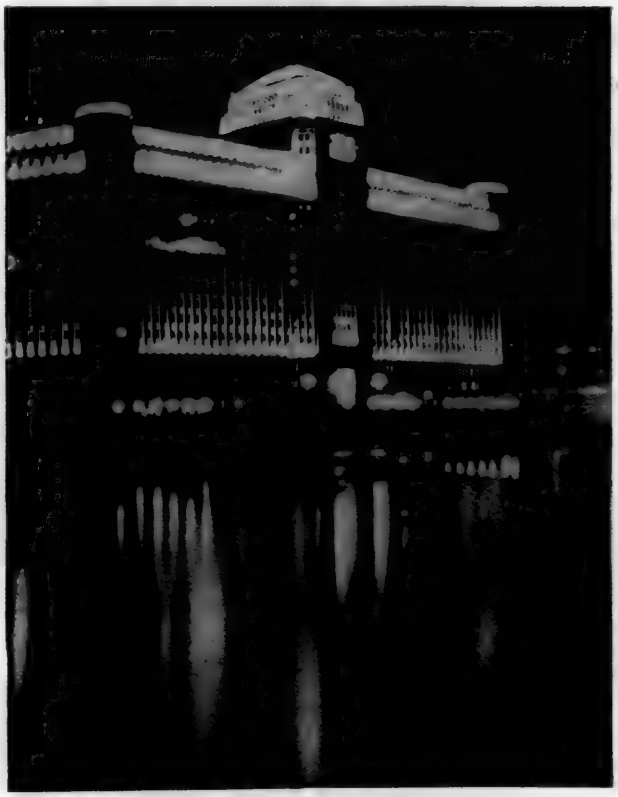
Illinois Agricultural Mutual Ins. Co.

"We thank you very kindly for the check Mr. C. F. Dobbins turned over to us this morning covering E. L. Rieser's account on repairs to his Buick coupe.

"It is indeed a pleasure to be able to serve persons insured in your company because if any difficulties arise your agent, Mr. Dobbins, is always ready to adjust matters satisfactory to all.

"Enclosed please find receipted bill covering repairs to cushions."

CLYDE C. NETZLEY & CO.,
Per E. G. Tannery
Naperville, Dupage county, Ill.



Between 1899 and 1927 general taxes charged against property in Rock Island county, Illinois, for state purposes increased 7.34 times as fast as population, and 6.60 times as fast as total full valuations of property.

For county and local purposes taxes increased 6.20 times as fast as population, and 6.30 times as fast as total full valuations of property.

The bigger and more highly colored apples are, the longer they will keep, it has been discovered by horticulturists.

THE WRECK AFTER THE ACCIDENT

THE SAME CAR AFTER BEING REPAIRED

YOUR CAR RESTORED LIKE NEW

THE picture to the left above shows the automobile of L. F. Oertwig, McLean county, Illinois, after a bad accident that happened four miles west of Bloomington. At the direction of the company the wreck was repaired by a high grade garage in central Illinois. The insured's automobile was placed in first class condition at an expense of $513.12 to the company. The restored car after the repair job is seen to the right.

Collision

Public Liability and Property Damage

The Illinois Agricultural Mutual—the state-wide Farm Bureau auto insurance company—patronizes only the best garages for repair work on the damaged cars of its policyholders. Restoring damaged cars to their original condition is a service your company performs for policy holders insured against movable or stationary object collision, or both.

THE POLICY HOLDER COMES FIRST

ACTUAL value of the car is paid in case of fire or theft. Public liability and property damage insurance protects you against court costs, hospital bills, damage your car does to other property. Claims are settled fairly and promptly . . . the interest of the policyholder comes first. Premiums are held at a minimum consistent with safety. Ample reserves insure the payment of losses without unnecessary delay. Policyholders are limited to Farm Bureau members . . . responsible people . . . preferred risks.

Fire

Theft

Insurance AT COST in your OWN COMPANY is the best you can buy It's a privilege to be a member of the Illinois Agricultural Mutual family.

Tax Amendment Goes Down in Nov. 4 Vote

Farmers Stand Well Together in Defeating Measure, Compare with 1926 Amendment Vote

AS we go to press, election officials and newspapers are still tabulating the results of the proposed revenue amendment which appeared on the main ballot under the misleading label "Tax Relief Amendment."

The measure was badly defeated. That much is certain, although the count is still far from completed.

One newspaper computing the vote on the basis of the first day's returns stated that around 800,000 voted on the measure out of more than 2,000,000 who went to the polls. This same publication reports, "Of the 790,000 who voted on the amendment, 440,000 were against it."

If this statement is roughly accurate, 350,000 voted yes.

Early Returns

Another report shows that 4,762 precincts out of 7,109 in Illinois voted as follows: Yes, 219,196; No, 312,889. The Associated Press statement of Nov. 6 showed that 4,948 precincts out of 7,109 in Illinois voted as follows: No, 330,622; Yes, 236,376.

What was in the minds of the vast number of people who failed to vote on the measure is something for conjecture. It is likely that the majority of these were confused over the proposal and so did nothing. It is also likely that many who had not studied the measure were attracted by the catchy title with the "bait" underneath it and voted Yes. Many contend that the measure was submitted in an illegal manner and there is good evidence to justify this belief. It is doubtful if the amendment would have become law had it received the required constitutional majority.

Behind 1926 Proposal

In spite of the advantages for approval the 1930 amendment had in the way it was handled on the ballot, it ran considerably behind the better amendment of 1926 which was submitted on a separate small ballot, and which was vigorously supported by the Illinois Agricultural Association.

A check-up of the Nov. 4 vote in McLean county supplied by the Bloomington Pantagraph shows that 86 precincts in the county voted Yes, 4,426; No, 4,439. Four years ago the McLean county vote was 5,174 YES and 4,119 AGAINST.

Mercer county, which is strictly rural, offers even a more striking illustration. Returns supplied by the Mercer County Farm Bureau, which opposed the amendment this year, show 1,896 votes Against and only 630 For.

In 1926 when the Farm Bureau supported the amendment the vote was 3,362 Yes and only 983 Against.

Whiteside County Figures

In Whiteside county, the Whiteside Sentinel reports that 2,692 voted No on the amendment this year, while 1,970 voted Yes. That the farmers of Whiteside county heeded the advice of the Farm Bureau, the I. A. A., Prairie Farmer and Illinois Farmer in opposing the measure is revealed in a check-up of the vote in the strictly rural townships.

In Genesee and Hopkins townships, which contain no towns of any consequence, the vote was 2 to 1 Against the tax measure. In Hume township—all rural—it was 4 to 1 Against; in Hahnaman 3 to 1; in Montgomery and Jordan nearly 3 to 1. In most of the cities of this county the measure got a majority or about an even break.

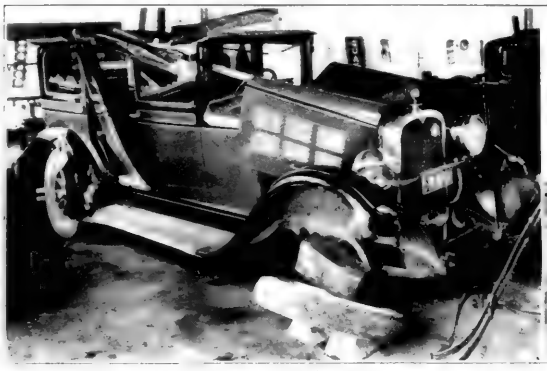
All this indicates that Illinois farmers are presenting a reasonably solid front in legislative matters affecting their welfare.

The Illinois Agricultural Association, in line with its policy of being constructive in needed reforms is already at work on helpful and constructive suggestions for tax measures, designed to lift some of the burden from property, for introduction in the approaching 57th general assembly.

Boycott Hearing in Live Stock Case Held

Government Citation Charges Boycott and Discrimination Against Co-Op. by Commission Men

PROCEEDINGS against more than two score firms or individuals operating as market agents or dealers at the St. Louis National Stock Yards for discrimination against live stock co-operative organizations, began in the Federal building, East St. Louis, on Nov. 6.



Immediately on the opening of the hearing motions to dismiss the inquiry by Secretary Hyde, a demurrer to the allegations of the citation, and a motion for continuance, were offered by the attorney for the commission men. These were overruled by Examiner J. B. Horigan, the Federal attorney conducting the hearing.

Ketner Is Witness

F. G. Ketner, manager of the National Order Buying Company, was the first witness called. He stated that because of discrimination against the Order Buying Company their volume of business had dropped from 20 per cent to 10 per cent of the orders filled on the market in a period of about three weeks.

His statement, which was admitted to the record, included a discussion of the trading conditions on the market with Frank Young, manager of the Farmers' Live Stock Commission Company, and W. A. Moody, president of the St. Louis Live Stock Exchange. During this discussion the alleged boycott was openly referred to and both gentlemen were asked to assist in keeping the market open. Neither Mr. Young nor Mr. Moody were agreeable to the proposal nor were trading relations improved following this conference.

The attorneys for the respondents were scheduled to cross examine Mr. Ketner on Friday, November 7.

THE WRECK AFTER THE ACCIDENT

THE SAME CAR AFTER BEING REPAIRED

YOUR CAR RESTORED LIKE NEW

HE picture to the left above shows the automobile of L. F. Oertwig, McLean county, Illinois, after a bad accident that happened four miles west of Bloomington. At the direction of the company the wreck was repaired by a high grade garage in central Illinois. The insured's automobile was placed in first class condition at an expense of $513.12 to the company. The restored car after the repair job is seen to the right.

Collision

Public Liability and Property Damage

The Illinois Agricultural Mutual—the state-wide Farm Bureau auto insurance company—patronizes only the best garages for repair work on the damaged cars of its policyholders. Restoring damaged cars to their original condition is a service your company performs for policy holders insured against movable or stationary object collision, or both.

CTUAL value of the car is paid in case of fire or theft. Public liability and property damage insurance protects you against court costs, hospital bills, damage your car does to other property. Claims are settled fairly and promptly the interest of the policyholder comes first. Premiums are held at a minimum consistent with safety. Ample reserves insure the payment of losses without unnecessary delay. Policyholders are limited to Farm Bureau members . . . responsible people . . . preferred risks.

Fire

Theft

Insurance AT COST in your OWN COMPANY is the best you can buy It's a privilege to be a member of the Illinois Agricultural Mutual family.

For full information about the cost of insuring your automobile or truck see your local agent or mail the coupon.

Tax Amendment Goes Down in Nov. 4 Vote

Farmers Stand Well Together in Defeating Measure, Compare with 1926 Amendment Vote

AS we go to press, election officials and newspapers are still tabulating the results of the proposed revenue amendment which appeared on the main ballot under the misleading label "Tax Relief Amendment."

The measure was badly defeated. That much is certain, although the count is still far from completed.

One newspaper computing the vote on the basis of the first day's returns stated that around 800,000 voted on the measure out of more than 2,000,000 who went to the polls. This same publication reports, "Of the 790,000 who voted on the amendment, 440,000 were against it."

If this statement is roughly accurate, 350,000 voted yes.

Early Returns

Another report shows that 4,762 precincts out of 7,109 in Illinois voted as follows: Yes, 219,196; No, 312,889. The Associated Press statement of Nov. 6 showed that 4,948 precincts out of 7,109 in Illinois voted as follows: No, 330,622; Yes, 236,376.

What was in the minds of the vast number of people who failed to vote on the measure is something for conjecture. It is likely that the majority of these were confused over the proposal and so did nothing. It is also likely that many who had not studied the measure were attracted by the catchy title with the "bait" underneath it and voted Yes. Many contend that the measure was submitted in an illegal manner and there is good evidence to justify this belief. It is doubtful if the amendment would have become law had it received the required constitutional majority.

Behind 1926 Proposal

In spite of the advantages for approval the 1930 amendment had in the way it was handled on the ballot, it ran considerably behind the better amendment of 1926 which was submitted on a separate small ballot, and which was vigorously supported by the Illinois Agricultural Association.

A check-up of the Nov. 4 vote in McLean county supplied by the Bloomington Pantagraph shows that 86 precincts in the county voted Yes, 4,426; No, 4,439. Four years ago the McLean county vote was 5,174 YES and 4,119 AGAINST.

Mercer county, which is strictly rural, offers even a more striking illustration. Returns supplied by the Mercer County Farm Bureau, which opposed the amendment this year, show 1,896 votes Against and only 630 For.

In 1926 when the Farm Bureau supported the amendment the vote was 3,362 Yes and only 983 Against.

Whiteside County Figures

In Whiteside county, the Whiteside Sentinel reports that 2,692 voted No on the amendment this year, while 1,970 voted Yes. That the farmers of Whiteside county heeded the advice of the Farm Bureau, the I. A. A., Prairie Farmer and Illinois Farmer in opposing the measure is revealed in a check-up of the vote in the strictly rural townships.

In Genesee and Hopkins townships, which contain no towns of any consequence, the vote was 2 to 1 Against the tax measure. In Hume township—all rural—it was 4 to 1 Against; in Hahnaman 3 to 1; in Montgomery and Jordan nearly 3 to 1. In most of the cities of this county the measure got a majority or about an even break.

All this indicates that Illinois farmers are presenting a reasonably solid front in legislative matters affecting their welfare.

The Illinois Agricultural Association, in line with its policy of being constructive in needed reforms is already at work on helpful and constructive suggestions for tax measures, designed to lift some of the burden from property, for introduction in the approaching 57th general assembly.

Boycott Hearing in Live Stock Case Held

Government Citation Charges Boycott and Discrimination Against Co-Op. by Commission Men

PROCEEDINGS against more than two score firms or individuals operating as market agents or dealers at the St. Louis National Stock Yards for discrimination against live stock co-operative organizations, began in the Federal building, East St. Louis, on Nov. 6.

Immediately on the opening of the hearing motions to dismiss the inquiry by Secretary Hyde, a demurrer to the allegations of the citation, and a motion for continuance, were offered by the attorney for the commission men. These were overruled by Examiner J. B. Horigan, the Federal attorney conducting the hearing.

Ketner Is Witness

F. G. Ketner, manager of the National Order Buying Company, was the first witness called. He stated that because of discrimination against the Order Buying Company their volume of business had dropped from 20 per cent to 10 per cent of the orders filled on the market in a period of about three weeks.

His statement, which was admitted to the record, included a discussion of the trading conditions on the market with Frank Young, manager of the Farmers' Live Stock Commission Company, and W. A. Moody, president of the St. Louis Live Stock Exchange. During this discussion the alleged boycott was openly referred to and both gentlemen were asked to assist in keeping the market open. Neither Mr. Young nor Mr. Moody were agreeable to the proposal nor were trading relations improved following this conference.

The attorneys for the respondents were scheduled to cross examine Mr. Ketner on Friday, November 7.

Here Are Charges

Charges filed by the Secretary of Agriculture for violation of the Packers and Stockyards Act of 1921 state that: "The said respondents have combined, conspired and agreed to have no business relations at the said stock yards with the National Order Buying Company, and Kennett, Sparks & Company, Inc., market agencies duly registered as such and engaged in business at the St. Louis National Stock Yards, and with other divers market agencies registered and doing business as such at said stock yards whose names are unknown to the Secretary of Agriculture, and have combined, conpired and agreed to refuse and refrain, and to cause other registered market agencies and dealers to refuse and refrain from having any business relations with the said National Order Buying Company and Kennett, Sparks & Company, Incorporated."

Unfair and Unjust

The charges further state that the respondents acting by themselves and through their lawful agents "have engaged in and used certain unfair and unjustly discriminatory practices and devices in connection with the receiving, marketing, buying, selling, feeding, watering, holding, delivery, shipment, weighing and handling of live stock in commerce, and that the said respondents while acting as the agent for their principals, to wit, the shippers of live stock, and while having custody, possession and control of live stock so shipped to the said respondents for sale on commission at said stock yards, without just cause have refused and refrained from showing or offering to show to buyers, to wit, the National Order Buying Company, Kennett, Spark & Company, Incorporated, and other buyers, live stock so held by them for sale on consignment on behalf of their shippers and have failed, refused and declined to permit said buyers to look at the live stock consigned to respondents as aforesaid, and have thereby rendered buyers to bid on or buy such live stock which said buyers were at all times ready, able and willing to purchase, and to pay the prices agreed upon therefor."

The boycott represents a concerted effort on the part of private dealers and commission men to fight co-operative marketing in general, and the new national live stock co-operative plan sponsored by the Farm Board in particular.

Changing styles in the beef trade will see the heavier types of grain-fed steers losing even more of their waning popularity during the next few years, according to Sleeter Bull, meat specialist at the University of Illinois.

The present trend toward marketing grain-fed cattle at younger ages will continue during the next few years, he believes.

Spitler and Longmire Promoted

J. C. Spitler is the new state leader of farm advisers recently appointed to succeed the late Prof. W. H. Smith.

Mr. Spitler has been with the State Extension Service for many years as assistant state leader. He is well liked by farmers and extension workers throughout Illinois. Mr. Spitler is a graduate of the University of Illinois.

J. C. Spitler

F. E. Longmire, able farm adviser in Grundy county for the past 13 years, will fill the position occupied by Mr. Spitler before the latter's promotion. Mr. Longmire made an enviable record in seed corn improvement work and in helping to develop and popularize Grundy county sweet clover.

Scott Produce Assn. Has Successful Year

NEARLY 500 attended the annual meeting of the Scott County Produce Assn. on Oct. 30. The program for the day consisted of reports on the activities of the Farm Bureau and subsidiary companies, addresses, a splendid dinner at noon and local entertainment, states Frank Gougler, who addressed the meeting.

The audit report of the association showed that it handled during the past fourteen months 109,348.6 pounds of butterfat, 109,369¾ dozens of eggs, and 139,352 pounds of poultry. Gross income on this business amounted to $12,112.52. Expenses amounted to $6,182, leaving a net income of $5,930.50.

Patronage refunds were made in the amount of $4,465.73 on the basis of 3 cents per pound on butterfat handled and 1 cent per dozen eggs and per pound poultry handled. In addition to this, $1,464.29 was set aside in the surplus fund.

During the meeting the members voted to change their charter so it will conform to the State Produce Marketing plan, which provides for capital stock. From its organization to November 1, 1930, the Scott County Produce Association has sold its butterfat to the Aro Creamery of St. Louis. Pleasant relations have prevailed throughout that time. Now the cream is going to Swift's branch plant at Jacksonville under the terms of the new contract with the creamery companies.

Observations

THE National Association Against Government Competition in Business is the imposing title given the latest anti-co-operative organization formed at St. Louis following a harangue by F. Dumont Smith, Kansas attorney, against the Agricultural Marketing Act, on the night of Oct. 31.

"F. Dumont Smith will be remembered, if at all," writes Bill Stahl of the Farmers' National Grain Co-Op, "as the gentleman who declared the Marketing Act unconstitutional without resort to any court of justice." F. Dumont's efforts at getting the American Bar Association to go on record against the Act failed, although his advance publicity heralded the association's opposition as a foregone conclusion.

Word received by Charles Cummings, general manager of the Midwest Grain Corp., from a friend in St. Louis, indicates that around 200 people signed membership cards in the National Association Against Government organization which already has been dubbed the "Naag's." Mr. Legge, the Farm Board, and farm co-operatives apparently are in for more "nagging" on a grander scale.

F. Dumont must have electrified his audience by picturing the Farm Board as threatening to enter the meat packing, canning, flour milling and chain store field. Hallowe'en was an appropriate time, it must be said, to let loose the hobgoblins, witches and bogey men to terrify gullible listeners. However, the careless distortion of facts and truth is not a new game to those who on the surface decry the Farm Board and Marketing Act, but who at heart bitterly resent any advancement by agricultural producers in marketing their own products co-operatively.

Charlie Cummings, who has acquired a reputation around the state as a humorist as well as an astute grain man, says that all these propagandists remind him of the bedtime story about the polecats and the bear. Mamma Skunk and her three little ones were going down the path through the dark woods when they met a great big bear. "Mamma," cried the little ones in terror as they ran to their mother, "What are we going to do?" Thoughtfully, the mother replied, "Children, let-us-pray."

Grocers Succeed by Contract Co-Operation

President of Independent Group Tells How Merchants Are Meeting Competition by Working Together

HOW more than 9,000 independent grocers throughout the United States are succeeding by compulsory co-operation under the contract plan of membership was disclosed by J. Frank Grimes of Chicago, president of the Independent Grocers' Alliance of America, who spoke recently before the Independent Oil Men of America at St. Louis.

So successful have the 9,000 or more merchants in Grimes' organization been that their profits this year, despite business depression, are 45 per cent larger than last year, continues the newspaper report of his address.

Compulsory, Not Voluntary

The touchstone of their success was co-operative buying and uniform merchandising and display methods, but it was a different type of co-operation than that ordinarily envisioned.

It was compulsory rather than voluntary.

When members entered the alliance they signed contracts to follow the policies outlined by the directing heads so that in effect the alliance is a chain store organization composed of independent merchants.

The fatal weakness of most co-operative business attempts, according to Grimes, is that they lack competitive leadership and the power to enforce policies that will bring success.

"It is of the greatest importance to this country to see that individual ownership of business and the continuance of opportunity for individual ownership be safeguarded as a national heritage," said Grimes.

Individualism Is Obstacle

"The power that lies in the hands of the independents so far exceeds that of the organized corporations that it is appalling to see it going to waste for lack of use. Probably the greatest difficulty that confronts independent business men is the peculiarly individualistic ideas and ideals that have developed around the individual business. They seem somehow to resent taking suggestions and following the example of others.

"It is only within the last four or five years that definite steps have been taken to harnessing the power of the independents and combining great numbers of individuals so that things may be done which no single individual could do alone, but which all can do together."

Grimes related how the early attempt to organize the independent grocers failed because they lacked "the directing organization powerful enough to draw to itself keen minds, the finest talent and to evolve a program complete in every detail that would match or excel that of the strongest competition."

$500,000,000 Business

Members of Grimes' alliance are found in 37 states. Last year its sales exceeded $500,000,000. It advertises both nationally and locally. The members pay $3.50 a week as alliance dues and this pays for the entire services of the alliance, including advertising and purchasing through a centralized agency. All alliance stores are uniform in appearance and unless the member is willing to follow the alliance's policies he forfeits his membership.

In all respects, however, Grimes said, the individual member is the owner of his own store. He runs the business and pockets the profits, and is a fixture in his community.

Its members have enjoyed such prosperity in the last two years that Grimes said applications for membership are pouring in faster than they can be passed upon.

Brought Results

Editor, I. A. A. Record:

"Your I. A. A. RECORD surely brings results. We have been simply deluged with mail from people anxious to go up on our 78 acre tract. Also a number of them called on us personally as well as telephoned.

"Mr. Stolz of Lyle, Ill., is going to move up there tomorrow and I think everything will be all fine and dandy.

"This has reference to my letter which you printed about wanting someone to go up on our 78 acre place, rent free, in exchange for a little work for me around our cottages in the summer season. I surely struck the right medium when I picked your name out of the telephone book.

"Thanks for your part in this matter."

H. C. WILLIAMSON,
319 N. Crawford Ave.,
Chicago, Ill.

The autoist is 13 times more likely to be killed than the railway passenger, according to the Governor's Committee on Street and Highway Safety of Massachusetts. The street car is the safest of the three methods of travel.

Illinois Butter Campaign Begins

A JOINT campaign financed by Illinois processors and producers to advertise and boost the consumption of creamery butter was begun under the direction of the National Dairy Council on November 1. The campaign which will be first tried out in Illinois, was inspired by the success of recent efforts by county Farm Bureaus, dairy associations and other groups in advertising the superiority of butter over oleo and other substitutes among consumers.

A deduction of one cent per delivery from each cream producer will be matched by a similar contribution from the processors in underwriting advertising costs. The Illinois Produce Marketing Association, meeting on October 10, endorsed the plan and recommended that all affiliated local and county associations co-operate. Creameries which buy from individual farmers, likewise, will make the deduction.

The Illinois Agricultural Association approved the program, and the American Farm Bureau Federation has been asked to help administer the funds to guarantee equity to the farmers who are helping finance the campaign.

Soybean Harvest Now Completed

The unprecedented movement of soybeans from farm to market during the harvest season of 1930 is now almost finished, reports the Soybean Marketing association. Favorable weather was largely responsible for expediting the rapid delivery of the crop.

Reliable information indicates that soybeans in the hands of farmers and seed companies will be inadequate to meet the demands for feed and for next year's seed requirements. Information coming from other states indicates a shortage of seed beans elsewhere. The association officials believe that members of the organization who have good seed beans will materially profit by holding them in storage.

Wants a Job

A. Eilert, 2608 Vega Ave. W., Cleveland, Ohio, 39-year-old German immigrant, single, six feet tall, strong, healthy, farm experienced, two and one-half years in this country, wants a job on a farm.

His letter indicates he is well educated, honest, and not afraid of work. He was raised on a farm in the Province of Hanover, Germany. Write him. He offers references.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

The Farmer and the Utilities

EXTENSIVE construction of pipe lines, high power, and telephone lines across country by public utility companies brings to the fore a number of questions concerning the rights and interests of landowners whose property is used for this purpose.

In Illinois, Farm Bureau members confronted with such problems have rightfully appealed to their organization representatives for advice and assistance. Landowners' committees have been organized, competent counsel brought in to place the individual farmer on an equal footing with the utilities in protecting his property rights; in obtaining a fair and equitable compensation for damages to his land.

In most cases negotiations between the landowners' committees and utilities have proceeded amicably. Differences of opinion have been compromised without resort to the courts. Utility representatives publicly have expressed their appreciation for the orderly and business-like methods used by landowners in thus expediting the settlement of troublesome problems.

That this attitude has not been shown in every case is expressive of the prejudice which still exists in some quarters against farmers organizing for their mutual welfare whether the purpose is to prevent oppression, or to sell their products co-operatively.

In one instance utility representatives, failing to secure the acquiescence of the organized landowners to their proposals, broke off negotiations and filed condemnation suits while the farmers were still ready and willing to arbitrate. Chagrined at the unfavorable verdicts of the local juries in several cases which have come to trial, the utility's lawyers have resorted to hurling false charges of unfairness by counsel for the landowners in conducting the trials. The propriety of the Illinois Agricultural Association in assisting its members in their negotiations even has been questioned. This attitude amounts to a denial of the right of farmers to employ counsel and the services of trained men in representing them.

As evidence that this condition exists we cite a recent instance in which the chairman of a landowners' committee was approached by a utility company attorney who asked for a conference. The committee chairman readily assented but asked that the committee's local attorney and the I. A. A. representative sit in the meeting. "What! can't you farmers think for yourselves?" was the attorney's angry retort.

If the individual through intelligent organization ceases to remain easy prey for designing people it is natural for such folks who find the going tougher to attack the organization. They might as well become educated to the fact that this is a changing world, that what was true yesterday may not be true today. The law guarantees the farmer the right to organize. The realization that he has taken advantage of the right and is using it intelligently may be disconcerting to a few. They will presently become adjusted to the new order whether they like it or not.

Keeping Faith with Agriculture

THE irrigation development of the Columbia River Basin in the Northwest has resulted in the reclamation of approximately 4,000,000 acres of desert land, according to the U. S. Department of Agriculture. We are told that the available water supply is sufficient for the reclamation of 11,000,000 acres when conditions warrant the expenditure for development.

This announcement has an ominous tone. It implies that at the earliest opportunity more

Federal money will be poured into reclamation projects to provide further competition for present producers of farm crops. One can readily understand the zeal of the dry land states in lobbying and log rolling for Federal reclamation money. These projects develop local communities, bring in more settlers, build up local income and create more taxable values for the state. And while the desert blooms under the watchful eye of the government water dispensary, agriculture elsewhere languishes for want of a profitable market.

Some of the middlemen have set up a great howl against the government loaning money to farm co-operatives for marketing agricultural products. So far as we know, the Farm Board in no wise is authorized nor has it sought to subsidize co-operative marketing or enter into competition with private distributors of farm produce. Yet during the past 30 years the government not only has fostered new competition in farming but it has directly subsidized such competition through reclamation and land settlement work throughout the west. Agricultural expansion has been our national policy for generations.

Only during recent years with the growth of effective organization have farmers come to look upon their business as an industry as well as a way of living. There has been a sad lack of vision, or at least interest, in protecting the investments of agricultural producers against destructive competition from both within and without the borders of the United States. The present administration is the first in recent years to give serious attention to the economic welfare of agriculture. But the continuance of federal land reclamation work in the west will not be considered by farmers as keeping faith in promoting their welfare. Certainly such projects are inconsistent with the ideals of the Marketing Act. It is absurd for the Farm Board to advise acreage reduction in the middle west and south while the Reclamation Bureau practices acreage extension in the far west.

Mussolini Goes After the Swindlers

DICTATOR Mussolini of Italy recently called his cabinet together, submitted a decree for drastic action against speculators and dishonest financiers. The report was readily approved. Penalties are as follows:

One to 10 years' imprisonment at hard labor and fines of from $500 to $5,000 for "promoters, officers and liquidators of joint stock companies" who "fraudulently damage the interests of stockholders."

Frauds include: (1) distributing dividends unwarranted by the condition of the company; (2) false statements in balance sheets or to the public at stockholders' meetings; (3) concealment of facts relating to economic conditions of a company.

One to five years' imprisonment at hard labor and fines of $400 to $1,000 for "persons who, for their own or others' profit, circulate false news or by other fraudulent means create fictitious increases in the value of stocks of companies they represent."

One to three years' imprisonment at hard labor and fines of $400 to $1,000 for company officials who contract loans with their own companies.

The operations of fraudulent promoters, salesmen and tipsters, which mulct the American people out of millions of dollars annually, are a national disgrace. Yet, the majority of these reprobates are never punished; first, because of failure to prosecute, and secondly, because our existing laws are not drastic enough to fit the offense.

Men who would be base criminals under the new Italian code are among our highly respected citizens. An army of real estate promoters and stock and bond salesmen operating in the balmy days before the stock market crash of November, 1929, defrauded thousands of people out of their savings. The going is not so easy now. Will Rogers said with some truth after visiting a Federal prison, "They got the wrong crowd in there." Certain kinds of criminals are punished, others are not molested.

We may not like Mussolini's methods, but they get results. Until our government initiates plans for more direct action against frauds whose offense frequently lies in not telling the whole truth, the investing public will continue at the mercy of the rule of caveat emptor—let the buyer beware.

The Cover

THE largest building in the world is the mammoth structure covering two city blocks in length, and 23 stories in height, known as the Merchandise Mart. It is located on the north bank of the Chicago River at Wells street, erected at a cost of $30,000,000.

In this giant structure, having 4,000,000 square feet of floor space, buyers, retail merchants, etc., of the United States, Canada and foreign countries can view under one roof hundreds of lines of the best merchandise. The building houses a city in itself and includes club rooms, restaurants, barber shops, a branch postoffice, the National Broadcasting Co. Chicago studios and countless other activities.

The site of the building is that formerly occupied by the old C. & N. W. R. R. station. Part of the building stands over the C. & N. W. tracks. The railroad sold merely the "air rights." Some 200 acres of air right property over railroad yards and tracks are still available for buildings in and about Chicago's loop.

Editorial of the Month

PREPARE FOR REAL REVENUE REFORM

NO tears are being shed over the grave of the rejected amendment which was proposed to the antiquated and unjust revenue article of the Illinois constitution. Yet every intelligent citizen in the state recognizes keenly the existing public need of a well-devised, modern, enforceable revenue article. Unhappily the amendment that was offered to the voters was inadequate, ambiguous and pitiably lame. If ratified, it might have aggravated the injustices in taxation now so generally and so justly complained of by farmers, home owners and other holders of real estate.

The more carefully the amendment was studied the clearer it became that in operation it would not meet the requirements of the state in matters of revenue and taxation. The proposal was rejected not because it involved changes but bcause it failed to provide for changes favored by authorities on taxation and by citizens who realize the essential elements forming the basis of reasonable equality in any application of the tax burden.

There is nothing partisan about the question. It should be taken up for full consideration and constructive action by a joint committee of capable legislators, impartial economists, men of affairs and representatives of farmers' organizations. Amendments to the revenue article of the constitution should be drafted with knowledge and in a spirit of justice.

The Daily News ,which for years has been a persistent and consistent advocate of sound tax reform, reiterates its conviction that the tax on personality, tangible and intangible, should be abolished and a fair, simple, reasonable tax on all incomes over a certain proper minimum should be substituted for that unenforceable tax. Any other attempted solution would be practically certain to prove illusory and futile.—*Chicago Daily News.*

Stark County Meeting

A. J. Olson, president of the Minnesota Farm Bureau Federation, was the principal speaker at the recent annual meeting of the Stark County Farm Bureau.

David Turnbull of Elmira township was elected president; Richard Hall of Osceola, vice-president; Fred D. Smith of West Jersey, secretary; and George Wilson of Toulon, treasurer.

E. E. Brown, retiring farm adviser, sketched the year's activities.

The Pawnee Four and Dick Bradley, the talkative tailor furnished most of the entertainment. A successor to County Adviser Brown has not yet been announced.

Peoria in 1,000 Class

Farm Bureau membership committees of Peoria county recently added 66 new members to put the Peoria County Farm Bureau in the 1,000 class with 1,009 members. Radnor township led with 17. "I think it likely that we will have 25 or 30 more when the work is finished and all reports are in," writes Farm Adviser J. W. Whisenand.

The membership committee in the leading township was composed of Wyatt Ashbaugh, Clair Harlan, Leo Heinz and Wilbur Challacomb.

Serum Directors Meet

The directors of the Illinois Farm Bureau Serum Association met in Chicago on October 29.

The association expects to purchase large quantities of anti-hog cholera serum and virus for Farm Bureau members in the coming year.

The Serum Association has been instrumental first in insuring an adequate supply of high quality serum for Illinois farmers, and secondly, in lowering the cost of anti-cholera vaccination by organizing the buying power of live stock growers in the purchase of immunizing materials.

Packers Have No Plans

F. E. White, president of Armour & Company, states that his organization "has no definite plans as to engaging in the retailing of meats and groceries," should its plea and that of Swift & Company be granted for removal of the restrictions in the packers' consent decree.

"The trend of the times is such that we may be forced to go into the retailing business," continued Mr. White. "We want to be unfettered and have freedom of action to meet any conditions arising."

ANOTHER FARM FOR SOMEONE

Editor, I. A. A. RECORD:

"Wonder if any of your readers would be interested in using 268 acres in South Dakota, 90 acres of this land in level tract on the banks of the Missouri River, balance in cultivatable upland, and timber. Excellent for potatoes, small grain, good timber pasture on river banks for wintering cattle, located eight miles from Mobridge in Walworth county, no buildings on land but plenty timber available. Willing to make an agreement with right party to use property, rent free, for a number of years. Taxes are not high, plenty water available, and a pump could irrigate if necessary at small expense."

H. C. WILLIAMSON,
321 No. Crawford Ave.,
Chicago.

A $24,000 Melon

A $24,000 melon for Farm Bureau member patrons of the Marshall-Putnam Oil Company was announced recently at the annual meeting of the company at Henry.

The patronage refund, it is understood, will be paid as follows: an 8 per cent regular cash dividend on sales, immediately; two special 6 per cent dividends to be paid later. The $24,000 patronage dividend represents surplus after dividends on capital stock, reserves, depreciation, and general operating expenses.

The Marshall-Putnam Company handled 696,362 gallons of gasoline, 259,292 gallons of kerosene, 29,685 gallons of lubricating oil, 15,012 pounds of grease, with a total volume of business for the year amounting to $163,981.

Judges for International

Three of the live stock judges at the coming International Live Stock Exposition will be imported from Scotland; two from Canada. The Scotch judges will place the steers, Aberdeen-Angus cattle, and Clydesdale horses.

Manager Heide reports that entries are being received in large numbers by all departments from the United States, Canada, and even from foreign countries.

The exposition opens on the first Saturday following Thanksgiving, November 29, and closes December 6.

Reduced railroad fares will be in force throughout this period.

The Whiteside County Farm Bureau announces that 105 new members joined in a one-day drive staged September 30.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart, is broadcast between 12:15 and 12:30 P. M., Monday to Friday, inclusive. Hear the daily Chicago live stock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, farm news and economic information are broadcast daily.

C. L. Mast, club cleader in LaSalle county, Illinois, broadcast over the NBC chain on November 8 from KYW, Chicago. Mast is a former club member of Adams county.

The winners of the Illinois State Play Tournament from Savoy in Champaign county presented their play, "The Mayor and the Manicure," before the annual convention of the American Country Life Association at Madison on October 8.

On their return to Chicago the play was broadcast from WLS.

President Earl C. Smith spoke on the proposed revenue amendment from Station WLS, Chicago, Wednesday night, Oct. 29. John C. Watson followed with a similar talk over the same station the night of Nov. 1, pointing out why the I. A. A. could not support the measure.

An Argentine radio station was closed recently because it broadcast too much advertising.

There are about half as many radio sets in use in the United States as there are families in the country, according to an estimate made by the Department of Commerce.

Advertising Helps Producer

Production and consumption of dairy products at present are so nearly balanced, states the National Dairy Council, that any increase in production without a corresponding increase in demand will surely depress prices still further. A fund estimated at around $200,000 will be raised jointly by Illinois cream producers and processors to advertise butter among consumers within the state.

As a result of a short publicity campaign last winter, the consumption of butter was so increased that storage holdings were reduced more than 30,000,000 lbs. Prices arose accordingly.

Farm Board News

The Coarse Grain Advisory Commodity Committee of the Federal Farm Board was scheduled to meet in Washington on November 17.

The members of the committee were selected by the grain co-operatives on invitation of the Farm Board. The members are as follows: S. J. Cottington, president of the National Farmers' Co-Operative Elevator Assn., Stanhope, Iowa; Sam H. Thompson, president of the American Farm Bureau Federation, Quincy, Ill.; L. J. Taber, master of the National Grange, Columbus, Ohio; C. E. Huff, president of the National Farmers' Educational and Co-Operative Union, Chicago, Ill.; Wayland Magee, president of the Crop Improvers' Association of Nebraska, Bennington, Neb.; George S. Milnor, vice-president and general manager of the Farmers' National Grain Corporation, Chicago, Ill.; and James Murray, vice-president of the Quaker Oats Company, Chicago, Ill.

THE Federal Farm Board does not intend to loan its funds in support of a lot of different organizations within an industry to fight each other over differences of opinion about what the national co-operative set-up should be, Chairman Alexander Legge stated in a letter to Secretary J. H. Mercer of the Kansas Live Stock Association on October 25.

Old line commission men and their supporters at Kansas City are fighting the board because some government money has been loaned the National Live Stock Marketing Association to develop a comprehensive co-operative sales plan for live stock producers.

The Federal Farm Board is taking steps to extend to Porto Rico the benefits of the Agricultural Marketing Act.

"It seems to me that the average live stock man in Kansas would sooner see the cows die hungry than co-operate with anybody," Chairman Alexander Legge said in a recent letter to the Chairman of the Kansas Emergency Relief Committee.

"As I explained at considerable length to Governor Reed when he was here," said Mr. Legge, "the machinery is all set up whereby these people can get assistance through the national live stock organization, and get it promptly, by merely affiliating with that organization. My judgment is that if they ever do affiliate with the organization they will never want to leave it, but the membership contracts of these co-operatives all provide for a member to drop out at stated periods if the service is not satisfactory.

"You state you would be glad to pass on loans for us, but what we are most interested in is some responsible organization that would see to it they are collected."

The Federal Farm Board in its 14 months of experience has found four fundamentals clear in its task of solving farm problems, C. C. Teague said recently speaking to farmers at Cornell University.

"These fundamentals," he said, "are:

1. That all problems of agriculture will never be solved by legislation;
2. That stabilization corporations to deal in surpluses are only warranted in cases of emergency and must be approached with the utmost care or more harm than good may be done;
3. That the law of supply and demand cannot be lightly set aside;
4. That the greatest assistance to agriculture that can come from federal and state aid is the gradual development of a system of grower-owned and controlled co-operative marketing."

He said the development of co-operation cannot be accomplished without some interference with existing agencies, but he expressed the hope that the necessary readjustment "may be brought about with as much consideration for existing agencies and investments as possible."

The question now confronting the Federal Farm Board is how far the farmers will support the board in attempts to control production, said Dr. F. B. Bomberger, assistant chief of the board's division of co-operative marketing, recently.

"A grudging, qualified acceptance by slightly over half of the growers, with a positive argumentative refusal by the remainder, indicates a degree of unwillingness on the part of the growers of that region to listen to counsels of safety and conservation," he said in commenting upon the advice of Mr. Hyde and Mr. Legge to the wheat growers to cut acreage.

State legislation to penalize "business bribery" was recently advocated by the chairman of the Federal Trade Commission, Garland S. Ferguson, Jr.

"Commercial bribery" in order to influence sales, he said, is fraudulent and immoral. The practice comes within the definition of unfair methods of competition, is characterized by deceit and fraud, and is against public policy.

Do You Know That—

It's a good time to economize by wise spending.

The per capita consumption of milk in the United States in 1917 was 836 pounds and in 1927 it was 1,032 pounds.

A noticeable decrease in the buying of shoes is depressing leather production and prices. People are wearing their shoes longer this year.

Hard times don't affect tobacco consumption. The total revenue collections on tobacco for the first nine months of 1930 were higher than for the same period in 1929.

A shortage of water has cut the hatch of ducks and geese and other wild fowls 50 per cent this year, compared with last, according to the U. S. biological survey.

During the past 10 years the number of farms in the United States decreased 150,466. Consolidation and abandonment were the principal reasons for the decrease.

The rapid increase in the popularity of miniature golf has resulted in the use of 1,500,000 yards of cotton textile fabrics on the various midget links throughout the country.

A "chain store" tax of $50 a year on all stores under the same ownership, operation and management, excluding one, was declared constitutional in an opinion handed down recently by the North Carolina Supreme Court.

Vigorous campaigns for the adoption of the Drivers' License Law will be conducted in 28 states, including Illinois, during the fall and early spring months. Twelve states already have such laws and in nine of these where official records are available there have been 29 per cent fewer fatalities.

Farmers' troubles cannot be blamed on prohibition, according to Col. Amos Woodcock, prohibition enforcement chief.

Less than 1 per cent of the wheat and oats crop and only slightly more than 1 per cent of the corn crop was used by brewers and distillers prior to the passage of the 18th Amendment. About 7½ per cent of the rye crop went into the production of liquors. Barley and malt showed the greatest average. In the years 1915 and 1916 distillers and brewers used 32 per cent of the annual malt crop.

Co-Op. Grain Marketing Grows Rapidly in '30

Half of 4,000 Local Farmers' Elevators Affiliated with Farmers' National Grain Corp.

DEVELOPMENT of farmer co-operative agencies for terminal and national grain marketing has gone forward more rapidly during the last year than in any previous similar period, officials of Farmers' National Grain Corporation pointed out recently in reviewing the progress of the corporation since its incorporation on October 29, 1929.

"The result," it was said, "has been that all types of grain co-operatives affiliated with the national organization have had tremendous growth in both membership and volume of grain delivered. Organizations with years of experience find that development of co-operative grain marketing on a national scale has given powerful impetus to the movement. Newer organizations made progress in many cases entirely beyond their expectations. Elevator groups, grain associations and sales agencies alike, report the last twelve months as being the most successful, from the standpoint of growth, in co-operative grain marketing history.

Gain 60 Per Cent

"In the southwest, growers' organizations report membership gains ranging from 60 to 66 per cent, and farmer elevator affiliations more than double the number a year ago. Elevator groups in the same territory report heavy increases in numbers of stockholders and volume of business. In the spring wheat territory all stockholders, both new organizations and old, state that the development during the last year has set new records. Similar gains are reported throughout the soft wheat areas. In some communities as high as 85 per cent of all grain growers have taken steps to market grain the co-operative way.

"Fully 50 per cent of the 4,000 or more local farmers' elevators now are affiliated with state or regional co-operative grain marketing organizations that hold stock in the national corporation and market an increasingly large share of their grain through them. New sales agencies, supported by farmer elevator associations and composed of farmers' elevators have been organized in several states, and in turn have become parts of the national co-operative grain movement by purchase of stock of Farmers' National Grain Corporation.

Farm Bureau Gains

County Farm Bureaus in New York State gained 4,124 members in 1930 and now have a combined membership of 39,055 in the 55 New York State agricultural counties.

Seventeen New York counties now have more than 900 members. Monroe county has the largest with 1,568 members. Wayne has 1,496, Delaware 1,242, Otsego 1,143, Albany 1,123, ONeida 1,113, Erie 1,072, and Onondaga 1,028.

Each of 24 other counties gained more than 100 members over the previous year.

Railroads Claim They're Hard Up

The present income of the western district railroads has become insufficient to insure the maintenance of adequate transportation for the future and carriers in the western district as a whole cannot expect to continue constructive programs of capital expenditures, according to a statement made recently by the Association of Western Railway Executives before the Interstate Commerce Commission.

"Not since 1920 have carriers in the western district as a whole been in receipt of earnings equivalent to a fair return upon the value of their property," said the statement.

Land Values Now Half

From 1920 to 1930 land alone in Ogle county, Illinois declined in valuation from $76,545,285 to $35,619,954, according to the Bureau of Census. In other words, Ogle county land depreciated more than half in the past decade.

There are now 2,686 farms in this county, 1,292 of which are operated by owners, 44 by managers, and 1,350 by tenants.

There are 1,045 farms of from 100 to 174 acres, 669 from 175 to 259 acres, 329 farms from 260 to 499 acres in size, 29 farms from 500 to 999 acres, and one farm of more than 1,000 acres, This county had more than twice as much land idle (9,570 acres) in 1930 as it had in 1925.

The sale of advertising space on postal stamps to private enterprise has been suggested by Representative Celler of Brooklyn, New York, in a letter to Postmaster Brown as a means by which the postal deficit may be reduced. He said he merely offered the plan for discussion, but does not advocate it.

New Milk Sales Plan Adopted at Bloomington

Mrs. Virgil Loeb of St. Louis Reports as Arbitrator in Market Controversy

THE new base and surplus plan for organized milk producers and distributors on the Bloomington market went into effect November 1 following a favorable report by Mrs. Virgil Loeb of St. Louis, arbitrator selected jointly by the McLean County Milk Producers' Association and the Snow & Palmer Company, H. H. Bevan Dairy and Ice Cream Company, and Normal Sanitary Dairy to decide on the new proposal.

Mrs. Loeb's report ordered that the following changes in the present buying plan in effect between the Producers and co-operating dealers be accepted as an amendment to the rules and regulations of the present contract:

SUPPLEMENTAL RULES AND REGULATIONS TO BUYER'S CONTRACT

"1. Changes embodied in this amendment do not affect any parts of the present contract with which they do not conflict.

"2. A complete dealers' pool of the proceeds of the sale of milk by classes shall be arranged so that each producer selling to any contracting dealer receives a proportionate amount of the total sales in the various classes of all the contracting dealers.

"3. The sales classes of milk shall be as follows:

Class I—All milk or cream, the butterfat from which is contained in sales of fluid milk and cream at wholesale and retail, bottled and bulk to direct consumers, grocery stores, restaurants, hotels, confectioners, lodges, churches, etc.

Class II Special—All milk, the butterfat from which is contained in bulk milk sold to other dealers for shortage requirements.

Class III—All milk or cream, the butterfat from which is used or sold for making butter or storing for later use. All milk that is reported in Class III is call milk.

"4. A basic allotment and excess production plan of payment to individual producer members shall be instituted. Each member producer will receive a basic allotment approximating his proportion of the sales of butterfat in Class I in the month of least sales, proportioned to him on a basis of the average amount per month of butterfat sold by him during the months of August. September, October and November of

1929, for the remainder of the year 1930. The basic allotment for 1931 shall be similarly computed from the average pounds of butterfat sold by each respective producer member in August, September, October and November of 1930.

May Change Bases

"The basic allotments for calendar years after 1931 shall be re-determined if deemed advisable by the association and dealers jointly in the month of December preceding, after the general method and manner used for 1930 and 1931. Individual bases, however, shall not be reduced unless the member fails to produce his basic allotment during the base period, or unless the total basic allotments exceed the Class I sales in month of lease sales. Individual increases of basic allotments shall be limited to a certain uniform percentage of the preceding base, which percentage shall be determined and announced in advance by the association. In no case shall the total allotted base exceed the Class I sales in the month of least sales.

"New producer members will be admitted to the market if buyers have demand for the milk. Basic allotments will be established by giving a percentage of the total per cent established for the current year for the first month's shipment. The allotment will be given on a scaled percentage depending on the month new members start and in no case shall the allotment exceed 75 per cent of the market percentage, until the new producer has established a base for himself in the regular manner.

Surplus Price Plan

"5. All of the production each month of each producer member in excess of his basic allotment will constitute his excess production and will be paid for at an 'excess' price as follows: The excess price shall be determined by adding together the butterfat value of sales in the remaining three classes. The total of the values of these sales divided by the total of butterfat sold will be the price of excess milk.

"Section 13 of the present contract and rules 1 and 2 of the Rules and Regulations, having been complied with, this amendment is hereby declared final and binding upon the *McLean County Producers' Association* and all contracting buyers—viz. the *Snow & Palmer Co., H. H. Bevan Dairy and Ice Cream Co.* and *Normal Sanitary Dairy*, and is hereby ordered to go into effect on November 1, 1930."

—Mrs. Virgil Loeb.

October 27, 1930.

Bevan Advertises

Following the arbitrator's report, the H. H. Bevan Company announced in paid advertising in the Bloomington Pantagraph that the change in the pooling plan would place this firm in a less favorable position than its competitors not having contracts with the association; that it would rather not abide by the decision of the arbitration, although its present contract contains an arbitration clause; that the arbitration was unwarranted; and that the present agreement, without the supplementary rules and regulations be kept in force until March 1, 1931.

The new plan differs from the old in that heretofore the average price paid for milk by all contracting dealers was based on the price paid by Snow & Palmer Company which handles about 50 to 60 per cent of all the milk distributed on that market. It so happened that Snow & Palmer used large quantities of milk for making butter and other dairy products, whereas the smaller dairies, including the Bevan Company, sold a much larger proportion of their milk in bottles and to the wholesale fluid trade. As a result the smaller companies had a decided advantage, and price cutting with consequent destructive competition resulted.

How It Operates

Under the new dealer pool plan each dealer will pay the Class I price for all milk or cream going to the wholesale and retail, bottled and bulk trade. Thus, if $2.75 per cwt. is the Class I price, the dealer who sells 80 per cent of his milk receipts in the Class I division will pay such a price for 80 per cent of his receipts; whereas the dealer who sells 60 per cent of his milk receipts to Class I trade will pay the $2.75 price for only 60 per cent of his receipts.

Obviously this plan is fair to all the contract dealers and places each one on the same level. The McLean County Milk Producers takes the position that the Bevan Company will abide by its contract, although the contract has been amended, as was legally provided for in the arbitration clause. Each dealer signing the contract accepted the arbitration feature and now legally is bound by the decision of the arbitrator.

Cheap farm land may prove dear, says the New York College of Agriculture in warning prospective buyers. Poor land is almost always over-valued in relation to what it will produce as compared to good land. It is cheaper to buy fertility in the form of rich soil than to buy fertility through fertilizer.

O. C. Fisher recently succeeded Z. T. Storm as manager of the Windsor (Shelby Co.) Shipping Association.

The Indianapolis Producers handled 299 carloads of live stock the week ending October 30, or 21 loads more than the previous week. The percentage of receipts was 31.94 per cent compared with 29.76 per cent the previous week. Approximately 93.47 per cent of producers' receipts came from shippings associations.

Iowa produces approximately one-fourth of the commercial crop of hogs in the U. S. More than one-half of the Iowa hogs are now sold direct to packers who operate plants or patronize or maintain concentration yards in Iowa and southern Minnesota.

On its opening day the newly organized Vermilion County Live Stock Marketing Association, Danville, handled approximately 400 hogs, 35 cattle and calves, and 52 sheep. Two double decks of hogs were bought by the National Order Buying Company, while the balance of the stock was shipped to the Indianapolis Producers.

Any improvement in industrial conditions, which seems likely within the next six months, will be reflected in higher prices for meats and live stock, in the opinion of Mr. Conway, director for the National Live Stock Marketing Association.

Live stock growers from Ogle county visited the Union Stock Yards, Chicago, as guests of the Chicago Producers' Commission Association on November 14.

Stock men in Illinois and Missouri had more than a half million dollars in loans outstanding for the purchase of feed and feeder stock early in October, according to the St. Louis Producers. These loans were obtained through the Producers from the Intermediate Credit Bank.

Forty years ago cotton seed was practically worthless. Today it is a highly valuable product yielding cottonseed meal, cottonseed oil and cottonseed hulls used for turf in miniature golf courses.

"Linters," the fiber left on the seed after ginning is removed by a special process and used in making mattresses and other feltings. During the war linters were used largely by the government in the manufacture of explosives.

AMATEUR baseball is suffering today from the competition of countless sports, activities and amusements which were unknown or little developed 25 years ago, Carl Lundgren, baseball coach at the University of Illinois and member of the famous Chicago Cubs world's championship team from 1902-09, told nearly 100 farm Bureau baseball officials, players, managers and fans at a banquet in Jacksonville November 8.

Chas. S. Black

Lack of sportsmanship, gambling on games and the employment of professional players, he gave as other reasons for the discontinuance of many town baseball teams which in the beginning were made up purely of local talent. Amateur baseball has been harmed because of too many sports and not enough sportsmen, he said.

"But I still believe baseball is our greatest national sport and should receive more encouragement from organizations such as the Farm Bureau, Chambers of Commerce, luncheon clubs, etc.," continued Mr. Lundgren. "There is evidence that the tide is swinging back to baseball again. Sporting goods houses last year reported an increase of 40 per cent in sales of baseball equipment. This is a good sign and I hope it continues, for the game is a clean, wholesome sport when properly conducted."

Practical Baseball Talk

Coach Lundgren gave an interesting and practical talk on the fine points of the game. He explained the much misunderstood "forced play" and the "balk rule." "The purpose of the balk rule is to increase base running," said the speaker. "If there is doubt about the pitcher making a balk the base runner should be favored."

Mr. Lundgren pleaded for observance of the Golden Rule in all sports. "A proper interpretation of this rule," he said, "is for each team to allow the other to play the game the best way it knows how, and for each team to play that way itself. No man in the world of sports has fought harder and longer for sportsmanship than George A. Huff, director of athletics at the University of Illinois," said Lundgren. "He has been a pioneer in placing college sports on a high plane.

Uphold the Umpire

"Abide by the decision of the umpire," said Lundgren. "Remember, you employed him to officiate, so back him up. The wise coach seldom protests, but when he does he will secure the respectful attention of the umpire. An umpire soon learns if a coach or player is honest or if he protests merely for the effect on the audience. When making a protest be gentlemanly."

Spectatos are more often guilty of unsportsmanlike conduct that the players, according to Lundgren, but not infrequently the action of the players out on the field gives the audience its que for heaping insult and injury on the umpire.

Earl Smith Speaks

President Earl C. Smith of the I. A. A. gave a very interesting account of his early experiences in baseball as a player and later as an umpire. He told of a memorable experience in umpiring a game, witnessed by 17,000 people, between rival teams from Pittsfield and New Canton in which he reversed the decision of the base umpire that decided the game against the home team at New Canton. "Rivalry and enmity was so intense between the two teams that but for the action of two men on the New Canton team I probably would not be here tonight," he said. Later he received a statement containing the signature of each player on the losing team, upholding his decision.

Mr. Smith pledged the support of the Illinois Agricultural Association to organized Farm Bureau baseball. "I hope to see the day when at least three-fourths of our counties will have teams," he said. "The older heads must take an interest in the sport and help develop it. We must learn to forget the dollar long enough to help build character and sportsmanship in our youth.

"I have never been in favor of Sunday baseball," he said, "and I firmly believe that as much real farm work can be done in five and one-half days with a half holiday for sport and recreation on Saturday afternoon, as in six days of labor."

Teaches Baseball Lesson

George Thiem, secretary-treasurer of the state league, discussed its development from the beginning through the current season when 31 county teams participated in organized play. "Baseball teaches team play, a valuable lesson in organization, and in playing the game of life," he said. "The successful team invariably is the one in which each player does his best without thought of personal credit. We need leaders, followers, pitchers, catchers and shortstops to succeed in solving farm problems through organization. And those who sit on the bench waiting their turn are important cogs in the machine—just as essential as those in the limelight out on the field."

Charlie Black Precides

Charles S. Black, vice-president of the state league, performed as master of ceremonies. He told how he and his boys would unhitch Saturday noon to go to the baseball game. "Organized Farm Bureau baseball is having a fine influence in rural communities where the game is played," said Mr. Black. "We need more dads who will spend some time with their boys, interesting them in wholesome recreation like baseball."

800 Attend Farmers' Frolic at Polo

THE annual Farmers' Frolic, for farmers, business men and their families in and about Polo in Ogle county was held the night of Oct. 31 at the Community High School, Polo. Approximately 800 attended.

As in past years, the gathering was managed by C. E. Bamborough, I. A. A. director from the thirteenth district. A splendid dinner, speeches and entertainment, including dancing, have given the Annual Frolic a reputation as the most popular community affair of the year in western Ogle county.

C. E. Bamborough

The speaker of the evening was Earl C. Smith, president of the Illinois Agricultural Association, who discussed the revenue amendment, subsequently defeated at the November 4th election.

Every Farm Bureau family in the townships adjoining Polo is asked to invite at least one non-member family. The social is an open affair to which all are invited.

Mr. Bamborough is a firm believer in building good will between town and country Farm Bureau member and non-member, through such meetings in which the major part of the evening is devoted to having a good time. The fact that these gatherings are increasing in size and popularity year by year indicates the possibilities for holding similar events throughout the state.

We've Had a Lot of Class Legislation—Legge

Tells Boston Business Men to Help, Not Complain

"THE Board is prepared to assist farmers in organizing along sound lines the co-operative associations necessary to secure for them the best results that market conditions will justify," Alexander Legge, chairman of the Federal Farm Board, told members of the Boston Chamber of Commerce at a luncheon on October 30.

"In collaboration with the Department of Agriculture," continued Mr. Legge, "we can supply the best information available as to market outlook and prospects, and assist co-operatives in providing proper facilities for the warehousing and handling of any agricultural commodity. You will notice I say we can assist.

Alex. Legge

The start must be made by the farmers themselves. We haven't any power to compel them to do anything. We don't want any such authority and we wouldn't use it if we had it.

"Certainly there cannot be any logical reason why the farmer should not be encouraged and helped to engage in merchandising his own product, but some of you say this is using taxpayers' money in competition with private capital which has heretofore been engaged in the business—class legislation. Well, what about it?

Lots of Class Legislation

"We have had a lot of this class legislation, even since the time back in 1816 when the manufacturers of New England secured the first protective duty of 20 per cent to aid the infant industries which, according to the discussion at the time the protection was granted, would in time develop to a point where they would not need it. Whether or not that has been the history, every farmer in purchasing his manufactured products has contributed all these years to this group in higher prices that he paid for manufactured products than would have been paid on a free trade basis. The milk used to feed those infants at that time has since been fed generally in increasing quantities. In the language of the cattlemen, a long time has elapsed without any of the calves having been weaned.

"Why should you deny to the underdog, who for over a century has been contributing to the welfare of manufacturers, some measure of aid in improving his unhappy position?

Why All the Fuss?

"Nor has this aid been limited to manufacturing industries—rail and water transportation have benefited through various laws, banking and finance by the Federal Reserve System, labor through protective measures including restricted immigration. In the past, aid has been extended to many groups and we haven't heard any howl about class legislation; therefore, why all this fuss because the government is now trying to do something for the agricultural group?

"Instead of complaining, get busy and help us make the Agricultural Marketing Act a success, and each and every one of you will benefit by an improvement in the financial position of this large group who then will be better customers for the things you make."

Mid-West Grain Corp. Board of Trade Member

WORD was received on Nov. 5 that Chas. P. Cummings, vice-president and general manager of the Mid-West Grain Corporation was elected to membership on the Chicago Board of Trade. The corporation, a sales agency for Illinois grain producers, was registered and admitted to do business.

This action completes arrangements by the Mid-West Grain Corp. for handling grain at Chicago, St. Louis and Peoria. The corporation was admitted to membership on the St. Louis exchange some time ago.

C. P. Cummings

The Illinois Grain Corporation, regional co-operative for Illinois, of which the Mid-West organization is a subsidiary, reports that five more farmers' elevators applied for membership last week. The Illinois regional, a member of the Farmers' National Grain Corp., is quietly sawing wood explaining the advantages of producer co-operation at the terminals as well as at the country receiving points.

The Mid-West Grain Corp., co-operating with the Farmers' National, handled a substantial number of cars of grain at Peoria, Chicago and St. Louis during October.

Future Trading Is Gambling

TRADING in futures on the Chicago Board of Trade when the intent and purpose is merely to make a profit on price fluctuations, not to deliver or accept delivery of grain, is *gambling;* hence debts so contracted are not collectable, according to a recent ruling of the Illinois Supreme Court.

The ruling was given in the case of James K. Riordan of Riordan, Martin & Co. against William McCabe, Bureau county farmer.

McCabe, the evidence shows says a news report, had run up a large loss he was asked to make good and turned over mortgages on Illinois farm lands to cover the debts. The mortgages were held by James K. Riordon for eight years and on default of interest, a foreclosure suit was started, which was opposed by McCabe. The case has been through the lower courts and a decision rendered against the brokers, who carried it to the Illinois Supreme Court.

In affirming the lower courts the bench held the intention of the purchaser of grain is the only thing that can distinguish a gambling transaction from a legitimate deal. The court said McCabe had never intended to buy or sell grain, but simply had planned to profit by the fluctuation of prices and thus had been gambling on the probabilities of market action.

Baseball Dope

(*Continued from page* 12)

Brief remarks by C. E. Brockman of Jacksonville, a former University of Illinois baseball and football player; by Farm Advisers Clanahan, Parett, Chalcraft, Husted; by I. A. Madden, former adviser of Sangamon county, and by the team managers wound up the evening. An excellent dinner was served by the ladies of the Presbyterian church. Farm Bureau baseball teams from Morgan, Greene, Cass, Menard and Sangamon counties participated in the gathering. This was the second annual banquet for the teams in District Seven. They voted unanimously to hold another one next year.

To Boston

The following delegates who will represent Illinois at the coming A. F. B. F. meeting in Boston, Dec. 8, 9 and 10, were chosen at the October meeting of the I. A. A. directors in Decatur:

Earl C. Smith,
A. R. Wright,
Geo. F. Tullock,
Harold C. Vial.

Alternates are A. N. Skinner, Samuel Sorrells, Frank Oexner, W. L. Cope.

Baseball Dope

AMATEUR baseball is suffering today from the competition of countless sports, activities and amusements which were unknown or little developed 25 years ago, Carl Lundgren, baseball coach at the University of Illinois and member of the famous Chicago Cubs world's championship team from 1902-09, told nearly 100 farm Bureau baseball officials, players, managers and fans at a banquet in Jacksonville November 8.

Chas. S. Black

Lack of sportsmanship, gambling on games and the employment of professional players, he gave as other reasons for the discontinuance of many town baseball teams which in the beginning were made up purely of local talent. Amateur baseball has been harmed because of too many sports and not enough sportsmen, he said.

"But I still believe baseball is our greatest national sport and should receive more encouragement from organizations such as the Farm Bureau, Chambers of Commerce, luncheon clubs, etc.," continued Mr. Lundgren. "There is evidence that the tide is swinging back to baseball again. Sporting goods houses last year reported an increase of 40 per cent in sales of baseball equipment. This is a good sign and I hope it continues, for the game is a clean, wholesome sport when properly conducted."

Practical Baseball Talk

Coach Lundgren gave an interesting and practical talk on the fine points of the game. He explained the much misunderstood "forced play" and the "balk rule." "The purpose of the balk rule is to increase base running," said the speaker. "If there is doubt about the pitcher making a balk the base runner should be favored."

Mr. Lundgren pleaded for observance of the Golden Rule in all sports. "A proper interpretation of this rule," he said, "is for each team to allow the other to play the game the best way it knows how, and for each team to play that way itself. No man in the world of sports has fought harder and longer for sportsmanship than George A. Huff, director of athletics at the University of Illinois," said Lundgren. "He has been a pioneer in placing college sports on a high plane.

Uphold the Umpire

"Abide by the decision of the umpire," said Lundgren. "Remember, you employed him to officiate, so back him up. The wise coach seldom protests, but when he does he will secure the respectful attention of the umpire. An umpire soon learns if a coach or player is honest or if he protests merely for the effect on the audience. When making a protest be gentlemanly."

Spectatos are more often guilty of unsportsmanlike conduct that the players, according to Lundgren, but not infrequently the action of the players out on the field gives the audience its que for heaping insult and injury on the umpire.

Earl Smith Speaks

President Earl C. Smith of the I. A. A. gave a very interesting account of his early experiences in baseball as a player and later as an umpire. He told of a memorable experience in umpiring a game, witnessed by 17,000 people, between rival teams from Pittsfield and New Canton in which he reversed the decision of the base umpire that decided the game against the home team at New Canton. "Rivalry and enmity was so intense between the two teams that but for the action of two men on the New Canton team I probably would not be here tonight," he said. Later he received a statement containing the signature of each player on the losing team, upholding his decision.

Mr. Smith pledged the support of the Illinois Agricultural Association to organized Farm Bureau baseball. "I hope to see the day when at least three-fourths of our counties will have teams," he said. "The older heads must take an interest in the sport and help develop it. We must learn to forget the dollar long enough to help build character and sportsmanship in our youth.

"I have never been in favor of Sunday baseball," he said, "and I firmly believe that as much real farm work can be done in five and one-half days with a half holiday for sport and recreation on Saturday afternoon, as in six days of labor."

Teaches Baseball Lesson

George Thiem, secretary-treasurer of the state league, discussed its development from the beginning through the current season when 31 county teams participated in organized play. "Baseball teaches team play, a valuable lesson in organization, and in playing the game of life," he said. "The successful team invariably is the one in which each player does his best without thought of personal credit. We need leaders, followers, pitchers, catchers and shortstops to succeed in solving farm problems through organization. And those who sit on the bench waiting their turn are important cogs in the machine—just as essential as those in the limelight out on the field."

Charlie Black Precides

Charles S. Black, vice-president of the state league, performed as master of ceremonies. He told how he and his boys would unhitch Saturday noon to go to the baseball game. "Organized Farm Bureau baseball is having a fine influence in rural communities where the game is played," said Mr. Black. "We need more dads who will spend some time with their boys, interesting them in wholesome recreation like baseball."

800 Attend Farmers' Frolic at Polo

THE annual Farmers' Frolic, for farmers, business men and their families in and about Polo in Ogle county was held the night of Oct. 31 at the Community High School, Polo. Approximately 800 attended.

As in past years, the gathering was managed by C. E. Bamborough, I. A. A. director from the thirteenth district. A splendid dinner, speeches and entertainment, including dancing, have given the Annual Frolic a reputation as the most popular community affair of the year in western Ogle county.

C. E. Bamborough

The speaker of the evening was Earl C. Smith, president of the Illinois Agricultural Association, who discussed the revenue amendment, subsequently defeated at the November 4th election.

Every Farm Bureau family in the townships adjoining Polo is asked to invite at least one non-member family. The social is an open affair to which all are invited.

Mr. Bamborough is a firm believer in building good will between town and country Farm Bureau member and non-member, through such meetings in which the major part of the evening is devoted to having a good time. The fact that these gatherings are increasing in size and popularity year by year indicates the possibilities for holding similar events throughout the state.

We've Had a Lot of Class Legislation—Legge

Tells Boston Business Men to Help, Not Complain

"THE Board is prepared to assist farmers in organizing along sound lines the co-operative associations necessary to secure for them the best results that market conditions will justify," Alexander Legge, chairman of the Federal Farm Board, told members of the Boston Chamber of Commerce at a luncheon on October 30.

"In collaboration with the Department of Agriculture," continued Mr. Legge, "we can supply the best information available as to market outlook and prospects, and assist co-operatives in providing proper facilities for the warehousing and handling of any agricultural commodity. You will notice I say we can assist.

Alex. Legge

The start must be made by the farmers themselves. We haven't any power to compel them to do anything. We don't want any such authority and we wouldn't use it if we had it.

"Certainly there cannot be any logical reason why the farmer should not be encouraged and helped to engage in merchandising his own product, but some of you say this is using taxpayers' money in competition with private capital which has heretofore been engaged in the business—class legislation. Well, what about it?

Lots of Class Legislation

"We have had a lot of this class legislation, even since the time back in 1816 when the manufacturers of New England secured the first protective duty of 20 per cent to aid the infant industries which, according to the discussion at the time the protection was granted, would in time develop to a point where they would not need it. Whether or not that has been the history, every farmer in purchasing his manufactured products has contributed all these years to this group in higher prices that he paid for manufactured products than would have been paid on a free trade basis. The milk used to feed those infants at that time has since been fed generally in increasing quantities. In the language of the cattlemen, a long time has elapsed without any of the calves having been weaned.

"Why should you deny to the underdog, who for over a century has been contributing to the welfare of manufacturers, some measure of aid in improving his unhappy position?

Why All the Fuss?

"Nor has this aid been limited to manufacturing industries—rail and water transportation have benefited through various laws, banking and finance by the Federal Reserve System, labor through protective measures including restricted immigration. In the past, aid has been extended to many groups and we haven't heard any howl about class legislation; therefore, why all this fuss because the government is now trying to do something for the agricultural group?

"Instead of complaining, get busy and help us make the Agricultural Marketing Act a success, and each and every one of you will benefit by an improvement in the financial position of this large group who then will be better customers for the things you make."

KEEPING WELL

By Dr. John E. Boland

Scarlet fever is an acute infectious disease more common during the first ten years of life than during any other period, the seasonal incidence being greatest in the school period of September to June.

The typical case is characterized by the sudden onset with nausea and vomiting, high fever, sore throat and the appearance within twenty-four hours of a generalized rash on the body. The "strawberry" appearance of the tongue is very characteristic.

Dr. J. E. Boland

The temperature and other symptoms usually begin to subside gradually within five to seven days and a few days after the disappearance of the rash the period of "peeling" begins. It is during this period, which lasts for several weeks, that the much feared complications of scarlet fever arise.

The most severe are throat abscesses, infection of glands of neck, middle ear infection with resulting deafness, mastoiditis, kidney trouble and rheumatism. Rigid quarantine of patient and attendant must be kept throughout the entire period of peeling and must not be lifted until peeling is entirely complete and then only if there is no discharge from the nose or ears.

Unlike diphtheria, the serum used at the present time for the prevention of scarlet fever is not entirely satisfactory. A great deal of work is being done along those lines at present and I feel sure it will only be a question of time when we will have a serum that will be as effective in preventing scarlet fever as the toxin antitoxin is in preventing diphtheria.

Probably one of the greatest discoveries of recent years in the medical field was the discovery of a specific antitoxin for treating scarlet fever. This serum when given early invariably causes a reduction in temperature in twenty-four hours and also a very distinct lessening in the severity of the sore throat and other toxic symptoms. The period of peeling is much shorter so that uncomplicated cases may be released from quarantine much sooner than was formerly the case. When given early the incidence of complications is probably reduced.

Scarlet fever is still a dreaded disease, due to the serious complications that very often accompany it. It is well when children are suddenly taken ill with nausea and vomiting, high fever and sore throat, to think of scarlet fever and immediately call your physician. The specific scarlet fever antitoxin, if given early, might be the means of saving your child's life.

Endorse I. A. A. Tax Stand

A motion commending the I. A. A. directors on their action to withhold the support of the organization from the proposed revenue amendment was passed at the 21st district Farm Bureau meeting held Sept. 23 at Taylorville. The Farm Bureaus in the district sent out cards a few days before the November election calling attention to the I. A. A.'s position on the amendment as set forth in the September I. A. A. RECORD.

Representatives from Sangamon, Christian, Macoupin and Montgomery counties attended the meeting. Taxation was one of the principal topics of discussion. Sam Sorrells, district I. A. A. director, outlined the reasons for the board's action. President Dwight Hart presided.

Gets $365 Verdict

A verdict of $365 was given on October 4 by a jury in the Lee County Court, Dixon, Illinois, in the Guthrie case. This was one of a list of condemnation suits initiated by the Illinois Northern Utilities Company in the dispute over compensation for damages resulting from their high power line between Freeport and Dixon.

Mr. Guthrie had been offered substantially less than the $365 damages awarded by the jury.

L. J. Quasey and Donald Kirkpatrick, representing the Illinois Agricultural Association, assisted Harry C. Warner, local attorney retained by the interested land owners of Lee county.

Theodore Tuftie of LaSalle county successfully defended his local cornhusking laurels in the annual county contest on October 31. His record was 33.004 bushels.

Vernon Ryg placed second with 30.54 bushels, and Harold Fosse third with 29.95 bushels.

Correction

L. A. Williams, manager of Country Life Insurance Company, states that on page 18 of the October RECORD, paragraph 4, under "Country Life Records," is more or less ambiguous; that the item meant to convey the information that few life insurance companies are showing a gain in 1930 over their 1929 production.

Soybean Growers to Meet Decatur Nov. 21

ILLINOIS' leading soybean growers, members of the Soybean Marketing Association, will meet at the Orlando Hotel, Decatur, Friday morning, Nov. 21, to consider important matters affecting the future activities of the organization. Representative delegations of grower members from each of the counties in the soybean belt across central Illinois are expected at the conference.

The growers' meeting, called for 10:30 a. m., will be preceded by a brief conference of the directors at 9 o'clock. The decision to call the Decatur meeting was made by the executive committee of the Marketing Association in Chicago on Nov. 5.

The new co-operative, operating in its first year, handled more than a million bushels of beans shipped by elevators at country receiving points to the down-state terminal markets. A large portion of the crop already has been sold.

Market Suffers

The market for the chief products of the soybean, namely oil and meal, is suffering from the business depression along with other commodities. New uses for soybean oil have not yet been fully developed, and the meal left after pressing the oil from the bean, is compelled to face keen competition as a feed concentrate for live stock. Low prices for bran, cottonseed meal, linseed meal, and similar concentrates have driven down the price of the soybean product and soybeans compared with last year's prices.

In spite of these adverse factors, the Marketing Association advanced its members $1 per bushel for No. 2 or standard grade beans on delivery.

Farm Prices Fall

The general agricultural situation this fall continues to be influenced by the business depression and by the world-wide commodity price level.

The market for apples has gone haywire and even potato prices, in spite of a lower supply, have fallen below the average of last year. Meat prices, likewise, are suffering because of the sluggish demand from industrial centers.

From August, 1929, to August, 1930, the average prices at the farm fell 25 per cent, while the wholesale prices of all commodities of the United States fell 14 per cent. Retail prices of things which farmers have to buy declined only 4 per cent during this period. Prices of raw materials have declined more than the prices of manufactured products.

Number 12 | December, 1930 | Volume 8

Full Day of Annual Meetings on Jan. 28

Ray Schalk of Chicago Cubs, John Brandt of Minnesota and Others Scheduled to Address Various Groups.

ANNUAL meetings of an ever-growing number of organizations associated with the County Farm Bureaus and Illinois Agricultural Association will be held on Wednesday, Jan. 28 as in past years.

Among these will be the Illinois Farm Bureau Baseball League where Ray Schalk, former Chicago White Sox catcher and manager, and now one of the coaches of the Chicago Cubs, will discuss practical problems of players and managers in developing better baseball teams. Mr. Schalk who got his start that landed him in the big leagues, with the Taylorville, Ill., team of the old I and M League, was reared at Litchfield in Montgomery county, whence came many a big league player.

The Illinois Farm Bureau Serum Association will have a program of interest pertaining to the protection of the Illinois hog crop against cholera and other diseases.

The Illinois Produce Marketing Association will hold its first annual meeting. John Brandt of Minnesota, president of the Land O' Lakes Creameries, one of the largest co-operatives in the country, has been tentatively engaged as a speaker.

The Illinois Agricultural Mutual Insurance Co., the Illinois Agricultural Holding Co., which holds the stock of Country Life Insurance Co., and the Illinois Agricultural Co-Operatives Association will all hold official meetings to elect officers and transact other business.

Country Life Insurance Co. agents and workers are preparing for a larger conference than that held last year. General and special agents from more than 90 counties will thresh out problems with the officers and Manager L. A. Williams having to do with the operation of the company.

Annual Meeting Speaker

ALEXANDER LEGGE

Chairman Legge of the Farm Board will be one of the headline speakers at the coming annual convention of the I. A. A., Springfield, Jan. 29-30.

Reduced Rates, Annual Meeting, Springfield

Ask for the special fare and one-half rate to the I. A. A. annual meeting, Springfield, if you go by train. Applications for lower fares are being filed by the I. A. A. Transportation Department with all roads leading to the capital city.

Plan to come Tuesday night or early Wednesday morning for the full three days' sessions. Nearly everyone you want to see among your friends and associates in the ranks of organized agriculture in Illinois will be there.

J. H. Brock of the Dairy Department, University of Illinois, has been employed as farm adviser in Bond county.

I. A. A. Annual Meeting Looms Ahead, Jan. 29-30

Chairman Legge and Co-Op. Marketing Officials Booked as Speakers at Springfield Convention.

MAKE RESERVATIONS EARLY

Reservations for rooms and accommodations should be made by all delegates and members who plan to attend, with their County Farm Bureaus. These in turn should be forwarded to the Committee on Arrangements, care Sangamon County Farm Bureau, Springfield, Ill., at once. Ample accommodations at nominal rates are promised for all.

ANOTHER great annual meeting, the sixteenth since the Illinois Agricultural Association was organized, will be held at the state capital, Springfield, Jan. 29-30, 1931. Plans are being developed to maintain the reputation past I. A. A. conventions have won as the Mid-West Forum of Agriculture.

Last year both Secretary Hyde and Frank O. Lowden, two outstanding speakers and students of farm problems delivered stirring addresses. This year Alexander Legge, the frank, outspoken chairman of the Farm Board who has shown remarkable courage and independence in carrying out the mandates of the Agricultural Marketing Act will appear as one of the leading speakers.

Geo. S. Milner, general manager of the Farmers National Grain Corporation, Chicago, long experienced in the grain trade, will bring the last word about the activities and experiences of that organization in developing a nation-wide marketing service for the grain farmer.

A representative of the National Live Stock Marketing Association, which is engaged in unifying and modernizing the co-operative marketing of live stock throughout the United States, will discuss the problems live stock farmers are facing in building a marketing system suited to their best interests and needs. Full details will appear in the January RECORD.

THE peace, happiness, and comforts of Christmas-tide are not marred for those protected against automobile accidents. Automobile insurance at cost in Your Own Company brings self-assurance and freedom from worry . . . makes possible fuller enjoyment of the holiday season . . . wards off fear of liability that may cost heavily not only in property, but also in peace of mind.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 124 So. Fifth St., Marshall, Ill.; Editorial Offices, 608 So. Dearborn St., Chicago, Ill. Entered as second class matter at post-office at Marshall, Ill., June 16, 1930, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412 Act of Feb. 28, 1925, authorized Oct. 27, 1925. Address all communications for publication to Editorial Offices, Illinois Agricultural Association Record, 608 So. Dearborn St., Chicago.

Number 12 | December, 1930 | Volume 8

Full Day of Annual Meetings on Jan. 28

Ray Schalk of Chicago Cubs, John Brandt of Minnesota and Others Scheduled to Address Various Groups.

ANNUAL meetings of an ever-growing number of organizations associated with the County Farm Bureaus and Illinois Agricultural Association will be held on Wednesday, Jan. 28 as in past years.

Among these will be the Illinois Farm Bureau Baseball League where Ray Schalk, former Chicago White Sox catcher and manager, and now one of the coaches of the Chicago Cubs, will discuss practical problems of players and managers in developing better baseball teams. Mr. Schalk who got his start that landed him in the big leagues, with the Taylorville, Ill., team of the old I and M League, was reared at Litchfield in Montgomery county, whence came many a big league player.

The Illinois Farm Bureau Serum Association will have a program of interest pertaining to the protection of the Illinois hog crop against cholera and other diseases.

The Illinois Produce Marketing Association will hold its first annual meeting. John Brandt of Minnesota, president of the Land O' Lakes Creameries, one of the largest co-operatives in the country, has been tentatively engaged as a speaker.

The Illinois Agricultural Mutual Insurance Co., the Illinois Agricultural Holding Co., which holds the stock of Country Life Insurance Co., and the Illinois Agricultural Co-Operatives Association will all hold official meetings to elect officers and transact other business.

Country Life Insurance Co. agents and workers are preparing for a larger conference than that held last year. General and special agents from more than 90 counties will thresh out problems with the officers and Manager L. A. Williams having to do with the operation of the company.

Annual Meeting Speaker

ALEXANDER LEGGE
Chairman Legge of the Farm Board will be one of the headline speakers at the coming annual convention of the I. A. A., Springfield, Jan. 29-30.

Reduced Rates, Annual Meeting, Springfield

Ask for the special fare and one-half rate to the I. A. A. annual meeting, Springfield, if you go by train. Applications for lower fares are being filed by the I. A. A. Transportation Department with all roads leading to the capital city.

Plan to come Tuesday night or early Wednesday morning for the full three days' sessions. Nearly everyone you want to see among your friends and associates in the ranks of organized agriculture in Illinois will be there.

J. H. Brock of the Dairy Department, University of Illinois, has been employed as farm adviser in Bond county.

I. A. A. Annual Meeting Looms Ahead, Jan. 29-30

Chairman Legge and Co-Op. Marketing Officials Booked as Speakers at Springfield Convention.

MAKE RESERVATIONS EARLY

Reservations for rooms and accommodations should be made by all delegates and members who plan to attend, with their County Farm Bureaus. These in turn should be forwarded to the Committee on Arrangements, care Sangamon County Farm Bureau, Springfield, Ill., at once. Ample accommodations at nominal rates are promised for all.

ANOTHER great annual meeting, the sixteenth since the Illinois Agricultural Association was organized, will be held at the state capital, Springfield, Jan. 29-30, 1931. Plans are being developed to maintain the reputation past I. A. A. conventions have won as the Mid-West Forum of Agriculture.

Last year both Secretary Hyde and Frank O. Lowden, two outstanding speakers and students of farm problems delivered stirring addresses. This year Alexander Legge, the frank, outspoken chairman of the Farm Board who has shown remarkable courage and independence in carrying out the mandates of the Agricultural Marketing Act will appear as one of the leading speakers.

Geo. S. Milner, general manager of the Farmers National Grain Corporation, Chicago, long experienced in the grain trade, will bring the last word about the activities and experiences of that organization in developing a nation-wide marketing service for the grain farmer.

A representative of the National Live Stock Marketing Association, which is engaged in unifying and modernizing the co-operative marketing of live stock throughout the United States, will discuss the problems live stock farmers are facing in building a marketing system suited to their best interests and needs. Full details will appear in the January RECORD.

Red Top Growers Get Third Advance on Seed

Total Payment Now 15c Per Lb. One More to Come.

A THIRD advance of four cents per pound on red top seed went out to members of the Egyptian Seed Growers' Exchange recently, according to Manager E. J. Oelze of Flora. This payment is in addition to an initial advance of 9 cents per pound, and a later payment of 2 cents per pound, which brings the total advance to members on seed pooled through the Exchange to 15 cents.

The Exchange promises to make an additional advance as soon as the rest of its supplies are cleaned up and sold.

Made Good Sales

Manager Oelze reports that the Exchange consummated some unusually good sales earlier in the season as a result of the impending light crop. He reports that only about two carloads of seed still remain to be sold, and that the organization is in excellent condition and hopes to make the final payment early in 1931.

All storage charges for seed held in outlying warehouses earlier in the season have been paid. Loans from the Intermediate Credit Bank at St. Louis and from the Federal Farm Board have been largely liquidated. The Exchange had over $60,000 in loans from the Intermediate Credit Bank of St. Louis and the Farm Board at one time. All except around $4,000 of this had been paid back.

Many Sold at 9c

"When you stop to consider that many growers who sold early in the season received only 7 to 11 cents per pound for their seed, we think our showing a remarkable one for the first year's operations under the reorganized plan," said Mr. Oelze. "No fair-minded person will question the fact that the Exchange has had a helpful influence in getting other red top growers throughout southern Illinois, whether members of the pool or not, a maximum price for their seed.

Cut Overhead

"Through the development of other services to the farmers of southern Illinois we hope to cut to a minimum all overhead expenses having to do with handling, cleaning and selling the seed of our grower members. It will be our purpose to get our members the maximum price for their seed in line with market demands."

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL ASSOCIATION

Notice is hereby given that the annual meeting of the members of the Illinois Agricultural Association will be held at the Majestic Theatre, in Springfield, Illinois, on the 29th day of January, 1931, at 9 o'clock a. m., for the following purposes:

For the consideration and vote upon approval and ratification of the reports of the president, secretary and treasurer of the association, and the acts of the board of directors and officers in furtherance of the matters therein set forth, since the last annual meeting of the members of the association.

To approve, ratify and confirm the several purchases heretofore made by this association of stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein.

To secure consent and authorization to acquire on behalf of this association, by purchase, certain stocks and evidences of indebtedness of corporations whose activities will directly or indirectly promote agriculture or the interests of those engaged therein.

To elect eight members to the board of directors for two-year terms.

To elect a president and vice-president.

To consider any proposed amendment of the articles of association or of the by-laws of the Illinois Agricultural Association as may be properly submitted.

For the transaction of such other business as may properly come before the meeting.

GEO. E. METZGER, *Secretary.*

Chicago, Illinois, Dec. 15, 1930.

They Read the "RECORD"

Editor, RECORD:

In a meeting held in Peoria county yesterday with members of boards of directors of farmers' elevators in which a part of these boards were also Farm Bureau members, some of the members spoke very complimentary of the last issue of the I. A. A. RECORD. One of these men in particular said that it was the most interesting, condensed report of the doings of our Association that he had ever read.

I also want to add my commendation, too, as I read every issue from cover to cover and believe every issue gets better. After spending so many years with the Association, it is just like getting a letter from home and I keep looking forward for each issue about the same as I would for such a letter.

Keep up the good work and be assured that the rank and file of the membership is back of you.

F. D. BARTON,
Livingston County, Ill.

As of Oct. 1, 1930, the membership in the I. A. A. reports the Organization Department, is 2,151 over the high peak during the previous three-year period.

Tullock Presides at 12th District Meeting

FARM Bureau representatives of the 12th congressional district met with Congressman John T. Buckbee at Rockford recently to inform him of the organization's attitude toward questions and controversial issues which might arise in the present session of congress. George F. Tullock of Rockford, president of the Winnebago County Farm Bureau, presided.

Resolutions unanimously adopted by the group from Winnebago, Kendall, LaSalle, Boone, DeKalb and Grundy counties were as follows:

Geo. F. Tullock

"Whereas, we as representatives of the several County Farm Bureaus in the 12th congressional district are assembled in a meeting on Nov. 26, 1930, and having at heart the welfare of the other members of our organizations, therefore, be it resolved:

"That we express our appreciation to the members of the Federal Farm Board for its faithful support and administration of the agricultural marketing act, and we want to assure the board of the continued support of the Farm Bureau in the 12th Illinois district.

"That we oppose any changes in the agricultural marketing act that will in any measure curtail its effectiveness.

"That we commend to Congressman Buckbee, the counsel and guidance of the Illinois Agricultural Association and American Farm Bureau Federation in regard to pending legislation.

"That we favor restriction of immigration of undesirable aliens and the deportation of those who have proven undesirable.

"That the tariff on soybean meal and soybean oil be increased so as to afford adequate protection for the American soybean industry.

"That we protect American dairy interests by a higher tariff on cocoanut oil.

"That we favor the construction of more farm-to-market roads rather than the construction of wider roads adjacent to cities.

"That we express appreciation to Congressman Buckbee for giving us an opportunity to discuss with him prospective legislation affecting the agricultural people of this district.

"Be it further resolved, that a copy of these resolutions be sent to Mr. Samuel McKelvie, a member of the Federal Farm Board."

Farmer Grain Dealers Hold Convention, Chicago

"Rump" Meeting Also Held, Passes Meaningless Resolution.

THE National Farmers Grain Dealers' Association meeting in Chicago, December 1, 2 and 3, adopted a resolution to support the efforts of the Federal Farm Board and the Farmers National Grain Corporation so long as local ownership and control of farmers' elevators is safeguarded. The whole spirit of the meeting was friendly to co-operative grain marketing as represented by the Farmers Mutual and the regionals in the various states.

While the national meeting was going on in the Sherman Hotel, a "rump" meeting, composed of a half dozen anti-co-operative propagandists who run around the country specializing in misrepresentation, held a meeting in the Great Northern Hotel. A small group of followers and curiosity seekers attended the sessions.

The main object of this group is to stay close enough to the legitimate farmer's elevator leaders to exercise influence in stopping the rising tide of co-operative grain marketing in the terminals. It is believed by many that these propagandists are using whatever influence they may have gained by past or present connections with farm organizations in the interest of certain grain commission men who have a selfish interest in heading off successful co-operative marketing.

The Farmers Grain Dealers' Association is not paying one cent, according to statements by its officers, toward subsidizing this group. At a recent directors' meeting it called a halt on the use of its name by a second vice-president who set himself up at an office in Bloomington and used the name "Illinois Farmers Grain Dealers' Association" presumably to give an official air to propaganda sent to farmers' elevators in an effort to discourage the establishment of effective terminal co-operative marketing for Illinois farmers.

This group which has no standing with the National Farmers Grain Dealers' Association passed a meaningless resolution demanding that an amendment to the Agricultural Marketing Act be passed making it mandatory that the Federal Farm Board recognize loans on grain without the requirement that grain be pooled when sold. It is difficult for anyone familiar with the Marketing Act to understand the basis for such a resolution when there is nothing in the Act or in the present setup of the Farmers National Grain Corporation requiring that grain be pooled when sold.

The National Farmers Grain Dealers' Association elected the following officers: President, W. C. Horn, Castalia, Ohio; vice-president, L. E. Webb, Dodge City, Kansas, a director in the Farmers National Grain Corporation; secretary, W. H. Thompson, Ft. Dodge, Iowa; and assistant secretary, J. A. Shorthill, son of the former secretary, J. W. Shorthill, Omaha, Nebraska.

A Champion for Dobbin

Editor, I. A. A. RECORD:

"Your headline on the back page of one of your issues was "Know Your Oil as Well as Your Soil." Then you propose to be trying to help the farm depression.

"The principal thing that causes the farm depression of today is the horse industry being lost to the farmers and replaced by machinery. Power farming may be a saving on large farms where machinery can be used advantageously. But how much less per bu. are farmers required to take for their grain, etc., by buying gas and oils and throwing all they raise on a depressed market? They cannot feed hay, corn and oats to the tractors and trucks. . . .

"Every horse off the farm is a bean in the pot of overproduction. How many millions annually did the farmers receive for horses from 1910 to 1920 which were sold to cities and towns besides their feed? I received applications to buy shares in a co-operative oil company in Illinois. The thing that would boost farm prices most would be $1 gasoline. And that is inevitable. Then some want gas for 5c if they can get it. Give them 5c gas and wheat will be under 50c in no time.

"When it is all summed up as I see the future there will be more machinery and a decline in prices until the population increases enough to consume what has been and is being lost through the consumption of the horse industry. This condition is a saving to the cities but a loss to the farmers. If you propose to help the farmers I think there are some thoughts in this letter that would be of advantage to them if they would co-operate."

DR. W. E. POOLE, Kirkwood, Mo.

Better Plan to Attend the I. A. A. and Other Annual Meetings, Springfield, Ill., January 28, 29, 30

THE Sangamon County Farm Bureau baseball team entertained at a rousing banquet in Springfield (Laurel M. E. Church) Wednesday night, Dec. 10. Delegates from Cass, Logan, Morgan, Montgomery came, swelling the crowd to more than 100. Manager Harry Sweet presided. Speakers were Ray Schalk, famous old White Sox catcher, now Chicago Cubs coach, who gave an interesting, rapid-fire talk on big league experience; George Thiem, State League secretary; John Stout, district chairman; Rep. Michael Bray, Litchfield; Chas. S. Black, state vice-president; Farm Advisers Ed Bay, Guy Husted, J. H. Checkley, Alden Snyder; also Bob Drysdale, sports editor, Illinois State Journal; L. R. Welk, team managers and others.

A new feature of the coming Farm and Home Week, January 12 to 16, at the University of Illinois, will be a daily coaching class taught by Coach Lundgren in the finer points of baseball. One hour each afternoon will be devoted to the science of playing this well known game.

Players on the teams in the Illinois Farm Bureau Baseball League are invited to attend. They should take along a fielder's glove, old clothes, or a baseball uniform, and tennis or baseball shoes. Balls and bats and other necessary equipment will be furnished by the University of Illinois.

Coach Lundgren is well known to Illinois baseball fans. He assisted in organizing the State League, and has appeared at a number of meetings and baseball banquets.

Lundgren played on the famous Chicago Cubs team from 1902 to 1909. In 1905 he was third pitcher in the league, in 1907 the fifth.

After leaving professional baseball he coached at Princeton and Michigan before going to Illinois in 1920.

Approximately 75 attended a banquet given the McDonough county state championship Farm Bureau team at Macomb on November 29 by the McDonough County Farm Bureau.

Charles S. Black of Jacksonville, vice-president of the State Farm Bureau League and I. A. A. director, presented the silver trophy given by the Illinois Agricultural Association. Manager E. W. Runkle accepted the trophy on behalf of the McDonough county team.

Both Mr. Black and T. H. Brockman of Jacksonville, former professional baseball player with the Cleveland Indians, were among the speakers.

45 Counties Build Organization Forces

Report Recommends Retention of District Organization Plan, Improvement in Its Administration.

PERMANENT Farm Bureau organization machinery, with volunteer committees and solicitors appointed by townships, have been established in 45 Illinois counties.

In its recent report to the I. A. A. Board of Directors the Organization-Information Advisory Committee composed of C. E. Bamborough, F. G. Oexner and W. A. Dennis said:

"The committee found there had been a steady increase in membership each consecutive month since September, 1929, to October 1, 1930. Written reports indicate that the men in the districts had been of considerable assistance in the organization and the promotion of various service projects offered by the Association which does not bear directly on Farm Bureau membership acquisition and that unquestionably a considerable amount of promotional expense had been saved the Illinois Agricultural Association by having trained men available in its Organization Department who could assume some of that responsibility.

Close Contact Needed

"It is the belief of the committee that to maintain a strong, loyal membership a close contact is necessary between the Illinois Agricultural Association, the County Farm Bureaus, their officers and executive committeemen and the organization project leaders in the counties. The committee recognizes that in the face of all of these favorable facts of the operation and possibilities of the district plan of organization that there is considerable criticism from a number of counties of the state, which indicates the value of the plan has not been fully recognized.

"Upon careful analysis of the facts it is the opinion of the committee that the fundamental principles of the district plan of organization are sound and that it has great possibilities and the criticism of the plan arises more from its administration than on the merits or demerits of the plan itself."

Uncle Ab says he can't see how spending money he hasn't got for things he really doesn't need is going to help much; because that's what started his present money troubles.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL MUTUAL INSURANCE COMPANY

Take notice that the annual meeting of the members of Illinois Agricultural Mutual Insurance Company will be held on Wednesday, the 28th day of January, 1931, at the hour of 1 o'clock p. m., at the Abraham Lincoln Hotel, Springfield, Illinois, to elect directors, receive, and, if approved, confirm the report of the board of directors of the company for the fiscal year ending December 31, 1930; and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, Dec. 15, 1930.

GEORGE F. TULLOCK, *Secretary.*

A Good Idea

Editor, I. A. A. RECORD:

Our Mossville community pulled a stunt a short time ago that might be of interest to you. A committee of Farm Bureau members arranged a Farm Bureau day at the local Methodist church, the only one in the community.

Ira Moats of Maquon, secretary of the Knox County Farm Bureau, and formerly a minister, was obtained for the sermon. A Farm Bureau quartet consisting of B. W. DeBord, Albert Hayes, C. W. McMillen and S. H. Kruntz furnished special music.

Farm Bureau executive committeemen and directors from other parts of the county were invited to the services and nearly all of them were present. Church is held in the afternoon.

Very pleasant and much worthwhile is the report of those attending.

J. W. WHISENAND, Farm Adviser,
Peoria County.

Whiteside Coming Up

More than 350 members and non-members attended an organization meeting Nov. 18, in Morrison, sponsored by the Whiteside County Farm Bureau. Secretary Geo. E. Metzger was the principal speaker. Farm Adviser H. E. Brunnemeyer of Jo Daviess county sang. Rev. Becker of the local Presbyterian church led in community singing. Farm Bureau membership in Whiteside is steadily growing.

Continuous Membership

Sixty Illinois County Farm Bureaus had their members signed up on the continuous membership contract, on Oct. 1, 1930. At this date the membership in the I. A. A. was 2,151 above the high peak during the former three-year period.

I. A. A. Directors Take Action in Nov. Meet

The board of directors of the Illinois Agricultural Association meeting in Chicago on Nov. 14 voted to:

1. Continue the present district organization plan with district managers, but to authorize and direct the Organization Department to make its administration and operation more satisfactory and effective;

2. Adopt a uniform rate of 5c per mile for the operation of cars used in the service of the organization and associated companies managed by the Illinois Agricultural Service Co.;

3. Authorize the delegates from Illinois to present the following resolution before the Resolutions Committee of the American Farm Bureau Federation at its annual convention in Boston;

"We believe the present policy of the American Farm Bureau Federation which allows other institutions or agencies to finance or assist in financing projects promoted and carried on by the American Farm Bureau Federation to be very detrimental to the growing prestige of the organization; and therefore,

"BE IT RESOLVED, that the future policy be to restrict the program of the American Farm Bureau to projects that can be financed by membership income";

4. Authorize W. R. Boys, secretary of the Shelby County Farm Bureau to vote the I. A. A. stock at the annual meeting of the Shelby County Live Stock Marketing Association;

5. Concur in the recommendation of the Organization-Information Committee that the American Farm Bureau proposal to form a new publishing company to take over the Bureau Farmer, with the State Farm Bureau organizations assisting financially by taking stock, be taken under advisement and a report made at a later meeting;

6. Appropriate $150 toward the next American Institute of Co-Operation at Manhattan, Kansas;

7. Employ Swanson-Ogilvie Co. to audit the Association accounts;

8. Pay expenses of a dinner to 4-H Club Illinois champions in Chicago the night of Dec. 3.

The University of Illinois, it is reported, is building a $110,000 home for its president.

Ray Watson, assistant adviser in McLean county, has been employed as farm adviser to succed F. E. Longmire in Grundy county.

Egyptian Service Co. Launches Mixed Feeds

Southern Illinois Members to Have New Co-Operative Money-Saving Service.

THE Egyptian Service Company of Flora, Illinois, will launch its new mixed feed department on December 15, according to Manager E. J. Oelze, who was in Chicago recently.

The company has adopted the trade name "Blue Seal" and will put out two grades of feed under this brand name, adding others as the demand requires.

"Blue Seal" Dairy Feed, following a formula recommended by both the Illinois and Iowa State Agricultural Colleges, will contain a minimum of 24 per cent digestible protein, 4 per cent digestible fats and a maximum of 5 per cent fiber. It will contain ground corn, gluten feed, ground oats, ground barley, soybean meal, cottonseed meal, bran, and salt. The Illinois Farm Supply Company will own the formula and is taking out the necessary state licenses.

"Blue Seal" Laying Mash will be a mixture of ground alfalfa, ground corn, cracked wheat, ground oats, ground barley, soybean oil meal, bran, bone meal, meat scraps, dry bone meal, and salt with a minimum of 18 per cent digestible protein, 4 per cent digestible fats, and a maximum of 6½ per cent fiber.

Modern Plant Ready

A modern hammer mill and mixing plant, capable of handling 60 tons of mixed feed a day, has been installed in the warehouse of the Egyptian Seed Growers' Exchange at Flora. George Smith, county adviser in Washington county will have charge of the mixing plant which will pay rental on a per ton basis to the Seed Growers' Exchange for space and facilities.

Two men are already out seeing dealers and making arrangements throughout the southern Illinois territory to handle the new high-quality feeds. The feed mixtures will conform to the highest standards using only the best grains and concentrates, without adulteration.

Manager Oelze has been busy during recent weeks making necessary purchases of grain and concentrates for the mixing plant. In addition concentrates and unmixed feeds will be handled for dairymen, poultrymen and live stock feeders throughout the southern Illinois territory.

Ship in Feeds

Following the wide-spread drouth in southern Illinois during the past season, Manager Oelze jumped into the breach and assisted in shipping in large supplies of corn and other feeds. He bought and distributed 10 carloads of ear and shell corn, and more recently has purchased several carloads of oats, barley and wheat. In addition he has contracted to buy 30 carloads of soybean oil meal, three of which have been sold already.

As soon as the necessary capital can be obtained through the sale of preferred A 7 per cent cumulative stock, the Egyptian Service Company will erect several bulk stations for handling SERVICE BRAND petroleum products. Territory within a radius of 50 miles or more will be served with the "SERVICE" products as soon as facilities are provided.

Making Progress

Since coming to Flora, July 1, 1930, Manager Oelze and the new board of directors have made rapid strides, first, in putting the Egyptian Seed Growers' Exchange back on its feet, and secondly, in getting the much needed feed service underway. Southern Illinois farmers, particularly dairymen and poultrymen, are compelled to buy part of their live stock feeds. This new department of the Egyptian Seed Service promises to be of outstanding importance and service throughout the territory.

The Service Company is strictly a co-operative like the Egyptian Seed Growers' Exchange, and all profits from handling petroleum products and mixing feeds will be paid back to Farm Bureau member patrons after setting aside necessary reserves, in the form of patronage refunds. The County Farm Bureaus in the southern Illinois area are backing the new project because of the great service promised to their members.

The Cook County Farm Bureau holds its regular monthly directors' meetings in the I. A. A. offices.

NOTICE OF ANNUAL MEETING OF ILLINOIS AGRICULTURAL HOLDING COMPANY

Take notice that the annual meeting of the stockholders of Illinois Agricultural Holding Company will be held on Wednesday, the 28th day of January, 1931, at the hour of 11 o'clock a. m., at the Abraham Lincoln Hotel, Springfield, Illinois, to elect directors, receive, and, if approved, confirm the report of the board of directors of the company for the fiscal year ending December 31, 1930; and to consider and, if approved, ratify and confirm all the acts and proceedings of the board of directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, Dec. 15, 1930.

GEORGE F. TULLOCK, *Secretary.*

Consider Farm Supply Co. in Monroe County

"If we were setting out to organize our local supply company again, it would not be a question of where we could sell the stock but of how much are we going to allow each investor," L. A. Landon, secretary of the Jersey County Farm Supply Co., told members of the Monroe County Farm Bureau at their recent annual meeting.

"The first year we cleared something over $8,000," said Landon. "Our net profit to date will run considerably over $20,000. This is either added to our working capital and reserves or paid back to Farm Bureau members in patronage dividends.

"Our company was organized for three reasons as follows:

1. "We wanted through the Illinois Farm Supply Co. to secure high quality oils, grease and fuel oils.

2. "We felt our farmers were entitled to the savings and profits from co-operative purchasing and distribution.

3. "The Farm Bureau wanted to bring further service to its members in cutting costs of production. This project has brought up our Farm Bureau membership and interested many others in the organization."

The meeting went on record in favor of organizing a county company.

Peoria and Tazewell Co-Ops. Pay Dividends

THE Peoria County Service Company recently declared its regular 8 per cent patronage dividend payable at once, also a special 8 per cent dividend payable later. Lloyd L. Woolsey is the able manager of the Peoria County co-operative.

The Tazewell Service Company, according to Manager Clyde Woolsey, handled more than $87,000 worth of petroleum products during its first six months' of operation from which it made a profit of $17,000 on the capital stock of $20,000.

An 8 per cent patronage dividend was declared, and an equal amount was set aside for reserves and future patronage refunds.

Mr. Woolsey stated that gasoline shrinkage amounted to only about 1 per cent since the company started. This is considered an excellent record because many companies report shrinkages of 2 per cent or more.

Lloyd and Clyde Woolsey visited the Illinois Farm Supply headquarters and the I. A. A. offices on Monday, December 1.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Editor, George Thiem

Published once a month by the Illinois Agricultural Association, at 124 So. Fifth St., Marshall, Ill. Adress all communications for publication to Editorial Office, 608 So. Dearborn St., Chicago, Ill. Entered as second-class matter June 16, 1930, at the post office at Marshall, Ill., under the Act of March 3, 1879. The Farmer and His Job

THE farmer must help himself. The government can't do much for him.

This is the doctrine preached by many a man wherever and whenever the farm problem comes up for discussion. Nearly everyone takes a kindly interest in the farmer and his troubles, although for the moment attention has been diverted to the centers of population where the armies of unemployed are rightfully receiving most of the sympathy.

The farmer has come to believe that he must help himself, although he insists that so long as the government extends privileges to various groups by means of the protective tariff, immigration law, federal reserve act, etc., that agriculture be given a seat at the table of privilege.

There are a host of people who have sympathized with farmers over their difficulties and who even admit the justice of and need for "equality for agriculture." Yet when the farmer starts to follow the advice of his well wishers by helping himself in his own way these same people change their attitude. When farmers seek to eliminate some of the waste in distribution, for example, by developing co-operative marketing, certain middlemen and their allies leave no stone unturned to head off any progress in that direction. This condition was clearly pointed out by President Smith in his address before the recent annual Farm Bureau convention at Boston.

When the farmer through organization sought to lower his costs by providing certain services for himself, such as insurance and co-operative buying, he was none the less criticized for his activity. Those who had already established these services immediately felt and claimed, directly or indirectly, that they had an exclusive and God-given right to render the given service at their own prices and on their own terms.

The farmer has no business doing this nor doing that, they said. "Let him stick to marketing," says the insurance man; "that's where he can make the best showing."

"The present system of marketing is perfect and cannot be improved upon," says the commission man. "Let the farmer develop his insurance and oil business where the opportunities are greater." And so it goes.

When the Farm Bureau was young and weak, and confined its activities to preaching the "two-blades-of-grass" doctrine, it was lauded to the skies and patronized by many a commission man, merchant and trader. But when it put on long pants and directed its attention to larger problems influencing the farm income and outgo, it lost favor with some of its old allies.

Everyone loves the farmer as a customer, but when he stops being a customer, he loses some of his friends. Who can blame him, then, for believing that many of his business friendships have the dollar sign tied to them; for becoming painfully aware of the selfishness of humanity; for judging many of his critics with these things in mind.

The farmer has come to assume a philosophic attitude toward life and his fellow man, determined to do the best he knows how to help himself and his industry, recognizing the necessity for hewing away at the job letting the chips fall where they may.

Lessons from the Official Vote

THE official vote on the proposed revenue amendment in the last election reveals that less than half the voters expressed themselves on this important question.

The total number of votes cast in the election was 2,332,696. Of this number 513,661 voted against the amendment, 371,812 voted for it. To have passed the amendment would have required a majority of all votes cast or 1,166,349. Thus it was overwhelmingly defeated.

Four years ago when the Illinois Agricultural Association supported the tax amendment proposed then, the vote was 651,768 for it, and 476,455 against. It is reasonably safe to assume that the position of organized farmers against the measure submitted in the last election was largely responsible for an overturn of nearly 280,000 votes.

The fact that the proposal appeared on the main ballot this year instead of on a separate ballot did not seem to help it any. While 1,128,223 voted on the measure in 1926, only 885,473 voted on the proposal this year.

Both the recent vote and that of four years ago indicate the extreme difficulty of passing any kind of an amendment, because of the large number who invariably fail to express themselves on important questions of public policy. This fact is all the more reason why strenuous efforts must be made in the coming General Assembly to establish a more equitable taxing system under our present constitution.

Observations

BELIEVE half you read, one-tenth you hear, says the sage with some truth.

This is no plea for more Doubting Thomases. There is more to be said for the "believer" than the "doubter." Nothing is accomplished without faith. Futile and useless is the man or woman who doubts everything, believes nothing.

But there is need in these days of propaganda for placing an estimate on the accuracy of the spoken and written word. Many a weak thought or untruth is covered up by the oratory of the spell-binder. Many a careless speaker tries to "crawl out" of his mistakes by charging the reporter with "misquoting" him. And the prominent speaker frequently succeeds in making the conscientious reporter the goat.

Not so with the writer. His words are preserved for all time. There they are read to be thrown back at him, waiting to rise up and damn him before all the people. A suit for slander (oral defamation) is rare, a successful one rarer because slander is usually hard to prove. Cases of libel (written defamation) are tried every day. Scores of newspaper have been put out of business because of them.

The doctor's mistakes are buried, the speaker's denied, the lawyer's charged against his luckless client. But the writer's go down in history, saved for generations.

Arthur Brisbane, the $100,000 a year columnist, was accused of being inconsistent at times. He readily admitted the charge, saying that no man who writes a column every day can always be right. The ninety-nine times the writer is correct are forgotten. His one mistake is remembered.

We had the privilege once of exposing a humbug in a paper of wide circulation. We and the publisher were promptly sued for libel, hailed into court, compelled to prove the accuracy of every statement. Which we did at considerable expense.

A fearless, independent and intellectually honest press (of which there are too few) remains our most useful instrument to protect the people against shysters, frauds and false doctrines. That kind of service by our best publications should be encouraged and rewarded.

—E. G. T.

ILLINOIS GIRL WINS JUNIOR GRAND CHAMPIONSHIP AT INTERNATIONAL LIVESTOCK SHOW

Sarah Ann Tolan, 14-year-old high school freshman and Farm Bureau member's daughter of Sangamon county, captured the grand championship in the Junior Livestock Feeding Contest at the International Livestock Exposition, Chicago. She is shown with her prize-winning Aberdeen-Angus yearling, "CHOCOLATE."

Sarah Tolan's Calf Brings 56c a Pound

A SMALLER crowd than usual attended the International Live Stock Exposition in Chicago, which closed on December 6. Reduced gate receipts, however, were not unexpected. Exhibits were up to standard in most departments.

Of interest to Illinois live stock men and 4-H club members was the junior feeding contest won by Sarah Tolan, Farm Bureau member's daughter of Farmingdale, Sangamon county, Illinois, on her black Angus steer. The calves were sold on Friday afternoon, the grand champion calf bringing 56 cents per pound. It was purchased for $574 by the Wabash railroad dining service.

Half of the receipts of the grand champion calf were donated by the 14-year-old girl to the Volunteers of America for their Chicago soup kitchen where the unemployed are fed.

A special class for utility type seed corn was one of the features of the Hay and Grain Show. Herbert Watson, young Indiana farmer, was crowned corn king on his 10 ears of medium smooth yellow dent corn.

"Doctoring" of live stock such as removing or remedying physical defects by cutting ties or lifting and filling under the skin was barred from the show ring this year for the first time. While the champions did not show the smoothness of the "doctored" champions of past years, the fact that "honesty" has been adopted as the policy in the "International" show ring promises to have a wholesome influence for the future.

The grand champion steer, a black Angus from Missouri, was a thick, short, plump individual worthy of the high honor. The reserve grand champion was a Shorthorn.

Farm Bureau Basketball

A State Farm Bureau Basketball League with inter-county games leading to a state championship tournament has been suggested as a means of providing sport and recreation for farm boys and men, entertainment for young and old, during the winter.

High school and community gymnasiums can be obtained for regular practice and play. The cost of running County Farm Bureau teams will be light. Expenses can be met by charging small admission fees to games.

Iroquois county is ready to go, providing other counties will bring out teams to furnish competition.

Eligibility rules similar to those used in the Farm Bureau Baseball League are contemplated.

Get in touch with your County Farm Bureau office if you want a team, or write Department of Information, I. A. A., 608 S. Dearborn St., Chicago.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely, to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Editor, George Thiem

Published once a month by the Illinois Agricultural Association, at 608 So. Fourth St., Marshall, Ill. Adress all communications for publication to Editorial Office, 608 So. Dearborn St., Chicago, Ill. Entered as second-class matter June 16, 1930, at the post office at Marshall, Ill., under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of Feb. 28, 1925, authorized Dec. 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the Illinois Agricultural Association Record. Postmaster: In returning an uncalled for missent copy please indicate key number on address as is required by law.

The Farmer and His Job

THE farmer must help himself. The government can't do much for him.

This is the doctrine preached by many a man wherever and whenever the farm problem comes up for discussion. Nearly everyone takes a kindly interest in the farmer and his troubles, although for the moment attention has been diverted to the centers of population where the armies of unemployed are rightfully receiving most of the sympathy.

The farmer has come to believe that he must help himself, although he insists that so long as the government extends privileges to various groups by means of the protective tariff, immigration law, federal reserve act, etc., that agriculture be given a seat at the table of privilege.

There are a host of people who have sympathized with farmers over their difficulties and who even admit the justice of and need for "equality for agriculture." Yet when the farmer starts to follow the advice of his well wishers by helping himself in his own way these same people change their attitude. When farmers seek to eliminate some of the waste in distribution, for example, by developing co-operative marketing, certain middlemen and their allies leave no stone unturned to head off any progress in that direction. This condition was clearly pointed out by President Smith in his address before the recent annual Farm Bureau convention at Boston.

When the farmer through organization seeks to lower his costs by providing certain services for himself such as insurance and co-operative buying, he was never the less criticized for his activity. Those who had already established these services immediately felt and claimed, directly or indirectly, that they had an exclusive and God-given right to render the given service at their own prices and on their own terms.

The farmer has no business doing this nor doing that, they said. "Let him stick to marketing," says the insurance man; "that's where he can make the best showing."

"The present system of marketing is perfect and cannot be improved upon," says the commission man. "Let the farmer develop his insurance and oil business where the opportunities are greater." And so it goes.

When the Farm Bureau was young and weak, and confined its activities to preaching the "two-blades-of-grass" doctrine, it was lauded to the skies and patronized by many a commission man, merchant and trader. But when it put on long pants and directed its attention to larger problems influencing the farm income and outgo, it lost favor with some of its old allies.

Everyone loves the farmer as a customer, but when he stops being a customer, he loses some of his friends. Who can blame him, then, for believing that many of his business friendships have the dollar sign tied to them; for becoming painfully aware of the selfishness of humanity; for judging many of his critics with these things in mind.

The farmer has come to assume a philosophic attitude toward life and his fellow man, determined to do the best he knows how to help himself and his industry, recognizing the necessity for hewing away at the job letting the chips fall where they may.

Thousands are Flock

THE rapid rise of Country Life Insurance Company with more than 25,000 policyholders in less than two years is expressive of the confidence Illinois farm people have in their own company. Thousands are flocking to "Country Life" because:

1. Its purpose is to benefit policyholders through low cost, legal reserve protection.
2. There is no selfish interest because of its co-operative setup.
3. The return of profits to policyholders in dividends makes net cost still lower than the already low participating premiums.

An endowment policy means education and a start in life for your boy.

Like a rising tide, confidence in Country Life has expressed itself daily in a steady influx of business.

Thousands are flocking to Country Life because its policyholders are never disappointed. They do not wake up after the policy is sold to learn that they might have done better elsewhere. A Country Life policy stands for the best in life insurance. The company has kept faith with its policyholders. It has done everything and more than it agreed to do.

COUNTRY LIFE INSURANCE

608 SO. DEARBORN STREET. CHIC

THOUSANDS are flocking to Country Life because of its sincerity of purpose . . . its declaration of a dividend payable with the third premium, which is one year earlier than the contract provides. This is just another evidence of the company's desire to give its present policyholders the benefit of savings.

Thousands are flocking to Country Life because of its intelligent service that pyramids good will and keeps policies in force, that strengthens the bond between the insured and the company.

Thousands of farm folks have come to Country Life for protection because they recognize in it a company built to serve them, founded on the spirit of co-operation. Its goal is to return to the patron all the profits except that retained to guarantee payment of premiums and safety.

Illinois agriculture has responded in full measure to its opportunity to build a financial structure of its own in the field of life insurance . . . a structure owned and controlled by farm folks, operated unselfishly for service to policyholders.

The habit of thrift and saving for later education can be taught your daughter through life insurance.

Mail this coupon for our new low rates at your age.

Farm Board News

THE Coarse Grains Advisory Committee meeting in Washington on November 17 and 18 reported to the Federal Farm Board as follows:

"The outstanding facts in the feed grain situation are, first, the great shortage of corn and of feed grains as a group; and second, the low prices prevailing in the face of this shortage.

"The corn crop is the smallest since 1901; it is 520 million bushels smaller than last year, and only 88 per cent of the 1924-28 average. While crops of oats and barley are somewhat larger than last year, the supply of the three principal coarse grains is only about 89 million tons as compared with the moderate supply of 100 million tons last year. The less important crop of grain sorghums is only 84 per cent of last year's small crop and 66 per cent of the 1924-28 average. The position is further accentuated by short crops of hay.

"A partial offset to this reduction in feed grains and hay is the existence of unusually liberal wheat supplies, including carry-over and new crop. Rye supplies also are larger than usual, though very small as compared with other grains. Even if supplies of wheat and rye are added to the coarse grain supplies, the total is appreciably below what the country has been using up in each of several recent years."

Reasons given for the low price of corn were:

1. The low price of wheat brought about by liberal carryovers.
2. Import restrictions in European countries.
3. Russian shipments.
4. The world business depression.
5. A severe decline in world price levels.

Prices of corn and barley in other exporting countries are very low for similar reasons in spite of the fact that world crops of both grains outside the United States are smaller than the large production in 1929.

The Advisory Board reported that coarse grains as low as they are, are considerably higher here than in most foreign countries. The spread between Chicago and Buenos Aires prices of corn is around 35 cents. The spread between Minneapolis and Winnipeg prices of barley is around 20 to 25 cents. The tariff on corn, recently raised to 25 cents per bushel is effective in restricting imports to small proportions and to an unusual degree in keeping domestic prices above world levels.

Commenting upon the action of the Grain Stabilization Corporation in buying wheat at Chicago to hold the price at 73c, Chairman Legge said:

"Demoralization in world grain markets has made it necessary for The Grain Stabilization Corporation to again enter the wheat market in order to stop panicky selling and to prevent further unwarranted declines in domestic prices. Comparatively wheat is lower in price than other agricultural commodities. The price of flour fully reflects the price of wheat, which, no doubt, is increasing the per capita consumption. While the visible supply of wheat is large, there is no congestion in any of the terminal markets. Receipts at primary markets are unusually light, which suggests the extent to which farm stocks are being used for feeding purposes. Further price declines would be in sympathy with foreign markets and not justified by domestic conditions."

Monroe Leads in Use of Limestone

Monroe county, Illinois, holds the record for the most limestone spread by any Illinois county, according to C. M. Linsley of the University of Illinois. He states that 43,000 tons of limestone have been hauled and spread by farmers of this county.

"Every $2 invested in a ton of limestone for acid soil will return $15 or more in higher crop yields," said Linsley. "Farmers who can't spend $1 in order to make $7.50 are the only ones entitled to say that they can't afford to buy limestone to sweeten their acid soils.

"If some oil stock salesman would approach these farmers who say that they cannot afford to buy limestone and offer them stock in an oil well which was guaranteed to return $15 for every $2 invested, most of them would manage to get together at least $100."

Serum Directors Meet Buy Supplies for '31

DIRECTORS of the Illinois Farm Bureau Serum Association met in Chicago recently to consider bids on more than 30,000,000 c.c. of serum and virus for immunizing hogs against cholera.

Farmers in 72 counties have pooled their buying power in purchasing the largest quantity of serum ever ordered at one time. Radio advertising it is thought has been helpful in reminding hog growers of the need for protecting their herds. A larger sale of serum and virus than heretofore is expected in 1931.

Only two of the 72 co-operating counties specified blood serum. Nearly all have adopted the clear concentrated serum.

The prices obtained from the various companies were the lowest on record. The Anchor Serum Co. of St. Joe, Mo., and the Globe Laboratories, Ft. Worth, Tex., both high grade companies producing their immunizing materials in sanitary laboratories under government supervision, shared the bulk of the business.

The advantages gained by purchasing serum and virus co-operatively are first the substantial savings in cost, and secondly the assurance of having on hand at all times an ample supply of materials.

THE McLean County Milk Producers' Association announces that the new base-rating plan effective for November, December, January and February provides for a price of $2.45 per 100 pounds of 4 per cent milk for all supplies delivered under the base amounts, f. o. b. Bloomington. With association dues and trucking costs deducted, this means a net of $2.10 to the producers. This price covers all milk sold to the wholesale or retail trade.

Surplus milk used for ice cream and other dairy products, except butter, will be valued according to its butterfat content, according to the following formula: 92 score Chicago butter market price plus 5 cents for each pound of butterfat, plus 30 cents per 100 pounds of whole milk delivered.

For surplus milk used in butter making, the price is computed on the base of Chicago 92 score butter market for butterfat content plus 30 cents per 100 pounds for the whole milk.

Thus, the net price paid each producer depends upon the base amount delivered and the percentage of his total used in making butter or manufactured products.

Each member's base amounts to 30 per cent of the average amount delivered during August, September, October and November of 1929. That base rating is to apply throughout the balance of 1930. A new base will go into effect January 1, applying the average figures for the same months this year.

This plan operates very much like the equalization fee plan advocated in the McNary-Haugen bill in that the producer is penalized for surplus production.

Livestock Marketing

The Chicago Producers handle one out of every five loads of live stock shipped to Chicago by co-operative shipping associations.

For the first 10 months of 1930 the Chicago Producers received 7,115 co-operative shipments, which represented 20.1% of the total co-operative loads coming to the market. Illinois associations were the largest contributors; Iowa second.

The annual meeting of the Indianapolis Producers' Commission Ass'n. will be held Dec. 30, 10:30 A. M., Severin Hotel, Indianapolis. The Indianapolis Producers continues to handle around one-third of all live stock received at that market, 90 per cent of which comes from co-operative shipping associations.

Fred Gumm, manager of the Paris (Edgar Co.) Shipping Association, against keen competition, shows a gain in shipments to the Indianapolis Producers over November a year ago. During the month of November he shipped 15 cars, compared with 14 a year ago.

Mgr. Frank Kettering, Vermilion County Live Stock Marketing Association, Danville, consigned 18 decks to the Indianapolis Producers during November.

DURING the first nine months of 1930 Adams county led all other Illinois counties in co-operative shipments of live stock to Producer agencies. Adams shipped 634 carloads, Fulton 550, Henry 555, DeKalb 477, Macoupin 428, Knox 413, LaSalle 410, McLean 384, and Peoria 396.

The bulk of the Illinois co-operative shipments went to the Producers at Chicago, St. Louis, Peoria and Indianapolis. A larger number than ever before—144 carloads—went to the Buffalo Producers.

Total shipments to Producer agencies for the nine months' period were 16,177 carloads. Chicago led with 6,732 carloads, St. Louis was next with 4,993, Peoria third with 2,128, and Indianapolis 2,104.

Live stock receipts at all the principal markets were lower this year than last, hence shipments to the Producers fell off to some extent compared with the same period in 1929.

During the month of November Carl Smith of the Champaign County Live Stock Marketing Association shipped 10 decks to the Producers at Indianapolis.

The following Illinois managers show a gain over November last year: C. M. Weller, Tuscola, with 10 cars; W. J. Richey, Palestine; W. F. Kurtz, Tabor; Hans Heit, Garrett; Harry Gosnell, Rose Hill; Henry Volle, Mt. Pulaski; Fred M. Stoll, Beason; Carl Shasteen, Sullivan; W. E. Leischner, DeLand; H. H. Richards, Parkersburg; O. C. Fisher, Windsor; D. E. Elliott, Shelbyville.

Illinois cattle feeders consigning to the Producers at Indianapolis recently were Frank Goodwin, Palestine; W. L. Dunston, Marion, and John Conlin, Arthur.

"THE ability of the live stock producer to market his own product economically is shown by the fact that the members of the St. Louis Producers' Commission Association made a saving in reduced commissions and cash refunds of approximately $129,000 last year alone," said President J. R. Fulkerson in a recent statement.

Commenting upon the recent boycott here, Fulkerson said: "In the last analysis, it is not for the United States Department of Agriculture nor the courts to decide, but for the American live stock producer to say whether he prefers to select one from the many competent, self-appointed commission firms doing business on this market to sell his live stock for him, or whether he prefers to market his product through his own marketing agency. Let all selling agencies agree to abide by this decision and permit him to sell any way he chooses on an open and unrestricted market."

LOADING IN—VERMILION COUNTY LIVESTOCK MARKETING ASSOCIATION
Livestock farmers in and about Vermilion county, Illinois, are now served by this up-to-date co-operative with modern facilities for grading, handling, and selling their cattle, hogs, and sheep.

THE Vermilion County Live Stock Marketing Association with headquarters at Danville is one of the new county live stock co-operatives created to organize the bargaining power of Illinois live stock producers. The Association ships live stock on Tuesdays and Thursdays, handling around seven decks a week.

Excellent facilities have been provided in a 210x63 foot shed capable of housing 23 carloads of live stock at one time. Two loading chutes are available and the unloading platform will take care of four trucks at one time. An up-to-date office, scales, paved sorting-pens, and large live stock pens, some of them holding as many as two carloads of stock, are part of the equipment.

Approximately 400 Vermilion county live stock growers have signed agreements to ship their live stock through the co-operative association except when they have carloads and wish to consign direct to the large terminal markets.

The organization is capitalized at $25,000, $4,000 of which has been sold. A board of directors of seven men and the manager, Frank B. Kettering, direct the affairs of the association.

The Big Four railroad co-operated in providing trackage and facilities for expediting the handling of live stock.

Wants to Buy Land

"I have a client very much interested in the purchase of large tracts of land, either timbered, or cutover, or barren. Write location and price per acre.

"Most of this land will be used for farming, and hunting, and fishing purposes."

CHARLES H. COLES,
180 East Park Ave.,
Elmhurst, Illinois.

Farm Board News

THE Coarse Grains Advisory Committee meeting in Washington on November 17 and 18 reported to the Federal Farm Board as follows:

"The outstanding facts in the feed grain situation are, first, the great shortage of corn and of feed grains as a group; and second, the low prices prevailing in the face of this shortage.

"The corn crop is the smallest since 1901; it is 520 million bushels smaller than last year, and only 88 per cent of the 1924-28 average. While crops of oats and barley are somewhat larger than last year, the supply of the three principal coarse grains is only about 89 million tons as compared with the moderate supply of 100 million tons last year. The less important crop of grain sorghums is only 84 per cent of last year's small crop and 66 per cent of the 1924-28 average. The position is further accentuated by short crops of hay.

"A partial offset to this reduction in feed grains and hay is the existence of unusually liberal wheat supplies, including carry-over and new crop. Rye supplies also are larger than usual, though very small as compared with other grains. Even if supplies of wheat and rye are added to the coarse grain supplies, the total is appreciably below what the country has been using up in each of several recent years."

Reasons given for the low price of corn were:

1. The low price of wheat brought about by liberal carryovers.
2. Import restrictions in European countries.
3. Russian shipments.
4. The world business depression.
5. A severe decline in world price levels.

Prices of corn and barley in other exporting countries are very low for similar reasons in spite of the fact that world crops of both grains outside the United States are smaller than the large production in 1929.

The Advisory Board reported that coarse grains as low as they are, are considerably higher here than in most foreign countries. The spread between Chicago and Buenos Aires prices of corn is around 35 cents. The spread between Minneapolis and Winnipeg prices of barley is around 20 to 25 cents. The tariff on corn, recently raised to 25 cents per bushel is effective in restricting imports to small proportions and to an unusual degree in keeping domestic prices above world levels.

Commenting upon the action of the Grain Stabilization Corporation in buying wheat at Chicago to hold the price at 73c, Chairman Legge said:

"Demoralization in world grain markets has made it necessary for The Grain Stabilization Corporation to again enter the wheat market in order to stop panicky selling and to prevent further unwarranted declines in domestic prices. Comparatively wheat is lower in price than other agricultural commodities. The price of flour fully reflects the price of wheat, which, no doubt, is increasing the per capita consumption. While the visible supply of wheat is large, there is no congestion in any of the terminal markets. Receipts at primary markets are unusually light, which suggests the extent to which farm stocks are being used for feeding purposes. Further price declines would be in sympathy with foreign markets and not justified by domestic conditions."

Monroe Leads in Use of Limestone

Monroe county, Illinois, holds the record for the most limestone spread by any Illinois county, according to C. M. Linsley of the University of Illinois. He states that 43,000 tons of limestone have been hauled and spread by farmers of this county.

"Every $2 invested in a ton of limestone for acid soil will return $15 or more in higher crop yields," said Linsley. "Farmers who can't spend $1 in order to make $7.50 are the only ones entitled to say that they can't afford to buy limestone to sweeten their acid soils.

"If some oil stock salesman would approach these farmers who say that they cannot afford to buy limestone and offer them stock in an oil well which was guaranteed to return $15 for every $2 invested, most of them would manage to get together at least $100."

Serum Directors Meet Buy Supplies for '31

DIRECTORS of the Illinois Farm Bureau Serum Association met in Chicago recently to consider bids on more than 30,000,000 c.c. of serum and virus for immunizing hogs against cholera.

Farmers in 72 counties have pooled their buying power in purchasing the largest quantity of serum ever ordered at one time. Radio advertising it is thought has been helpful in reminding hog growers of the need for protecting their herds. A larger sale of serum and virus than heretofore is expected in 1931.

Only two of the 72 co-operating counties specified blood serum. Nearly all have adopted the clear concentrated serum.

The prices obtained from the various companies were the lowest on record. The Anchor Serum Co. of St. Joe, Mo., and the Globe Laboratories, Ft. Worth, Tex., both high grade companies producing their immunizing materials in sanitary laboratories under government supervision, shared the bulk of the business.

The advantages gained by purchasing serum and virus co-operatively are first the substantial savings in cost, and secondly the assurance of having on hand at all times an ample supply of materials.

DAIRY Marketing

THE McLean County Milk Producers' Association announces that the new base-rating plan effective for November, December, January and February provides for a price of $2.45 per 100 pounds of 4 per cent milk for all supplies delivered under the base amounts, f. o. b. Bloomington. With association dues and trucking costs deducted, this means a net of $2.10 to the producers. This price covers all milk sold to the wholesale or retail trade.

Surplus milk used for ice cream and other dairy products, except butter, will be valued according to its butterfat content, according to the following formula: 92 score Chicago butter market price plus 5 cents for each pound of butterfat, plus 30 cents per 100 pounds of whole milk delivered.

For surplus milk used in butter making, the price is computed on the base of Chicago 92 score butter market for butterfat content plus 30 cents per 100 pounds for the whole milk.

Thus, the net price paid each producer depends upon the base amount delivered and the percentage of his total used in making butter or manufactured products.

Each member's base amounts to 30 per cent of the average amount delivered during August, September, October and November of 1929. That base rating is to apply throughout the balance of 1930. A new base will go into effect January 1, applying the average figures for the same months this year.

This plan operates very much like the equalization fee plan advocated in the McNary-Haugen bill in that the producer is penalized for surplus production.

Livestock Marketing

The Chicago Producers handle one out of every five loads of live stock shipped to Chicago by co-operative shipping associations.

For the first 10 months of 1930 the Chicago Producers received 7,115 co-operative shipments, which represented 20.1% of the total co-operative loads coming to the market. Illinois associations were the largest contributors; Iowa second.

The annual meeting of the Indianapolis Producers' Commission Ass'n. will be held Dec. 30, 10:30 A. M., Severin Hotel, Indianapolis. The Indianapolis Producers continues to handle around one-third of all live stock received at that market, 90 per cent of which comes from co-operative shipping associations.

Fred Gumm, manager of the Paris (Edgar Co.) Shipping Association, against keen competition, shows a gain in shipments to the Indianapolis Producers over November a year ago. During the month of November he shipped 15 cars, compared with 14 a year ago.

Mgr. Frank Kettering, Vermilion County Live Stock Marketing Association, Danville, consigned 18 decks to the Indianapolis Producers during November.

DURING the first nine months of 1930 Adams county led all other Illinois counties in co-operative shipments of live stock to Producer agencies. Adams shipped 634 carloads, Fulton 550, Henry 555, DeKalb 477, Macoupin 428, Knox 413, LaSalle 410, McLean 384, and Peoria 396.

The bulk of the Illinois co-operative shipments went to the Producers at Chicago, St. Louis, Peoria and Indianapolis. A larger number than ever before—144 carloads—went to the Buffalo Producers.

Total shipments to Producer agencies for the nine months' period were 16,177 carloads. Chicago led with 6,732 carloads, St. Louis was next with 4,993, Peoria third with 2,128, and Indianapolis 2,104.

Live stock receipts at all the principal markets were lower this year than last, hence shipments to the Producers fell off to some extent compared with the same period in 1929.

During the month of November Carl Smith of the Champaign County Live Stock Marketing Association shipped 10 decks to the Producers at Indianapolis.

The following Illinois managers show a gain over November last year: C. M. Weller, Tuscola, with 10 cars; W. J. Richey, Palestine; W. F. Kurtz, Tabor; Hans Heit, Garrett; Harry Gosnell, Rose Hill; Henry Volle, Mt. Pulaski; Fred M. Stoll, Beason; Carl Shasteen, Sullivan; W. E. Leischner, DeLand; H. H. Richards, Parkersburg; O. C. Fisher, Windsor; D. E. Elliott, Shelbyville.

Illinois cattle feeders consigning to the Producers at Indianapolis recently were Frank Goodwin, Palestine; W. L. Dunston, Marion, and John Conlin, Arthur.

"THE ability of the live stock producer to market his own product economically is shown by the fact that the members of the St. Louis Producers' Commission Association made a saving in reduced commissions and cash refunds of approximately $129,000 last year alone," said President J. R. Fulkerson in a recent statement.

Commenting upon the recent boycott here, Fulkerson said: "In the last analysis, it is not for the United States Department of Agriculture nor the courts to decide, but for the American live stock producer to say whether he prefers to select one from the many competent, self-appointed commission firms doing business on this market to sell his live stock for him, or whether he prefers to market his product through his own marketing agency. Let all selling agencies agree to abide by this decision and permit him to sell any way he chooses on an open and unrestricted market."

Feeding Trials Show Value Soybean Oil Meal

A Superior Feed for Cows, Pigs, Sheep and Poultry.

THE superior feeding qualities of soybean oil meal are discussed in a series of experiments brought to light recently by J. H. Lloyd of the Soybean Marketing Association.

Henry and Morrison, authorities on the feeding of farm animals, state that the total digestible nutrients in 100 pounds of soybean oil meal is 84.2 pounds compared to 78.2 pounds in cotton seed meal and 77.9 pounds in linseed oil meal. Soybean oil meal is very palatable and can be safely fed in quantities to all classes of live stock.

With guaranteed 40 per cent protein soybean oil meal at $45 a ton, a pound of protein costs the feeder 5.625 cents, while at the same price per ton a pound of protein in 34 per cent protein linseed oil meal costs 6.617 cents. On this basis linseed oil meal protein is 17.6 per cent higher in price than protein in soybean oil meal.

For Dairy Cows

Soybean oil meal is especially valuable in feeding dairy cows. One hundred pounds of soybean oil meal mixed with 500 pounds of corn and cob meal, and 300 pounds of ground oats makes a very good grain ration when fed with legume hay. Another good ration is:

Soybean oil meal	100	pounds
Wheat bran	100	"
Corn-and-cob meal	600	"
Ground oats	300	"

When both silage and legume hay are fed the following mixtures are recommended:

1.	Soybean oil meal	200	pounds
	Wheat bran	100	"
	Ground corn or barley	600	"
	Ground oats	300	"
2.	Soybean oil	100	"
	Cottonseed meal	100	"
	Ground corn or barley	600	"
	Ground oats	300	"

Wheat may be substituted for corn or barley in the above rations.

The Ohio Experiment Station reports a 2 per cent advantage over linseed oil meal for milk production. The Tennessee Station secured an increase of 5 per cent in milk production and butterfat content when cows were fed soybean oil meal as compared with cottonseed meal.

For Beef Calves

Beef calves fed at the Illinois Station with soybean oil meal made somewhat faster and slightly more economical gains than those receiving cottonseed meal. The cost per 100 cwt. of beef was $7.69 for the soybean oil meal lot as compared with $8.32 for the calves fed cottonseed meal.

Soybean oil meal has a high value for feeding hogs. The soybean oil meal has approximately 80 per cent of the value of tankage, according to the University of Illinois. In other words, a mixture of 90 pounds of corn and 10 pounds of tankage would contain approximately the same amount of protein as a mixture of 88 pounds of corn and 12 pounds of soybean oil meal.

The Illinois Experiment Station recommends half a pound of soybean meal daily for pigs. Brood sows should be fed about the same amount during the gestation period. These figures must be cut in half for full-fed pigs running on pasture.

For Poultry

At the North Carolina Station it was found that a mixture of equal parts of soybean oil meal, wheat shorts and cracked corn, moistened with sweet milk was a good ration for little chicks.

Pacific Coast poultrymen have used soybean oil meal for several years and consider it a most excellent feed for poultry and egg production.

Kennard and White found that soybean oil meal, with suitable minerals added, gave results in egg production comparable with a standard meat scrap ration.

Similarly soybean meal and soybean hay are recommended for feeding sheep. The Illinois Experiment Station found that soybean oil meal as a supplement to shelled corn and soybean straw resulted in somewhat more rapid gains, and in the use of slightly less feed for 100 pounds of gain than did linseed oil meal.

Lambs getting soybean oil meal had good appetites at all times and were never off feed. Soybeans in this form seemed to be more palatable than either the whole or ground soybeans. Lambs fed soybean oil meal were more desirably finished than those fed the whole or ground beans.

Complete instructions for feeding soybean oil meal, together with rations for all classes of live stock can be had by writing the Soybean Marketing Association, 608 S. Dearborn St., Chicago.

Many Dealers

Following are a few of the many Illinois dealers handling soybean oil meal. Call your County Farm Bureau office for the names of dealers in your locality.

E. E. Johnson, Lanark.
Graham Bros., Freeport.
Arthur Deets, Chadwick.
Milledgeville Farmers Elev. Co., Milledgeville.
F. H. Colehouer, Mt. Carroll.

Soybean Marketing Ass'n. Financial Plan

Authorizes Issue of $100,000 of 6 Per Cent Preferred Stock

THE Soybean Marketing Association recently launched a campaign to sell capital stock for financing future operations of the co-operative in effectively merchandising the soybean crop produced by more than 2,900 members.

The new financing plan calls for capitalization of $100,000. There has been authorized the sale of 2,000 shares of 6 per cent preferred "A" cumulative stock of $50 par value. As we go to press reports show that 87 shares already have been purchased by soybean growers. In addition 20 shares have been bought by Farm Bureaus and the Illinois Agricultural Association.

A series of county meetings is being arranged by the various local advisory councils where soybean growers will learn the details of the financing plan.

At a meeting in Decatur on November 26 the need for enlarging the outlet for soybean products and for funds to market the crop orderly was discussed at length. Up to date the association has been operating on funds borrowed from the Intermediate Credit Bank and the Federal Farm Board.

County meetings in the soybean growing area are to be arranged as soon after December 17 as possible. The soybean advisory counsels are to have charge of local solicitation. J. H. Lloyd, manager of the association, will attend most of these meetings and outline plans for the development of the Soybean Marketing Association on a broader basis, looking toward joining with growers in other states.

Elevator Co-Operation Could Aid Corn Prices

Donald Kirkpatrick Speaks on "Marketing" at Logan Co. Annual Meeting.

THE possibilities for stabilizing corn prices at a profitable level through the co-operation of farmers' elevators in Illinois, Iowa and Nebraska were outlined by Donald Kirkpatrick, legal counsel for the Illinois Agricultural Association at the Logan County Farm Bureau annual meeting on Nov. 25.

The surplus problem handicapping wheat producers does not apply to coarse grains, according to Kirkpatrick. It would not even require the full co-operation of all the elevators in the 80 corn belt counties to obtain a successful degree of control over corn prices, he said. Farmers' elevators have raised the price of corn locally from 2 to 4 cents a bushel, but they have not yet co-operated fully to establish a central selling agency necessary to exert an influence in the terminal markets. Not until the Farmers' National Grain Corporation was formed was an opportunity offered to influence prices in the terminals.

Mr. Kirkpatrick

Corn Belt Co-Operation

Kirkpatrick asserted that even 250 elevators in Illinois, 250 more in Iowa, and 100 in the corn belt counties of Nebraska could, if they would, organize their sales power in the terminals and influence the price situation. He urged corn growers to obtain that control through co-operation, whether or not wheat producers are able to cope with their greater surplus problem.

The speaker saw little hope for American farmers in the wheat situation so long as the market is on an export basis. He stated that the government might hold American prices higher than world prices temporarily, but it could not do so permanently unless production was lowered to fit domestic demands. Some control over corn production, likewise, would be needed, intimated the speaker, if the price is to be stabilized at a profitable level.

Live Stock Marketing

The speaker touched on the progress being made on live stock and produce marketing. The formation of county live stock marketing associations, he said, is growing because farmers see the need for gaining control of their product locally to compete with the modern trend in direct shipments of stock from country points to packers. He saw no objection to direct marketing, providing the farmer's bargaining power in the sale of his live stock is safeguarded.

The old officers of the Farm Bureau were re-elected.

The Logan County Farm Supply Company and the Logan Produce Association declared patronage dividends, the oil company in addition placing $12,000 in its surplus fund.

President Floyd Wendell, John Crane and Louis N. Baker were the delegates chosen to represent Logan county at the annual meeting of the Illinois Agricultural Association.

Grain Marketing

THE Grain Stabilization Corp. made history during recent weeks when it held the price of wheat on the Chicago market at 73 cents while wheat of the same grade at Winnipeg sold for 18 cents less per bushel. Newspapers reporting this unusual situation said under date of November 19:

"The federal government, yesterday, rode through one of the worst debacles in the history of declining grain prices on world markets, holding the whip hand in maintaining wheat prices on the Chicago Board of Trade.

"Winnipeg and Liverpool wheat prices went into tailspin and other grain values crashed in foreign markets, while Chicago traders watched the ticker tape in wonder as December wheat held its stabilized level of 73 cents. This result was credited to persistent but not heavy buying by the Federal Farm Board's stabilization corporation.

"In contrast, wheat in Winnipeg dropped 8 cents a bushel, 18 cents less than the same grade in Chicago. And Liverpool's prices were the lowest in 36 years."

One newspaper which had been hostile to the Farmers' National Grain Corporation said: "Veteran traders who for over a year have been bitter toward an intruding federal body, suddenly changed front yesterday to declare they believed the federal support of Chicago's markets had averted a panic."

Success of the Farm Board plan "will be a tremendous factor in lifting the United States and the world out of its present economic slough of depression," B. W. Marx of Clement Curtis & Co., well-known Chicago brokers, was quoted as saying. Commenting on purchases of wheat by the Grain Stabilization Corporation, Mr. Marx said: "It is astounding that the Farm Board action should be so bitterly criticized when it ought to be apparent to every thinking person that a terrific emergency exists. The Farm Board should be greeted as a saving force by every business man in the country and in the entire world, or at least that part of the world that is in sympathy with our present methods of doing business and forms of government outside of Soviet Russia . . . The Farm Board is waging war, perhaps far more serious than the one 12 years back, when we in our country subscribed about eight billions of dollars to 'make the world safe for democracy.'"

The Chicago Daily News said in part:

"The (Farm) Board has had to grope its way along uncharted courses. It has had to solve baffling problems, deal with extraordinary situations and apply business principles in novel and untried ways. It has been attacked by farmers for sins of omission, actual or alleged, and by grain men and chambers of commerce for sins of commission. But clearly in all its measures, wise and unwise, *it has sought to promote the welfare of the basic national industry, agriculture.*

"The board has just re-entered the wheat market, after resisting, for months, demands of spokesmen for the farmers that it do so. For it feels that at this time its direct aid in supporting the price of wheat is imperative and not unsafe. Circumstances, in short, alter cases. What was inadvisable in August may be expedient in November.

"It has bought wheat in order to prevent what it considers further wholly unwarranted declines in price and the spread of alarmist views which the future, it feels, will refute."

Evidence that our wheat surplus is being reduced at a rapid rate, is growing. Under date of December 2 the Mid-West Grain Corporation said in its market letter: "We have exported more wheat to date than the same period last year. And last but not least, the final figures on feeding consumption of wheat will undoubtedly show a tremendous amount which cannot but help have its effect.

"Corn and oats occupy a strong position assisted by stabilized wheat prices. Receipts of corn at terminals are very light. There is a considerable amount of corn that usually goes to terminals being shipped between country points direct. This will go into consumption on the farm since live stock pays good dividends on corn fed at these prices."

Local Co-Ops. Fail in Co-Operation—Jewett

Chicago Banker Discusses Two-Price System Similar to Base and Surplus Milk Plan, at Bloomington Forum.

WE have thousands of small co-operative marketing units scattered over the country, the majority of which have been successful in the communities they serve. They have done a good local job. They have improved the local situation and have made their members some money. But as yet the majority of these co-operative units have not fully learned the principle of co-operation. At least their management has not applied that principle. They have failed in one prime essential. They have failed to co-operate with each other, George C. Jewett, Chicago banker, said recently in an address before the Illinois open forum at Bloomington.

"The same principle of co-operation which they taught the individual farmer in organizing local units should now be offered in organizing district and national units," he said. "We fall short of the goal when we stop with local organizations and turn them loose to broadcast our farm commodities in competition with each other.

Geo. C. Jewett

An Insidious Practice

"Local units possess but little in the way of bargaining power. Many of them have become more or less financially involved and the insidious practice of borrowing from those who buy their products is quite generally in use. It does not take an economist nor a marketing specialist to readily appreciate that such a practice weakens the ability of the local co-operative to make a good deal for its products.

"Then again there are too many co-operative men talking in terms of commissions and in terms of quarter or half cents per bushel. They are dickering in penny units instead of more substantial units. They fuss around among commission men to see which one will pay one-quarter or one-half cent more on a dollar in value. They think they are accomplishing big things if they handle grain at a fraction less than some dealer has handled it. They think they are gaining material things if they have a few dollars left at the end of the year to pay a patronage dividend.

"I do not say that all of these things are unimportant. They are important and should be accomplished for the benefits they bring to farmers. But nevertheless the co-operative leader who has his eyes cast on such gains and fails to look higher is not living up to the possibilities of his leadership. The thing the co-operatives must do is to bind themselves together in commodity groups for the purpose of eliminating competition among themselves and for the purpose of stabilizing the price of their commodity at a proper level. To do this, in my judgment, is wholly possible."

Need Bargaining Power

Using wheat as an illustration, Jewett outlined a plan whereby the crop would move to the local elevator, to the district regional, and to the national co-operative under the contract plan. "I consider it tommyrot for farmers' elevators to talk about their independent way. If their thought in this respect is sound then it is just as logical for the farmers to throw aside all co-operatives and depend on their own independent ability to deal with private concerns. It is contrary to the co-operative principle and it is contrary to sound co-operative procedure; it eliminates orderly distribution; it eliminates and takes away the bargaining power which must be maintained. It makes the market a buyers' market instead of a sellers' market; it makes the farmer and his commodity subject to all kinds of speculation; it creates gamblers in the commodity, and gambling pools for the purpose of manipulating the price of the commodity. It works in the ultimate end to the disadvantage of the producer and without any corresponding advantage to the consumer.

Should Be Federated

"The elevators of Illinois and of all other states should be federated together as co-operative units operating in a co-operative way as outlined above. It is up to the farmers to see that this is done. Many who have talked independence do not possess it. It is regrettable that many elevator managers have never cast their eyes above their local situation. Most of these men are honest in their convictions, but they have been schooled under the wrong teachers. Others are selfish in their attitude because they think any change to their system would work to their personal detriment. The men now engaged as managers of co-operatives are essential to any program but they must be converted to higher co-operation, to look beyond their local territory for the greater success so sadly needed."

Commenting upon the surplus situation, the speaker said in his opinion it would never be entirely eliminated. He favors creating a two-price situation: one price for the grain sold at home, another price for that surplus portion sent abroad. He advocated the formation of a surplus pool and delivering that surplus to the Farmers' National Grain Corporation through the local and regional channels. The surplus can be set aside, he said, to be stored, ground into feed, or exported. It would not be difficult to secure the world price plus our tariff for at least 80 per cent of our present wheat production.

Jewett admitted that this would be a gigantic task involving the co-operation of the majority of the producers of the commodity, but that leaders in the movement should approach the plan with the determination to bring about the necessary accomplishments.

10 "Master Farmers" Farm Bureau Members

OF the ten "Master Farmers" of Illinois honored by Prairie Farmer on the night of December 1 all are Farm Bureau members, most of them prominently identified with the activities of their county organizations.

The 10 men to receive the gold medal this year follow:

A. G. Beckman, Adams County.
W. F. Black, Bureau County.
E. G. Britton, Pulaski County.
Talmadge Defrees, Bond County.
John B. Hunt, Greene County.
Fred J. Johnson, Whiteside County.
L. L. Lehman, Sangamon County.
Herbert Malsbury, Macoupin County.
Herman Moews, Putnam County.
C. C. Stier, Menard County.

The 1930 class was the sixth since the Master Farmer plan was initiated. During the six years this recognition has been bestowed upon 91 representative farmers of Illinois, all of whom, with two or three exceptions, are or were Farm Bureau members. Several have died since receiving the award.

As in past years the men receiving the medal from Publisher Burridge D. Butler, gave their wives and families credit for much of their success, revealing that farming is an enterprise that promotes family solidarity.

Editor C. V. Gregory presided as toastmaster, Mr. Butler presented the medals, and Albert Hayes, an officer in the Peoria County Farm Bureau and president of the State Master Farmer Club, welcomed the new class. S. H. Thompson, president of the American Farm Bureau Federation; and Dr. W. L. Burlison of the University of Illinois served as judges.

Life Insurance

By L. A. Williams

NO outstanding accomplishment has ever been made without imitators attempting to hitch on and be dragged to success with the ascendancy of the original. Mediocre accomplishment attracts no atention and is the object of no attack. It is always the outstanding success that sets a thousand jealous tongues wagging. Every great man in art, in politics, or in any other field, knows the sound of the heckler's voice who calls him "fake" and decries his accomplishment. It is the penalty of great success and outstanding accomplishment. It has come to be an identification mark of superior work and so every great institution attaining "impossible" heights in its field, expects to be condemned and criticized by the petty and weak.

The maligning accusations, derogatory insinuations, and deliberate planting of suspicion by those who are petty and jealous, make a dark background against which supremacy of an institution shines in its silvery success more brilliantly, emphasizing value to the discerning mind. Time and sane consideration tests true worth and finds Abe Lincoln great, and the once belittled accomplishments of a Morse and Fulton acclaimed.

L. A. Williams

The outstanding accomplishment of our company in the legal reserve field of protection for the human family has a sincerity of purpose which gives it character to withstand the onslaught of the jealous and prejudiced, and sanity to contemplate and appreciate this natural reception of great accomplishment which is as old as the world itself.

May we who compose the Country Life Insurance Company act with the dignity which becomes an institution elected by accomplishment to a superior position of service. We can be tolerant if we are certain of our position. We need not defend if we are right. Care is imperative because faults in our work are plainly visible and even magnified under this penetrating X-ray of critical minds which are focused upon us the more easily because of our supremacy. "Uneasy is the head that wears the crown"—means that the footsteps of the elect are more readily objects and targets of the critic.

Our still greater future depends upon still greater service and still greater care in our methods, for great as have been our deeds, we have before us a long road of service to millions who are still to hear our story and measure our worth.

Groundless attacks and criticism will only help us forward. Our progress is doubly assured by the never-failing criticism of the unfair competitor which has come to be a part of the measure of greatness. Let there be no discreditable act of ours to add difficulties to the path.

EFFINGHAM COUNTY OFFICIALS BAT 100 PER CENT

The Effingham County Farm Bureau Executive Committee, farm adviser, general agent, and office secretary are all policyholders in Country Life Insurance Co. "The first (executive committee) in the state to have 100% of its members carrying a policy in Country Life," writes Adviser Geo. Iftner.

LEFT TO RIGHT, SEATED: H. W. Homan, Henry Repking, H. O. Henry, general agent; Bliss E. Loy, president; Eldred Richars, chairman insurance committee; G. H. Iftner.

STANDING: Gertrude Brown, office secretary; B. J. Schumacher, Jos. Bierman, Harry Ebbert, secretary-treasurer; Geo. L. Fulte, Geo. I. Danks, vice-pres.

Iroquois County Has Opening Day

The Iroquois County Live Stock Marketing Association got under way Dec. 15 when its "grand opening" was held at the Sheldon stock yards. R. C. Boatman, who for several years has served successfully as manager of the Sheldon Shipping Association, has been employed to manage the new county-wide co-operative.

In a letter announcing the opening of the new organization, President R. F. Karr states that all live stock received will be graded, part sent to nearby terminals, and part direct to eastern markets. The Big Four R. R. has agreed to provide facilities for handling a large volume of stock.

Utility Problems Coming to Head

A decision as to whether or not a pipe line used for transporting oil, gas, gasoline or other products is a public utility is expected to be forthcoming in the near future from the Illinois Commerce Commission. Briefs have been filed by the I. A. A. with the Commission relating to proper jurisdiction in the case of the Panhandle Illinois Pipe Line Co. which proposes to build a line through central Illinois from the Mississippi east to the Indiana line. Farm Bureaus in some 16 counties are interested in the case and have joined the Illinois Agricultural Association in representing the interests of their landowner members.

Landowners in Woodford, Tazewell and adjoining counties represented by local committees set up under the direction of the County Farm Bureaus are still negotiating with officials of the Superpower Company over compensation for easements wanted by the utility company in building a high power line from Powerton to Chicago. L. J. Quasey attended a landowners' meeting in Eureka recently where questions pertinent to this case were discussed.

The I. A. A. and Farm Bureaus are hopeful that a satisfactory settlement can be negotiated without resort to the courts, but if necessary the landowners will be ready to defend their rights.

Local Co-Ops. Fail in Co-Operation—Jewett

Chicago Banker Discusses Two-Price System Similar to Base and Surplus Milk Plan, at Bloomington Forum.

WE have thousands of small co-operative marketing units scattered over the country, the majority of which have been successful in the communities they serve. They have done a good local job. They have improved the local situation and have made their members some money. But as yet the majority of these co-operative units have not fully learned the principle of co-operation. At least their management has not applied that principle. They have failed in one prime essential. They have failed to co-operate with each other, George C. Jewett, Chicago banker, said recently in an address before the Illinois open forum at Bloomington.

"The same principle of co-operation which they taught the individual farmer in organizing local units should now be offered in organizing district and national units," he said. "We fall short of the goal when we stop with local organizations and turn them loose to broadcast our farm commodities in competition with each other.

Geo. C. Jewett

An Insidious Practice

"Local units possess but little in the way of bargaining power. Many of them have become more or less financially involved and the insidious practice of borrowing from those who buy their products is quite generally in use. It does not take an economist nor a marketing specialist to readily appreciate that such a practice weakens the ability of the local co-operative to make a good deal for its products.

"Then again there are too many co-operative men talking in terms of commissions and in terms of quarter or half cents per bushel. They are dickering in penny units instead of more substantial units. They fuss around among commission men to see which one will pay one-quarter or one-half cent more on a dollar in value. They think they are accomplishing big things if they handle grain at a fraction less than some dealer has handled it. They think they are gaining material things if they have a few dollars left at the end of the year to pay a patronage dividend.

"I do not say that all of these things are unimportant. They are important and should be accomplished for the benefits they bring to farmers. But nevertheless the co-operative leader who has his eyes cast on such gains and fails to look higher is not living up to the possibilities of his leadership. The thing the co-operatives must do is to bind themselves together in commodity groups for the purpose of eliminating competition among themselves and for the purpose of stabilizing the price of their commodity at a proper level. To do this, in my judgment, is wholly possible."

Need Bargaining Power

Using wheat as an illustration, Jewett outlined a plan whereby the crop would move to the local elevator, to the district regional, and to the national co-operative under the contract plan. "I consider it tommyrot for farmers' elevators to talk about their independent way. If their thought in this respect is sound then it is just as logical for the farmers to throw aside all co-operatives and depend on their own independent ability to deal with private concerns. It is contrary to the co-operative principle and it is contrary to sound co-operative procedure; it eliminates orderly distribution; it eliminates and takes away the bargaining power which must be maintained. It makes the market a buyers' market instead of a sellers' market; it makes the farmer and his commodity subject to all kinds of speculation; it creates gamblers in the commodity, and gambling pools for the purpose of manipulating the price of the commodity. It works in the ultimate end to the disadvantage of the producer and without any corresponding advantage to the consumer.

Should Be Federated

"The elevators of Illinois and of all other states should be federated together as co-operative units operating in a co-operative way as outlined above. It is up to the farmers to see that this is done. Many who have talked independence do not possess it. It is regrettable that many elevator managers have never cast their eyes above their local situation. Most of these men are honest in their convictions, but they have been schooled under the wrong teachers. Others are selfish in their attitude because they think any change to their system would work to their personal detriment. The men now engaged as managers of co-operatives are essential to any program but they must be converted to higher co-operation, to look beyond their local territory for the greater success so sadly needed."

Commenting upon the surplus situation, the speaker said in his opinion it would never be entirely eliminated. He favors creating a two-price situation: one price for the grain sold at home, another price for that surplus portion sent abroad. He advocated the formation of a surplus pool and delivering that surplus to the Farmers' National Grain Corporation through the local and regional channels. The surplus can be set aside, he said, to be stored, ground into feed, or exported. It would not be difficult to secure the world price plus our tariff for at least 80 per cent of our present wheat production.

Jewett admitted that this would be a gigantic task involving the co-operation of the majority of the producers of the commodity, but that leaders in the movement should approach the plan with the determination to bring about the necessary accomplishments.

10 "Master Farmers" Farm Bureau Members

OF the ten "Master Farmers" of Illinois honored by Prairie Farmer on the night of December 1 all are Farm Bureau members, most of them prominently identified with the activities of their county organizations.

The 10 men to receive the gold medal this year follow:

A. G. Beckman, Adams County.
W. F. Black, Bureau County.
E. G. Britton, Pulaski County.
Talmadge Defrees, Bond County.
John B. Hunt, Greene County.
Fred J. Johnson, Whiteside County.
L. L. Lehman, Sangamon County.
Herbert Malsbury, Macoupin County.
Herman Moews, Putnam County.
C. C. Stier, Menard County.

The 1930 class was the sixth since the Master Farmer plan was initiated. During the six years this recognition has been bestowed upon 91 representative farmers of Illinois, all of whom, with two or three exceptions, are or were Farm Bureau members. Several have died since receiving the award.

As in past years the men receiving the medal from Publisher Burridge D. Butler, gave their wives and families credit for much of their success, revealing that farming is an enterprise that promotes family solidarity.

Editor C. V. Gregory presided as toastmaster, Mr. Butler presented the medals, and Albert Hayes, an officer in the Peoria County Farm Bureau and president of the State Master Farmer Club, welcomed the new class. S. H. Thompson, president of the American Farm Bureau Federation; and Dr. W. L. Burlison of the University of Illinois served as judges.

Life Insurance

By L. A. Williams

NO outstanding accomplishment has ever been made without imitators attempting to hitch on and be dragged to success with the ascendancy of the original. Mediocre accomplishment attracts no atention and is the object of no attaek. It is always the outstanding success that sets a thousand jealous tongues wagging. Every great man in art, in politics, or in any other field, knows the sound of the heckler's voice who calls him "fake" and decries his accomplishment. It is the penalty of great success and outstanding accomplishment. It has come to be an identification mark of superior work and so every great institution attaining "impossible" heights in its field, expects to be condemned and criticized by the petty and weak.

The maligning accusations, derogatory insinuations, and deliberate planting of suspicion by those who are petty and jealous, make a dark background against which supremacy of an institution shines in its silvery success more brilliantly, emphasizing value to the discerning mind. Time and sane consideration tests true worth and finds Abe Lincoln great, and the once belittled accomplishments of a Morse and Fulton acclaimed.

L. A. Williams

The outstanding accomplishment of our company in the legal reserve field of protection for the human family has a sincerity of purpose which gives it character to withstand the onslaught of the jealous and prejudiced, and sanity to contemplate and appreciate this natural reception of great accomplishment which is as old as the world itself.

May we who compose the Country Life Insurance Company act with the dignity which becomes an institution elected by accomplishment to a superior position of service. We can be tolerant if we are certain of our position. We need not defend if we are right. Care is imperative because faults in our work are plainly visible and even magnified under this penetrating X-ray of critical minds which are focused upon us the more easily because of our supremacy. "Uneasy is the head that wears the crown"—means that the footsteps of the elect are more readily objects and targets of the critic.

Our still greater future depends upon still greater service and still greater care in our methods, for great as have been our deeds, we have before us a long road of service to millions who are still to hear our story and measure our worth.

Groundless attacks and criticism will only help us forward. Our progress is doubly assured by the never-failing criticism of the unfair competitor which has come to be a part of the measure of greatness. Let there be no discreditable act of ours to add difficulties to the path.

The I. A. A. and Farm Bureaus are hopeful that a satisfactory settlement can be negotiated without resort to the courts, but if necessary the landowners will be ready to defend their rights.

KEEPING WELL

By Dr. John E. Boland

ONLY those who have lost health or witnessed the calamity of lost health have any appreciation of its worth. We never miss the water 'till the well runs dry. You, in your bloom of health, are not conscious of the value of pulsating, vibrating, vigorous health. You think it is just you, and perhaps you are a bit vain, even. But to be grateful for it, or careful and conservative in maintaining it, has never occurred to you. "Me? I'm strong as a horse," you say. As though you always would be strong.

Perhaps none in your family has ever contracted the dangerous contagious disease, *tuberculosis*. You may never have seen great powerful men wither away and fade out into shadows, all from the reception given an insidious germ.

Maybe you have never seen great strong men like yourself pull out a rusty nail from the flesh, shake off the dripping blood, and go on with their work, only to pay for it with *blood poisoning* within 48 hours.

Maybe you have never seen whole families snuffed out with *pneumonia* because of broken resistance—living in houses with windows shut tight all winter.

It is very possible you have not suffered the agonizing pains that accompany *ulcers* of the stomach, which follow the careless diet, and indeed the heartiest eaters.

The growing and ever increasing death rate from *cancer* of the stomach points to improper eating of a careless and indifferent people. The amazing thing of it all is that no information is being taken seriously, and the cancer "dagger" hangs over us with its ever thinning thread, more ominous today than ever. You may not be bothered about little sores, ulcers or bruises, but remember, a cancer cannot grow in the absence of chronic irritation.

You may treat stomach-ache with indifference, and say it will teach the children not to eat too much. But one night you may rush to a hospital with your little ones, too late. A ruptured *appendix* could have been avoided if earlier and proper diagnosis of the "belly-ache" had been made.

Numerous diseases follow congestion. Proper elimination and eating would avoid the majority of diseases of the kidneys, liver, intestines, stomach and gall bladder. And yet, more attention is given to balanced rations for cattle than is given to the diet of the American family today. The loving mother ignorantly feeds her darlings to death. I have visited in families where some form of meat and potatoes are eaten three times a day. It takes the constitution of more than man to stand up under that diet. Liver and kidneys are going to balk. Stomachs are going to revolt.

I know of no place where good health should be more easily available than on the farm. And yet, I believe there is greater abuse of the rules of health on our farms than there is in the largest cities. I speak from observation and experience, for I was born and raised on the farm.

NATIONAL HEALTH CHAMPIONS

Marion E. Syndergaard, 15-year-old girl of Grundy County, Iowa, and William R. Bodenhamer, 20, of Johnson County, Mo., were chosen as the 1930 national health champions at the 9th annual boys' and girls' 4-H Club Congress in Chicago, Dec. 2.

Miss Syndergaard scored 99.7, the highest ever made in similar contests, and Bodenhamer scored 98.7, after careful examination by a corps of nurses, dentists and doctors. There were twenty girls and 15 boys, all state champions, entered in contest.

Both champions declared they drank a quart of milk or more each day and ate plenty of good wholesome foods.

Does anyone in the country ever have a yearly physical examination at his own expense, just to see if everything is all right? No. He has his car overhauled, but the numerous physical faults in his body that might be taken in time and corrected are scarcely ever attended to.

"Your little girl is very thin, isn't she?" says a neighbor. "Yes," says mother, "she doesn't seem to do well, but I guess she'll come out all right." Underweight has a reason behind it. Malnutrition, improper assimilation, diseased colon, tuberculosis, diabetes, a hundred things can cause underweight. Why not take the child to a good doctor and have a thorough examination made. It may be an infected lung, which, taken in time, could be corrected or arrested. Hundreds never have urine tested until diabetes has become chronic. Annual or shorter period urine tests would avoid serious trouble.

There is no excuse for filth on farms, and yet it is a common sight to see farm yards improperly drained, and drinking water used untested for years, with seepage from barn yards contaminating it. Surely there are thousands of careful farmers, and sanitary farm houses, but appreciation of health is often lacking. I am concerned about the easily corrected wrongs of health that every farm home could take part in overcoming. To be ever watchful of clean bodies, of fresh air and good food is commendable, but this is not sufficient. Check up on physical condition, and let's study the great science of keeping healthy, of raising families, and of living together.

Thousands of people have never had their blood pressure taken. A blood pressure reading is as simple as taking a thermometer reading. It is a barometer of your physical condition. The first inkling of numerous dangerous ills are discovered by blood pressure readings. Learn more about yourself through such tests. (To be continued)

All Your Insurance at Mutual Rates

THE demons of fire, lightning, windstorm, tornado and hail that destroy farm property have no fear for the thousands who are protected against loss with Insurance At Cost in the FARMERS MUTUAL REINSURANCE COMPANY.

¶The FARMERS MUTUAL is your company. It was organized by the state association of farmers' mutual fire and windstorm companies and the I. A.
